0946. A - Implicit bias: Reflecting on whether assumptions may be affecting an assessment or referral decision. / Accessibility: Identifying and removing practical barriers to communication and participation. [Concept: Implicit bias and Accessibility]

0947. D - Social justice counseling: A counseling orientation that addresses individual wellbeing alongside inequitable systems and barriers. / Implicit bias: Automatic associations that can influence judgment and behavior without conscious intent. [Concept: Social justice counseling and Implicit bias]

0948. A - Social justice counseling [Concept: Social justice counseling]

0949. B - Oppression: Systematic, institutional, or interpersonal processes that restrict opportunities and dignity for groups. / Accessibility: Designing environments, communication, and services so people with varied abilities can participate. [Concept: Oppression and Accessibility]

0950. B - Social justice counseling: A counseling orientation that addresses individual wellbeing alongside inequitable systems and barriers. / Microaggression: A commonplace interaction or environmental message that communicates devaluation related to identity. [Concept: Social justice counseling and Microaggression]

0951. D - Microaggression [Concept: Microaggression]

0952. A - Social justice counseling [Concept: Social justice counseling]

0953. A - Equity: Providing different supports where needed to make participation meaningfully accessible. / Cultural safety: Inviting client feedback about whether care feels respectful and adapting in response. [Concept: Equity and Cultural safety]

0954. D - Accessibility: Designing environments, communication, and services so people with varied abilities can participate. / Cultural safety: A client-defined experience of care in which identity is respected and power imbalances are addressed. [Concept: Accessibility and Cultural safety]

0955. A - Social justice counseling: A counseling orientation that addresses individual wellbeing alongside inequitable systems and barriers. / Equality: Provision of the same treatment or resource to everyone, regardless of differing circumstances. [Concept: Social justice counseling and Equality]

0956. A - Power analysis: Examination of how authority, resources, and decision-making influence relationships and outcomes. / Microaggression: A commonplace interaction or environmental message that communicates devaluation related to identity. [Concept: Power analysis and Microaggression]

0957. C - Equality: Distinguishing identical provision from support tailored to unequal barriers. / Cultural safety: Inviting client feedback about whether care feels respectful and adapting in response. [Concept: Equality and Cultural safety]

0958. A - Implicit bias: Automatic associations that can influence judgment and behavior without conscious intent. / Cultural safety: A client-defined experience of care in which identity is respected and power imbalances are addressed. [Concept: Implicit bias and Cultural safety]

0959. C - Oppression: Recognizing patterns of exclusion rather than reducing a structural problem to an individual deficit. / Microaggression: Listening to the client's account of an identity-related slight and exploring its impact without minimizing it. [Concept: Oppression and Microaggression]

0960. B - Microaggression [Concept: Microaggression]

0961. A - Equity: Fair allocation of support that accounts for differing barriers and needs to enable meaningful opportunity. / Liberation psychology: An approach emphasizing critical awareness and action addressing social conditions that contribute to distress. [Concept: Equity and Liberation psychology]

0962. B - Oppression: Systematic, institutional, or interpersonal processes that restrict opportunities and dignity for groups. / Cultural safety: A client-defined experience of care in which identity is respected and power imbalances are addressed. [Concept: Oppression and Cultural safety]

0963. D - Equality [Concept: Equality]

0964. C - Equality [Concept: Equality]

0965. C - Oppression: Systematic, institutional, or interpersonal processes that restrict opportunities and dignity for groups. / Equity: Fair allocation of support that accounts for differing barriers and needs to enable meaningful opportunity. [Concept: Oppression and Equity]

0966. A - Social justice counseling: A counseling orientation that addresses individual wellbeing alongside inequitable systems and barriers. / Cultural safety: A client-defined experience of care in which identity is respected and power imbalances are addressed. [Concept: Social justice counseling and Cultural safety]

0967. B - Social justice counseling: A counseling orientation that addresses individual wellbeing alongside inequitable systems and barriers. / Liberation psychology: An approach emphasizing critical awareness and action addressing social conditions that contribute to distress. [Concept: Social justice counseling and Liberation psychology]

0968. A - Equity: Providing different supports where needed to make participation meaningfully accessible. / Accessibility: Identifying and removing practical barriers to communication and participation. [Concept: Equity and Accessibility]

0969. D - Equity: Fair allocation of support that accounts for differing barriers and needs to enable meaningful opportunity. / Equality: Provision of the same treatment or resource to everyone, regardless of differing circumstances. [Concept: Equity and Equality]

0970. B - Oppression [Concept: Oppression]

0971. D - Power analysis [Concept: Power analysis]

0972. B - Social justice counseling: Connecting a client's distress with relevant structural conditions without dismissing personal experience. / Accessibility: Identifying and removing practical barriers to communication and participation. [Concept: Social justice counseling and Accessibility]

0973. D - Microaggression [Concept: Microaggression]

0974. C - Equity: Providing different supports where needed to make participation meaningfully accessible. / Implicit bias: Reflecting on whether assumptions may be affecting an assessment or referral decision. [Concept: Equity and Implicit bias]

0975. C - Power analysis: Examination of how authority, resources, and decision-making influence relationships and outcomes. / Cultural safety: A client-defined experience of care in which identity is respected and power imbalances are addressed. [Concept: Power analysis and Cultural safety]

0976. B - Accessibility [Concept: Accessibility]

0977. B - Accessibility [Concept: Accessibility]

0978. A - Power analysis: Examination of how authority, resources, and decision-making influence relationships and outcomes. / Cultural safety: A client-defined experience of care in which identity is respected and power imbalances are addressed. [Concept: Power analysis and Cultural safety]

0979. C - Listening to the client's account of an identity-related slight and exploring its impact without minimizing it. [Concept: Microaggression]

0980. D - Power analysis [Concept: Power analysis]

0981. C - Equality: Provision of the same treatment or resource to everyone, regardless of differing circumstances. / Implicit bias: Automatic associations that can influence judgment and behavior without conscious intent. [Concept: Equality and Implicit bias]

0982. D - Power analysis [Concept: Power analysis]

0983. B - Equality: Provision of the same treatment or resource to everyone, regardless of differing circumstances. / Implicit bias: Automatic associations that can influence judgment and behavior without conscious intent. [Concept: Equality and Implicit bias]

0984. D - Microaggression: A commonplace interaction or environmental message that communicates devaluation related to identity. / Accessibility: Designing environments, communication, and services so people with varied abilities can participate. [Concept: Microaggression and Accessibility]

0014. D - Lifespan perspective [Concept: Lifespan perspective]

0015. A - Emerging adulthood [Concept: Emerging adulthood]

0016. C - Developmental task [Concept: Developmental task]

0017. C - Ageism [Concept: Ageism]

0018. D - Life review [Concept: Life review]

0019. A - Life review [Concept: Life review]

0020. A - Ageism: Checking whether age-based assumptions are limiting a client's choices or care. / Life transition: Supporting coping and identity adjustment during a change such as school transition or caregiving. [Concept: Ageism and Life transition]

0021. C - Cohort effect [Concept: Cohort effect]

0022. B - Cohort effect [Concept: Cohort effect]

0023. C - Cohort effect [Concept: Cohort effect]

0024. D - Inviting a client to reflect on meaningful experiences and how their interpretation has changed. [Concept: Life review]

0025. B - Lifespan perspective: A view of development as lifelong, multidimensional, multidirectional, and shaped by context and change. / Continuity and change: The joint consideration of stable patterns and meaningful transformation across a person's life. [Concept: Lifespan perspective and Continuity and change]

0026. B - Cumulative risk [Concept: Cumulative risk]

0027. D - Lifespan perspective: Considering gains and losses across physical, cognitive, and relational domains over time. / Emerging adulthood: Exploring a young adult's actual roles and context instead of assuming a standard transition timetable. [Concept: Lifespan perspective and Emerging adulthood]

0028. B - Emerging adulthood [Concept: Emerging adulthood]

0029. D - Continuity and change: The joint consideration of stable patterns and meaningful transformation across a person's life. / Cumulative risk: The increasing effect of exposure to multiple risks over time, often interacting with protective resources. [Concept: Continuity and change and Cumulative risk]

0030. D - Lifespan perspective: Considering gains and losses across physical, cognitive, and relational domains over time. / Emerging adulthood: Exploring a young adult's actual roles and context instead of assuming a standard transition timetable. [Concept: Lifespan perspective and Emerging adulthood]

0031. C - Developmental resilience [Concept: Developmental resilience]

0032. A - Checking whether age-based assumptions are limiting a client's choices or care. [Concept: Ageism]

0033. B - Lifespan perspective: Considering gains and losses across physical, cognitive, and relational domains over time. / Cohort effect: Considering whether a generational difference reflects distinct historical context rather than aging alone. [Concept: Lifespan perspective and Cohort effect]

0034. D - Developmental resilience [Concept: Developmental resilience]

0035. B - Developmental task [Concept: Developmental task]

0036. D - Life review [Concept: Life review]

0037. C - Identifying a current developmental challenge without treating it as a rigid age-based requirement. [Concept: Developmental task]

0038. D - Lifespan perspective: A view of development as lifelong, multidimensional, multidirectional, and shaped by context and change. / Life transition: A significant change in roles, relationships, health, or context that may require adaptation. [Concept: Lifespan perspective and Life transition]

0039. C - Life review: A guided reflection on life events, meaning, identity, and continuity, often used to support integration. / Cohort effect: Differences associated with shared historical experiences among people born or raised in a similar period. [Concept: Life review and Cohort effect]

0040. C - Cohort effect: Considering whether a generational difference reflects distinct historical context rather than aging alone. / Life transition: Supporting coping and identity adjustment during a change such as school transition or caregiving. [Concept: Cohort effect and Life transition]

0041. D - Developmental resilience [Concept: Developmental resilience]

0042. A - Life review: A guided reflection on life events, meaning, identity, and continuity, often used to support integration. / Life transition: A significant change in roles, relationships, health, or context that may require adaptation. [Concept: Life review and Life transition]

0043. A - Emerging adulthood: A culturally contingent period of transition with exploration and changing roles, not a universal fixed stage. / Ageism: Stereotypes, prejudice, or discrimination based on age. [Concept: Emerging adulthood and Ageism]

0044. D - Continuity and change: The joint consideration of stable patterns and meaningful transformation across a person's life. / Cumulative risk: The increasing effect of exposure to multiple risks over time, often interacting with protective resources. [Concept: Continuity and change and Cumulative risk]

0045. C - Continuity and change: The joint consideration of stable patterns and meaningful transformation across a person's life. / Life transition: A significant change in roles, relationships, health, or context that may require adaptation. [Concept: Continuity and change and Life transition]

0046. D - Exploring a young adult's actual roles and context instead of assuming a standard transition timetable. [Concept: Emerging adulthood]

0047. A - Developmental task: A context-sensitive challenge or capacity that becomes salient during a period of development. / Ageism: Stereotypes, prejudice, or discrimination based on age. [Concept: Developmental task and Ageism]

0048. D - Developmental resilience [Concept: Developmental resilience]

0049. D - Lifespan perspective [Concept: Lifespan perspective]

0050. D - Ageism [Concept: Ageism]

0051. D - A guided reflection on life events, meaning, identity, and continuity, often used to support integration. [Concept: Life review]

0052. C - Continuity and change [Concept: Continuity and change]

0053. A - Life transition [Concept: Life transition]

0054. B - Identifying both enduring strengths and recent developmental changes. [Concept: Continuity and change]

0055. D - Cohort effect: Differences associated with shared historical experiences among people born or raised in a similar period. / Continuity and change: The joint consideration of stable patterns and meaningful transformation across a person's life. [Concept: Cohort effect and Continuity and change]

0056. C - Cumulative risk: Assessing the combination and timing of stressors rather than counting each in isolation. / Developmental resilience: Identifying resources and relationships that have supported adaptation across developmental transitions. [Concept: Cumulative risk and Developmental resilience]

0057. A - Developmental task [Concept: Developmental task]

0058. C - Lifespan perspective: A view of development as lifelong, multidimensional, multidirectional, and shaped by context and change. / Cumulative risk: The increasing effect of exposure to multiple risks over time, often interacting with protective resources. [Concept: Lifespan perspective and Cumulative risk]

0059. C - Identifying a current developmental challenge without treating it as a rigid age-based requirement. [Concept: Developmental task]

0060. B - Stereotypes, prejudice, or discrimination based on age. [Concept: Ageism]

0061. C - Lifespan perspective [Concept: Lifespan perspective]

0062. A - Life transition: A significant change in roles, relationships, health, or context that may require adaptation. / Cumulative risk: The increasing effect of exposure to multiple risks over time, often interacting with protective resources. [Concept: Life transition and Cumulative risk]

0063. D - Lifespan perspective: Considering gains and losses across physical, cognitive, and relational domains over time. / Developmental task: Identifying a current developmental challenge without treating it as a rigid age-based requirement. [Concept: Lifespan perspective and Developmental task]

0157. D - Ageism: Checking whether age-based assumptions are limiting a client's choices or care. / Cumulative risk: Assessing the combination and timing of stressors rather than counting each in isolation. [Concept: Ageism and Cumulative risk]

0158. C - Lifespan perspective: A view of development as lifelong, multidimensional, multidirectional, and shaped by context and change. / Emerging adulthood: A culturally contingent period of transition with exploration and changing roles, not a universal fixed stage. [Concept: Lifespan perspective and Emerging adulthood]

0159. D - Lifespan perspective [Concept: Lifespan perspective]

0160. A - Cohort effect [Concept: Cohort effect]

0161. C - Lifespan perspective [Concept: Lifespan perspective]

0162. B - Lifespan perspective: Considering gains and losses across physical, cognitive, and relational domains over time. / Continuity and change: Identifying both enduring strengths and recent developmental changes. [Concept: Lifespan perspective and Continuity and change]

0163. A - Life transition [Concept: Life transition]

0164. B - Differences associated with shared historical experiences among people born or raised in a similar period. [Concept: Cohort effect]

0165. D - Emerging adulthood: Exploring a young adult's actual roles and context instead of assuming a standard transition timetable. / Developmental task: Identifying a current developmental challenge without treating it as a rigid age-based requirement. [Concept: Emerging adulthood and Developmental task]

0166. C - Developmental resilience [Concept: Developmental resilience]

0167. D - Developmental resilience [Concept: Developmental resilience]

0168. D - Emerging adulthood [Concept: Emerging adulthood]

0169. B - Lifespan perspective: A view of development as lifelong, multidimensional, multidirectional, and shaped by context and change. / Ageism: Stereotypes, prejudice, or discrimination based on age. [Concept: Lifespan perspective and Ageism]

0170. D - Ageism [Concept: Ageism]

0171. A - Emerging adulthood [Concept: Emerging adulthood]

0172. C - Developmental task: A context-sensitive challenge or capacity that becomes salient during a period of development. / Life transition: A significant change in roles, relationships, health, or context that may require adaptation. [Concept: Developmental task and Life transition]

0173. A - Life transition [Concept: Life transition]

0174. B - Ageism: Stereotypes, prejudice, or discrimination based on age. / Life transition: A significant change in roles, relationships, health, or context that may require adaptation. [Concept: Ageism and Life transition]

0175. A - Developmental resilience [Concept: Developmental resilience]

0176. C - Considering whether a generational difference reflects distinct historical context rather than aging alone. [Concept: Cohort effect]

0177. B - Ageism: Checking whether age-based assumptions are limiting a client's choices or care. / Developmental resilience: Identifying resources and relationships that have supported adaptation across developmental transitions. [Concept: Ageism and Developmental resilience]

0178. C - Developmental task [Concept: Developmental task]

0179. C - Supporting coping and identity adjustment during a change such as school transition or caregiving. [Concept: Life transition]

0180. D - Cohort effect: Differences associated with shared historical experiences among people born or raised in a similar period. / Ageism: Stereotypes, prejudice, or discrimination based on age. [Concept: Cohort effect and Ageism]

0181. B - Ageism [Concept: Ageism]

0182. D - Emerging adulthood: Exploring a young adult's actual roles and context instead of assuming a standard transition timetable. / Life review: Inviting a client to reflect on meaningful experiences and how their interpretation has changed. [Concept: Emerging adulthood and Life review]

0183. A - Ageism: Stereotypes, prejudice, or discrimination based on age. / Developmental resilience: Positive adaptation over time supported by interacting personal, relational, and contextual resources. [Concept: Ageism and Developmental resilience]

0184. D - Ageism [Concept: Ageism]

0185. A - Identifying resources and relationships that have supported adaptation across developmental transitions. [Concept: Developmental resilience]

0186. A - Lifespan perspective: A view of development as lifelong, multidimensional, multidirectional, and shaped by context and change. / Developmental resilience: Positive adaptation over time supported by interacting personal, relational, and contextual resources. [Concept: Lifespan perspective and Developmental resilience]

0187. D - A guided reflection on life events, meaning, identity, and continuity, often used to support integration. [Concept: Life review]

0188. D - Cumulative risk [Concept: Cumulative risk]

0371. D - Ageism [Concept: Ageism]

0372. D - Cohort effect [Concept: Cohort effect]

CAC.921 | Lifespan Developmental Counseling

QUESTION | CORRECT OPTION AND CONCEPT

0373. A - The joint consideration of stable patterns and meaningful transformation across a person's life. [Concept: Continuity and change]

0374. A - Identifying resources and relationships that have supported adaptation across developmental transitions. [Concept: Developmental resilience]

0375. D - Cohort effect [Concept: Cohort effect]

0376. C - Lifespan perspective: A view of development as lifelong, multidimensional, multidirectional, and shaped by context and change. / Continuity and change: The joint consideration of stable patterns and meaningful transformation across a person's life. [Concept: Lifespan perspective and Continuity and change]

0377. C - Emerging adulthood: A culturally contingent period of transition with exploration and changing roles, not a universal fixed stage. / Life review: A guided reflection on life events, meaning, identity, and continuity, often used to support integration. [Concept: Emerging adulthood and Life review]

0378. D - Cohort effect [Concept: Cohort effect]

0379. D - Ageism [Concept: Ageism]

0380. A - Identifying resources and relationships that have supported adaptation across developmental transitions. [Concept: Developmental resilience]

0381. B - Cohort effect [Concept: Cohort effect]

0382. C - Developmental resilience [Concept: Developmental resilience]

0383. D - Developmental task [Concept: Developmental task]

0384. C - Lifespan perspective [Concept: Lifespan perspective]

0385. B - Life transition: A significant change in roles, relationships, health, or context that may require adaptation. / Developmental resilience: Positive adaptation over time supported by interacting personal, relational, and contextual resources. [Concept: Life transition and Developmental resilience]

0386. C - Developmental task [Concept: Developmental task]

0387. C - A culturally contingent period of transition with exploration and changing roles, not a universal fixed stage. [Concept: Emerging adulthood]

0388. D - Lifespan perspective [Concept: Lifespan perspective]

0389. C - Cohort effect: Considering whether a generational difference reflects distinct historical context rather than aging alone. / Developmental resilience: Identifying resources and relationships that have supported adaptation across developmental transitions. [Concept: Cohort effect and Developmental resilience]

0390. B - Ageism [Concept: Ageism]

0391. A - Lifespan perspective: Considering gains and losses across physical, cognitive, and relational domains over time. / Developmental resilience: Identifying resources and relationships that have supported adaptation across developmental transitions. [Concept: Lifespan perspective and Developmental resilience]

0392. D - A significant change in roles, relationships, health, or context that may require adaptation. [Concept: Life transition]

0393. C - Supporting coping and identity adjustment during a change such as school transition or caregiving. [Concept: Life transition]

0394. D - Cohort effect: Differences associated with shared historical experiences among people born or raised in a similar period. / Cumulative risk: The increasing effect of exposure to multiple risks over time, often interacting with protective resources. [Concept: Cohort effect and Cumulative risk]

0395. D - Lifespan perspective: Considering gains and losses across physical, cognitive, and relational domains over time. / Emerging adulthood: Exploring a young adult's actual roles and context instead of assuming a standard transition timetable. [Concept: Lifespan perspective and Emerging adulthood]

0396. B - A guided reflection on life events, meaning, identity, and continuity, often used to support integration. [Concept: Life review]

0397. A - Developmental task: Identifying a current developmental challenge without treating it as a rigid age-based requirement. / Cohort effect: Considering whether a generational difference reflects distinct historical context rather than aging alone. [Concept: Developmental task and Cohort effect]

0398. A - Developmental task [Concept: Developmental task]

0399. D - Assessing the combination and timing of stressors rather than counting each in isolation. [Concept: Cumulative risk]

0400. D - Life review [Concept: Life review]

0401. B - Developmental task [Concept: Developmental task]

0402. A - Life review [Concept: Life review]

0403. A - Life transition [Concept: Life transition]

0404. C - Continuity and change: The joint consideration of stable patterns and meaningful transformation across a person's life. / Cumulative risk: The increasing effect of exposure to multiple risks over time, often interacting with protective resources. [Concept: Continuity and change and Cumulative risk]

0405. B - Ageism [Concept: Ageism]

0406. C - Developmental task: A context-sensitive challenge or capacity that becomes salient during a period of development. / Cumulative risk: The increasing effect of exposure to multiple risks over time, often interacting with protective resources. [Concept: Developmental task and Cumulative risk]

0407. C - Continuity and change [Concept: Continuity and change]

0408. D - A view of development as lifelong, multidimensional, multidirectional, and shaped by context and change. [Concept: Lifespan perspective]

0409. C - Life review: A guided reflection on life events, meaning, identity, and continuity, often used to support integration. / Cumulative risk: The increasing effect of exposure to multiple risks over time, often interacting with protective resources. [Concept: Life review and Cumulative risk]

0410. D - Emerging adulthood: A culturally contingent period of transition with exploration and changing roles, not a universal fixed stage. / Developmental task: A context-sensitive challenge or capacity that becomes salient during a period of development. [Concept: Emerging adulthood and Developmental task]

0411. A - Ageism [Concept: Ageism]

0412. C - Life review: Inviting a client to reflect on meaningful experiences and how their interpretation has changed. / Developmental task: Identifying a current developmental challenge without treating it as a rigid age-based requirement. [Concept: Life review and Developmental task]

0413. B - Cumulative risk: The increasing effect of exposure to multiple risks over time, often interacting with protective resources. / Developmental resilience: Positive adaptation over time supported by interacting personal, relational, and contextual resources. [Concept: Cumulative risk and Developmental resilience]

0414. D - Life transition [Concept: Life transition]

0415. D - Life transition: Supporting coping and identity adjustment during a change such as school transition or caregiving. / Developmental resilience: Identifying resources and relationships that have supported adaptation across developmental transitions. [Concept: Life transition and Developmental resilience]

0416. B - Emerging adulthood: Exploring a young adult's actual roles and context instead of assuming a standard transition timetable. / Cohort effect: Considering whether a generational difference reflects distinct historical context rather than aging alone. [Concept: Emerging adulthood and Cohort effect]

0417. B - Developmental resilience [Concept: Developmental resilience]

0418. D - Ageism: Checking whether age-based assumptions are limiting a client's choices or care. / Life transition: Supporting coping and identity adjustment during a change such as school transition or caregiving. [Concept: Ageism and Life transition]

0419. C - Ageism: Stereotypes, prejudice, or discrimination based on age. / Life transition: A significant change in roles, relationships, health, or context that may require adaptation. [Concept: Ageism and Life transition]

0420. B - Developmental resilience [Concept: Developmental resilience]

0421. D - Continuity and change [Concept: Continuity and change]

0422. B - Emerging adulthood: Exploring a young adult's actual roles and context instead of assuming a standard transition timetable. / Continuity and change: Identifying both enduring strengths and recent developmental changes. [Concept: Emerging adulthood and Continuity and change]

0423. C - Continuity and change [Concept: Continuity and change]

0424. A - Ageism: Stereotypes, prejudice, or discrimination based on age. / Developmental resilience: Positive adaptation over time supported by interacting personal, relational, and contextual resources. [Concept: Ageism and Developmental resilience]

0425. A - Ageism: Checking whether age-based assumptions are limiting a client's choices or care. / Cumulative risk: Assessing the combination and timing of stressors rather than counting each in isolation. [Concept: Ageism and Cumulative risk]

0426. B - Developmental task [Concept: Developmental task]

0427. A - Emerging adulthood [Concept: Emerging adulthood]

0428. A - Developmental resilience [Concept: Developmental resilience]

0429. B - Emerging adulthood [Concept: Emerging adulthood]

0430. A - Life transition [Concept: Life transition]

0431. B - Emerging adulthood [Concept: Emerging adulthood]

0432. A - Developmental task: A context-sensitive challenge or capacity that becomes salient during a period of development. / Cumulative risk: The increasing effect of exposure to multiple risks over time, often interacting with protective resources. [Concept: Developmental task and Cumulative risk]

0433. C - Developmental task [Concept: Developmental task]

0434. D - Lifespan perspective [Concept: Lifespan perspective]

0435. D - Ageism: Checking whether age-based assumptions are limiting a client's choices or care. / Continuity and change: Identifying both enduring strengths and recent developmental changes. [Concept: Ageism and Continuity and change]

0436. B - Life transition [Concept: Life transition]

0437. D - Lifespan perspective: Considering gains and losses across physical, cognitive, and relational domains over time. / Cumulative risk: Assessing the combination and timing of stressors rather than counting each in isolation. [Concept: Lifespan perspective and Cumulative risk]

0438. C - Identifying resources and relationships that have supported adaptation across developmental transitions. [Concept: Developmental resilience]

CAC.921 | Lifespan Developmental Counseling

QUESTION | CORRECT OPTION AND CONCEPT

0439. C - The joint consideration of stable patterns and meaningful transformation across a person's life. [Concept: Continuity and change]

0440. B - Developmental task [Concept: Developmental task]

0441. A - Lifespan perspective: Considering gains and losses across physical, cognitive, and relational domains over time. / Cumulative risk: Assessing the combination and timing of stressors rather than counting each in isolation. [Concept: Lifespan perspective and Cumulative risk]

0442. C - Life review: Inviting a client to reflect on meaningful experiences and how their interpretation has changed. / Continuity and change: Identifying both enduring strengths and recent developmental changes. [Concept: Life review and Continuity and change]

0443. A - Life review: A guided reflection on life events, meaning, identity, and continuity, often used to support integration. / Developmental task: A context-sensitive challenge or capacity that becomes salient during a period of development. [Concept: Life review and Developmental task]

0444. B - Emerging adulthood: Exploring a young adult's actual roles and context instead of assuming a standard transition timetable. / Cohort effect: Considering whether a generational difference reflects distinct historical context rather than aging alone. [Concept: Emerging adulthood and Cohort effect]

0445. C - Continuity and change [Concept: Continuity and change]

0446. D - Life review: Inviting a client to reflect on meaningful experiences and how their interpretation has changed. / Life transition: Supporting coping and identity adjustment during a change such as school transition or caregiving. [Concept: Life review and Life transition]

0447. C - Lifespan perspective: Considering gains and losses across physical, cognitive, and relational domains over time. / Cohort effect: Considering whether a generational difference reflects distinct historical context rather than aging alone. [Concept: Lifespan perspective and Cohort effect]

0448. A - Developmental task: A context-sensitive challenge or capacity that becomes salient during a period of development. / Cohort effect: Differences associated with shared historical experiences among people born or raised in a similar period. [Concept: Developmental task and Cohort effect]

0449. A - Cumulative risk [Concept: Cumulative risk]

0450. C - Cohort effect [Concept: Cohort effect]

0451. D - Continuity and change: Identifying both enduring strengths and recent developmental changes. / Life transition: Supporting coping and identity adjustment during a change such as school transition or caregiving. [Concept: Continuity and change and Life transition]

0452. C - Lifespan perspective: A view of development as lifelong, multidimensional, multidirectional, and shaped by context and change. / Life review: A guided reflection on life events, meaning, identity, and continuity, often used to support integration. [Concept: Lifespan perspective and Life review]

0453. C - Cumulative risk [Concept: Cumulative risk]

0454. B - Lifespan perspective: Considering gains and losses across physical, cognitive, and relational domains over time. / Cumulative risk: Assessing the combination and timing of stressors rather than counting each in isolation. [Concept: Lifespan perspective and Cumulative risk]

0455. A - Lifespan perspective: A view of development as lifelong, multidimensional, multidirectional, and shaped by context and change. / Life transition: A significant change in roles, relationships, health, or context that may require adaptation. [Concept: Lifespan perspective and Life transition]

0456. A - Ageism [Concept: Ageism]

0457. A - Life transition [Concept: Life transition]

0458. D - Developmental task [Concept: Developmental task]

0459. D - Positive adaptation over time supported by interacting personal, relational, and contextual resources. [Concept: Developmental resilience]

0460. C - Lifespan perspective: Considering gains and losses across physical, cognitive, and relational domains over time. / Developmental task: Identifying a current developmental challenge without treating it as a rigid age-based requirement. [Concept: Lifespan perspective and Developmental task]

0461. D - Life transition [Concept: Life transition]

0462. A - Lifespan perspective: A view of development as lifelong, multidimensional, multidirectional, and shaped by context and change. / Cohort effect: Differences associated with shared historical experiences among people born or raised in a similar period. [Concept: Lifespan perspective and Cohort effect]

0463. C - Developmental task: A context-sensitive challenge or capacity that becomes salient during a period of development. / Developmental resilience: Positive adaptation over time supported by interacting personal, relational, and contextual resources. [Concept: Developmental task and Developmental resilience]

0464. D - The increasing effect of exposure to multiple risks over time, often interacting with protective resources. [Concept: Cumulative risk]

0465. C - Developmental task: A context-sensitive challenge or capacity that becomes salient during a period of development. / Continuity and change: The joint consideration of stable patterns and meaningful transformation across a person's life. [Concept: Developmental task and Continuity and change]

0466. B - Lifespan perspective: A view of development as lifelong, multidimensional, multidirectional, and shaped by context and change. / Developmental resilience: Positive adaptation over time supported by interacting personal, relational, and contextual resources. [Concept: Lifespan perspective and Developmental resilience]

0467. B - Emerging adulthood: A culturally contingent period of transition with exploration and changing roles, not a universal fixed stage. / Continuity and change: The joint consideration of stable patterns and meaningful transformation across a person's life. [Concept: Emerging adulthood and Continuity and change]

0468. C - Ageism [Concept: Ageism]

0469. A - Lifespan perspective [Concept: Lifespan perspective]

0470. C - Developmental task: Identifying a current developmental challenge without treating it as a rigid age-based requirement. / Life transition: Supporting coping and identity adjustment during a change such as school transition or caregiving. [Concept: Developmental task and Life transition]

0471. C - Lifespan perspective: Considering gains and losses across physical, cognitive, and relational domains over time. / Developmental resilience: Identifying resources and relationships that have supported adaptation across developmental transitions. [Concept: Lifespan perspective and Developmental resilience]

0472. D - Life review: A guided reflection on life events, meaning, identity, and continuity, often used to support integration. / Cumulative risk: The increasing effect of exposure to multiple risks over time, often interacting with protective resources. [Concept: Life review and Cumulative risk]

0473. D - Cohort effect [Concept: Cohort effect]

0474. A - Ageism: Stereotypes, prejudice, or discrimination based on age. / Continuity and change: The joint consideration of stable patterns and meaningful transformation across a person's life. [Concept: Ageism and Continuity and change]

0475. B - Life review: A guided reflection on life events, meaning, identity, and continuity, often used to support integration. / Cumulative risk: The increasing effect of exposure to multiple risks over time, often interacting with protective resources. [Concept: Life review and Cumulative risk]

0476. C - Life transition: A significant change in roles, relationships, health, or context that may require adaptation. / Developmental resilience: Positive adaptation over time supported by interacting personal, relational, and contextual resources. [Concept: Life transition and Developmental resilience]

0477. C - Continuity and change: The joint consideration of stable patterns and meaningful transformation across a person's life. / Cumulative risk: The increasing effect of exposure to multiple risks over time, often interacting with protective resources. [Concept: Continuity and change and Cumulative risk]

0478. B - Lifespan perspective [Concept: Lifespan perspective]

0479. D - Emerging adulthood: Exploring a young adult's actual roles and context instead of assuming a standard transition timetable. / Cumulative risk: Assessing the combination and timing of stressors rather than counting each in isolation. [Concept: Emerging adulthood and Cumulative risk]

0480. D - Lifespan perspective: Considering gains and losses across physical, cognitive, and relational domains over time. / Emerging adulthood: Exploring a young adult's actual roles and context instead of assuming a standard transition timetable. [Concept: Lifespan perspective and Emerging adulthood]

0481. D - Life review: A guided reflection on life events, meaning, identity, and continuity, often used to support integration. / Cumulative risk: The increasing effect of exposure to multiple risks over time, often interacting with protective resources. [Concept: Life review and Cumulative risk]

0482. D - Lifespan perspective [Concept: Lifespan perspective]

0483. D - Lifespan perspective: Considering gains and losses across physical, cognitive, and relational domains over time. / Developmental task: Identifying a current developmental challenge without treating it as a rigid age-based requirement. [Concept: Lifespan perspective and Developmental task]

0484. B - Cohort effect [Concept: Cohort effect]

0485. C - Developmental task: A context-sensitive challenge or capacity that becomes salient during a period of development. / Developmental resilience: Positive adaptation over time supported by interacting personal, relational, and contextual resources. [Concept: Developmental task and Developmental resilience]

0486. A - Continuity and change: Identifying both enduring strengths and recent developmental changes. / Developmental resilience: Identifying resources and relationships that have supported adaptation across developmental transitions. [Concept: Continuity and change and Developmental resilience]

0487. B - Ageism [Concept: Ageism]

0488. B - Developmental task: Identifying a current developmental challenge without treating it as a rigid age-based requirement. / Ageism: Checking whether age-based assumptions are limiting a client's choices or care. [Concept: Developmental task and Ageism]

0489. A - Lifespan perspective [Concept: Lifespan perspective]

0490. A - Developmental task [Concept: Developmental task]

0491. B - Life review: A guided reflection on life events, meaning, identity, and continuity, often used to support integration. / Developmental task: A context-sensitive challenge or capacity that becomes salient during a period of development. [Concept: Life review and Developmental task]

0576. C - Life review: Inviting a client to reflect on meaningful experiences and how their interpretation has changed. / Ageism: Checking whether age-based assumptions are limiting a client's choices or care. [Concept: Life review and Ageism]

0577. C - Lifespan perspective: Considering gains and losses across physical, cognitive, and relational domains over time. / Ageism: Checking whether age-based assumptions are limiting a client's choices or care. [Concept: Lifespan perspective and Ageism]

0578. B - Lifespan perspective [Concept: Lifespan perspective]

0579. A - Life transition [Concept: Life transition]

0580. B - Cumulative risk [Concept: Cumulative risk]

0581. A - A significant change in roles, relationships, health, or context that may require adaptation. [Concept: Life transition]

0582. D - Lifespan perspective: A view of development as lifelong, multidimensional, multidirectional, and shaped by context and change. / Ageism: Stereotypes, prejudice, or discrimination based on age. [Concept: Lifespan perspective and Ageism]

0583. A - Lifespan perspective: A view of development as lifelong, multidimensional, multidirectional, and shaped by context and change. / Cumulative risk: The increasing effect of exposure to multiple risks over time, often interacting with protective resources. [Concept: Lifespan perspective and Cumulative risk]

0584. C - Life transition: Supporting coping and identity adjustment during a change such as school transition or caregiving. / Cumulative risk: Assessing the combination and timing of stressors rather than counting each in isolation. [Concept: Life transition and Cumulative risk]

0585. B - Cohort effect [Concept: Cohort effect]

0586. B - Emerging adulthood [Concept: Emerging adulthood]

0587. B - Life review: A guided reflection on life events, meaning, identity, and continuity, often used to support integration. / Continuity and change: The joint consideration of stable patterns and meaningful transformation across a person's life. [Concept: Life review and Continuity and change]

0588. C - Continuity and change: The joint consideration of stable patterns and meaningful transformation across a person's life. / Developmental resilience: Positive adaptation over time supported by interacting personal, relational, and contextual resources. [Concept: Continuity and change and Developmental resilience]

0589. A - Developmental resilience [Concept: Developmental resilience]

0590. B - Ageism [Concept: Ageism]

0591. B - Life review: A guided reflection on life events, meaning, identity, and continuity, often used to support integration. / Cohort effect: Differences associated with shared historical experiences among people born or raised in a similar period. [Concept: Life review and Cohort effect]

0592. D - Cohort effect [Concept: Cohort effect]

0593. D - Ageism: Checking whether age-based assumptions are limiting a client's choices or care. / Continuity and change: Identifying both enduring strengths and recent developmental changes. [Concept: Ageism and Continuity and change]

0594. B - Cohort effect: Differences associated with shared historical experiences among people born or raised in a similar period. / Life transition: A significant change in roles, relationships, health, or context that may require adaptation. [Concept: Cohort effect and Life transition]

0595. A - Developmental resilience [Concept: Developmental resilience]

0596. C - Ageism [Concept: Ageism]

0597. A - Ageism: Stereotypes, prejudice, or discrimination based on age. / Continuity and change: The joint consideration of stable patterns and meaningful transformation across a person's life. [Concept: Ageism and Continuity and change]

0598. B - Lifespan perspective [Concept: Lifespan perspective]

0599. C - Life review: Inviting a client to reflect on meaningful experiences and how their interpretation has changed. / Life transition: Supporting coping and identity adjustment during a change such as school transition or caregiving. [Concept: Life review and Life transition]

0600. D - Cohort effect: Differences associated with shared historical experiences among people born or raised in a similar period. / Life transition: A significant change in roles, relationships, health, or context that may require adaptation. [Concept: Cohort effect and Life transition]

0601. C - Emerging adulthood [Concept: Emerging adulthood]

0602. D - Developmental task: Identifying a current developmental challenge without treating it as a rigid age-based requirement. / Cumulative risk: Assessing the combination and timing of stressors rather than counting each in isolation. [Concept: Developmental task and Cumulative risk]

0603. B - Cohort effect: Differences associated with shared historical experiences among people born or raised in a similar period. / Cumulative risk: The increasing effect of exposure to multiple risks over time, often interacting with protective resources. [Concept: Cohort effect and Cumulative risk]

0604. A - Developmental task: A context-sensitive challenge or capacity that becomes salient during a period of development. / Cohort effect: Differences associated with shared historical experiences among people born or raised in a similar period. [Concept: Developmental task and Cohort effect]

0605. C - Cohort effect [Concept: Cohort effect]

0606. B - Cohort effect: Considering whether a generational difference reflects distinct historical context rather than aging alone. / Continuity and change: Identifying both enduring strengths and recent developmental changes. [Concept: Cohort effect and Continuity and change]

0607. A - Life review: Inviting a client to reflect on meaningful experiences and how their interpretation has changed. / Cumulative risk: Assessing the combination and timing of stressors rather than counting each in isolation. [Concept: Life review and Cumulative risk]

0608. C - Lifespan perspective: Considering gains and losses across physical, cognitive, and relational domains over time. / Continuity and change: Identifying both enduring strengths and recent developmental changes. [Concept: Lifespan perspective and Continuity and change]

0991. A - Developmental task: A context-sensitive challenge or capacity that becomes salient during a period of development. / Life transition: A significant change in roles, relationships, health, or context that may require adaptation. [Concept: Developmental task and Life transition]

0992. C - Cohort effect: Differences associated with shared historical experiences among people born or raised in a similar period. / Ageism: Stereotypes, prejudice, or discrimination based on age. [Concept: Cohort effect and Ageism]

0993. D - Cohort effect: Considering whether a generational difference reflects distinct historical context rather than aging alone. / Life transition: Supporting coping and identity adjustment during a change such as school transition or caregiving. [Concept: Cohort effect and Life transition]

0994. C - Cohort effect: Differences associated with shared historical experiences among people born or raised in a similar period. / Ageism: Stereotypes, prejudice, or discrimination based on age. [Concept: Cohort effect and Ageism]

0995. B - Life transition [Concept: Life transition]

0996. B - Lifespan perspective: A view of development as lifelong, multidimensional, multidirectional, and shaped by context and change. / Ageism: Stereotypes, prejudice, or discrimination based on age. [Concept: Lifespan perspective and Ageism]

0997. D - Developmental task [Concept: Developmental task]

0998. D - Developmental resilience [Concept: Developmental resilience]

0999. A - Life review: A guided reflection on life events, meaning, identity, and continuity, often used to support integration. / Life transition: A significant change in roles, relationships, health, or context that may require adaptation. [Concept: Life review and Life transition]

1000. C - Continuity and change [Concept: Continuity and change]

CAC.922 | Behavioral Interventions for Children

QUESTION | CORRECT OPTION AND CONCEPT

0001. A - Generalization [Concept: Generalization]

0002. B - Shaping [Concept: Shaping]

0003. B - Behavioral data fidelity [Concept: Behavioral data fidelity]

0004. A - Reinforcing a specified appropriate or alternative behavior while withholding reinforcement for another response when safe and appropriate. [Concept: Differential reinforcement]

0005. C - Negative reinforcement: Recognizing when task removal following refusal could unintentionally strengthen refusal. / Generalization: Practicing a skill with varied people and settings so it is more likely to transfer. [Concept: Negative reinforcement and Generalization]

0006. B - Functional behavior assessment: A systematic process for identifying antecedents, behavior, consequences, and likely function. / Consequence: An event following a behavior that can influence the likelihood of that behavior in the future. [Concept: Functional behavior assessment and Consequence]

0007. B - Differential reinforcement [Concept: Differential reinforcement]

0008. D - Behavioral data fidelity [Concept: Behavioral data fidelity]

0009. B - Extinction burst [Concept: Extinction burst]

0010. B - Antecedent: An event or condition that occurs before a behavior and may set the occasion for it. / Differential reinforcement: Reinforcing a specified appropriate or alternative behavior while withholding reinforcement for another response when safe and appropriate. [Concept: Antecedent and Differential reinforcement]

0011. A - Extinction burst: A temporary increase in a behavior when reinforcement that previously maintained it is no longer provided. / Generalization: Transfer of a learned behavior or skill to people, settings, or materials beyond training conditions. [Concept: Extinction burst and Generalization]

0012. C - Functional behavior assessment [Concept: Functional behavior assessment]

0013. C - Consequence: Examining what happens immediately after a behavior and whether it may reinforce it. / Extinction burst: Planning support and safety before changing a reinforcement pattern that may briefly intensify behavior. [Concept: Consequence and Extinction burst]

0014. A - Behavioral data fidelity [Concept: Behavioral data fidelity]

0015. D - Antecedent: Noting the instruction, transition, or setting that reliably precedes a behavior. / Negative reinforcement: Recognizing when task removal following refusal could unintentionally strengthen refusal. [Concept: Antecedent and Negative reinforcement]

0016. A - Functional behavior assessment [Concept: Functional behavior assessment]

0017. A - Antecedent [Concept: Antecedent]

0018. D - Negative reinforcement: Recognizing when task removal following refusal could unintentionally strengthen refusal. / Shaping: Reinforcing progressively closer steps as a child learns a complex skill. [Concept: Negative reinforcement and Shaping]

0019. A - Antecedent: Noting the instruction, transition, or setting that reliably precedes a behavior. / Differential reinforcement: Reinforcing a child's appropriate request for help rather than only reacting to disruption. [Concept: Antecedent and Differential reinforcement]

0020. B - Generalization: Practicing a skill with varied people and settings so it is more likely to transfer. / Behavioral data fidelity: Checking whether agreed steps were implemented before judging the intervention ineffective. [Concept: Generalization and Behavioral data fidelity]

0021. A - Differential reinforcement [Concept: Differential reinforcement]

0022. C - Extinction burst [Concept: Extinction burst]

0023. B - Antecedent: An event or condition that occurs before a behavior and may set the occasion for it. / Generalization: Transfer of a learned behavior or skill to people, settings, or materials beyond training conditions. [Concept: Antecedent and Generalization]

0024. D - Antecedent [Concept: Antecedent]

0025. A - Antecedent: An event or condition that occurs before a behavior and may set the occasion for it. / Behavioral data fidelity: Consistent implementation and recording of an intervention as designed. [Concept: Antecedent and Behavioral data fidelity]

0026. C - Shaping [Concept: Shaping]

0027. B - Shaping: Reinforcing successive approximations toward a target behavior. / Behavioral data fidelity: Consistent implementation and recording of an intervention as designed. [Concept: Shaping and Behavioral data fidelity]

0028. B - Shaping [Concept: Shaping]

0029. C - Generalization: Transfer of a learned behavior or skill to people, settings, or materials beyond training conditions. / Behavioral data fidelity: Consistent implementation and recording of an intervention as designed. [Concept: Generalization and Behavioral data fidelity]

0030. A - Extinction burst: A temporary increase in a behavior when reinforcement that previously maintained it is no longer provided. / Behavioral data fidelity: Consistent implementation and recording of an intervention as designed. [Concept: Extinction burst and Behavioral data fidelity]

0031. B - Shaping: Reinforcing progressively closer steps as a child learns a complex skill. / Behavioral data fidelity: Checking whether agreed steps were implemented before judging the intervention ineffective. [Concept: Shaping and Behavioral data fidelity]

0032. D - Functional behavior assessment: A systematic process for identifying antecedents, behavior, consequences, and likely function. / Antecedent: An event or condition that occurs before a behavior and may set the occasion for it. [Concept: Functional behavior assessment and Antecedent]

0033. B - Functional behavior assessment: Collecting direct contextual data before selecting an intervention for a recurring behavior. / Differential reinforcement: Reinforcing a child's appropriate request for help rather than only reacting to disruption. [Concept: Functional behavior assessment and Differential reinforcement]

0034. A - Negative reinforcement [Concept: Negative reinforcement]

0035. A - Differential reinforcement: Reinforcing a child's appropriate request for help rather than only reacting to disruption. / Extinction burst: Planning support and safety before changing a reinforcement pattern that may briefly intensify behavior. [Concept: Differential reinforcement and Extinction burst]

0036. A - Positive reinforcement: Providing a valued consequence contingent on a clearly defined target behavior. / Negative reinforcement: Recognizing when task removal following refusal could unintentionally strengthen refusal. [Concept: Positive reinforcement and Negative reinforcement]

0037. B - Consequence [Concept: Consequence]

0038. A - Extinction burst [Concept: Extinction burst]

0039. B - Reinforcing successive approximations toward a target behavior. [Concept: Shaping]

0040. B - Shaping: Reinforcing progressively closer steps as a child learns a complex skill. / Generalization: Practicing a skill with varied people and settings so it is more likely to transfer. [Concept: Shaping and Generalization]

0041. C - Negative reinforcement: Removing or reducing an aversive condition after behavior, thereby increasing that behavior. / Behavioral data fidelity: Consistent implementation and recording of an intervention as designed. [Concept: Negative reinforcement and Behavioral data fidelity]

0042. A - Differential reinforcement: Reinforcing a child's appropriate request for help rather than only reacting to disruption. / Shaping: Reinforcing progressively closer steps as a child learns a complex skill. [Concept: Differential reinforcement and Shaping]

0043. C - Negative reinforcement: Removing or reducing an aversive condition after behavior, thereby increasing that behavior. / Shaping: Reinforcing successive approximations toward a target behavior. [Concept: Negative reinforcement and Shaping]

0044. C - Extinction burst: Planning support and safety before changing a reinforcement pattern that may briefly intensify behavior. / Behavioral data fidelity: Checking whether agreed steps were implemented before judging the intervention ineffective. [Concept: Extinction burst and Behavioral data fidelity]

0045. B - Reinforcing a child's appropriate request for help rather than only reacting to disruption. [Concept: Differential reinforcement]

0046. A - Differential reinforcement: Reinforcing a specified appropriate or alternative behavior while withholding reinforcement for another response when safe and appropriate. / Behavioral data fidelity: Consistent implementation and recording of an intervention as designed. [Concept: Differential reinforcement and Behavioral data fidelity]

0047. C - Positive reinforcement [Concept: Positive reinforcement]

0048. C - Behavioral data fidelity [Concept: Behavioral data fidelity]

0049. A - Antecedent: Noting the instruction, transition, or setting that reliably precedes a behavior. / Positive reinforcement: Providing a valued consequence contingent on a clearly defined target behavior. [Concept: Antecedent and Positive reinforcement]

0050. C - Antecedent [Concept: Antecedent]

0051. A - Differential reinforcement: Reinforcing a specified appropriate or alternative behavior while withholding reinforcement for another response when safe and appropriate. / Behavioral data fidelity: Consistent implementation and recording of an intervention as designed. [Concept: Differential reinforcement and Behavioral data fidelity]

0052. C - Differential reinforcement: Reinforcing a specified appropriate or alternative behavior while withholding reinforcement for another response when safe and appropriate. / Extinction burst: A temporary increase in a behavior when reinforcement that previously maintained it is no longer provided. [Concept: Differential reinforcement and Extinction burst]

0053. B - Differential reinforcement [Concept: Differential reinforcement]

0054. D - Extinction burst [Concept: Extinction burst]

0055. A - Functional behavior assessment [Concept: Functional behavior assessment]

0056. A - Positive reinforcement: Adding a consequence after behavior that increases the behavior's future frequency. / Generalization: Transfer of a learned behavior or skill to people, settings, or materials beyond training conditions. [Concept: Positive reinforcement and Generalization]

0057. B - Behavioral data fidelity [Concept: Behavioral data fidelity]

CAC.922 | Behavioral Interventions for Children

QUESTION | CORRECT OPTION AND CONCEPT

0058. D - Generalization [Concept: Generalization]

0059. A - Consequence: Examining what happens immediately after a behavior and whether it may reinforce it. / Positive reinforcement: Providing a valued consequence contingent on a clearly defined target behavior. [Concept: Consequence and Positive reinforcement]

0060. A - Positive reinforcement: Adding a consequence after behavior that increases the behavior's future frequency. / Shaping: Reinforcing successive approximations toward a target behavior. [Concept: Positive reinforcement and Shaping]

0061. D - An event or condition that occurs before a behavior and may set the occasion for it. [Concept: Antecedent]

0062. A - Consequence: Examining what happens immediately after a behavior and whether it may reinforce it. / Negative reinforcement: Recognizing when task removal following refusal could unintentionally strengthen refusal. [Concept: Consequence and Negative reinforcement]

0063. A - Antecedent [Concept: Antecedent]

0064. C - Antecedent: Noting the instruction, transition, or setting that reliably precedes a behavior. / Shaping: Reinforcing progressively closer steps as a child learns a complex skill. [Concept: Antecedent and Shaping]

0065. [Concept: Differential reinforcement and Behavioral data fidelity]

0209. B - Extinction burst: Planning support and safety before changing a reinforcement pattern that may briefly intensify behavior. / Behavioral data fidelity: Checking whether agreed steps were implemented before judging the intervention ineffective. [Concept: Extinction burst and Behavioral data fidelity]

0210. A - Differential reinforcement [Concept: Differential reinforcement]

0211. D - Behavioral data fidelity [Concept: Behavioral data fidelity]

0212. C - Negative reinforcement: Recognizing when task removal following refusal could unintentionally strengthen refusal. / Extinction burst: Planning support and safety before changing a reinforcement pattern that may briefly intensify behavior. [Concept: Negative reinforcement and Extinction burst]

0213. A - Functional behavior assessment: A systematic process for identifying antecedents, behavior, consequences, and likely function. / Negative reinforcement: Removing or reducing an aversive condition after behavior, thereby increasing that behavior. [Concept: Functional behavior assessment and Negative reinforcement]

0214. B - Positive reinforcement: Providing a valued consequence contingent on a clearly defined target behavior. / Extinction burst: Planning support and safety before changing a reinforcement pattern that may briefly intensify behavior. [Concept: Positive reinforcement and Extinction burst]

0215. C - Positive reinforcement: Adding a consequence after behavior that increases the behavior's future frequency. / Extinction burst: A temporary increase in a behavior when reinforcement that previously maintained it is no longer provided. [Concept: Positive reinforcement and Extinction burst]

0216. B - Antecedent: Noting the instruction, transition, or setting that reliably precedes a behavior. / Generalization: Practicing a skill with varied people and settings so it is more likely to transfer. [Concept: Antecedent and Generalization]

0217. D - Functional behavior assessment: A systematic process for identifying antecedents, behavior, consequences, and likely function. / Shaping: Reinforcing successive approximations toward a target behavior. [Concept: Functional behavior assessment and Shaping]

0218. C - Negative reinforcement: Recognizing when task removal following refusal could unintentionally strengthen refusal. / Differential reinforcement: Reinforcing a child's appropriate request for help rather than only reacting to disruption. [Concept: Negative reinforcement and Differential reinforcement]

0219. C - Differential reinforcement: Reinforcing a specified appropriate or alternative behavior while withholding reinforcement for another response when safe and appropriate. / Shaping: Reinforcing successive approximations toward a target behavior. [Concept: Differential reinforcement and Shaping]

0220. A - Reinforcing successive approximations toward a target behavior. [Concept: Shaping]

0221. B - Functional behavior assessment [Concept: Functional behavior assessment]

0222. A - Consequence: An event following a behavior that can influence the likelihood of that behavior in the future. / Negative reinforcement: Removing or reducing an aversive condition after behavior, thereby increasing that behavior. [Concept: Consequence and Negative reinforcement]

0223. D - Consequence: Examining what happens immediately after a behavior and whether it may reinforce it. / Behavioral data fidelity: Checking whether agreed steps were implemented before judging the intervention ineffective. [Concept: Consequence and Behavioral data fidelity]

0224. A - Functional behavior assessment: A systematic process for identifying antecedents, behavior, consequences, and likely function. / Antecedent: An event or condition that occurs before a behavior and may set the occasion for it. [Concept: Functional behavior assessment and Antecedent]

0225. C - Generalization [Concept: Generalization]

0226. B - Consequence [Concept: Consequence]

0227. B - Positive reinforcement: Providing a valued consequence contingent on a clearly defined target behavior. / Differential reinforcement: Reinforcing a child's appropriate request for help rather than only reacting to disruption. [Concept: Positive reinforcement and Differential reinforcement]

0228. D - Consequence: Examining what happens immediately after a behavior and whether it may reinforce it. / Negative reinforcement: Recognizing when task removal following refusal could unintentionally strengthen refusal. [Concept: Consequence and Negative reinforcement]

0229. B - Positive reinforcement [Concept: Positive reinforcement]

0230. C - A temporary increase in a behavior when reinforcement that previously maintained it is no longer provided. [Concept: Extinction burst]

0231. C - Antecedent [Concept: Antecedent]

0232. A - Differential reinforcement [Concept: Differential reinforcement]

0233. B - Antecedent: Noting the instruction, transition, or setting that reliably precedes a behavior. / Extinction burst: Planning support and safety before changing a reinforcement pattern that may briefly intensify behavior. [Concept: Antecedent and Extinction burst]

0234. C - Consequence: An event following a behavior that can influence the likelihood of that behavior in the future. / Generalization: Transfer of a learned behavior or skill to people, settings, or materials beyond training conditions. [Concept: Consequence and Generalization]

0235. A - Differential reinforcement [Concept: Differential reinforcement]

0236. B - Adding a consequence after behavior that increases the behavior's future frequency. [Concept: Positive reinforcement]

0237. A - Noting the instruction, transition, or setting that reliably precedes a behavior. [Concept: Antecedent]

0238. A - Antecedent: Noting the instruction, transition, or setting that reliably precedes a behavior. / Consequence: Examining what happens immediately after a behavior and whether it may reinforce it. [Concept: Antecedent and Consequence]

0239. B - Consequence [Concept: Consequence]

0423. B - Negative reinforcement [Concept: Negative reinforcement]

0424. A - Collecting direct contextual data before selecting an intervention for a recurring behavior. [Concept: Functional behavior assessment]

0425. B - Functional behavior assessment [Concept: Functional behavior assessment]

0426. A - Functional behavior assessment: Collecting direct contextual data before selecting an intervention for a recurring behavior. / Consequence: Examining what happens immediately after a behavior and whether it may reinforce it. [Concept: Functional behavior assessment and Consequence]

0427. B - Shaping [Concept: Shaping]

0428. D - Negative reinforcement: Recognizing when task removal following refusal could unintentionally strengthen refusal. / Generalization: Practicing a skill with varied people and settings so it is more likely to transfer. [Concept: Negative reinforcement and Generalization]

0429. B - Positive reinforcement [Concept: Positive reinforcement]

0430. C - Antecedent: Noting the instruction, transition, or setting that reliably precedes a behavior. / Differential reinforcement: Reinforcing a child's appropriate request for help rather than only reacting to disruption. [Concept: Antecedent and Differential reinforcement]

0431. D - Positive reinforcement: Adding a consequence after behavior that increases the behavior's future frequency. / Behavioral data fidelity: Consistent implementation and recording of an intervention as designed. [Concept: Positive reinforcement and Behavioral data fidelity]

0432. A - Behavioral data fidelity [Concept: Behavioral data fidelity]

0433. D - Differential reinforcement: Reinforcing a child's appropriate request for help rather than only reacting to disruption. / Shaping: Reinforcing progressively closer steps as a child learns a complex skill. [Concept: Differential reinforcement and Shaping]

0434. B - Consequence: Examining what happens immediately after a behavior and whether it may reinforce it. / Positive reinforcement: Providing a valued consequence contingent on a clearly defined target behavior. [Concept: Consequence and Positive reinforcement]

0435. B - Functional behavior assessment: A systematic process for identifying antecedents, behavior, consequences, and likely function. / Antecedent: An event or condition that occurs before a behavior and may set the occasion for it. [Concept: Functional behavior assessment and Antecedent]

0436. C - Functional behavior assessment: Collecting direct contextual data before selecting an intervention for a recurring behavior. / Generalization: Practicing a skill with varied people and settings so it is more likely to transfer. [Concept: Functional behavior assessment and Generalization]

0437. C - Positive reinforcement [Concept: Positive reinforcement]

0438. B - Positive reinforcement: Adding a consequence after behavior that increases the behavior's future frequency. / Shaping: Reinforcing successive approximations toward a target behavior. [Concept: Positive reinforcement and Shaping]

0439. B - Consequence: Examining what happens immediately after a behavior and whether it may reinforce it. / Generalization: Practicing a skill with varied people and settings so it is more likely to transfer. [Concept: Consequence and Generalization]

0440. A - Differential reinforcement [Concept: Differential reinforcement]

0441. C - Shaping [Concept: Shaping]

0442. B - Negative reinforcement: Recognizing when task removal following refusal could unintentionally strengthen refusal. / Behavioral data fidelity: Checking whether agreed steps were implemented before judging the intervention ineffective. [Concept: Negative reinforcement and Behavioral data fidelity]

0443. D - Antecedent: An event or condition that occurs before a behavior and may set the occasion for it. / Behavioral data fidelity: Consistent implementation and recording of an intervention as designed. [Concept: Antecedent and Behavioral data fidelity]

0444. B - Positive reinforcement [Concept: Positive reinforcement]

0445. D - Functional behavior assessment: Collecting direct contextual data before selecting an intervention for a recurring behavior. / Generalization: Practicing a skill with varied people and settings so it is more likely to transfer. [Concept: Functional behavior assessment and Generalization]

0446. D - Antecedent: An event or condition that occurs before a behavior and may set the occasion for it. / Differential reinforcement: Reinforcing a specified appropriate or alternative behavior while withholding reinforcement for another response when safe and appropriate. [Concept: Antecedent and Differential reinforcement]

0447. A - Behavioral data fidelity [Concept: Behavioral data fidelity]

0448. D - Generalization [Concept: Generalization]

0449. B - Behavioral data fidelity [Concept: Behavioral data fidelity]

0450. C - Functional behavior assessment [Concept: Functional behavior assessment]

0451. D - Differential reinforcement: Reinforcing a child's appropriate request for help rather than only reacting to disruption. / Generalization: Practicing a skill with varied people and settings so it is more likely to transfer. [Concept: Differential reinforcement and Generalization]

0452. B - Consequence [Concept: Consequence]

0453. B - Functional behavior assessment [Concept: Functional behavior assessment]

0454. B - Behavioral data fidelity [Concept: Behavioral data fidelity]

0455. B - Positive reinforcement: Adding a consequence after behavior that increases the behavior's future frequency. / Shaping: Reinforcing successive approximations toward a target behavior. [Concept: Positive reinforcement and Shaping]

0456. C - Generalization [Concept: Generalization]

0457. D - Extinction burst [Concept: Extinction burst]

0458. B - Antecedent: An event or condition that occurs before a behavior and may set the occasion for it. / Positive reinforcement: Adding a consequence after behavior that increases the behavior's future frequency. [Concept: Antecedent and Positive reinforcement]

0459. C - Reinforcing progressively closer steps as a child learns a complex skill. [Concept: Shaping]

0460. A - Positive reinforcement [Concept: Positive reinforcement]

0461. C - Reinforcing progressively closer steps as a child learns a complex skill. [Concept: Shaping]

0462. B - Antecedent: An event or condition that occurs before a behavior and may set the occasion for it. / Negative reinforcement: Removing or reducing an aversive condition after behavior, thereby increasing that behavior. [Concept: Antecedent and Negative reinforcement]

0463. A - Differential reinforcement: Reinforcing a specified appropriate or alternative behavior while withholding reinforcement for another response when safe and appropriate. / Behavioral data fidelity: Consistent implementation and recording of an intervention as designed. [Concept: Differential reinforcement and Behavioral data fidelity]

0464. C - Behavioral data fidelity [Concept: Behavioral data fidelity]

0465. C - Functional behavior assessment: Collecting direct contextual data before selecting an intervention for a recurring behavior. / Generalization: Practicing a skill with varied people and settings so it is more likely to transfer. [Concept: Functional behavior assessment and Generalization]

0466. C - Positive reinforcement: Providing a valued consequence contingent on a clearly defined target behavior. / Differential reinforcement: Reinforcing a child's appropriate request for help rather than only reacting to disruption. [Concept: Positive reinforcement and Differential reinforcement]

0467. B - Generalization [Concept: Generalization]

0468. C - Consequence [Concept: Consequence]

0469. C - Positive reinforcement [Concept: Positive reinforcement]

0470. D - Differential reinforcement [Concept: Differential reinforcement]

0471. A - Positive reinforcement: Providing a valued consequence contingent on a clearly defined target behavior. / Differential reinforcement: Reinforcing a child's appropriate request for help rather than only reacting to disruption. [Concept: Positive reinforcement and Differential reinforcement]

0472. B - Consequence: An event following a behavior that can influence the likelihood of that behavior in the future. / Behavioral data fidelity: Consistent implementation and recording of an intervention as designed. [Concept: Consequence and Behavioral data fidelity]

0473. A - Antecedent: Noting the instruction, transition, or setting that reliably precedes a behavior. / Positive reinforcement: Providing a valued consequence contingent on a clearly defined target behavior. [Concept: Antecedent and Positive reinforcement]

0474. C - Adding a consequence after behavior that increases the behavior's future frequency. [Concept: Positive reinforcement]

0475. A - Positive reinforcement: Adding a consequence after behavior that increases the behavior's future frequency. / Negative reinforcement: Removing or reducing an aversive condition after behavior, thereby increasing that behavior. [Concept: Positive reinforcement and Negative reinforcement]

0476. B - Consequence: Examining what happens immediately after a behavior and whether it may reinforce it. / Shaping: Reinforcing progressively closer steps as a child learns a complex skill. [Concept: Consequence and Shaping]

0477. B - Negative reinforcement: Recognizing when task removal following refusal could unintentionally strengthen refusal. / Shaping: Reinforcing progressively closer steps as a child learns a complex skill. [Concept: Negative reinforcement and Shaping]

0478. B - Positive reinforcement: Providing a valued consequence contingent on a clearly defined target behavior. / Extinction burst: Planning support and safety before changing a reinforcement pattern that may briefly intensify behavior. [Concept: Positive reinforcement and Extinction burst]

0479. B - Antecedent: An event or condition that occurs before a behavior and may set the occasion for it. / Behavioral data fidelity: Consistent implementation and recording of an intervention as designed. [Concept: Antecedent and Behavioral data fidelity]

CAC.922 | Behavioral Interventions for Children

QUESTION | CORRECT OPTION AND CONCEPT

0480. A - Providing a valued consequence contingent on a clearly defined target behavior. [Concept: Positive reinforcement]

0481. D - Antecedent: Noting the instruction, transition, or setting that reliably precedes a behavior. / Behavioral data fidelity: Checking whether agreed steps were implemented before judging the intervention ineffective. [Concept: Antecedent and Behavioral data fidelity]

0482. C - Consequence [Concept: Consequence]

0483. A - Differential reinforcement: Reinforcing a specified appropriate or alternative behavior while withholding reinforcement for another response when safe and appropriate. / Extinction burst: A temporary increase in a behavior when reinforcement that previously maintained it is no longer provided. [Concept: Differential reinforcement and Extinction burst]

0484. B - Functional behavior assessment [Concept: Functional behavior assessment]

0485. D - Extinction burst: Planning support and safety before changing a reinforcement pattern that may briefly intensify behavior. / Generalization: Practicing a skill with varied people and settings so it is more likely to transfer. [Concept: Extinction burst and Generalization]

0642. C - Negative reinforcement: Recognizing when task removal following refusal could unintentionally strengthen refusal. / Shaping: Reinforcing progressively closer steps as a child learns a complex skill. [Concept: Negative reinforcement and Shaping]

0643. B - Consequence: Examining what happens immediately after a behavior and whether it may reinforce it. / Positive reinforcement: Providing a valued consequence contingent on a clearly defined target behavior. [Concept: Consequence and Positive reinforcement]

0644. A - Functional behavior assessment: A systematic process for identifying antecedents, behavior, consequences, and likely function. / Shaping: Reinforcing successive approximations toward a target behavior. [Concept: Functional behavior assessment and Shaping]

0645. B - Functional behavior assessment: Collecting direct contextual data before selecting an intervention for a recurring behavior. / Extinction burst: Planning support and safety before changing a reinforcement pattern that may briefly intensify behavior. [Concept: Functional behavior assessment and Extinction burst]

0646. B - Positive reinforcement: Adding a consequence after behavior that increases the behavior's future frequency. / Generalization: Transfer of a learned behavior or skill to people, settings, or materials beyond training conditions. [Concept: Positive reinforcement and Generalization]

0647. A - Antecedent: Noting the instruction, transition, or setting that reliably precedes a behavior. / Behavioral data fidelity: Checking whether agreed steps were implemented before judging the intervention ineffective. [Concept: Antecedent and Behavioral data fidelity]

0648. A - Positive reinforcement [Concept: Positive reinforcement]

0649. A - Antecedent: An event or condition that occurs before a behavior and may set the occasion for it. / Extinction burst: A temporary increase in a behavior when reinforcement that previously maintained it is no longer provided. [Concept: Antecedent and Extinction burst]

0650. D - Behavioral data fidelity [Concept: Behavioral data fidelity]

0651. A - Functional behavior assessment: A systematic process for identifying antecedents, behavior, consequences, and likely function. / Negative reinforcement: Removing or reducing an aversive condition after behavior, thereby increasing that behavior. [Concept: Functional behavior assessment and Negative reinforcement]

0652. D - Behavioral data fidelity [Concept: Behavioral data fidelity]

0653. C - Behavioral data fidelity [Concept: Behavioral data fidelity]

0654. B - Generalization [Concept: Generalization]

0655. A - Antecedent: Noting the instruction, transition, or setting that reliably precedes a behavior. / Positive reinforcement: Providing a valued consequence contingent on a clearly defined target behavior. [Concept: Antecedent and Positive reinforcement]

0656. D - Consequence: An event following a behavior that can influence the likelihood of that behavior in the future. / Differential reinforcement: Reinforcing a specified appropriate or alternative behavior while withholding reinforcement for another response when safe and appropriate. [Concept: Consequence and Differential reinforcement]

0657. A - Functional behavior assessment: A systematic process for identifying antecedents, behavior, consequences, and likely function. / Negative reinforcement: Removing or reducing an aversive condition after behavior, thereby increasing that behavior. [Concept: Functional behavior assessment and Negative reinforcement]

0658. A - Behavioral data fidelity [Concept: Behavioral data fidelity]

0659. A - Positive reinforcement [Concept: Positive reinforcement]

0660. C - Behavioral data fidelity [Concept: Behavioral data fidelity]

0661. C - Noting the instruction, transition, or setting that reliably precedes a behavior. [Concept: Antecedent]

CAC.922 | Behavioral Interventions for Children

QUESTION | CORRECT OPTION AND CONCEPT

0662. C - Functional behavior assessment: Collecting direct contextual data before selecting an intervention for a recurring behavior. / Behavioral data fidelity: Checking whether agreed steps were implemented before judging the intervention ineffective. [Concept: Functional behavior assessment and Behavioral data fidelity]

0663. B - Functional behavior assessment: A systematic process for identifying antecedents, behavior, consequences, and likely function. / Consequence: An event following a behavior that can influence the likelihood of that behavior in the future. [Concept: Functional behavior assessment and Consequence]

0664. B - Consequence [Concept: Consequence]

0665. D - Consequence: Examining what happens immediately after a behavior and whether it may reinforce it. / Behavioral data fidelity: Checking whether agreed steps were implemented before judging the intervention ineffective. [Concept: Consequence and Behavioral data fidelity]

0666. A - Antecedent [Concept: Antecedent]

0667. B - Generalization: Practicing a skill with varied people and settings so it is more likely to transfer. / Behavioral data fidelity: Checking whether agreed steps were implemented before judging the intervention ineffective. [Concept: Generalization and Behavioral data fidelity]

0858. A - Positive reinforcement [Concept: Positive reinforcement]

0859. C - Behavioral data fidelity [Concept: Behavioral data fidelity]

0860. D - Consequence: Examining what happens immediately after a behavior and whether it may reinforce it. / Generalization: Practicing a skill with varied people and settings so it is more likely to transfer. [Concept: Consequence and Generalization]

0861. C - Functional behavior assessment: Collecting direct contextual data before selecting an intervention for a recurring behavior. / Consequence: Examining what happens immediately after a behavior and whether it may reinforce it. [Concept: Functional behavior assessment and Consequence]

0862. B - Negative reinforcement [Concept: Negative reinforcement]

0863. A - Differential reinforcement [Concept: Differential reinforcement]

0864. D - Extinction burst [Concept: Extinction burst]

0865. C - Positive reinforcement: Adding a consequence after behavior that increases the behavior's future frequency. / Behavioral data fidelity: Consistent implementation and recording of an intervention as designed. [Concept: Positive reinforcement and Behavioral data fidelity]

0866. D - Negative reinforcement [Concept: Negative reinforcement]

0867. D - Antecedent: Noting the instruction, transition, or setting that reliably precedes a behavior. / Behavioral data fidelity: Checking whether agreed steps were implemented before judging the intervention ineffective. [Concept: Antecedent and Behavioral data fidelity]

0868. C - Functional behavior assessment [Concept: Functional behavior assessment]

0869. A - Differential reinforcement [Concept: Differential reinforcement]

0870. B - Positive reinforcement [Concept: Positive reinforcement]

0871. D - Consequence: An event following a behavior that can influence the likelihood of that behavior in the future. / Shaping: Reinforcing successive approximations toward a target behavior. [Concept: Consequence and Shaping]

0872. B - Differential reinforcement: Reinforcing a child's appropriate request for help rather than only reacting to disruption. / Extinction burst: Planning support and safety before changing a reinforcement pattern that may briefly intensify behavior. [Concept: Differential reinforcement and Extinction burst]

0873. A - Positive reinforcement [Concept: Positive reinforcement]

0874. A - Collecting direct contextual data before selecting an intervention for a recurring behavior. [Concept: Functional behavior assessment]

0875. D - Negative reinforcement [Concept: Negative reinforcement]

0876. A - Differential reinforcement: Reinforcing a child's appropriate request for help rather than only reacting to disruption. / Generalization: Practicing a skill with varied people and settings so it is more likely to transfer. [Concept: Differential reinforcement and Generalization]

0877. D - Consequence: Examining what happens immediately after a behavior and whether it may reinforce it. / Differential reinforcement: Reinforcing a child's appropriate request for help rather than only reacting to disruption. [Concept: Consequence and Differential reinforcement]

0878. D - A systematic process for identifying antecedents, behavior, consequences, and likely function. [Concept: Functional behavior assessment]

0879. A - Consequence: An event following a behavior that can influence the likelihood of that behavior in the future. / Generalization: Transfer of a learned behavior or skill to people, settings, or materials beyond training conditions. [Concept: Consequence and Generalization]

0880. A - Differential reinforcement [Concept: Differential reinforcement]

0881. D - Generalization [Concept: Generalization]

0882. D - An event following a behavior that can influence the likelihood of that behavior in the future. [Concept: Consequence]

0883. B - Recognizing when task removal following refusal could unintentionally strengthen refusal. [Concept: Negative reinforcement]

0884. A - Functional behavior assessment: A systematic process for identifying antecedents, behavior, consequences, and likely function. / Positive reinforcement: Adding a consequence after behavior that increases the behavior's future frequency. [Concept: Functional behavior assessment and Positive reinforcement]

0885. A - Antecedent: Noting the instruction, transition, or setting that reliably precedes a behavior. / Consequence: Examining what happens immediately after a behavior and whether it may reinforce it. [Concept: Antecedent and Consequence]

0886. A - Extinction burst [Concept: Extinction burst]

0887. D - Antecedent [Concept: Antecedent]

0888. C - Consequence: An event following a behavior that can influence the likelihood of that behavior in the future. / Behavioral data fidelity: Consistent implementation and recording of an intervention as designed. [Concept: Consequence and Behavioral data fidelity]

0889. A - Consequence [Concept: Consequence]

0890. D - Antecedent [Concept: Antecedent]

0891. A - Negative reinforcement [Concept: Negative reinforcement]

0892. A - Planning support and safety before changing a reinforcement pattern that may briefly intensify behavior. [Concept: Extinction burst]

0893. C - Generalization [Concept: Generalization]

0894. B - Shaping [Concept: Shaping]

0895. D - Consequence [Concept: Consequence]

0896. B - Planning support and safety before changing a reinforcement pattern that may briefly intensify behavior. [Concept: Extinction burst]

0897. D - Generalization [Concept: Generalization]

0898. B - Shaping: Reinforcing progressively closer steps as a child learns a complex skill. / Extinction burst: Planning support and safety before changing a reinforcement pattern that may briefly intensify behavior. [Concept: Shaping and Extinction burst]

0899. B - Shaping [Concept: Shaping]

0900. A - Consistent implementation and recording of an intervention as designed. [Concept: Behavioral data fidelity]

0901. A - Collecting direct contextual data before selecting an intervention for a recurring behavior. [Concept: Functional behavior assessment]

0902. B - Functional behavior assessment: Collecting direct contextual data before selecting an intervention for a recurring behavior. / Positive reinforcement: Providing a valued consequence contingent on a clearly defined target behavior. [Concept: Functional behavior assessment and Positive reinforcement]

0903. A - Differential reinforcement [Concept: Differential reinforcement]

0904. D - Negative reinforcement: Recognizing when task removal following refusal could unintentionally strengthen refusal. / Behavioral data fidelity: Checking whether agreed steps were implemented before judging the intervention ineffective. [Concept: Negative reinforcement and Behavioral data fidelity]

0905. C - Antecedent: Noting the instruction, transition, or setting that reliably precedes a behavior. / Negative reinforcement: Recognizing when task removal following refusal could unintentionally strengthen refusal. [Concept: Antecedent and Negative reinforcement]

0906. D - Functional behavior assessment: Collecting direct contextual data before selecting an intervention for a recurring behavior. / Negative reinforcement: Recognizing when task removal following refusal could unintentionally strengthen refusal. [Concept: Functional behavior assessment and Negative reinforcement]

0907. D - Functional behavior assessment [Concept: Functional behavior assessment]

0908. B - Negative reinforcement: Recognizing when task removal following refusal could unintentionally strengthen refusal. / Differential reinforcement: Reinforcing a child's appropriate request for help rather than only reacting to disruption. [Concept: Negative reinforcement and Differential reinforcement]

0909. A - Functional behavior assessment [Concept: Functional behavior assessment]

CAC.922 | Behavioral Interventions for Children

QUESTION | CORRECT OPTION AND CONCEPT

0910. C - Negative reinforcement: Removing or reducing an aversive condition after behavior, thereby increasing that behavior. / Extinction burst: A temporary increase in a behavior when reinforcement that previously maintained it is no longer provided. [Concept: Negative reinforcement and Extinction burst]

0911. C - Consequence: Examining what happens immediately after a behavior and whether it may reinforce it. / Positive reinforcement: Providing a valued consequence contingent on a clearly defined target behavior. [Concept: Consequence and Positive reinforcement]

0912. A - An event or condition that occurs before a behavior and may set the occasion for it. [Concept: Antecedent]

0913. C - Positive reinforcement: Adding a consequence after behavior that increases the behavior's future frequency. / Extinction burst: A temporary increase in a behavior when reinforcement that previously maintained it is no longer provided. [Concept: Positive reinforcement and Extinction burst]

0914. B - Shaping [Concept: Shaping]

0915. B - Extinction burst [Concept: Extinction burst]

0916. D - A systematic process for identifying antecedents, behavior, consequences, and likely function. [Concept: Functional behavior assessment]

0917. A - Shaping [Concept: Shaping]

0918. A - Positive reinforcement: Providing a valued consequence contingent on a clearly defined target behavior. / Shaping: Reinforcing progressively closer steps as a child learns a complex skill. [Concept: Positive reinforcement and Shaping]

0919. B - Antecedent [Concept: Antecedent]

0920. C - Consequence: An event following a behavior that can influence the likelihood of that behavior in the future. / Differential reinforcement: Reinforcing a specified appropriate or alternative behavior while withholding reinforcement for another response when safe and appropriate. [Concept: Consequence and Differential reinforcement]

0921. B - Behavioral data fidelity [Concept: Behavioral data fidelity]

0922. C - Shaping: Reinforcing successive approximations toward a target behavior. / Behavioral data fidelity: Consistent implementation and recording of an intervention as designed. [Concept: Shaping and Behavioral data fidelity]

0923. C - Removing or reducing an aversive condition after behavior, thereby increasing that behavior. [Concept: Negative reinforcement]

0924. A - Antecedent: An event or condition that occurs before a behavior and may set the occasion for it. / Consequence: An event following a behavior that can influence the likelihood of that behavior in the future. [Concept: Antecedent and Consequence]

0925. A - Reinforcing a specified appropriate or alternative behavior while withholding reinforcement for another response when safe and appropriate. [Concept: Differential reinforcement]

0926. D - Negative reinforcement [Concept: Negative reinforcement]

0927. C - Negative reinforcement [Concept: Negative reinforcement]

0928. B - Functional behavior assessment: A systematic process for identifying antecedents, behavior, consequences, and likely function. / Extinction burst: A temporary increase in a behavior when reinforcement that previously maintained it is no longer provided. [Concept: Functional behavior assessment and Extinction burst]

0929. B - Negative reinforcement: Recognizing when task removal following refusal could unintentionally strengthen refusal. / Shaping: Reinforcing progressively closer steps as a child learns a complex skill. [Concept: Negative reinforcement and Shaping]

0930. A - Negative reinforcement: Recognizing when task removal following refusal could unintentionally strengthen refusal. / Behavioral data fidelity: Checking whether agreed steps were implemented before judging the intervention ineffective. [Concept: Negative reinforcement and Behavioral data fidelity]

0931. D - Antecedent [Concept: Antecedent]

0932. A - Reinforcing progressively closer steps as a child learns a complex skill. [Concept: Shaping]

0933. A - Consequence [Concept: Consequence]

0934. C - Differential reinforcement: Reinforcing a child's appropriate request for help rather than only reacting to disruption. / Behavioral data fidelity: Checking whether agreed steps were implemented before judging the intervention ineffective. [Concept: Differential reinforcement and Behavioral data fidelity]

0935. C - Functional behavior assessment: Collecting direct contextual data before selecting an intervention for a recurring behavior. / Shaping: Reinforcing progressively closer steps as a child learns a complex skill. [Concept: Functional behavior assessment and Shaping]

0936. A - Positive reinforcement: Providing a valued consequence contingent on a clearly defined target behavior. / Differential reinforcement: Reinforcing a child's appropriate request for help rather than only reacting to disruption. [Concept: Positive reinforcement and Differential reinforcement]

0937. D - Positive reinforcement: Providing a valued consequence contingent on a clearly defined target behavior. / Negative reinforcement: Recognizing when task removal following refusal could unintentionally strengthen refusal. [Concept: Positive reinforcement and Negative reinforcement]

0938. B - Shaping: Reinforcing progressively closer steps as a child learns a complex skill. / Extinction burst: Planning support and safety before changing a reinforcement pattern that may briefly intensify behavior. [Concept: Shaping and Extinction burst]

CAC.923 | Advanced Research Methodology

QUESTION | CORRECT OPTION AND CONCEPT

0001. C - Mixed-methods design: Intentional integration of qualitative and quantitative data to address complementary aspects of a research question. / Mediation: A model in which an intervening variable may explain how or through what process an exposure relates to an outcome. [Concept: Mixed-methods design and Mediation]

0002. D - Multilevel modeling: A statistical approach for nested data that accounts for dependence among observations within groups. / Missing data mechanism: A description of how the probability of missingness relates to observed or unobserved values. [Concept: Multilevel modeling and Missing data mechanism]

0003. D - Mediation [Concept: Mediation]

0004. B - Mixed-methods design: Intentional integration of qualitative and quantitative data to address complementary aspects of a research question. / Effect size: A quantitative index of the magnitude of a relationship or difference, interpreted with context and uncertainty. [Concept: Mixed-methods design and Effect size]

0005. D - Mixed-methods design: Intentional integration of qualitative and quantitative data to address complementary aspects of a research question. / Moderation: A model in which the strength or direction of a relationship differs depending on another variable. [Concept: Mixed-methods design and Moderation]

0006. D - Multilevel modeling [Concept: Multilevel modeling]

0007. A - Bayesian inference: Reporting how data update a prior distribution while making assumptions transparent. / Reproducible research: Preserving documented code, decisions, and materials so another researcher can audit the analysis. [Concept: Bayesian inference and Reproducible research]

0008. D - Thematic analysis [Concept: Thematic analysis]

0009. B - Missing data mechanism: Examining whether dropout depends on observed factors or unobserved outcomes before selecting handling methods. / Bayesian inference: Reporting how data update a prior distribution while making assumptions transparent. [Concept: Missing data mechanism and Bayesian inference]

0010. A - Thematic analysis [Concept: Thematic analysis]

0011. D - Coding transcripts and developing themes that are grounded in participant accounts. [Concept: Thematic analysis]

0012. D - Thematic analysis [Concept: Thematic analysis]

0013. C - Measurement invariance [Concept: Measurement invariance]

0014. C - Missing data mechanism: A description of how the probability of missingness relates to observed or unobserved values. / Moderation: A model in which the strength or direction of a relationship differs depending on another variable. [Concept: Missing data mechanism and Moderation]

0015. B - Moderation [Concept: Moderation]

0016. C - Bayesian inference [Concept: Bayesian inference]

0017. A - Mediation [Concept: Mediation]

0018. D - Effect size: Reporting magnitude and confidence intervals rather than relying on statistical significance alone. / Mediation: Testing a hypothesized pathway while avoiding causal claims unsupported by design. [Concept: Effect size and Mediation]

0019. B - Multilevel modeling [Concept: Multilevel modeling]

0020. A - Thematic analysis: Coding transcripts and developing themes that are grounded in participant accounts. / Reproducible research: Preserving documented code, decisions, and materials so another researcher can audit the analysis. [Concept: Thematic analysis and Reproducible research]

0021. D - Thematic analysis: A method for identifying and interpreting patterns of meaning in qualitative data. / Bayesian inference: Updating probability distributions for unknown quantities by combining prior information with observed data. [Concept: Thematic analysis and Bayesian inference]

0022. C - Mixed-methods design: Intentional integration of qualitative and quantitative data to address complementary aspects of a research question. / Thematic analysis: A method for identifying and interpreting patterns of meaning in qualitative data. [Concept: Mixed-methods design and Thematic analysis]

0023. A - Thematic analysis: A method for identifying and interpreting patterns of meaning in qualitative data. / Missing data mechanism: A description of how the probability of missingness relates to observed or unobserved values. [Concept: Thematic analysis and Missing data mechanism]

0024. C - Multilevel modeling: A statistical approach for nested data that accounts for dependence among observations within groups. / Bayesian inference: Updating probability distributions for unknown quantities by combining prior information with observed data. [Concept: Multilevel modeling and Bayesian inference]

0025. C - Effect size: A quantitative index of the magnitude of a relationship or difference, interpreted with context and uncertainty. / Measurement invariance: Evidence that a measure functions comparably across groups or time points for intended comparisons. [Concept: Effect size and Measurement invariance]

0026. C - Mediation: A model in which an intervening variable may explain how or through what process an exposure relates to an outcome. / Reproducible research: Research practices that make data processing, analytic decisions, and outputs transparent and checkable. [Concept: Mediation and Reproducible research]

0027. C - Measurement invariance [Concept: Measurement invariance]

0028. D - Effect size [Concept: Effect size]

0029. D - Bayesian inference [Concept: Bayesian inference]

0030. B - Measurement invariance: Testing whether items measure a construct comparably before comparing group scores. / Moderation: Examining whether intervention effects vary across a prespecified context or participant characteristic. [Concept: Measurement invariance and Moderation]

0031. B - Reproducible research [Concept: Reproducible research]

0032. A - Missing data mechanism: A description of how the probability of missingness relates to observed or unobserved values. / Measurement invariance: Evidence that a measure functions comparably across groups or time points for intended comparisons. [Concept: Missing data mechanism and Measurement invariance]

0033. B - Moderation [Concept: Moderation]

0034. C - Mixed-methods design: Intentional integration of qualitative and quantitative data to address complementary aspects of a research question. / Thematic analysis: A method for identifying and interpreting patterns of meaning in qualitative data. [Concept: Mixed-methods design and Thematic analysis]

0035. C - Effect size [Concept: Effect size]

0036. C - Reproducible research [Concept: Reproducible research]

0037. D - Mixed-methods design [Concept: Mixed-methods design]

0038. B - Combining outcome data with interviews and explicitly integrating findings. [Concept: Mixed-methods design]

0039. B - Thematic analysis: A method for identifying and interpreting patterns of meaning in qualitative data. / Reproducible research: Research practices that make data processing, analytic decisions, and outputs transparent and checkable. [Concept: Thematic analysis and Reproducible research]

0040. D - Reproducible research [Concept: Reproducible research]

0041. D - Effect size [Concept: Effect size]

0042. B - Reproducible research [Concept: Reproducible research]

0043. C - Mixed-methods design: Intentional integration of qualitative and quantitative data to address complementary aspects of a research question. / Missing data mechanism: A description of how the probability of missingness relates to observed or unobserved values. [Concept: Mixed-methods design and Missing data mechanism]

0044. A - Mixed-methods design: Combining outcome data with interviews and explicitly integrating findings. / Measurement invariance: Testing whether items measure a construct comparably before comparing group scores. [Concept: Mixed-methods design and Measurement invariance]

0045. D - Missing data mechanism [Concept: Missing data mechanism]

0046. D - Thematic analysis [Concept: Thematic analysis]

0047. C - Bayesian inference [Concept: Bayesian inference]

0048. A - Measurement invariance [Concept: Measurement invariance]

0049. C - Missing data mechanism: A description of how the probability of missingness relates to observed or unobserved values. / Mediation: A model in which an intervening variable may explain how or through what process an exposure relates to an outcome. [Concept: Missing data mechanism and Mediation]

0050. B - Measurement invariance: Testing whether items measure a construct comparably before comparing group scores. / Mediation: Testing a hypothesized pathway while avoiding causal claims unsupported by design. [Concept: Measurement invariance and Mediation]

0051. C - Reproducible research [Concept: Reproducible research]

0052. A - Measurement invariance: Evidence that a measure functions comparably across groups or time points for intended comparisons. / Bayesian inference: Updating probability distributions for unknown quantities by combining prior information with observed data. [Concept: Measurement invariance and Bayesian inference]

0053. D - Mixed-methods design: Combining outcome data with interviews and explicitly integrating findings. / Thematic analysis: Coding transcripts and developing themes that are grounded in participant accounts. [Concept: Mixed-methods design and Thematic analysis]

0054. A - Effect size: Reporting magnitude and confidence intervals rather than relying on statistical significance alone. / Moderation: Examining whether intervention effects vary across a prespecified context or participant characteristic. [Concept: Effect size and Moderation]

0055. D - Measurement invariance: Testing whether items measure a construct comparably before comparing group scores. / Mediation: Testing a hypothesized pathway while avoiding causal claims unsupported by design. [Concept: Measurement invariance and Mediation]

0056. C - Mixed-methods design: Combining outcome data with interviews and explicitly integrating findings. / Multilevel modeling: Modeling students nested within schools instead of treating every observation as independent. [Concept: Mixed-methods design and Multilevel modeling]

0057. D - Multilevel modeling: Modeling students nested within schools instead of treating every observation as independent. / Missing data mechanism: Examining whether dropout depends on observed factors or unobserved outcomes before selecting handling methods. [Concept: Multilevel modeling and Missing data mechanism]

0078. D - Thematic analysis: Coding transcripts and developing themes that are grounded in participant accounts. / Measurement invariance: Testing whether items measure a construct comparably before comparing group scores. [Concept: Thematic analysis and Measurement invariance]

0079. A - Mixed-methods design: Intentional integration of qualitative and quantitative data to address complementary aspects of a research question. / Missing data mechanism: A description of how the probability of missingness relates to observed or unobserved values. [Concept: Mixed-methods design and Missing data mechanism]

0080. D - Moderation [Concept: Moderation]

0081. B - Reproducible research [Concept: Reproducible research]

0082. A - A description of how the probability of missingness relates to observed or unobserved values. [Concept: Missing data mechanism]

0083. A - Missing data mechanism [Concept: Missing data mechanism]

0084. A - Multilevel modeling [Concept: Multilevel modeling]

0085. C - Measurement invariance [Concept: Measurement invariance]

0086. C - Effect size: Reporting magnitude and confidence intervals rather than relying on statistical significance alone. / Bayesian inference: Reporting how data update a prior distribution while making assumptions transparent. [Concept: Effect size and Bayesian inference]

0087. C - Thematic analysis [Concept: Thematic analysis]

0088. C - Multilevel modeling: A statistical approach for nested data that accounts for dependence among observations within groups. / Mediation: A model in which an intervening variable may explain how or through what process an exposure relates to an outcome. [Concept: Multilevel modeling and Mediation]

0089. C - Moderation [Concept: Moderation]

0090. A - Thematic analysis: A method for identifying and interpreting patterns of meaning in qualitative data. / Bayesian inference: Updating probability distributions for unknown quantities by combining prior information with observed data. [Concept: Thematic analysis and Bayesian inference]

0091. A - A model in which an intervening variable may explain how or through what process an exposure relates to an outcome. [Concept: Mediation]

0092. A - Bayesian inference [Concept: Bayesian inference]

0093. A - Coding transcripts and developing themes that are grounded in participant accounts. [Concept: Thematic analysis]

0094. D - Multilevel modeling: A statistical approach for nested data that accounts for dependence among observations within groups. / Reproducible research: Research practices that make data processing, analytic decisions, and outputs transparent and checkable. [Concept: Multilevel modeling and Reproducible research]

0095. A - Mixed-methods design [Concept: Mixed-methods design]

0096. A - A description of how the probability of missingness relates to observed or unobserved values. [Concept: Missing data mechanism]

0097. C - Bayesian inference [Concept: Bayesian inference]

0098. A - Missing data mechanism: Examining whether dropout depends on observed factors or unobserved outcomes before selecting handling methods. / Mediation: Testing a hypothesized pathway while avoiding causal claims unsupported by design. [Concept: Missing data mechanism and Mediation]

0099. C - Effect size: Reporting magnitude and confidence intervals rather than relying on statistical significance alone. / Measurement invariance: Testing whether items measure a construct comparably before comparing group scores. [Concept: Effect size and Measurement invariance]

0100. B - Reproducible research [Concept: Reproducible research]

0101. A - Reproducible research [Concept: Reproducible research]

0102. B - Mixed-methods design: Intentional integration of qualitative and quantitative data to address complementary aspects of a research question. / Bayesian inference: Updating probability distributions for unknown quantities by combining prior information with observed data. [Concept: Mixed-methods design and Bayesian inference]

0103. C - Multilevel modeling [Concept: Multilevel modeling]

0104. D - Research practices that make data processing, analytic decisions, and outputs transparent and checkable. [Concept: Reproducible research]

0105. A - Missing data mechanism: A description of how the probability of missingness relates to observed or unobserved values. / Bayesian inference: Updating probability distributions for unknown quantities by combining prior information with observed data. [Concept: Missing data mechanism and Bayesian inference]

0106. C - Mediation: Testing a hypothesized pathway while avoiding causal claims unsupported by design. / Reproducible research: Preserving documented code, decisions, and materials so another researcher can audit the analysis. [Concept: Mediation and Reproducible research]

0107. C - Mixed-methods design: Intentional integration of qualitative and quantitative data to address complementary aspects of a research question. / Measurement invariance: Evidence that a measure functions comparably across groups or time points for intended comparisons. [Concept: Mixed-methods design and Measurement invariance]

0108. D - Thematic analysis [Concept: Thematic analysis]

0109. A - Measurement invariance: Testing whether items measure a construct comparably before comparing group scores. / Mediation: Testing a hypothesized pathway while avoiding causal claims unsupported by design. [Concept: Measurement invariance and Mediation]

0110. B - Multilevel modeling: A statistical approach for nested data that accounts for dependence among observations within groups. / Missing data mechanism: A description of how the probability of missingness relates to observed or unobserved values. [Concept: Multilevel modeling and Missing data mechanism]

0111. D - Thematic analysis: A method for identifying and interpreting patterns of meaning in qualitative data. / Multilevel modeling: A statistical approach for nested data that accounts for dependence among observations within groups. [Concept: Thematic analysis and Multilevel modeling]

0112. A - Measurement invariance [Concept: Measurement invariance]

0113. A - Effect size [Concept: Effect size]

0114. D - A model in which the strength or direction of a relationship differs depending on another variable. [Concept: Moderation]

0115. B - Moderation [Concept: Moderation]

0116. C - Thematic analysis: Coding transcripts and developing themes that are grounded in participant accounts. / Moderation: Examining whether intervention effects vary across a prespecified context or participant characteristic. [Concept: Thematic analysis and Moderation]

0117. D - Mixed-methods design: Combining outcome data with interviews and explicitly integrating findings. / Measurement invariance: Testing whether items measure a construct comparably before comparing group scores. [Concept: Mixed-methods design and Measurement invariance]

CAC.923 | Advanced Research Methodology

QUESTION | CORRECT OPTION AND CONCEPT

0118. B - Missing data mechanism: A description of how the probability of missingness relates to observed or unobserved values. / Effect size: A quantitative index of the magnitude of a relationship or difference, interpreted with context and uncertainty. [Concept: Missing data mechanism and Effect size]

0119. A - Measurement invariance [Concept: Measurement invariance]

0120. C - Reproducible research [Concept: Reproducible research]

0121. C - Moderation: A model in which the strength or direction of a relationship differs depending on another variable. / Reproducible research: Research practices that make data processing, analytic decisions, and outputs transparent and checkable. [Concept: Moderation and Reproducible research]

0122. A - Thematic analysis [Concept: Thematic analysis]

0123. B - Mixed-methods design: Intentional integration of qualitative and quantitative data to address complementary aspects of a research question. / Multilevel modeling: A statistical approach for nested data that accounts for dependence among observations within groups. [Concept: Mixed-methods design and Multilevel modeling]

0124. D - Thematic analysis [Concept: Thematic analysis]

0125. A - Multilevel modeling [Concept: Multilevel modeling]

0126. D - Missing data mechanism [Concept: Missing data mechanism]

0127. B - Mediation [Concept: Mediation]

0128. D - Measurement invariance [Concept: Measurement invariance]

0129. D - Effect size [Concept: Effect size]

0130. D - Effect size [Concept: Effect size]

0131. D - Effect size: A quantitative index of the magnitude of a relationship or difference, interpreted with context and uncertainty. / Measurement invariance: Evidence that a measure functions comparably across groups or time points for intended comparisons. [Concept: Effect size and Measurement invariance]

0132. D - Moderation [Concept: Moderation]

0133. D - Mixed-methods design: Intentional integration of qualitative and quantitative data to address complementary aspects of a research question. / Bayesian inference: Updating probability distributions for unknown quantities by combining prior information with observed data. [Concept: Mixed-methods design and Bayesian inference]

0134. A - Mediation [Concept: Mediation]

0135. A - Mediation [Concept: Mediation]

0136. D - Missing data mechanism: Examining whether dropout depends on observed factors or unobserved outcomes before selecting handling methods. / Effect size: Reporting magnitude and confidence intervals rather than relying on statistical significance alone. [Concept: Missing data mechanism and Effect size]

0137. B - Mixed-methods design [Concept: Mixed-methods design]

0138. A - Thematic analysis: Coding transcripts and developing themes that are grounded in participant accounts. / Bayesian inference: Reporting how data update a prior distribution while making assumptions transparent. [Concept: Thematic analysis and Bayesian inference]

0139. A - Missing data mechanism [Concept: Missing data mechanism]

0140. A - Measurement invariance: Testing whether items measure a construct comparably before comparing group scores. / Reproducible research: Preserving documented code, decisions, and materials so another researcher can audit the analysis. [Concept: Measurement invariance and Reproducible research]

0141. A - Mixed-methods design: Combining outcome data with interviews and explicitly integrating findings. / Mediation: Testing a hypothesized pathway while avoiding causal claims unsupported by design. [Concept: Mixed-methods design and Mediation]

0142. D - Multilevel modeling: Modeling students nested within schools instead of treating every observation as independent. / Measurement invariance: Testing whether items measure a construct comparably before comparing group scores. [Concept: Multilevel modeling and Measurement invariance]

0143. D - Thematic analysis: Coding transcripts and developing themes that are grounded in participant accounts. / Moderation: Examining whether intervention effects vary across a prespecified context or participant characteristic. [Concept: Thematic analysis and Moderation]

0144. B - Mixed-methods design: Combining outcome data with interviews and explicitly integrating findings. / Mediation: Testing a hypothesized pathway while avoiding causal claims unsupported by design. [Concept: Mixed-methods design and Mediation]

0145. D - Reproducible research [Concept: Reproducible research]

0146. C - Mixed-methods design [Concept: Mixed-methods design]

0147. C - A model in which the strength or direction of a relationship differs depending on another variable. [Concept: Moderation]

0148. C - Multilevel modeling: Modeling students nested within schools instead of treating every observation as independent. / Effect size: Reporting magnitude and confidence intervals rather than relying on statistical significance alone. [Concept: Multilevel modeling and Effect size]

0291. C - Measurement invariance: Testing whether items measure a construct comparably before comparing group scores. / Bayesian inference: Reporting how data update a prior distribution while making assumptions transparent. [Concept: Measurement invariance and Bayesian inference]

0292. A - Mixed-methods design: Intentional integration of qualitative and quantitative data to address complementary aspects of a research question. / Thematic analysis: A method for identifying and interpreting patterns of meaning in qualitative data. [Concept: Mixed-methods design and Thematic analysis]

0293. A - Measurement invariance [Concept: Measurement invariance]

0294. B - Mixed-methods design: Combining outcome data with interviews and explicitly integrating findings. / Measurement invariance: Testing whether items measure a construct comparably before comparing group scores. [Concept: Mixed-methods design and Measurement invariance]

0295. D - Multilevel modeling: Modeling students nested within schools instead of treating every observation as independent. / Mediation: Testing a hypothesized pathway while avoiding causal claims unsupported by design. [Concept: Multilevel modeling and Mediation]

0296. A - Missing data mechanism: Examining whether dropout depends on observed factors or unobserved outcomes before selecting handling methods. / Mediation: Testing a hypothesized pathway while avoiding causal claims unsupported by design. [Concept: Missing data mechanism and Mediation]

0297. A - Mixed-methods design: Combining outcome data with interviews and explicitly integrating findings. / Bayesian inference: Reporting how data update a prior distribution while making assumptions transparent. [Concept: Mixed-methods design and Bayesian inference]

0298. D - Measurement invariance: Evidence that a measure functions comparably across groups or time points for intended comparisons. / Moderation: A model in which the strength or direction of a relationship differs depending on another variable. [Concept: Measurement invariance and Moderation]

CAC.923 | Advanced Research Methodology

QUESTION | CORRECT OPTION AND CONCEPT

0299. B - Thematic analysis: Coding transcripts and developing themes that are grounded in participant accounts. / Effect size: Reporting magnitude and confidence intervals rather than relying on statistical significance alone. [Concept: Thematic analysis and Effect size]

0300. C - Mixed-methods design: Combining outcome data with interviews and explicitly integrating findings. / Bayesian inference: Reporting how data update a prior distribution while making assumptions transparent. [Concept: Mixed-methods design and Bayesian inference]

0301. C - Mediation: A model in which an intervening variable may explain how or through what process an exposure relates to an outcome. / Moderation: A model in which the strength or direction of a relationship differs depending on another variable. [Concept: Mediation and Moderation]

0302. B - Effect size: Reporting magnitude and confidence intervals rather than relying on statistical significance alone. / Mediation: Testing a hypothesized pathway while avoiding causal claims unsupported by design. [Concept: Effect size and Mediation]

0303. C - Measurement invariance: Evidence that a measure functions comparably across groups or time points for intended comparisons. / Mediation: A model in which an intervening variable may explain how or through what process an exposure relates to an outcome. [Concept: Measurement invariance and Mediation]

0304. B - Bayesian inference [Concept: Bayesian inference]

0305. D - Examining whether dropout depends on observed factors or unobserved outcomes before selecting handling methods. [Concept: Missing data mechanism]

0306. C - Missing data mechanism [Concept: Missing data mechanism]

0307. B - Missing data mechanism: A description of how the probability of missingness relates to observed or unobserved values. / Effect size: A quantitative index of the magnitude of a relationship or difference, interpreted with context and uncertainty. [Concept: Missing data mechanism and Effect size]

0308. C - Thematic analysis: Coding transcripts and developing themes that are grounded in participant accounts. / Effect size: Reporting magnitude and confidence intervals rather than relying on statistical significance alone. [Concept: Thematic analysis and Effect size]

0309. A - Reproducible research [Concept: Reproducible research]

0310. C - Multilevel modeling: Modeling students nested within schools instead of treating every observation as independent. / Effect size: Reporting magnitude and confidence intervals rather than relying on statistical significance alone. [Concept: Multilevel modeling and Effect size]

0311. A - Missing data mechanism [Concept: Missing data mechanism]

0312. A - Moderation: A model in which the strength or direction of a relationship differs depending on another variable. / Reproducible research: Research practices that make data processing, analytic decisions, and outputs transparent and checkable. [Concept: Moderation and Reproducible research]

0313. B - Mixed-methods design [Concept: Mixed-methods design]

0314. A - Missing data mechanism: Examining whether dropout depends on observed factors or unobserved outcomes before selecting handling methods. / Reproducible research: Preserving documented code, decisions, and materials so another researcher can audit the analysis. [Concept: Missing data mechanism and Reproducible research]

0315. A - Mediation [Concept: Mediation]

0316. A - Moderation [Concept: Moderation]

0317. A - Effect size [Concept: Effect size]

0318. B - Thematic analysis: A method for identifying and interpreting patterns of meaning in qualitative data. / Effect size: A quantitative index of the magnitude of a relationship or difference, interpreted with context and uncertainty. [Concept: Thematic analysis and Effect size]

0319. A - Missing data mechanism: Examining whether dropout depends on observed factors or unobserved outcomes before selecting handling methods. / Mediation: Testing a hypothesized pathway while avoiding causal claims unsupported by design. [Concept: Missing data mechanism and Mediation]

0320. D - Effect size [Concept: Effect size]

0321. A - Multilevel modeling: Modeling students nested within schools instead of treating every observation as independent. / Bayesian inference: Reporting how data update a prior distribution while making assumptions transparent. [Concept: Multilevel modeling and Bayesian inference]

0322. A - Effect size: A quantitative index of the magnitude of a relationship or difference, interpreted with context and uncertainty. / Mediation: A model in which an intervening variable may explain how or through what process an exposure relates to an outcome. [Concept: Effect size and Mediation]

0323. C - Effect size [Concept: Effect size]

0324. A - Thematic analysis [Concept: Thematic analysis]

0325. B - Bayesian inference [Concept: Bayesian inference]

0326. C - Measurement invariance [Concept: Measurement invariance]

0327. D - Thematic analysis: A method for identifying and interpreting patterns of meaning in qualitative data. / Reproducible research: Research practices that make data processing, analytic decisions, and outputs transparent and checkable. [Concept: Thematic analysis and Reproducible research]

0328. D - Measurement invariance [Concept: Measurement invariance]

0329. C - Missing data mechanism: Examining whether dropout depends on observed factors or unobserved outcomes before selecting handling methods. / Reproducible research: Preserving documented code, decisions, and materials so another researcher can audit the analysis. [Concept: Missing data mechanism and Reproducible research]

0330. A - Measurement invariance: Testing whether items measure a construct comparably before comparing group scores. / Reproducible research: Preserving documented code, decisions, and materials so another researcher can audit the analysis. [Concept: Measurement invariance and Reproducible research]

0331. D - Bayesian inference [Concept: Bayesian inference]

0332. D - Mixed-methods design: Combining outcome data with interviews and explicitly integrating findings. / Mediation: Testing a hypothesized pathway while avoiding causal claims unsupported by design. [Concept: Mixed-methods design and Mediation]

0333. D - Thematic analysis: Coding transcripts and developing themes that are grounded in participant accounts. / Effect size: Reporting magnitude and confidence intervals rather than relying on statistical significance alone. [Concept: Thematic analysis and Effect size]

0334. D - Measurement invariance [Concept: Measurement invariance]

0335. A - Multilevel modeling: Modeling students nested within schools instead of treating every observation as independent. / Missing data mechanism: Examining whether dropout depends on observed factors or unobserved outcomes before selecting handling methods. [Concept: Multilevel modeling and Missing data mechanism]

0336. D - Reporting magnitude and confidence intervals rather than relying on statistical significance alone. [Concept: Effect size]

0337. D - Effect size [Concept: Effect size]

0338. D - Missing data mechanism [Concept: Missing data mechanism]

0339. D - Research practices that make data processing, analytic decisions, and outputs transparent and checkable. [Concept: Reproducible research]

0340. A - A method for identifying and interpreting patterns of meaning in qualitative data. [Concept: Thematic analysis]

0341. D - Thematic analysis [Concept: Thematic analysis]

0342. A - Mixed-methods design: Combining outcome data with interviews and explicitly integrating findings. / Moderation: Examining whether intervention effects vary across a prespecified context or participant characteristic. [Concept: Mixed-methods design and Moderation]

0343. D - Thematic analysis: A method for identifying and interpreting patterns of meaning in qualitative data. / Effect size: A quantitative index of the magnitude of a relationship or difference, interpreted with context and uncertainty. [Concept: Thematic analysis and Effect size]

0344. B - Measurement invariance [Concept: Measurement invariance]

0345. B - Mediation [Concept: Mediation]

0346. B - Effect size: A quantitative index of the magnitude of a relationship or difference, interpreted with context and uncertainty. / Reproducible research: Research practices that make data processing, analytic decisions, and outputs transparent and checkable. [Concept: Effect size and Reproducible research]

0347. D - Measurement invariance: Testing whether items measure a construct comparably before comparing group scores. / Reproducible research: Preserving documented code, decisions, and materials so another researcher can audit the analysis. [Concept: Measurement invariance and Reproducible research]

0348. C - Combining outcome data with interviews and explicitly integrating findings. [Concept: Mixed-methods design]

0349. B - Mixed-methods design: Combining outcome data with interviews and explicitly integrating findings. / Moderation: Examining whether intervention effects vary across a prespecified context or participant characteristic. [Concept: Mixed-methods design and Moderation]

0350. D - Reproducible research [Concept: Reproducible research]

0351. A - Mixed-methods design: Combining outcome data with interviews and explicitly integrating findings. / Missing data mechanism: Examining whether dropout depends on observed factors or unobserved outcomes before selecting handling methods. [Concept: Mixed-methods design and Missing data mechanism]

0352. C - Effect size: A quantitative index of the magnitude of a relationship or difference, interpreted with context and uncertainty. / Measurement invariance: Evidence that a measure functions comparably across groups or time points for intended comparisons. [Concept: Effect size and Measurement invariance]

0353. C - Mediation: A model in which an intervening variable may explain how or through what process an exposure relates to an outcome. / Moderation: A model in which the strength or direction of a relationship differs depending on another variable. [Concept: Mediation and Moderation]

0354. A - Intentional integration of qualitative and quantitative data to address complementary aspects of a research question. [Concept: Mixed-methods design]

0355. C - Mediation [Concept: Mediation]

0496. A - Moderation: Examining whether intervention effects vary across a prespecified context or participant characteristic. / Reproducible research: Preserving documented code, decisions, and materials so another researcher can audit the analysis. [Concept: Moderation and Reproducible research]

0497. C - Missing data mechanism: A description of how the probability of missingness relates to observed or unobserved values. / Measurement invariance: Evidence that a measure functions comparably across groups or time points for intended comparisons. [Concept: Missing data mechanism and Measurement invariance]

0498. D - Thematic analysis: A method for identifying and interpreting patterns of meaning in qualitative data. / Reproducible research: Research practices that make data processing, analytic decisions, and outputs transparent and checkable. [Concept: Thematic analysis and Reproducible research]

0499. D - Mediation: Testing a hypothesized pathway while avoiding causal claims unsupported by design. / Moderation: Examining whether intervention effects vary across a prespecified context or participant characteristic. [Concept: Mediation and Moderation]

0500. D - Multilevel modeling [Concept: Multilevel modeling]

0501. A - Bayesian inference [Concept: Bayesian inference]

0502. D - Missing data mechanism: A description of how the probability of missingness relates to observed or unobserved values. / Measurement invariance: Evidence that a measure functions comparably across groups or time points for intended comparisons. [Concept: Missing data mechanism and Measurement invariance]

0503. C - Mediation: A model in which an intervening variable may explain how or through what process an exposure relates to an outcome. / Bayesian inference: Updating probability distributions for unknown quantities by combining prior information with observed data. [Concept: Mediation and Bayesian inference]

0504. B - Multilevel modeling: A statistical approach for nested data that accounts for dependence among observations within groups. / Mediation: A model in which an intervening variable may explain how or through what process an exposure relates to an outcome. [Concept: Multilevel modeling and Mediation]

0505. A - Thematic analysis [Concept: Thematic analysis]

0506. A - Thematic analysis: Coding transcripts and developing themes that are grounded in participant accounts. / Mediation: Testing a hypothesized pathway while avoiding causal claims unsupported by design. [Concept: Thematic analysis and Mediation]

0507. A - Thematic analysis: A method for identifying and interpreting patterns of meaning in qualitative data. / Moderation: A model in which the strength or direction of a relationship differs depending on another variable. [Concept: Thematic analysis and Moderation]

0508. C - Missing data mechanism [Concept: Missing data mechanism]

0509. C - Measurement invariance [Concept: Measurement invariance]

0510. A - Moderation [Concept: Moderation]

0511. B - Thematic analysis [Concept: Thematic analysis]

0512. C - Reproducible research [Concept: Reproducible research]

0513. B - Mixed-methods design: Intentional integration of qualitative and quantitative data to address complementary aspects of a research question. / Multilevel modeling: A statistical approach for nested data that accounts for dependence among observations within groups. [Concept: Mixed-methods design and Multilevel modeling]

0514. A - Multilevel modeling: A statistical approach for nested data that accounts for dependence among observations within groups. / Bayesian inference: Updating probability distributions for unknown quantities by combining prior information with observed data. [Concept: Multilevel modeling and Bayesian inference]

0515. C - Mixed-methods design [Concept: Mixed-methods design]

0516. C - Updating probability distributions for unknown quantities by combining prior information with observed data. [Concept: Bayesian inference]

0517. C - Bayesian inference: Updating probability distributions for unknown quantities by combining prior information with observed data. / Reproducible research: Research practices that make data processing, analytic decisions, and outputs transparent and checkable. [Concept: Bayesian inference and Reproducible research]

0518. D - Moderation [Concept: Moderation]

0519. D - Thematic analysis: Coding transcripts and developing themes that are grounded in participant accounts. / Measurement invariance: Testing whether items measure a construct comparably before comparing group scores. [Concept: Thematic analysis and Measurement invariance]

0520. A - Intentional integration of qualitative and quantitative data to address complementary aspects of a research question. [Concept: Mixed-methods design]

0521. A - A model in which the strength or direction of a relationship differs depending on another variable. [Concept: Moderation]

0522. D - Thematic analysis: A method for identifying and interpreting patterns of meaning in qualitative data. / Bayesian inference: Updating probability distributions for unknown quantities by combining prior information with observed data. [Concept: Thematic analysis and Bayesian inference]

0523. C - Mediation [Concept: Mediation]

0524. C - Mediation [Concept: Mediation]

0525. A - Thematic analysis [Concept: Thematic analysis]

0526. B - Mediation: Testing a hypothesized pathway while avoiding causal claims unsupported by design. / Moderation: Examining whether intervention effects vary across a prespecified context or participant characteristic. [Concept: Mediation and Moderation]

0527. B - Examining whether intervention effects vary across a prespecified context or participant characteristic. [Concept: Moderation]

0528. C - Examining whether dropout depends on observed factors or unobserved outcomes before selecting handling methods. [Concept: Missing data mechanism]

0529. B - Effect size [Concept: Effect size]

0530. D - Thematic analysis: A method for identifying and interpreting patterns of meaning in qualitative data. / Moderation: A model in which the strength or direction of a relationship differs depending on another variable. [Concept: Thematic analysis and Moderation]

0531. D - Measurement invariance: Evidence that a measure functions comparably across groups or time points for intended comparisons. / Moderation: A model in which the strength or direction of a relationship differs depending on another variable. [Concept: Measurement invariance and Moderation]

0532. C - Effect size [Concept: Effect size]

CAC.923 | Advanced Research Methodology

QUESTION | CORRECT OPTION AND CONCEPT

0533. C - Mixed-methods design: Combining outcome data with interviews and explicitly integrating findings. / Moderation: Examining whether intervention effects vary across a prespecified context or participant characteristic. [Concept: Mixed-methods design and Moderation]

0534. B - Mediation: A model in which an intervening variable may explain how or through what process an exposure relates to an outcome. / Bayesian inference: Updating probability distributions for unknown quantities by combining prior information with observed data. [Concept: Mediation and Bayesian inference]

0535. D - A quantitative index of the magnitude of a relationship or difference, interpreted with context and uncertainty. [Concept: Effect size]

0536. C - Reproducible research [Concept: Reproducible research]

0537. B - Mixed-methods design: Combining outcome data with interviews and explicitly integrating findings. / Reproducible research: Preserving documented code, decisions, and materials so another researcher can audit the analysis. [Concept: Mixed-methods design and Reproducible research]

0538. D - Mixed-methods design [Concept: Mixed-methods design]

0539. D - Mixed-methods design: Intentional integration of qualitative and quantitative data to address complementary aspects of a research question. / Reproducible research: Research practices that make data processing, analytic decisions, and outputs transparent and checkable. [Concept: Mixed-methods design and Reproducible research]

0540. C - Preserving documented code, decisions, and materials so another researcher can audit the analysis. [Concept: Reproducible research]

0541. D - Effect size [Concept: Effect size]

0542. B - Measurement invariance [Concept: Measurement invariance]

0543. A - Mediation [Concept: Mediation]

0544. B - Multilevel modeling: A statistical approach for nested data that accounts for dependence among observations within groups. / Bayesian inference: Updating probability distributions for unknown quantities by combining prior information with observed data. [Concept: Multilevel modeling and Bayesian inference]

0545. D - A model in which an intervening variable may explain how or through what process an exposure relates to an outcome. [Concept: Mediation]

0546. D - Reproducible research [Concept: Reproducible research]

0547. D - Multilevel modeling [Concept: Multilevel modeling]

0548. A - Mixed-methods design [Concept: Mixed-methods design]

0549. C - Mixed-methods design: Intentional integration of qualitative and quantitative data to address complementary aspects of a research question. / Bayesian inference: Updating probability distributions for unknown quantities by combining prior information with observed data. [Concept: Mixed-methods design and Bayesian inference]

0550. B - Missing data mechanism [Concept: Missing data mechanism]

0551. A - Mixed-methods design: Combining outcome data with interviews and explicitly integrating findings. / Moderation: Examining whether intervention effects vary across a prespecified context or participant characteristic. [Concept: Mixed-methods design and Moderation]

0552. D - Mixed-methods design [Concept: Mixed-methods design]

0553. C - Multilevel modeling: Modeling students nested within schools instead of treating every observation as independent. / Bayesian inference: Reporting how data update a prior distribution while making assumptions transparent. [Concept: Multilevel modeling and Bayesian inference]

0554. A - Missing data mechanism [Concept: Missing data mechanism]

0555. B - A quantitative index of the magnitude of a relationship or difference, interpreted with context and uncertainty. [Concept: Effect size]

0556. A - A description of how the probability of missingness relates to observed or unobserved values. [Concept: Missing data mechanism]

0557. D - Moderation: A model in which the strength or direction of a relationship differs depending on another variable. / Bayesian inference: Updating probability distributions for unknown quantities by combining prior information with observed data. [Concept: Moderation and Bayesian inference]

0558. A - Effect size: A quantitative index of the magnitude of a relationship or difference, interpreted with context and uncertainty. / Measurement invariance: Evidence that a measure functions comparably across groups or time points for intended comparisons. [Concept: Effect size and Measurement invariance]

0559. C - Mediation [Concept: Mediation]

0560. B - Measurement invariance: Testing whether items measure a construct comparably before comparing group scores. / Bayesian inference: Reporting how data update a prior distribution while making assumptions transparent. [Concept: Measurement invariance and Bayesian inference]

0561. A - Bayesian inference [Concept: Bayesian inference]

0562. D - Mixed-methods design: Combining outcome data with interviews and explicitly integrating findings. / Missing data mechanism: Examining whether dropout depends on observed factors or unobserved outcomes before selecting handling methods. [Concept: Mixed-methods design and Missing data mechanism]

0563. C - Missing data mechanism [Concept: Missing data mechanism]

0564. B - Measurement invariance [Concept: Measurement invariance]

0565. D - Testing whether items measure a construct comparably before comparing group scores. [Concept: Measurement invariance]

0566. D - Bayesian inference [Concept: Bayesian inference]

0711. C - Moderation [Concept: Moderation]

0712. D - Mixed-methods design: Intentional integration of qualitative and quantitative data to address complementary aspects of a research question. / Effect size: A quantitative index of the magnitude of a relationship or difference, interpreted with context and uncertainty. [Concept: Mixed-methods design and Effect size]

0713. B - Measurement invariance: Testing whether items measure a construct comparably before comparing group scores. / Bayesian inference: Reporting how data update a prior distribution while making assumptions transparent. [Concept: Measurement invariance and Bayesian inference]

0714. A - Multilevel modeling [Concept: Multilevel modeling]

0715. A - Bayesian inference [Concept: Bayesian inference]

0716. C - Thematic analysis [Concept: Thematic analysis]

CAC.923 | Advanced Research Methodology

QUESTION | CORRECT OPTION AND CONCEPT

0717. A - Mediation: Testing a hypothesized pathway while avoiding causal claims unsupported by design. / Reproducible research: Preserving documented code, decisions, and materials so another researcher can audit the analysis. [Concept: Mediation and Reproducible research]

0718. B - Thematic analysis [Concept: Thematic analysis]

0719. B - Mixed-methods design: Combining outcome data with interviews and explicitly integrating findings. / Bayesian inference: Reporting how data update a prior distribution while making assumptions transparent. [Concept: Mixed-methods design and Bayesian inference]

0720. D - Effect size [Concept: Effect size]

0721. C - Missing data mechanism [Concept: Missing data mechanism]

0722. A - Thematic analysis: A method for identifying and interpreting patterns of meaning in qualitative data. / Multilevel modeling: A statistical approach for nested data that accounts for dependence among observations within groups. [Concept: Thematic analysis and Multilevel modeling]

0723. D - Mediation [Concept: Mediation]

0724. B - Moderation [Concept: Moderation]

0725. A - Thematic analysis [Concept: Thematic analysis]

0726. C - Evidence that a measure functions comparably across groups or time points for intended comparisons. [Concept: Measurement invariance]

0727. C - Effect size: A quantitative index of the magnitude of a relationship or difference, interpreted with context and uncertainty. / Mediation: A model in which an intervening variable may explain how or through what process an exposure relates to an outcome. [Concept: Effect size and Mediation]

0728. C - Missing data mechanism [Concept: Missing data mechanism]

0729. A - Effect size: A quantitative index of the magnitude of a relationship or difference, interpreted with context and uncertainty. / Mediation: A model in which an intervening variable may explain how or through what process an exposure relates to an outcome. [Concept: Effect size and Mediation]

0730. C - Effect size: Reporting magnitude and confidence intervals rather than relying on statistical significance alone. / Moderation: Examining whether intervention effects vary across a prespecified context or participant characteristic. [Concept: Effect size and Moderation]

0731. C - Mixed-methods design: Combining outcome data with interviews and explicitly integrating findings. / Thematic analysis: Coding transcripts and developing themes that are grounded in participant accounts. [Concept: Mixed-methods design and Thematic analysis]

0732. D - Mixed-methods design [Concept: Mixed-methods design]

0733. C - Thematic analysis: Coding transcripts and developing themes that are grounded in participant accounts. / Reproducible research: Preserving documented code, decisions, and materials so another researcher can audit the analysis. [Concept: Thematic analysis and Reproducible research]

0734. B - Reproducible research [Concept: Reproducible research]

0735. B - Moderation: Examining whether intervention effects vary across a prespecified context or participant characteristic. / Bayesian inference: Reporting how data update a prior distribution while making assumptions transparent. [Concept: Moderation and Bayesian inference]

0736. C - Testing a hypothesized pathway while avoiding causal claims unsupported by design. [Concept: Mediation]

0737. D - Thematic analysis: Coding transcripts and developing themes that are grounded in participant accounts. / Mediation: Testing a hypothesized pathway while avoiding causal claims unsupported by design. [Concept: Thematic analysis and Mediation]

0738. D - Mixed-methods design [Concept: Mixed-methods design]

0739. A - Combining outcome data with interviews and explicitly integrating findings. [Concept: Mixed-methods design]

0740. D - Reporting magnitude and confidence intervals rather than relying on statistical significance alone. [Concept: Effect size]

0741. D - Bayesian inference [Concept: Bayesian inference]

0742. A - Missing data mechanism: Examining whether dropout depends on observed factors or unobserved outcomes before selecting handling methods. / Bayesian inference: Reporting how data update a prior distribution while making assumptions transparent. [Concept: Missing data mechanism and Bayesian inference]

0743. B - Mediation [Concept: Mediation]

0744. A - Effect size: A quantitative index of the magnitude of a relationship or difference, interpreted with context and uncertainty. / Mediation: A model in which an intervening variable may explain how or through what process an exposure relates to an outcome. [Concept: Effect size and Mediation]

0745. D - Moderation [Concept: Moderation]

0746. A - Effect size: Reporting magnitude and confidence intervals rather than relying on statistical significance alone. / Bayesian inference: Reporting how data update a prior distribution while making assumptions transparent. [Concept: Effect size and Bayesian inference]

0747. A - A method for identifying and interpreting patterns of meaning in qualitative data. [Concept: Thematic analysis]

0748. A - Missing data mechanism [Concept: Missing data mechanism]

0749. C - Thematic analysis: A method for identifying and interpreting patterns of meaning in qualitative data. / Mediation: A model in which an intervening variable may explain how or through what process an exposure relates to an outcome. [Concept: Thematic analysis and Mediation]

0750. A - A method for identifying and interpreting patterns of meaning in qualitative data. [Concept: Thematic analysis]

0751. D - Reproducible research [Concept: Reproducible research]

0752. A - Missing data mechanism: Examining whether dropout depends on observed factors or unobserved outcomes before selecting handling methods. / Moderation: Examining whether intervention effects vary across a prespecified context or participant characteristic. [Concept: Missing data mechanism and Moderation]

0753. A - Mixed-methods design: Intentional integration of qualitative and quantitative data to address complementary aspects of a research question. / Effect size: A quantitative index of the magnitude of a relationship or difference, interpreted with context and uncertainty. [Concept: Mixed-methods design and Effect size]

0754. C - Measurement invariance: Evidence that a measure functions comparably across groups or time points for intended comparisons. / Bayesian inference: Updating probability distributions for unknown quantities by combining prior information with observed data. [Concept: Measurement invariance and Bayesian inference]

0755. C - Effect size: A quantitative index of the magnitude of a relationship or difference, interpreted with context and uncertainty. / Mediation: A model in which an intervening variable may explain how or through what process an exposure relates to an outcome. [Concept: Effect size and Mediation]

0756. A - Moderation: A model in which the strength or direction of a relationship differs depending on another variable. / Reproducible research: Research practices that make data processing, analytic decisions, and outputs transparent and checkable. [Concept: Moderation and Reproducible research]

0757. B - Missing data mechanism: A description of how the probability of missingness relates to observed or unobserved values. / Mediation: A model in which an intervening variable may explain how or through what process an exposure relates to an outcome. [Concept: Missing data mechanism and Mediation]

0758. D - Multilevel modeling [Concept: Multilevel modeling]

0759. B - Mixed-methods design: Combining outcome data with interviews and explicitly integrating findings. / Measurement invariance: Testing whether items measure a construct comparably before comparing group scores. [Concept: Mixed-methods design and Measurement invariance]

0760. B - Missing data mechanism: A description of how the probability of missingness relates to observed or unobserved values. / Bayesian inference: Updating probability distributions for unknown quantities by combining prior information with observed data. [Concept: Missing data mechanism and Bayesian inference]

0761. C - Measurement invariance: Evidence that a measure functions comparably across groups or time points for intended comparisons. / Mediation: A model in which an intervening variable may explain how or through what process an exposure relates to an outcome. [Concept: Measurement invariance and Mediation]

0762. A - Effect size [Concept: Effect size]

0763. C - Bayesian inference [Concept: Bayesian inference]

0764. B - Mixed-methods design: Intentional integration of qualitative and quantitative data to address complementary aspects of a research question. / Moderation: A model in which the strength or direction of a relationship differs depending on another variable. [Concept: Mixed-methods design and Moderation]

0765. B - Measurement invariance [Concept: Measurement invariance]

0766. A - Missing data mechanism [Concept: Missing data mechanism]

0767. C - Updating probability distributions for unknown quantities by combining prior information with observed data. [Concept: Bayesian inference]

0768. B - Mixed-methods design: Combining outcome data with interviews and explicitly integrating findings. / Reproducible research: Preserving documented code, decisions, and materials so another researcher can audit the analysis. [Concept: Mixed-methods design and Reproducible research]

0769. A - Bayesian inference: Updating probability distributions for unknown quantities by combining prior information with observed data. / Reproducible research: Research practices that make data processing, analytic decisions, and outputs transparent and checkable. [Concept: Bayesian inference and Reproducible research]

0770. B - Multilevel modeling: Modeling students nested within schools instead of treating every observation as independent. / Reproducible research: Preserving documented code, decisions, and materials so another researcher can audit the analysis. [Concept: Multilevel modeling and Reproducible research]

0771. B - Measurement invariance: Evidence that a measure functions comparably across groups or time points for intended comparisons. / Moderation: A model in which the strength or direction of a relationship differs depending on another variable. [Concept: Measurement invariance and Moderation]

0772. B - Thematic analysis [Concept: Thematic analysis]

0921. C - Measurement invariance [Concept: Measurement invariance]

0922. C - Multilevel modeling: Modeling students nested within schools instead of treating every observation as independent. / Effect size: Reporting magnitude and confidence intervals rather than relying on statistical significance alone. [Concept: Multilevel modeling and Effect size]

0923. D - Moderation [Concept: Moderation]

0924. B - Mixed-methods design [Concept: Mixed-methods design]

0925. C - Thematic analysis: A method for identifying and interpreting patterns of meaning in qualitative data. / Bayesian inference: Updating probability distributions for unknown quantities by combining prior information with observed data. [Concept: Thematic analysis and Bayesian inference]

0926. C - Effect size: Reporting magnitude and confidence intervals rather than relying on statistical significance alone. / Bayesian inference: Reporting how data update a prior distribution while making assumptions transparent. [Concept: Effect size and Bayesian inference]

0927. B - Bayesian inference [Concept: Bayesian inference]

0928. A - Mediation [Concept: Mediation]

0929. A - Moderation [Concept: Moderation]

0930. A - Mixed-methods design: Intentional integration of qualitative and quantitative data to address complementary aspects of a research question. / Multilevel modeling: A statistical approach for nested data that accounts for dependence among observations within groups. [Concept: Mixed-methods design and Multilevel modeling]

0931. B - Thematic analysis: Coding transcripts and developing themes that are grounded in participant accounts. / Moderation: Examining whether intervention effects vary across a prespecified context or participant characteristic. [Concept: Thematic analysis and Moderation]

0932. D - Thematic analysis [Concept: Thematic analysis]

0933. A - Moderation [Concept: Moderation]

0934. D - A quantitative index of the magnitude of a relationship or difference, interpreted with context and uncertainty. [Concept: Effect size]

0935. D - Multilevel modeling [Concept: Multilevel modeling]

0936. A - Thematic analysis: Coding transcripts and developing themes that are grounded in participant accounts. / Moderation: Examining whether intervention effects vary across a prespecified context or participant characteristic. [Concept: Thematic analysis and Moderation]

0937. A - Thematic analysis [Concept: Thematic analysis]

0938. B - Testing whether items measure a construct comparably before comparing group scores. [Concept: Measurement invariance]

0939. D - Missing data mechanism [Concept: Missing data mechanism]

0940. D - Missing data mechanism: A description of how the probability of missingness relates to observed or unobserved values. / Moderation: A model in which the strength or direction of a relationship differs depending on another variable. [Concept: Missing data mechanism and Moderation]

0941. B - Thematic analysis: A method for identifying and interpreting patterns of meaning in qualitative data. / Effect size: A quantitative index of the magnitude of a relationship or difference, interpreted with context and uncertainty. [Concept: Thematic analysis and Effect size]

0942. B - Measurement invariance: Evidence that a measure functions comparably across groups or time points for intended comparisons. / Mediation: A model in which an intervening variable may explain how or through what process an exposure relates to an outcome. [Concept: Measurement invariance and Mediation]

0943. B - Effect size [Concept: Effect size]

0944. C - Modeling students nested within schools instead of treating every observation as independent. [Concept: Multilevel modeling]

0945. D - Missing data mechanism: A description of how the probability of missingness relates to observed or unobserved values. / Bayesian inference: Updating probability distributions for unknown quantities by combining prior information with observed data. [Concept: Missing data mechanism and Bayesian inference]

0946. C - Mixed-methods design [Concept: Mixed-methods design]

0947. C - Multilevel modeling: Modeling students nested within schools instead of treating every observation as independent. / Measurement invariance: Testing whether items measure a construct comparably before comparing group scores. [Concept: Multilevel modeling and Measurement invariance]

0948. D - Mediation: A model in which an intervening variable may explain how or through what process an exposure relates to an outcome. / Moderation: A model in which the strength or direction of a relationship differs depending on another variable. [Concept: Mediation and Moderation]

0949. D - Mediation: A model in which an intervening variable may explain how or through what process an exposure relates to an outcome. / Reproducible research: Research practices that make data processing, analytic decisions, and outputs transparent and checkable. [Concept: Mediation and Reproducible research]

0950. C - Evidence that a measure functions comparably across groups or time points for intended comparisons. [Concept: Measurement invariance]

0951. B - Moderation [Concept: Moderation]

0952. C - Reporting how data update a prior distribution while making assumptions transparent. [Concept: Bayesian inference]

0999. C - Intentional integration of qualitative and quantitative data to address complementary aspects of a research question. [Concept: Mixed-methods design]

1000. C - Thematic analysis: A method for identifying and interpreting patterns of meaning in qualitative data. / Mediation: A model in which an intervening variable may explain how or through what process an exposure relates to an outcome. [Concept: Thematic analysis and Mediation]

CAC.960 | Dissertation

QUESTION | CORRECT OPTION AND CONCEPT

0001. B - Distinguishing design limitations from the study's scope and explaining their implications. [Concept: Limitations statement]

0002. A - Theoretical framework: Explaining how a theory shapes the constructs and expected relationships in the study. / Dissertation proposal defense: Responding to committee questions and revising the plan before approved data collection. [Concept: Theoretical framework and Dissertation proposal defense]

0003. C - Data management plan [Concept: Data management plan]

0004. B - Research problem statement: Stating who is affected, what is not yet understood, and why the proposed inquiry matters. / Dissertation defense: Explaining analytic choices, acknowledging limits, and situating findings in the literature. [Concept: Research problem statement and Dissertation defense]

0005. A - Data management plan: A documented approach for data security, access, retention, sharing, and eventual disposition. / Dissertation defense: A scholarly presentation and examination of completed research, reasoning, findings, and contribution. [Concept: Data management plan and Dissertation defense]

0006. C - Literature synthesis [Concept: Literature synthesis]

0007. B - Methodological transparency: Documenting how participants were recruited and how decisions were made. / Limitations statement: Distinguishing design limitations from the study's scope and explaining their implications. [Concept: Methodological transparency and Limitations statement]

0008. B - Literature synthesis: An organized critical integration of prior scholarship that identifies patterns, limitations, and unanswered questions. / IRB or ethics review: Independent review of human-participant research risks, protections, consent, and compliance before research begins. [Concept: Literature synthesis and IRB or ethics review]

0009. D - Research question alignment: Consistency among the problem, purpose, questions, design, measures, and planned analysis. / Dissertation proposal defense: A formal review of the proposed study's significance, feasibility, methods, and protections before implementation. [Concept: Research question alignment and Dissertation proposal defense]

0010. B - Theoretical framework [Concept: Theoretical framework]

0011. B - Consistency among the problem, purpose, questions, design, measures, and planned analysis. [Concept: Research question alignment]

0012. C - IRB or ethics review: Independent review of human-participant research risks, protections, consent, and compliance before research begins. / Data management plan: A documented approach for data security, access, retention, sharing, and eventual disposition. [Concept: IRB or ethics review and Data management plan]

0013. A - Literature synthesis [Concept: Literature synthesis]

0014. B - Theoretical framework: A set of concepts and relationships used to guide the study's questions, interpretation, and contribution. / Data management plan: A documented approach for data security, access, retention, sharing, and eventual disposition. [Concept: Theoretical framework and Data management plan]

0015. B - Research problem statement: Stating who is affected, what is not yet understood, and why the proposed inquiry matters. / Research question alignment: Checking that the chosen method can directly answer each stated research question. [Concept: Research problem statement and Research question alignment]

0016. D - Limitations statement [Concept: Limitations statement]

0017. C - Research problem statement: Stating who is affected, what is not yet understood, and why the proposed inquiry matters. / Limitations statement: Distinguishing design limitations from the study's scope and explaining their implications. [Concept: Research problem statement and Limitations statement]

0018. C - Theoretical framework: A set of concepts and relationships used to guide the study's questions, interpretation, and contribution. / IRB or ethics review: Independent review of human-participant research risks, protections, consent, and compliance before research begins. [Concept: Theoretical framework and IRB or ethics review]

0019. B - Methodological transparency [Concept: Methodological transparency]

0020. D - Theoretical framework [Concept: Theoretical framework]

0021. D - Dissertation proposal defense [Concept: Dissertation proposal defense]

0022. A - Theoretical framework: Explaining how a theory shapes the constructs and expected relationships in the study. / Limitations statement: Distinguishing design limitations from the study's scope and explaining their implications. [Concept: Theoretical framework and Limitations statement]

0023. A - Data management plan [Concept: Data management plan]

0024. D - Theoretical framework [Concept: Theoretical framework]

0025. D - Research question alignment: Checking that the chosen method can directly answer each stated research question. / Methodological transparency: Documenting how participants were recruited and how decisions were made. [Concept: Research question alignment and Methodological transparency]

0026. C - Research problem statement [Concept: Research problem statement]

0027. D - Methodological transparency: Clear reporting of procedures, sampling, measures, and analysis sufficient for informed evaluation. / Dissertation proposal defense: A formal review of the proposed study's significance, feasibility, methods, and protections before implementation. [Concept: Methodological transparency and Dissertation proposal defense]

0028. B - Research problem statement: Stating who is affected, what is not yet understood, and why the proposed inquiry matters. / Dissertation proposal defense: Responding to committee questions and revising the plan before approved data collection. [Concept: Research problem statement and Dissertation proposal defense]

0029. B - Dissertation proposal defense: Responding to committee questions and revising the plan before approved data collection. / Data management plan: Specifying secure storage, access controls, retention, and disposal in advance. [Concept: Dissertation proposal defense and Data management plan]

0030. B - Methodological transparency [Concept: Methodological transparency]

0031. C - Literature synthesis: Comparing findings and methods across studies rather than listing article summaries. / Limitations statement: Distinguishing design limitations from the study's scope and explaining their implications. [Concept: Literature synthesis and Limitations statement]

0032. A - Literature synthesis: An organized critical integration of prior scholarship that identifies patterns, limitations, and unanswered questions. / Dissertation proposal defense: A formal review of the proposed study's significance, feasibility, methods, and protections before implementation. [Concept: Literature synthesis and Dissertation proposal defense]

0033. A - Data management plan [Concept: Data management plan]

0034. C - Limitations statement [Concept: Limitations statement]

0035. A - Dissertation proposal defense: Responding to committee questions and revising the plan before approved data collection. / Limitations statement: Distinguishing design limitations from the study's scope and explaining their implications. [Concept: Dissertation proposal defense and Limitations statement]

0036. B - Research question alignment: Consistency among the problem, purpose, questions, design, measures, and planned analysis. / IRB or ethics review: Independent review of human-participant research risks, protections, consent, and compliance before research begins. [Concept: Research question alignment and IRB or ethics review]

0037. A - Limitations statement [Concept: Limitations statement]

0038. D - Limitations statement [Concept: Limitations statement]

0039. D - IRB or ethics review [Concept: IRB or ethics review]

0040. B - Research question alignment: Checking that the chosen method can directly answer each stated research question. / IRB or ethics review: Obtaining required ethics approval before recruitment or data collection. [Concept: Research question alignment and IRB or ethics review]

0041. A - Literature synthesis: An organized critical integration of prior scholarship that identifies patterns, limitations, and unanswered questions. / Data management plan: A documented approach for data security, access, retention, sharing, and eventual disposition. [Concept: Literature synthesis and Data management plan]

0042. C - Research problem statement [Concept: Research problem statement]

0043. C - Theoretical framework: Explaining how a theory shapes the constructs and expected relationships in the study. / Data management plan: Specifying secure storage, access controls, retention, and disposal in advance. [Concept: Theoretical framework and Data management plan]

0044. C - Limitations statement [Concept: Limitations statement]

0045. D - Research problem statement [Concept: Research problem statement]

0046. A - Theoretical framework: A set of concepts and relationships used to guide the study's questions, interpretation, and contribution. / IRB or ethics review: Independent review of human-participant research risks, protections, consent, and compliance before research begins. [Concept: Theoretical framework and IRB or ethics review]

0047. C - Consistency among the problem, purpose, questions, design, measures, and planned analysis. [Concept: Research question alignment]

0048. C - Literature synthesis: Comparing findings and methods across studies rather than listing article summaries. / Limitations statement: Distinguishing design limitations from the study's scope and explaining their implications. [Concept: Literature synthesis and Limitations statement]

0049. C - Research question alignment: Checking that the chosen method can directly answer each stated research question. / Dissertation proposal defense: Responding to committee questions and revising the plan before approved data collection. [Concept: Research question alignment and Dissertation proposal defense]

0050. B - Dissertation proposal defense: Responding to committee questions and revising the plan before approved data collection. / Limitations statement: Distinguishing design limitations from the study's scope and explaining their implications. [Concept: Dissertation proposal defense and Limitations statement]

0051. D - Literature synthesis: Comparing findings and methods across studies rather than listing article summaries. / Dissertation proposal defense: Responding to committee questions and revising the plan before approved data collection. [Concept: Literature synthesis and Dissertation proposal defense]

0052. C - Theoretical framework: A set of concepts and relationships used to guide the study's questions, interpretation, and contribution. / Limitations statement: A transparent account of study constraints that may affect interpretation, inference, or transferability. [Concept: Theoretical framework and Limitations statement]

0322. A - Methodological transparency [Concept: Methodological transparency]

0323. C - Research problem statement: A focused description of a significant, researchable problem and the gap the study addresses. / Research question alignment: Consistency among the problem, purpose, questions, design, measures, and planned analysis. [Concept: Research problem statement and Research question alignment]

0324. D - Data management plan: A documented approach for data security, access, retention, sharing, and eventual disposition. / Dissertation defense: A scholarly presentation and examination of completed research, reasoning, findings, and contribution. [Concept: Data management plan and Dissertation defense]

0325. D - Responding to committee questions and revising the plan before approved data collection. [Concept: Dissertation proposal defense]

0326. A - Comparing findings and methods across studies rather than listing article summaries. [Concept: Literature synthesis]

0327. C - Methodological transparency [Concept: Methodological transparency]

0328. B - Research problem statement [Concept: Research problem statement]

0329. D - Data management plan [Concept: Data management plan]

0330. C - Literature synthesis: Comparing findings and methods across studies rather than listing article summaries. / Limitations statement: Distinguishing design limitations from the study's scope and explaining their implications. [Concept: Literature synthesis and Limitations statement]

0331. A - Research question alignment: Checking that the chosen method can directly answer each stated research question. / Theoretical framework: Explaining how a theory shapes the constructs and expected relationships in the study. [Concept: Research question alignment and Theoretical framework]

0332. B - Methodological transparency [Concept: Methodological transparency]

0333. C - Dissertation proposal defense [Concept: Dissertation proposal defense]

0334. C - IRB or ethics review [Concept: IRB or ethics review]

0335. C - Research problem statement: Stating who is affected, what is not yet understood, and why the proposed inquiry matters. / Literature synthesis: Comparing findings and methods across studies rather than listing article summaries. [Concept: Research problem statement and Literature synthesis]

0336. A - Theoretical framework [Concept: Theoretical framework]

0337. A - Dissertation proposal defense [Concept: Dissertation proposal defense]

0338. A - Research question alignment [Concept: Research question alignment]

0339. B - Research question alignment [Concept: Research question alignment]

0340. D - Research problem statement: A focused description of a significant, researchable problem and the gap the study addresses. / Dissertation proposal defense: A formal review of the proposed study's significance, feasibility, methods, and protections before implementation. [Concept: Research problem statement and Dissertation proposal defense]

0341. B - Research question alignment [Concept: Research question alignment]

0342. D - Research problem statement [Concept: Research problem statement]

0343. A - Comparing findings and methods across studies rather than listing article summaries. [Concept: Literature synthesis]

0344. C - Research problem statement: A focused description of a significant, researchable problem and the gap the study addresses. / Dissertation proposal defense: A formal review of the proposed study's significance, feasibility, methods, and protections before implementation. [Concept: Research problem statement and Dissertation proposal defense]

0345. C - Dissertation defense [Concept: Dissertation defense]

0346. B - IRB or ethics review [Concept: IRB or ethics review]

0347. A - Dissertation defense [Concept: Dissertation defense]

0348. B - Methodological transparency: Documenting how participants were recruited and how decisions were made. / IRB or ethics review: Obtaining required ethics approval before recruitment or data collection. [Concept: Methodological transparency and IRB or ethics review]

0349. C - Dissertation defense [Concept: Dissertation defense]

0350. C - Literature synthesis: An organized critical integration of prior scholarship that identifies patterns, limitations, and unanswered questions. / Data management plan: A documented approach for data security, access, retention, sharing, and eventual disposition. [Concept: Literature synthesis and Data management plan]

0351. C - IRB or ethics review: Independent review of human-participant research risks, protections, consent, and compliance before research begins. / Dissertation defense: A scholarly presentation and examination of completed research, reasoning, findings, and contribution. [Concept: IRB or ethics review and Dissertation defense]

0352. C - Dissertation proposal defense [Concept: Dissertation proposal defense]

CAC.960 | Dissertation

QUESTION | CORRECT OPTION AND CONCEPT

0353. B - A formal review of the proposed study's significance, feasibility, methods, and protections before implementation. [Concept: Dissertation proposal defense]

0354. D - Theoretical framework [Concept: Theoretical framework]

0355. D - IRB or ethics review [Concept: IRB or ethics review]

0356. B - Checking that the chosen method can directly answer each stated research question. [Concept: Research question alignment]

0357. B - Methodological transparency: Documenting how participants were recruited and how decisions were made. / IRB or ethics review: Obtaining required ethics approval before recruitment or data collection. [Concept: Methodological transparency and IRB or ethics review]

0358. B - An organized critical integration of prior scholarship that identifies patterns, limitations, and unanswered questions. [Concept: Literature synthesis]

0359. A - Dissertation proposal defense [Concept: Dissertation proposal defense]

0360. A - Research question alignment: Consistency among the problem, purpose, questions, design, measures, and planned analysis. / Limitations statement: A transparent account of study constraints that may affect interpretation, inference, or transferability. [Concept: Research question alignment and Limitations statement]

0361. D - Research problem statement: A focused description of a significant, researchable problem and the gap the study addresses. / Dissertation defense: A scholarly presentation and examination of completed research, reasoning, findings, and contribution. [Concept: Research problem statement and Dissertation defense]

0362. A - Checking that the chosen method can directly answer each stated research question. [Concept: Research question alignment]

0363. C - Data management plan [Concept: Data management plan]

0364. B - Documenting how participants were recruited and how decisions were made. [Concept: Methodological transparency]

0365. B - Methodological transparency: Documenting how participants were recruited and how decisions were made. / Limitations statement: Distinguishing design limitations from the study's scope and explaining their implications. [Concept: Methodological transparency and Limitations statement]

0366. A - Literature synthesis [Concept: Literature synthesis]

0367. C - Theoretical framework: Explaining how a theory shapes the constructs and expected relationships in the study. / Dissertation defense: Explaining analytic choices, acknowledging limits, and situating findings in the literature. [Concept: Theoretical framework and Dissertation defense]

0368. C - Dissertation defense [Concept: Dissertation defense]

0369. C - Dissertation proposal defense: Responding to committee questions and revising the plan before approved data collection. / Dissertation defense: Explaining analytic choices, acknowledging limits, and situating findings in the literature. [Concept: Dissertation proposal defense and Dissertation defense]

0370. B - Theoretical framework [Concept: Theoretical framework]

0371. D - Data management plan [Concept: Data management plan]

0372. B - Data management plan [Concept: Data management plan]

0373. B - Research problem statement: Stating who is affected, what is not yet understood, and why the proposed inquiry matters. / Dissertation proposal defense: Responding to committee questions and revising the plan before approved data collection. [Concept: Research problem statement and Dissertation proposal defense]

0374. D - Dissertation proposal defense: A formal review of the proposed study's significance, feasibility, methods, and protections before implementation. / Data management plan: A documented approach for data security, access, retention, sharing, and eventual disposition. [Concept: Dissertation proposal defense and Data management plan]

0375. A - Methodological transparency [Concept: Methodological transparency]

0376. A - Research problem statement: Stating who is affected, what is not yet understood, and why the proposed inquiry matters. / Dissertation proposal defense: Responding to committee questions and revising the plan before approved data collection. [Concept: Research problem statement and Dissertation proposal defense]

0377. C - Data management plan [Concept: Data management plan]

0378. A - Data management plan: Specifying secure storage, access controls, retention, and disposal in advance. / Dissertation defense: Explaining analytic choices, acknowledging limits, and situating findings in the literature. [Concept: Data management plan and Dissertation defense]

0379. A - Theoretical framework [Concept: Theoretical framework]

0380. A - Research problem statement: Stating who is affected, what is not yet understood, and why the proposed inquiry matters. / Dissertation defense: Explaining analytic choices, acknowledging limits, and situating findings in the literature. [Concept: Research problem statement and Dissertation defense]

0381. B - Research problem statement: A focused description of a significant, researchable problem and the gap the study addresses. / Data management plan: A documented approach for data security, access, retention, sharing, and eventual disposition. [Concept: Research problem statement and Data management plan]

0382. B - Literature synthesis: An organized critical integration of prior scholarship that identifies patterns, limitations, and unanswered questions. / Dissertation defense: A scholarly presentation and examination of completed research, reasoning, findings, and contribution. [Concept: Literature synthesis and Dissertation defense]

0383. B - IRB or ethics review: Obtaining required ethics approval before recruitment or data collection. / Dissertation proposal defense: Responding to committee questions and revising the plan before approved data collection. [Concept: IRB or ethics review and Dissertation proposal defense]

0384. D - Research question alignment [Concept: Research question alignment]

0385. C - Research problem statement: A focused description of a significant, researchable problem and the gap the study addresses. / Literature synthesis: An organized critical integration of prior scholarship that identifies patterns, limitations, and unanswered questions. [Concept: Research problem statement and Literature synthesis]

0386. A - Research question alignment [Concept: Research question alignment]

0387. A - Research question alignment [Concept: Research question alignment]

0388. D - Research problem statement: Stating who is affected, what is not yet understood, and why the proposed inquiry matters. / IRB or ethics review: Obtaining required ethics approval before recruitment or data collection. [Concept: Research problem statement and IRB or ethics review]

0389. B - Methodological transparency [Concept: Methodological transparency]

0390. C - Research problem statement [Concept: Research problem statement]

0391. C - IRB or ethics review: Obtaining required ethics approval before recruitment or data collection. / Dissertation proposal defense: Responding to committee questions and revising the plan before approved data collection. [Concept: IRB or ethics review and Dissertation proposal defense]

0392. B - Research question alignment: Checking that the chosen method can directly answer each stated research question. / Dissertation defense: Explaining analytic choices, acknowledging limits, and situating findings in the literature. [Concept: Research question alignment and Dissertation defense]

0393. C - Limitations statement [Concept: Limitations statement]

0394. D - Literature synthesis [Concept: Literature synthesis]

0395. B - A scholarly presentation and examination of completed research, reasoning, findings, and contribution. [Concept: Dissertation defense]

0396. D - Research question alignment [Concept: Research question alignment]

0397. C - A transparent account of study constraints that may affect interpretation, inference, or transferability. [Concept: Limitations statement]

0398. B - Research question alignment [Concept: Research question alignment]

0399. C - Limitations statement [Concept: Limitations statement]

0400. D - Data management plan [Concept: Data management plan]

0401. D - IRB or ethics review [Concept: IRB or ethics review]

0402. C - Theoretical framework: A set of concepts and relationships used to guide the study's questions, interpretation, and contribution. / Dissertation proposal defense: A formal review of the proposed study's significance, feasibility, methods, and protections before implementation. [Concept: Theoretical framework and Dissertation proposal defense]

0403. D - Research problem statement: A focused description of a significant, researchable problem and the gap the study addresses. / Data management plan: A documented approach for data security, access, retention, sharing, and eventual disposition. [Concept: Research problem statement and Data management plan]

0404. D - Data management plan: Specifying secure storage, access controls, retention, and disposal in advance. / Limitations statement: Distinguishing design limitations from the study's scope and explaining their implications. [Concept: Data management plan and Limitations statement]

0405. C - Research question alignment: Consistency among the problem, purpose, questions, design, measures, and planned analysis. / Dissertation proposal defense: A formal review of the proposed study's significance, feasibility, methods, and protections before implementation. [Concept: Research question alignment and Dissertation proposal defense]

0406. A - Methodological transparency: Clear reporting of procedures, sampling, measures, and analysis sufficient for informed evaluation. / Dissertation defense: A scholarly presentation and examination of completed research, reasoning, findings, and contribution. [Concept: Methodological transparency and Dissertation defense]

0407. B - IRB or ethics review [Concept: IRB or ethics review]

0408. C - Research problem statement: Stating who is affected, what is not yet understood, and why the proposed inquiry matters. / Research question alignment: Checking that the chosen method can directly answer each stated research question. [Concept: Research problem statement and Research question alignment]

0409. B - Research question alignment: Consistency among the problem, purpose, questions, design, measures, and planned analysis. / Limitations statement: A transparent account of study constraints that may affect interpretation, inference, or transferability. [Concept: Research question alignment and Limitations statement]

0410. A - Methodological transparency [Concept: Methodological transparency]

CAC.960 | Dissertation

QUESTION | CORRECT OPTION AND CONCEPT

0411. C - IRB or ethics review: Independent review of human-participant research risks, protections, consent, and compliance before research begins. / Limitations statement: A transparent account of study constraints that may affect interpretation, inference, or transferability. [Concept: IRB or ethics review and Limitations statement]

0412. C - IRB or ethics review [Concept: IRB or ethics review]

0413. D - IRB or ethics review [Concept: IRB or ethics review]

0414. A - IRB or ethics review: Obtaining required ethics approval before recruitment or data collection. / Dissertation defense: Explaining analytic choices, acknowledging limits, and situating findings in the literature. [Concept: IRB or ethics review and Dissertation defense]

0415. A - Dissertation defense [Concept: Dissertation defense]

0416. C - Data management plan: A documented approach for data security, access, retention, sharing, and eventual disposition. / Limitations statement: A transparent account of study constraints that may affect interpretation, inference, or transferability. [Concept: Data management plan and Limitations statement]

0417. C - Explaining how a theory shapes the constructs and expected relationships in the study. [Concept: Theoretical framework]

0418. C - Literature synthesis [Concept: Literature synthesis]

0419. A - Methodological transparency: Clear reporting of procedures, sampling, measures, and analysis sufficient for informed evaluation. / Limitations statement: A transparent account of study constraints that may affect interpretation, inference, or transferability. [Concept: Methodological transparency and Limitations statement]

0420. D - Research question alignment: Checking that the chosen method can directly answer each stated research question. / Limitations statement: Distinguishing design limitations from the study's scope and explaining their implications. [Concept: Research question alignment and Limitations statement]

0421. B - Research question alignment: Consistency among the problem, purpose, questions, design, measures, and planned analysis. / Dissertation proposal defense: A formal review of the proposed study's significance, feasibility, methods, and protections before implementation. [Concept: Research question alignment and Dissertation proposal defense]

0422. C - A set of concepts and relationships used to guide the study's questions, interpretation, and contribution. [Concept: Theoretical framework]

0423. C - Methodological transparency [Concept: Methodological transparency]

0424. A - Research problem statement [Concept: Research problem statement]

0425. C - Obtaining required ethics approval before recruitment or data collection. [Concept: IRB or ethics review]

0426. B - Research problem statement: Stating who is affected, what is not yet understood, and why the proposed inquiry matters. / Dissertation proposal defense: Responding to committee questions and revising the plan before approved data collection. [Concept: Research problem statement and Dissertation proposal defense]

0427. A - Literature synthesis: An organized critical integration of prior scholarship that identifies patterns, limitations, and unanswered questions. / Limitations statement: A transparent account of study constraints that may affect interpretation, inference, or transferability. [Concept: Literature synthesis and Limitations statement]

0428. C - Clear reporting of procedures, sampling, measures, and analysis sufficient for informed evaluation. [Concept: Methodological transparency]

0429. C - Research question alignment: Consistency among the problem, purpose, questions, design, measures, and planned analysis. / Dissertation defense: A scholarly presentation and examination of completed research, reasoning, findings, and contribution. [Concept: Research question alignment and Dissertation defense]

0430. B - IRB or ethics review [Concept: IRB or ethics review]

0431. B - Methodological transparency: Documenting how participants were recruited and how decisions were made. / Dissertation proposal defense: Responding to committee questions and revising the plan before approved data collection. [Concept: Methodological transparency and Dissertation proposal defense]

0432. A - Research question alignment: Checking that the chosen method can directly answer each stated research question. / Limitations statement: Distinguishing design limitations from the study's scope and explaining their implications. [Concept: Research question alignment and Limitations statement]

0433. A - Research problem statement: A focused description of a significant, researchable problem and the gap the study addresses. / Theoretical framework: A set of concepts and relationships used to guide the study's questions, interpretation, and contribution. [Concept: Research problem statement and Theoretical framework]

0434. B - Independent review of human-participant research risks, protections, consent, and compliance before research begins. [Concept: IRB or ethics review]

0435. B - Limitations statement [Concept: Limitations statement]

0436. B - Research question alignment [Concept: Research question alignment]

0437. A - Literature synthesis [Concept: Literature synthesis]

0438. A - Research question alignment: Checking that the chosen method can directly answer each stated research question. / Methodological transparency: Documenting how participants were recruited and how decisions were made. [Concept: Research question alignment and Methodological transparency]

0439. C - Literature synthesis [Concept: Literature synthesis]

0440. D - Theoretical framework: A set of concepts and relationships used to guide the study's questions, interpretation, and contribution. / Limitations statement: A transparent account of study constraints that may affect interpretation, inference, or transferability. [Concept: Theoretical framework and Limitations statement]

0441. C - Data management plan [Concept: Data management plan]

0442. C - Literature synthesis: An organized critical integration of prior scholarship that identifies patterns, limitations, and unanswered questions. / Limitations statement: A transparent account of study constraints that may affect interpretation, inference, or transferability. [Concept: Literature synthesis and Limitations statement]

0443. C - Research problem statement [Concept: Research problem statement]

0444. C - Research question alignment: Checking that the chosen method can directly answer each stated research question. / Theoretical framework: Explaining how a theory shapes the constructs and expected relationships in the study. [Concept: Research question alignment and Theoretical framework]

0445. D - IRB or ethics review: Independent review of human-participant research risks, protections, consent, and compliance before research begins. / Limitations statement: A transparent account of study constraints that may affect interpretation, inference, or transferability. [Concept: IRB or ethics review and Limitations statement]

0446. D - IRB or ethics review: Independent review of human-participant research risks, protections, consent, and compliance before research begins. / Limitations statement: A transparent account of study constraints that may affect interpretation, inference, or transferability. [Concept: IRB or ethics review and Limitations statement]

0447. D - Data management plan [Concept: Data management plan]

0448. D - Consistency among the problem, purpose, questions, design, measures, and planned analysis. [Concept: Research question alignment]

0449. B - Literature synthesis: Comparing findings and methods across studies rather than listing article summaries. / IRB or ethics review: Obtaining required ethics approval before recruitment or data collection. [Concept: Literature synthesis and IRB or ethics review]

0450. A - Theoretical framework: Explaining how a theory shapes the constructs and expected relationships in the study. / IRB or ethics review: Obtaining required ethics approval before recruitment or data collection. [Concept: Theoretical framework and IRB or ethics review]

0451. B - Theoretical framework [Concept: Theoretical framework]

0452. C - Literature synthesis: An organized critical integration of prior scholarship that identifies patterns, limitations, and unanswered questions. / Dissertation proposal defense: A formal review of the proposed study's significance, feasibility, methods, and protections before implementation. [Concept: Literature synthesis and Dissertation proposal defense]

0453. C - Methodological transparency [Concept: Methodological transparency]

0454. B - Limitations statement [Concept: Limitations statement]

0455. D - Research problem statement [Concept: Research problem statement]

0456. D - Dissertation proposal defense [Concept: Dissertation proposal defense]

0457. D - Methodological transparency [Concept: Methodological transparency]

0458. D - Methodological transparency: Clear reporting of procedures, sampling, measures, and analysis sufficient for informed evaluation. / Data management plan: A documented approach for data security, access, retention, sharing, and eventual disposition. [Concept: Methodological transparency and Data management plan]

0459. A - IRB or ethics review: Independent review of human-participant research risks, protections, consent, and compliance before research begins. / Limitations statement: A transparent account of study constraints that may affect interpretation, inference, or transferability. [Concept: IRB or ethics review and Limitations statement]

0460. C - Research question alignment: Consistency among the problem, purpose, questions, design, measures, and planned analysis. / Limitations statement: A transparent account of study constraints that may affect interpretation, inference, or transferability. [Concept: Research question alignment and Limitations statement]

0461. D - Literature synthesis: Comparing findings and methods across studies rather than listing article summaries. / Dissertation defense: Explaining analytic choices, acknowledging limits, and situating findings in the literature. [Concept: Literature synthesis and Dissertation defense]

CAC.960 | Dissertation

QUESTION | CORRECT OPTION AND CONCEPT

0519. B - Research problem statement: Stating who is affected, what is not yet understood, and why the proposed inquiry matters. / Data management plan: Specifying secure storage, access controls, retention, and disposal in advance. [Concept: Research problem statement and Data management plan]

0520. B - Theoretical framework [Concept: Theoretical framework]

0521. A - Methodological transparency [Concept: Methodological transparency]

0522. B - Literature synthesis [Concept: Literature synthesis]

0523. A - Research question alignment: Checking that the chosen method can directly answer each stated research question. / Limitations statement: Distinguishing design limitations from the study's scope and explaining their implications. [Concept: Research question alignment and Limitations statement]

0524. D - Literature synthesis [Concept: Literature synthesis]

0525. A - Research question alignment: Checking that the chosen method can directly answer each stated research question. / Dissertation proposal defense: Responding to committee questions and revising the plan before approved data collection. [Concept: Research question alignment and Dissertation proposal defense]

0526. B - IRB or ethics review [Concept: IRB or ethics review]

0527. A - Methodological transparency [Concept: Methodological transparency]

0528. B - Theoretical framework: Explaining how a theory shapes the constructs and expected relationships in the study. / IRB or ethics review: Obtaining required ethics approval before recruitment or data collection. [Concept: Theoretical framework and IRB or ethics review]

0529. B - Research problem statement: Stating who is affected, what is not yet understood, and why the proposed inquiry matters. / Research question alignment: Checking that the chosen method can directly answer each stated research question. [Concept: Research problem statement and Research question alignment]

0530. C - IRB or ethics review: Independent review of human-participant research risks, protections, consent, and compliance before research begins. / Dissertation defense: A scholarly presentation and examination of completed research, reasoning, findings, and contribution. [Concept: IRB or ethics review and Dissertation defense]

0531. C - Research problem statement [Concept: Research problem statement]

0532. C - Literature synthesis: Comparing findings and methods across studies rather than listing article summaries. / Research question alignment: Checking that the chosen method can directly answer each stated research question. [Concept: Literature synthesis and Research question alignment]

0533. A - Limitations statement [Concept: Limitations statement]

0534. A - Theoretical framework: Explaining how a theory shapes the constructs and expected relationships in the study. / Data management plan: Specifying secure storage, access controls, retention, and disposal in advance. [Concept: Theoretical framework and Data management plan]

0535. C - Research problem statement: Stating who is affected, what is not yet understood, and why the proposed inquiry matters. / Limitations statement: Distinguishing design limitations from the study's scope and explaining their implications. [Concept: Research problem statement and Limitations statement]

0536. D - Research problem statement [Concept: Research problem statement]

0537. D - Dissertation proposal defense: A formal review of the proposed study's significance, feasibility, methods, and protections before implementation. / Limitations statement: A transparent account of study constraints that may affect interpretation, inference, or transferability. [Concept: Dissertation proposal defense and Limitations statement]

0538. D - Research problem statement: A focused description of a significant, researchable problem and the gap the study addresses. / Limitations statement: A transparent account of study constraints that may affect interpretation, inference, or transferability. [Concept: Research problem statement and Limitations statement]

0539. B - Literature synthesis: Comparing findings and methods across studies rather than listing article summaries. / Methodological transparency: Documenting how participants were recruited and how decisions were made. [Concept: Literature synthesis and Methodological transparency]

0540. A - Research question alignment: Consistency among the problem, purpose, questions, design, measures, and planned analysis. / Data management plan: A documented approach for data security, access, retention, sharing, and eventual disposition. [Concept: Research question alignment and Data management plan]

0541. C - Literature synthesis [Concept: Literature synthesis]

0542. D - Research problem statement [Concept: Research problem statement]

0543. B - IRB or ethics review [Concept: IRB or ethics review]

0544. B - Research problem statement: Stating who is affected, what is not yet understood, and why the proposed inquiry matters. / Methodological transparency: Documenting how participants were recruited and how decisions were made. [Concept: Research problem statement and Methodological transparency]

0545. B - Methodological transparency: Clear reporting of procedures, sampling, measures, and analysis sufficient for informed evaluation. / Data management plan: A documented approach for data security, access, retention, sharing, and eventual disposition. [Concept: Methodological transparency and Data management plan]

0546. A - Dissertation proposal defense [Concept: Dissertation proposal defense]

0547. C - Research question alignment [Concept: Research question alignment]

0548. A - Theoretical framework: A set of concepts and relationships used to guide the study's questions, interpretation, and contribution. / Limitations statement: A transparent account of study constraints that may affect interpretation, inference, or transferability. [Concept: Theoretical framework and Limitations statement]

0549. A - Research problem statement [Concept: Research problem statement]

0550. C - Methodological transparency: Clear reporting of procedures, sampling, measures, and analysis sufficient for informed evaluation. / Data management plan: A documented approach for data security, access, retention, sharing, and eventual disposition. [Concept: Methodological transparency and Data management plan]

0551. A - Literature synthesis: An organized critical integration of prior scholarship that identifies patterns, limitations, and unanswered questions. / Methodological transparency: Clear reporting of procedures, sampling, measures, and analysis sufficient for informed evaluation. [Concept: Literature synthesis and Methodological transparency]

0552. B - Research problem statement: A focused description of a significant, researchable problem and the gap the study addresses. / Dissertation defense: A scholarly presentation and examination of completed research, reasoning, findings, and contribution. [Concept: Research problem statement and Dissertation defense]

0553. A - Research problem statement: Stating who is affected, what is not yet understood, and why the proposed inquiry matters. / Theoretical framework: Explaining how a theory shapes the constructs and expected relationships in the study. [Concept: Research problem statement and Theoretical framework]

0554. C - Research problem statement: Stating who is affected, what is not yet understood, and why the proposed inquiry matters. / Data management plan: Specifying secure storage, access controls, retention, and disposal in advance. [Concept: Research problem statement and Data management plan]

0555. A - Dissertation defense [Concept: Dissertation defense]

0556. A - IRB or ethics review [Concept: IRB or ethics review]

0557. D - Dissertation proposal defense [Concept: Dissertation proposal defense]

0558. A - Research question alignment [Concept: Research question alignment]

0559. A - Methodological transparency: Clear reporting of procedures, sampling, measures, and analysis sufficient for informed evaluation. / Dissertation proposal defense: A formal review of the proposed study's significance, feasibility, methods, and protections before implementation. [Concept: Methodological transparency and Dissertation proposal defense]

0560. C - IRB or ethics review [Concept: IRB or ethics review]

0561. C - Research problem statement: A focused description of a significant, researchable problem and the gap the study addresses. / Dissertation proposal defense: A formal review of the proposed study's significance, feasibility, methods, and protections before implementation. [Concept: Research problem statement and Dissertation proposal defense]

0562. C - Research question alignment [Concept: Research question alignment]

0563. B - Methodological transparency: Clear reporting of procedures, sampling, measures, and analysis sufficient for informed evaluation. / Dissertation defense: A scholarly presentation and examination of completed research, reasoning, findings, and contribution. [Concept: Methodological transparency and Dissertation defense]

0564. D - Data management plan [Concept: Data management plan]

0565. C - IRB or ethics review: Obtaining required ethics approval before recruitment or data collection. / Dissertation proposal defense: Responding to committee questions and revising the plan before approved data collection. [Concept: IRB or ethics review and Dissertation proposal defense]

0566. C - A scholarly presentation and examination of completed research, reasoning, findings, and contribution. [Concept: Dissertation defense]

0567. A - Theoretical framework [Concept: Theoretical framework]

0568. C - Dissertation proposal defense: A formal review of the proposed study's significance, feasibility, methods, and protections before implementation. / Limitations statement: A transparent account of study constraints that may affect interpretation, inference, or transferability. [Concept: Dissertation proposal defense and Limitations statement]

0569. B - Literature synthesis: An organized critical integration of prior scholarship that identifies patterns, limitations, and unanswered questions. / Methodological transparency: Clear reporting of procedures, sampling, measures, and analysis sufficient for informed evaluation. [Concept: Literature synthesis and Methodological transparency]

0570. B - Theoretical framework: Explaining how a theory shapes the constructs and expected relationships in the study. / Dissertation defense: Explaining analytic choices, acknowledging limits, and situating findings in the literature. [Concept: Theoretical framework and Dissertation defense]

0571. D - Dissertation defense [Concept: Dissertation defense]

0572. C - Research problem statement: A focused description of a significant, researchable problem and the gap the study addresses. / Literature synthesis: An organized critical integration of prior scholarship that identifies patterns, limitations, and unanswered questions. [Concept: Research problem statement and Literature synthesis]

CAC.960 | Dissertation

QUESTION | CORRECT OPTION AND CONCEPT

0573. A - Data management plan: A documented approach for data security, access, retention, sharing, and eventual disposition. / Limitations statement: A transparent account of study constraints that may affect interpretation, inference, or transferability. [Concept: Data management plan and Limitations statement]

0574. D - Data management plan [Concept: Data management plan]

0575. D - Research question alignment [Concept: Research question alignment]

0576. B - Research question alignment [Concept: Research question alignment]

0577. A - Literature synthesis [Concept: Literature synthesis]

0578. D - Limitations statement [Concept: Limitations statement]

0579. B - Literature synthesis: Comparing findings and methods across studies rather than listing article summaries. / Methodological transparency: Documenting how participants were recruited and how decisions were made. [Concept: Literature synthesis and Methodological transparency]

0580. D - Research problem statement [Concept: Research problem statement]

0581. B - Methodological transparency [Concept: Methodological transparency]

0582. B - IRB or ethics review [Concept: IRB or ethics review]

0583. B - Theoretical framework: A set of concepts and relationships used to guide the study's questions, interpretation, and contribution. / Dissertation proposal defense: A formal review of the proposed study's significance, feasibility, methods, and protections before implementation. [Concept: Theoretical framework and Dissertation proposal defense]

0584. C - Literature synthesis: An organized critical integration of prior scholarship that identifies patterns, limitations, and unanswered questions. / Dissertation defense: A scholarly presentation and examination of completed research, reasoning, findings, and contribution. [Concept: Literature synthesis and Dissertation defense]

0585. D - Methodological transparency: Clear reporting of procedures, sampling, measures, and analysis sufficient for informed evaluation. / Limitations statement: A transparent account of study constraints that may affect interpretation, inference, or transferability. [Concept: Methodological transparency and Limitations statement]

0586. D - Data management plan [Concept: Data management plan]

0587. D - Dissertation proposal defense [Concept: Dissertation proposal defense]

0588. D - Data management plan [Concept: Data management plan]

0589. B - Dissertation defense [Concept: Dissertation defense]

0590. C - Methodological transparency: Clear reporting of procedures, sampling, measures, and analysis sufficient for informed evaluation. / Data management plan: A documented approach for data security, access, retention, sharing, and eventual disposition. [Concept: Methodological transparency and Data management plan]

0591. D - IRB or ethics review [Concept: IRB or ethics review]

0592. D - IRB or ethics review [Concept: IRB or ethics review]

0593. A - Methodological transparency: Documenting how participants were recruited and how decisions were made. / Data management plan: Specifying secure storage, access controls, retention, and disposal in advance. [Concept: Methodological transparency and Data management plan]

0594. C - Research problem statement: Stating who is affected, what is not yet understood, and why the proposed inquiry matters. / Data management plan: Specifying secure storage, access controls, retention, and disposal in advance. [Concept: Research problem statement and Data management plan]

0595. C - Methodological transparency [Concept: Methodological transparency]

0596. D - Literature synthesis [Concept: Literature synthesis]

0597. D - Theoretical framework [Concept: Theoretical framework]

0598. D - Theoretical framework: Explaining how a theory shapes the constructs and expected relationships in the study. / Data management plan: Specifying secure storage, access controls, retention, and disposal in advance. [Concept: Theoretical framework and Data management plan]

0599. C - Dissertation proposal defense: A formal review of the proposed study's significance, feasibility, methods, and protections before implementation. / Data management plan: A documented approach for data security, access, retention, sharing, and eventual disposition. [Concept: Dissertation proposal defense and Data management plan]

0600. B - Responding to committee questions and revising the plan before approved data collection. [Concept: Dissertation proposal defense]

0601. A - Research problem statement [Concept: Research problem statement]

0602. C - A scholarly presentation and examination of completed research, reasoning, findings, and contribution. [Concept: Dissertation defense]

0603. A - Literature synthesis [Concept: Literature synthesis]

0604. A - Dissertation defense [Concept: Dissertation defense]

0605. B - Methodological transparency: Clear reporting of procedures, sampling, measures, and analysis sufficient for informed evaluation. / IRB or ethics review: Independent review of human-participant research risks, protections, consent, and compliance before research begins. [Concept: Methodological transparency and IRB or ethics review]

0606. B - Research question alignment [Concept: Research question alignment]

0607. C - IRB or ethics review [Concept: IRB or ethics review]

0608. A - Research problem statement: A focused description of a significant, researchable problem and the gap the study addresses. / IRB or ethics review: Independent review of human-participant research risks, protections, consent, and compliance before research begins. [Concept: Research problem statement and IRB or ethics review]

0609. B - Data management plan [Concept: Data management plan]

0610. B - IRB or ethics review: Independent review of human-participant research risks, protections, consent, and compliance before research begins. / Dissertation proposal defense: A formal review of the proposed study's significance, feasibility, methods, and protections before implementation. [Concept: IRB or ethics review and Dissertation proposal defense]

0611. A - IRB or ethics review: Obtaining required ethics approval before recruitment or data collection. / Dissertation proposal defense: Responding to committee questions and revising the plan before approved data collection. [Concept: IRB or ethics review and Dissertation proposal defense]

0612. A - Theoretical framework: A set of concepts and relationships used to guide the study's questions, interpretation, and contribution. / Dissertation defense: A scholarly presentation and examination of completed research, reasoning, findings, and contribution. [Concept: Theoretical framework and Dissertation defense]

0613. D - Theoretical framework: A set of concepts and relationships used to guide the study's questions, interpretation, and contribution. / IRB or ethics review: Independent review of human-participant research risks, protections, consent, and compliance before research begins. [Concept: Theoretical framework and IRB or ethics review]

0614. B - Research question alignment: Checking that the chosen method can directly answer each stated research question. / Dissertation defense: Explaining analytic choices, acknowledging limits, and situating findings in the literature. [Concept: Research question alignment and Dissertation defense]

0615. C - Clear reporting of procedures, sampling, measures, and analysis sufficient for informed evaluation. [Concept: Methodological transparency]

0616. B - Comparing findings and methods across studies rather than listing article summaries. [Concept: Literature synthesis]

0617. C - Data management plan [Concept: Data management plan]

0618. D - Literature synthesis: Comparing findings and methods across studies rather than listing article summaries. / Theoretical framework: Explaining how a theory shapes the constructs and expected relationships in the study. [Concept: Literature synthesis and Theoretical framework]

0619. D - Specifying secure storage, access controls, retention, and disposal in advance. [Concept: Data management plan]

0620. A - Research question alignment: Checking that the chosen method can directly answer each stated research question. / Theoretical framework: Explaining how a theory shapes the constructs and expected relationships in the study. [Concept: Research question alignment and Theoretical framework]

0621. D - Literature synthesis [Concept: Literature synthesis]

0622. B - Research problem statement: A focused description of a significant, researchable problem and the gap the study addresses. / Dissertation proposal defense: A formal review of the proposed study's significance, feasibility, methods, and protections before implementation. [Concept: Research problem statement and Dissertation proposal defense]

0623. A - A documented approach for data security, access, retention, sharing, and eventual disposition. [Concept: Data management plan]

0624. B - Data management plan: Specifying secure storage, access controls, retention, and disposal in advance. / Dissertation defense: Explaining analytic choices, acknowledging limits, and situating findings in the literature. [Concept: Data management plan and Dissertation defense]

0625. C - Data management plan [Concept: Data management plan]

0626. A - Theoretical framework: Explaining how a theory shapes the constructs and expected relationships in the study. / Dissertation defense: Explaining analytic choices, acknowledging limits, and situating findings in the literature. [Concept: Theoretical framework and Dissertation defense]

0627. A - Research question alignment: Consistency among the problem, purpose, questions, design, measures, and planned analysis. / IRB or ethics review: Independent review of human-participant research risks, protections, consent, and compliance before research begins. [Concept: Research question alignment and IRB or ethics review]

0628. C - Dissertation proposal defense [Concept: Dissertation proposal defense]

0629. C - Documenting how participants were recruited and how decisions were made. [Concept: Methodological transparency]

0630. B - IRB or ethics review: Independent review of human-participant research risks, protections, consent, and compliance before research begins. / Data management plan: A documented approach for data security, access, retention, sharing, and eventual disposition. [Concept: IRB or ethics review and Data management plan]

0631. A - A scholarly presentation and examination of completed research, reasoning, findings, and contribution. [Concept: Dissertation defense]

CAC.960 | Dissertation

QUESTION | CORRECT OPTION AND CONCEPT

0632. D - Research question alignment: Consistency among the problem, purpose, questions, design, measures, and planned analysis. / Theoretical framework: A set of concepts and relationships used to guide the study's questions, interpretation, and contribution. [Concept: Research question alignment and Theoretical framework]

0633. A - Methodological transparency: Documenting how participants were recruited and how decisions were made. / Dissertation defense: Explaining analytic choices, acknowledging limits, and situating findings in the literature. [Concept: Methodological transparency and Dissertation defense]

0634. D - Dissertation proposal defense [Concept: Dissertation proposal defense]

0635. B - Research question alignment: Consistency among the problem, purpose, questions, design, measures, and planned analysis. / Limitations statement: A transparent account of study constraints that may affect interpretation, inference, or transferability. [Concept: Research question alignment and Limitations statement]

0636. C - Dissertation proposal defense: Responding to committee questions and revising the plan before approved data collection. / Dissertation defense: Explaining analytic choices, acknowledging limits, and situating findings in the literature. [Concept: Dissertation proposal defense and Dissertation defense]

0637. C - Literature synthesis: An organized critical integration of prior scholarship that identifies patterns, limitations, and unanswered questions. / Research question alignment: Consistency among the problem, purpose, questions, design, measures, and planned analysis. [Concept: Literature synthesis and Research question alignment]

0638. B - Theoretical framework [Concept: Theoretical framework]

0639. C - A focused description of a significant, researchable problem and the gap the study addresses. [Concept: Research problem statement]

0640. D - IRB or ethics review [Concept: IRB or ethics review]

0641. D - Literature synthesis: Comparing findings and methods across studies rather than listing article summaries. / IRB or ethics review: Obtaining required ethics approval before recruitment or data collection. [Concept: Literature synthesis and IRB or ethics review]

0642. B - Literature synthesis: An organized critical integration of prior scholarship that identifies patterns, limitations, and unanswered questions. / Data management plan: A documented approach for data security, access, retention, sharing, and eventual disposition. [Concept: Literature synthesis and Data management plan]

0643. C - Theoretical framework: A set of concepts and relationships used to guide the study's questions, interpretation, and contribution. / Methodological transparency: Clear reporting of procedures, sampling, measures, and analysis sufficient for informed evaluation. [Concept: Theoretical framework and Methodological transparency]

0644. A - Literature synthesis: An organized critical integration of prior scholarship that identifies patterns, limitations, and unanswered questions. / Dissertation proposal defense: A formal review of the proposed study's significance, feasibility, methods, and protections before implementation. [Concept: Literature synthesis and Dissertation proposal defense]

0645. B - Literature synthesis: An organized critical integration of prior scholarship that identifies patterns, limitations, and unanswered questions. / Limitations statement: A transparent account of study constraints that may affect interpretation, inference, or transferability. [Concept: Literature synthesis and Limitations statement]

0646. B - A documented approach for data security, access, retention, sharing, and eventual disposition. [Concept: Data management plan]

0647. C - Methodological transparency: Documenting how participants were recruited and how decisions were made. / IRB or ethics review: Obtaining required ethics approval before recruitment or data collection. [Concept: Methodological transparency and IRB or ethics review]

0648. D - Checking that the chosen method can directly answer each stated research question. [Concept: Research question alignment]

0649. C - Literature synthesis: Comparing findings and methods across studies rather than listing article summaries. / Data management plan: Specifying secure storage, access controls, retention, and disposal in advance. [Concept: Literature synthesis and Data management plan]

0650. C - Dissertation defense [Concept: Dissertation defense]

0651. D - Literature synthesis [Concept: Literature synthesis]

0652. A - IRB or ethics review: Obtaining required ethics approval before recruitment or data collection. / Limitations statement: Distinguishing design limitations from the study's scope and explaining their implications. [Concept: IRB or ethics review and Limitations statement]

0653. C - Methodological transparency [Concept: Methodological transparency]

0654. D - Research question alignment: Consistency among the problem, purpose, questions, design, measures, and planned analysis. / IRB or ethics review: Independent review of human-participant research risks, protections, consent, and compliance before research begins. [Concept: Research question alignment and IRB or ethics review]

0655. D - Dissertation proposal defense: Responding to committee questions and revising the plan before approved data collection. / Data management plan: Specifying secure storage, access controls, retention, and disposal in advance. [Concept: Dissertation proposal defense and Data management plan]

0656. A - Data management plan [Concept: Data management plan]

0657. A - Theoretical framework: A set of concepts and relationships used to guide the study's questions, interpretation, and contribution. / Data management plan: A documented approach for data security, access, retention, sharing, and eventual disposition. [Concept: Theoretical framework and Data management plan]

0658. C - Methodological transparency: Documenting how participants were recruited and how decisions were made. / Dissertation proposal defense: Responding to committee questions and revising the plan before approved data collection. [Concept: Methodological transparency and Dissertation proposal defense]

0659. A - Theoretical framework: Explaining how a theory shapes the constructs and expected relationships in the study. / Data management plan: Specifying secure storage, access controls, retention, and disposal in advance. [Concept: Theoretical framework and Data management plan]

0660. B - Research problem statement: Stating who is affected, what is not yet understood, and why the proposed inquiry matters. / Research question alignment: Checking that the chosen method can directly answer each stated research question. [Concept: Research problem statement and Research question alignment]

0661. C - Methodological transparency [Concept: Methodological transparency]

0662. B - Methodological transparency [Concept: Methodological transparency]

0663. A - Data management plan [Concept: Data management plan]

0664. A - Methodological transparency [Concept: Methodological transparency]

0665. C - Dissertation proposal defense [Concept: Dissertation proposal defense]

0666. C - Theoretical framework [Concept: Theoretical framework]

0667. B - Research question alignment [Concept: Research question alignment]

0668. C - Explaining how a theory shapes the constructs and expected relationships in the study. [Concept: Theoretical framework]

0669. B - IRB or ethics review [Concept: IRB or ethics review]

0670. A - Research question alignment: Checking that the chosen method can directly answer each stated research question. / Dissertation proposal defense: Responding to committee questions and revising the plan before approved data collection. [Concept: Research question alignment and Dissertation proposal defense]

0671. A - Explaining how a theory shapes the constructs and expected relationships in the study. [Concept: Theoretical framework]

0672. A - A transparent account of study constraints that may affect interpretation, inference, or transferability. [Concept: Limitations statement]

0673. D - Methodological transparency [Concept: Methodological transparency]

0674. C - Theoretical framework [Concept: Theoretical framework]

0675. A - Research problem statement [Concept: Research problem statement]

0676. B - Data management plan: A documented approach for data security, access, retention, sharing, and eventual disposition. / Limitations statement: A transparent account of study constraints that may affect interpretation, inference, or transferability. [Concept: Data management plan and Limitations statement]

0677. B - Research problem statement: Stating who is affected, what is not yet understood, and why the proposed inquiry matters. / Methodological transparency: Documenting how participants were recruited and how decisions were made. [Concept: Research problem statement and Methodological transparency]

0678. B - Theoretical framework [Concept: Theoretical framework]

0679. D - Research question alignment: Consistency among the problem, purpose, questions, design, measures, and planned analysis. / Limitations statement: A transparent account of study constraints that may affect interpretation, inference, or transferability. [Concept: Research question alignment and Limitations statement]

0680. B - Independent review of human-participant research risks, protections, consent, and compliance before research begins. [Concept: IRB or ethics review]

0681. C - Dissertation defense [Concept: Dissertation defense]

0682. D - Data management plan [Concept: Data management plan]

0683. A - Limitations statement [Concept: Limitations statement]

0684. C - Theoretical framework [Concept: Theoretical framework]

0685. B - Research question alignment: Checking that the chosen method can directly answer each stated research question. / Data management plan: Specifying secure storage, access controls, retention, and disposal in advance. [Concept: Research question alignment and Data management plan]

0686. C - A formal review of the proposed study's significance, feasibility, methods, and protections before implementation. [Concept: Dissertation proposal defense]

0687. A - Research question alignment [Concept: Research question alignment]

0688. A - Data management plan [Concept: Data management plan]

0689. B - Literature synthesis [Concept: Literature synthesis]

0690. D - Research question alignment: Consistency among the problem, purpose, questions, design, measures, and planned analysis. / Data management plan: A documented approach for data security, access, retention, sharing, and eventual disposition. [Concept: Research question alignment and Data management plan]

CAC.960 | Dissertation

QUESTION | CORRECT OPTION AND CONCEPT

0691. A - Literature synthesis: Comparing findings and methods across studies rather than listing article summaries. / Data management plan: Specifying secure storage, access controls, retention, and disposal in advance. [Concept: Literature synthesis and Data management plan]

0692. D - Dissertation proposal defense [Concept: Dissertation proposal defense]

0693. C - Research problem statement: A focused description of a significant, researchable problem and the gap the study addresses. / Methodological transparency: Clear reporting of procedures, sampling, measures, and analysis sufficient for informed evaluation. [Concept: Research problem statement and Methodological transparency]

0694. D - Research question alignment [Concept: Research question alignment]

0695. B - Literature synthesis [Concept: Literature synthesis]

0696. C - IRB or ethics review [Concept: IRB or ethics review]

0697. A - Research question alignment [Concept: Research question alignment]

0698. B - Literature synthesis: Comparing findings and methods across studies rather than listing article summaries. / Dissertation defense: Explaining analytic choices, acknowledging limits, and situating findings in the literature. [Concept: Literature synthesis and Dissertation defense]

0699. B - A focused description of a significant, researchable problem and the gap the study addresses. [Concept: Research problem statement]

0700. D - Research problem statement: A focused description of a significant, researchable problem and the gap the study addresses. / IRB or ethics review: Independent review of human-participant research risks, protections, consent, and compliance before research begins. [Concept: Research problem statement and IRB or ethics review]

0701. B - A transparent account of study constraints that may affect interpretation, inference, or transferability. [Concept: Limitations statement]

0702. A - Limitations statement [Concept: Limitations statement]

0703. C - Methodological transparency: Documenting how participants were recruited and how decisions were made. / IRB or ethics review: Obtaining required ethics approval before recruitment or data collection. [Concept: Methodological transparency and IRB or ethics review]

0704. B - Clear reporting of procedures, sampling, measures, and analysis sufficient for informed evaluation. [Concept: Methodological transparency]

0705. B - Limitations statement [Concept: Limitations statement]

0706. D - Research question alignment: Consistency among the problem, purpose, questions, design, measures, and planned analysis. / Theoretical framework: A set of concepts and relationships used to guide the study's questions, interpretation, and contribution. [Concept: Research question alignment and Theoretical framework]

0707. D - Research question alignment: Checking that the chosen method can directly answer each stated research question. / Theoretical framework: Explaining how a theory shapes the constructs and expected relationships in the study. [Concept: Research question alignment and Theoretical framework]

0708. B - Theoretical framework: Explaining how a theory shapes the constructs and expected relationships in the study. / Methodological transparency: Documenting how participants were recruited and how decisions were made. [Concept: Theoretical framework and Methodological transparency]

0709. C - Data management plan [Concept: Data management plan]

0710. B - Dissertation proposal defense [Concept: Dissertation proposal defense]

0711. D - Data management plan [Concept: Data management plan]

0712. D - Data management plan [Concept: Data management plan]

0713. B - Methodological transparency: Documenting how participants were recruited and how decisions were made. / Limitations statement: Distinguishing design limitations from the study's scope and explaining their implications. [Concept: Methodological transparency and Limitations statement]

0714. C - IRB or ethics review [Concept: IRB or ethics review]

0715. D - Obtaining required ethics approval before recruitment or data collection. [Concept: IRB or ethics review]

0716. B - Dissertation proposal defense [Concept: Dissertation proposal defense]

0717. C - Methodological transparency: Documenting how participants were recruited and how decisions were made. / Limitations statement: Distinguishing design limitations from the study's scope and explaining their implications. [Concept: Methodological transparency and Limitations statement]

0718. D - Dissertation defense [Concept: Dissertation defense]

0719. A - Research problem statement: Stating who is affected, what is not yet understood, and why the proposed inquiry matters. / Research question alignment: Checking that the chosen method can directly answer each stated research question. [Concept: Research problem statement and Research question alignment]

0720. C - Theoretical framework [Concept: Theoretical framework]

0721. B - IRB or ethics review: Independent review of human-participant research risks, protections, consent, and compliance before research begins. / Data management plan: A documented approach for data security, access, retention, sharing, and eventual disposition. [Concept: IRB or ethics review and Data management plan]

0722. D - Literature synthesis: Comparing findings and methods across studies rather than listing article summaries. / Theoretical framework: Explaining how a theory shapes the constructs and expected relationships in the study. [Concept: Literature synthesis and Theoretical framework]

0723. A - IRB or ethics review: Obtaining required ethics approval before recruitment or data collection. / Limitations statement: Distinguishing design limitations from the study's scope and explaining their implications. [Concept: IRB or ethics review and Limitations statement]

0724. D - An organized critical integration of prior scholarship that identifies patterns, limitations, and unanswered questions. [Concept: Literature synthesis]

0725. A - Dissertation defense [Concept: Dissertation defense]

0726. B - IRB or ethics review [Concept: IRB or ethics review]

0727. D - Research problem statement: A focused description of a significant, researchable problem and the gap the study addresses. / Dissertation defense: A scholarly presentation and examination of completed research, reasoning, findings, and contribution. [Concept: Research problem statement and Dissertation defense]

0728. B - Data management plan [Concept: Data management plan]

0729. C - Theoretical framework: Explaining how a theory shapes the constructs and expected relationships in the study. / Methodological transparency: Documenting how participants were recruited and how decisions were made. [Concept: Theoretical framework and Methodological transparency]

0730. B - A set of concepts and relationships used to guide the study's questions, interpretation, and contribution. [Concept: Theoretical framework]

0731. B - Data management plan [Concept: Data management plan]

0732. A - Research problem statement: Stating who is affected, what is not yet understood, and why the proposed inquiry matters. / IRB or ethics review: Obtaining required ethics approval before recruitment or data collection. [Concept: Research problem statement and IRB or ethics review]

0733. D - Dissertation proposal defense [Concept: Dissertation proposal defense]

0734. D - Methodological transparency [Concept: Methodological transparency]

0735. D - Methodological transparency: Documenting how participants were recruited and how decisions were made. / Dissertation defense: Explaining analytic choices, acknowledging limits, and situating findings in the literature. [Concept: Methodological transparency and Dissertation defense]

0736. A - Dissertation defense [Concept: Dissertation defense]

0737. A - Literature synthesis: An organized critical integration of prior scholarship that identifies patterns, limitations, and unanswered questions. / Methodological transparency: Clear reporting of procedures, sampling, measures, and analysis sufficient for informed evaluation. [Concept: Literature synthesis and Methodological transparency]

0738. A - Research problem statement: A focused description of a significant, researchable problem and the gap the study addresses. / Research question alignment: Consistency among the problem, purpose, questions, design, measures, and planned analysis. [Concept: Research problem statement and Research question alignment]

0739. D - Theoretical framework [Concept: Theoretical framework]

0740. C - Research question alignment: Checking that the chosen method can directly answer each stated research question. / Limitations statement: Distinguishing design limitations from the study's scope and explaining their implications. [Concept: Research question alignment and Limitations statement]

0741. B - Methodological transparency: Documenting how participants were recruited and how decisions were made. / Dissertation defense: Explaining analytic choices, acknowledging limits, and situating findings in the literature. [Concept: Methodological transparency and Dissertation defense]

0742. A - A scholarly presentation and examination of completed research, reasoning, findings, and contribution. [Concept: Dissertation defense]

0743. A - Limitations statement [Concept: Limitations statement]

0744. A - Theoretical framework: Explaining how a theory shapes the constructs and expected relationships in the study. / Dissertation defense: Explaining analytic choices, acknowledging limits, and situating findings in the literature. [Concept: Theoretical framework and Dissertation defense]

0745. C - An organized critical integration of prior scholarship that identifies patterns, limitations, and unanswered questions. [Concept: Literature synthesis]

0746. A - Research problem statement [Concept: Research problem statement]

0747. C - Data management plan [Concept: Data management plan]

0748. A - Research problem statement: Stating who is affected, what is not yet understood, and why the proposed inquiry matters. / Literature synthesis: Comparing findings and methods across studies rather than listing article summaries. [Concept: Research problem statement and Literature synthesis]

0749. C - Theoretical framework: Explaining how a theory shapes the constructs and expected relationships in the study. / Data management plan: Specifying secure storage, access controls, retention, and disposal in advance. [Concept: Theoretical framework and Data management plan]

CAC.960 | Dissertation

QUESTION | CORRECT OPTION AND CONCEPT

0750. D - Data management plan: A documented approach for data security, access, retention, sharing, and eventual disposition. / Limitations statement: A transparent account of study constraints that may affect interpretation, inference, or transferability. [Concept: Data management plan and Limitations statement]

0751. C - Limitations statement [Concept: Limitations statement]

0752. B - Methodological transparency [Concept: Methodological transparency]

0753. C - Dissertation defense [Concept: Dissertation defense]

0754. B - Dissertation proposal defense: A formal review of the proposed study's significance, feasibility, methods, and protections before implementation. / Dissertation defense: A scholarly presentation and examination of completed research, reasoning, findings, and contribution. [Concept: Dissertation proposal defense and Dissertation defense]

0755. C - Documenting how participants were recruited and how decisions were made. [Concept: Methodological transparency]

0756. B - Explaining analytic choices, acknowledging limits, and situating findings in the literature. [Concept: Dissertation defense]

0757. A - Theoretical framework [Concept: Theoretical framework]

0758. B - Literature synthesis [Concept: Literature synthesis]

0759. B - Dissertation proposal defense: A formal review of the proposed study's significance, feasibility, methods, and protections before implementation. / Data management plan: A documented approach for data security, access, retention, sharing, and eventual disposition. [Concept: Dissertation proposal defense and Data management plan]

0760. A - Research question alignment: Consistency among the problem, purpose, questions, design, measures, and planned analysis. / Methodological transparency: Clear reporting of procedures, sampling, measures, and analysis sufficient for informed evaluation. [Concept: Research question alignment and Methodological transparency]

0761. C - Methodological transparency [Concept: Methodological transparency]

0762. C - A documented approach for data security, access, retention, sharing, and eventual disposition. [Concept: Data management plan]

0763. C - Distinguishing design limitations from the study's scope and explaining their implications. [Concept: Limitations statement]

0764. A - Research problem statement: A focused description of a significant, researchable problem and the gap the study addresses. / Methodological transparency: Clear reporting of procedures, sampling, measures, and analysis sufficient for informed evaluation. [Concept: Research problem statement and Methodological transparency]

0765. B - Comparing findings and methods across studies rather than listing article summaries. [Concept: Literature synthesis]

0766. C - Research problem statement: Stating who is affected, what is not yet understood, and why the proposed inquiry matters. / Methodological transparency: Documenting how participants were recruited and how decisions were made. [Concept: Research problem statement and Methodological transparency]

0767. B - Literature synthesis [Concept: Literature synthesis]

0768. C - Literature synthesis: Comparing findings and methods across studies rather than listing article summaries. / IRB or ethics review: Obtaining required ethics approval before recruitment or data collection. [Concept: Literature synthesis and IRB or ethics review]

0769. C - Methodological transparency [Concept: Methodological transparency]

0770. D - IRB or ethics review: Independent review of human-participant research risks, protections, consent, and compliance before research begins. / Dissertation proposal defense: A formal review of the proposed study's significance, feasibility, methods, and protections before implementation. [Concept: IRB or ethics review and Dissertation proposal defense]

0771. A - Limitations statement [Concept: Limitations statement]

0772. C - Research question alignment [Concept: Research question alignment]

0773. A - Literature synthesis: An organized critical integration of prior scholarship that identifies patterns, limitations, and unanswered questions. / Data management plan: A documented approach for data security, access, retention, sharing, and eventual disposition. [Concept: Literature synthesis and Data management plan]

0774. [Concept: Research problem statement and Literature synthesis]

0924. C - Dissertation defense [Concept: Dissertation defense]

0925. D - Research problem statement [Concept: Research problem statement]

CAC.960 | Dissertation

QUESTION | CORRECT OPTION AND CONCEPT

0926. C - Research problem statement [Concept: Research problem statement]

0927. C - Literature synthesis: An organized critical integration of prior scholarship that identifies patterns, limitations, and unanswered questions. / Methodological transparency: Clear reporting of procedures, sampling, measures, and analysis sufficient for informed evaluation. [Concept: Literature synthesis and Methodological transparency]

0928. C - Research problem statement: A focused description of a significant, researchable problem and the gap the study addresses. / Data management plan: A documented approach for data security, access, retention, sharing, and eventual disposition. [Concept: Research problem statement and Data management plan]

0929. C - Research question alignment [Concept: Research question alignment]

0930. A - Literature synthesis: An organized critical integration of prior scholarship that identifies patterns, limitations, and unanswered questions. / Dissertation defense: A scholarly presentation and examination of completed research, reasoning, findings, and contribution. [Concept: Literature synthesis and Dissertation defense]

0931. A - Dissertation proposal defense [Concept: Dissertation proposal defense]

0932. C - Dissertation proposal defense [Concept: Dissertation proposal defense]

0933. C - Limitations statement [Concept: Limitations statement]

0934. C - Literature synthesis: An organized critical integration of prior scholarship that identifies patterns, limitations, and unanswered questions. / Research question alignment: Consistency among the problem, purpose, questions, design, measures, and planned analysis. [Concept: Literature synthesis and Research question alignment]

0935. D - Research problem statement [Concept: Research problem statement]

0936. D - Theoretical framework [Concept: Theoretical framework]

0937. D - Limitations statement [Concept: Limitations statement]

0938. B - Limitations statement [Concept: Limitations statement]

0939. D - Research problem statement: A focused description of a significant, researchable problem and the gap the study addresses. / Research question alignment: Consistency among the problem, purpose, questions, design, measures, and planned analysis. [Concept: Research problem statement and Research question alignment]

0940. C - Literature synthesis: An organized critical integration of prior scholarship that identifies patterns, limitations, and unanswered questions. / Limitations statement: A transparent account of study constraints that may affect interpretation, inference, or transferability. [Concept: Literature synthesis and Limitations statement]

0941. A - Limitations statement: Distinguishing design limitations from the study's scope and explaining their implications. / Dissertation defense: Explaining analytic choices, acknowledging limits, and situating findings in the literature. [Concept: Limitations statement and Dissertation defense]

0942. B - Literature synthesis: An organized critical integration of prior scholarship that identifies patterns, limitations, and unanswered questions. / Limitations statement: A transparent account of study constraints that may affect interpretation, inference, or transferability. [Concept: Literature synthesis and Limitations statement]

0943. C - Methodological transparency: Clear reporting of procedures, sampling, measures, and analysis sufficient for informed evaluation. / Dissertation defense: A scholarly presentation and examination of completed research, reasoning, findings, and contribution. [Concept: Methodological transparency and Dissertation defense]

0944. A - Research question alignment: Checking that the chosen method can directly answer each stated research question. / Methodological transparency: Documenting how participants were recruited and how decisions were made. [Concept: Research question alignment and Methodological transparency]

0945. C - Research question alignment [Concept: Research question alignment]

0946. D - Research problem statement: A focused description of a significant, researchable problem and the gap the study addresses. / Theoretical framework: A set of concepts and relationships used to guide the study's questions, interpretation, and contribution. [Concept: Research problem statement and Theoretical framework]

0947. B - IRB or ethics review [Concept: IRB or ethics review]

0948. B - Research problem statement: Stating who is affected, what is not yet understood, and why the proposed inquiry matters. / Theoretical framework: Explaining how a theory shapes the constructs and expected relationships in the study. [Concept: Research problem statement and Theoretical framework]

0949. C - Limitations statement [Concept: Limitations statement]

0950. C - Literature synthesis [Concept: Literature synthesis]

0951. C - Methodological transparency: Clear reporting of procedures, sampling, measures, and analysis sufficient for informed evaluation. / Data management plan: A documented approach for data security, access, retention, sharing, and eventual disposition. [Concept: Methodological transparency and Data management plan]

0952. D - Dissertation proposal defense [Concept: Dissertation proposal defense]

0953. D - Methodological transparency: Clear reporting of procedures, sampling, measures, and analysis sufficient for informed evaluation. / Dissertation proposal defense: A formal review of the proposed study's significance, feasibility, methods, and protections before implementation. [Concept: Methodological transparency and Dissertation proposal defense]

0954. C - Research problem statement [Concept: Research problem statement]

0955. C - Dissertation defense [Concept: Dissertation defense]

0956. A - Methodological transparency [Concept: Methodological transparency]

0957. C - Research problem statement: A focused description of a significant, researchable problem and the gap the study addresses. / IRB or ethics review: Independent review of human-participant research risks, protections, consent, and compliance before research begins. [Concept: Research problem statement and IRB or ethics review]

0958. B - Research problem statement: A focused description of a significant, researchable problem and the gap the study addresses. / Data management plan: A documented approach for data security, access, retention, sharing, and eventual disposition. [Concept: Research problem statement and Data management plan]

0959. A - Explaining analytic choices, acknowledging limits, and situating findings in the literature. [Concept: Dissertation defense]

0960. C - Dissertation defense [Concept: Dissertation defense]

0961. C - Research problem statement [Concept: Research problem statement]

0962. A - IRB or ethics review [Concept: IRB or ethics review]

0963. D - Obtaining required ethics approval before recruitment or data collection. [Concept: IRB or ethics review]

0964. A - IRB or ethics review: Independent review of human-participant research risks, protections, consent, and compliance before research begins. / Dissertation defense: A scholarly presentation and examination of completed research, reasoning, findings, and contribution. [Concept: IRB or ethics review and Dissertation defense]

0965. B - Theoretical framework [Concept: Theoretical framework]

0966. A - Methodological transparency: Clear reporting of procedures, sampling, measures, and analysis sufficient for informed evaluation. / Limitations statement: A transparent account of study constraints that may affect interpretation, inference, or transferability. [Concept: Methodological transparency and Limitations statement]

0967. A - Research question alignment: Consistency among the problem, purpose, questions, design, measures, and planned analysis. / Data management plan: A documented approach for data security, access, retention, sharing, and eventual disposition. [Concept: Research question alignment and Data management plan]

0968. B - Data management plan [Concept: Data management plan]

0969. C - Literature synthesis [Concept: Literature synthesis]

0970. B - Research question alignment: Checking that the chosen method can directly answer each stated research question. / Data management plan: Specifying secure storage, access controls, retention, and disposal in advance. [Concept: Research question alignment and Data management plan]

0971. B - Dissertation defense [Concept: Dissertation defense]

0972. A - Literature synthesis [Concept: Literature synthesis]

0973. D - Methodological transparency: Documenting how participants were recruited and how decisions were made. / Data management plan: Specifying secure storage, access controls, retention, and disposal in advance. [Concept: Methodological transparency and Data management plan]

0974. C - Research question alignment [Concept: Research question alignment]

0975. C - Theoretical framework: Explaining how a theory shapes the constructs and expected relationships in the study. / Limitations statement: Distinguishing design limitations from the study's scope and explaining their implications. [Concept: Theoretical framework and Limitations statement]

0976. C - Research problem statement [Concept: Research problem statement]

0977. C - Research problem statement: A focused description of a significant, researchable problem and the gap the study addresses. / Theoretical framework: A set of concepts and relationships used to guide the study's questions, interpretation, and contribution. [Concept: Research problem statement and Theoretical framework]

0978. B - Research problem statement: Stating who is affected, what is not yet understood, and why the proposed inquiry matters. / Dissertation defense: Explaining analytic choices, acknowledging limits, and situating findings in the literature. [Concept: Research problem statement and Dissertation defense]

0979. A - Documenting how participants were recruited and how decisions were made. [Concept: Methodological transparency]

0980. C - IRB or ethics review [Concept: IRB or ethics review]

0981. C - Data management plan: A documented approach for data security, access, retention, sharing, and eventual disposition. / Dissertation defense: A scholarly presentation and examination of completed research, reasoning, findings, and contribution. [Concept: Data management plan and Dissertation defense]

0982. A - Theoretical framework: A set of concepts and relationships used to guide the study's questions, interpretation, and contribution. / Methodological transparency: Clear reporting of procedures, sampling, measures, and analysis sufficient for informed evaluation. [Concept: Theoretical framework and Methodological transparency]

0983. B - Literature synthesis: An organized critical integration of prior scholarship that identifies patterns, limitations, and unanswered questions. / Data management plan: A documented approach for data security, access, retention, sharing, and eventual disposition. [Concept: Literature synthesis and Data management plan]

0984. C - Methodological transparency [Concept: Methodological transparency]

CAC.960 | Dissertation

QUESTION | CORRECT OPTION AND CONCEPT

0985. C - Literature synthesis: An organized critical integration of prior scholarship that identifies patterns, limitations, and unanswered questions. / IRB or ethics review: Independent review of human-participant research risks, protections, consent, and compliance before research begins. [Concept: Literature synthesis and IRB or ethics review]

0986. A - Theoretical framework: Explaining how a theory shapes the constructs and expected relationships in the study. / Dissertation proposal defense: Responding to committee questions and revising the plan before approved data collection. [Concept: Theoretical framework and Dissertation proposal defense]

0987. D - A formal review of the proposed study’s significance, feasibility, methods, and protections before implementation. [Concept: Dissertation proposal defense]

0988. C - Literature synthesis: Comparing findings and methods across studies rather than listing article summaries. / Dissertation proposal defense: Responding to committee questions and revising the plan before approved data collection. [Concept: Literature synthesis and Dissertation proposal defense]

0989. A - Theoretical framework: A set of concepts and relationships used to guide the study’s questions, interpretation, and contribution. / IRB or ethics review: Independent review of human-participant research risks, protections, consent, and compliance before research begins. [Concept: Theoretical framework and IRB or ethics review]

0990. D - Dissertation proposal defense [Concept: Dissertation proposal defense]

0991. A - Research question alignment [Concept: Research question alignment]

0992. B - Research problem statement [Concept: Research problem statement]

0993. D - Literature synthesis: Comparing findings and methods across studies rather than listing article summaries. / IRB or ethics review: Obtaining required ethics approval before recruitment or data collection. [Concept: Literature synthesis and IRB or ethics review]

0994. B - Dissertation defense [Concept: Dissertation defense]

0995. A - Explaining analytic choices, acknowledging limits, and situating findings in the literature. [Concept: Dissertation defense]

0996. C - Limitations statement: Distinguishing design limitations from the study’s scope and explaining their implications. / Dissertation defense: Explaining analytic choices, acknowledging limits, and situating findings in the literature. [Concept: Limitations statement and Dissertation defense]

0997. D - Literature synthesis: Comparing findings and methods across studies rather than listing article summaries. / Data management plan: Specifying secure storage, access controls, retention, and disposal in advance. [Concept: Literature synthesis and Data management plan]

0998. A - Dissertation proposal defense: Responding to committee questions and revising the plan before approved data collection. / Limitations statement: Distinguishing design limitations from the study’s scope and explaining their implications. [Concept: Dissertation proposal defense and Limitations statement]

0999. D - Limitations statement [Concept: Limitations statement]

1000. B - Literature synthesis: An organized critical integration of prior scholarship that identifies patterns, limitations, and unanswered questions. / Dissertation defense: A scholarly presentation and examination of completed research, reasoning, findings, and contribution. [Concept: Literature synthesis and Dissertation defense]

CAC.924 | Ethical Issues in Child Welfare

QUESTION | CORRECT OPTION AND CONCEPT

0001. A - Family preservation: Services intended to strengthen family capacity and maintain safe family relationships when possible. / Child participation: Meaningful, developmentally appropriate inclusion of a child's perspective in decisions affecting them. [Concept: Family preservation and Child participation]

0002. D - Kinship care: Assessing kinship options with attention to safety, continuity, and available support. / Cultural continuity: Considering how placement decisions can maintain important cultural relationships. [Concept: Kinship care and Cultural continuity]

0003. B - Child participation: Meaningful, developmentally appropriate inclusion of a child's perspective in decisions affecting them. / Cultural continuity: Preserving a child's meaningful cultural, linguistic, familial, and community connections when safe and appropriate. [Concept: Child participation and Cultural continuity]

0004. A - Permanency planning [Concept: Permanency planning]

0005. B - Child welfare permanency: Weighing safety and continuity when considering a permanency plan. / Cultural continuity: Considering how placement decisions can maintain important cultural relationships. [Concept: Child welfare permanency and Cultural continuity]

0006. D - A structured process for securing a safe, stable, enduring family arrangement for a child. [Concept: Permanency planning]

0007. D - Kinship care: Care provided by relatives or people with significant prior relationships to the child. / Conflict of interest: A competing personal or professional interest that could impair impartial judgment or create that appearance. [Concept: Kinship care and Conflict of interest]

0008. A - Confidentiality in child welfare [Concept: Confidentiality in child welfare]

0009. A - Family preservation [Concept: Family preservation]

0010. A - Child participation: Explaining options in accessible terms and recording the child's views. / Trauma-informed case planning: Avoiding unnecessary repeated interviews and coordinating consistent care. [Concept: Child participation and Trauma-informed case planning]

0011. C - Permanency planning [Concept: Permanency planning]

0012. B - Child welfare permanency: Weighing safety and continuity when considering a permanency plan. / Cultural continuity: Considering how placement decisions can maintain important cultural relationships. [Concept: Child welfare permanency and Cultural continuity]

0013. A - Child welfare permanency [Concept: Child welfare permanency]

0014. C - Weighing safety and continuity when considering a permanency plan. [Concept: Child welfare permanency]

0015. D - Child participation [Concept: Child participation]

0016. B - Considering how placement decisions can maintain important cultural relationships. [Concept: Cultural continuity]

0017. C - Assessing kinship options with attention to safety, continuity, and available support. [Concept: Kinship care]

0018. B - Family preservation: Services intended to strengthen family capacity and maintain safe family relationships when possible. / Trauma-informed case planning: Planning that accounts for trauma impacts and prioritizes safety, predictability, and relational support. [Concept: Family preservation and Trauma-informed case planning]

0019. D - Child participation: Meaningful, developmentally appropriate inclusion of a child's perspective in decisions affecting them. / Confidentiality in child welfare: Careful, lawful protection and sharing of sensitive child and family information. [Concept: Child participation and Confidentiality in child welfare]

0020. D - Family preservation: Offering practical, culturally responsive supports that address identified safety needs. / Conflict of interest: Disclosing a relevant relationship and seeking guidance to protect independent decision-making. [Concept: Family preservation and Conflict of interest]

0021. C - Child participation: Explaining options in accessible terms and recording the child's views. / Permanency planning: Reviewing progress and barriers toward a lasting, safe caregiving plan. [Concept: Child participation and Permanency planning]

0022. D - Family preservation [Concept: Family preservation]

0023. B - Child welfare permanency [Concept: Child welfare permanency]

0024. D - Trauma-informed case planning [Concept: Trauma-informed case planning]

0025. D - Kinship care [Concept: Kinship care]

0026. C - Child participation [Concept: Child participation]

0027. D - Family preservation: Services intended to strengthen family capacity and maintain safe family relationships when possible. / Trauma-informed case planning: Planning that accounts for trauma impacts and prioritizes safety, predictability, and relational support. [Concept: Family preservation and Trauma-informed case planning]

0028. A - Confidentiality in child welfare: Sharing only information necessary for authorized care and checking applicable rules. / Conflict of interest: Disclosing a relevant relationship and seeking guidance to protect independent decision-making. [Concept: Confidentiality in child welfare and Conflict of interest]

0029. A - Least intrusive intervention: Using the least restrictive effective action consistent with child safety and governing law. / Trauma-informed case planning: Planning that accounts for trauma impacts and prioritizes safety, predictability, and relational support. [Concept: Least intrusive intervention and Trauma-informed case planning]

0030. A - Least intrusive intervention [Concept: Least intrusive intervention]

0031. D - Least intrusive intervention: Using the least restrictive effective action consistent with child safety and governing law. / Trauma-informed case planning: Planning that accounts for trauma impacts and prioritizes safety, predictability, and relational support. [Concept: Least intrusive intervention and Trauma-informed case planning]

0032. C - Conflict of interest [Concept: Conflict of interest]

0033. A - Trauma-informed case planning: Avoiding unnecessary repeated interviews and coordinating consistent care. / Conflict of interest: Disclosing a relevant relationship and seeking guidance to protect independent decision-making. [Concept: Trauma-informed case planning and Conflict of interest]

0034. D - A planning goal focused on stable, enduring caregiving relationships and continuity for a child. [Concept: Child welfare permanency]

0035. B - Least intrusive intervention [Concept: Least intrusive intervention]

0036. D - Permanency planning: Reviewing progress and barriers toward a lasting, safe caregiving plan. / Conflict of interest: Disclosing a relevant relationship and seeking guidance to protect independent decision-making. [Concept: Permanency planning and Conflict of interest]

0037. B - Trauma-informed case planning [Concept: Trauma-informed case planning]

0038. C - Child participation: Explaining options in accessible terms and recording the child's views. / Confidentiality in child welfare: Sharing only information necessary for authorized care and checking applicable rules. [Concept: Child participation and Confidentiality in child welfare]

0039. D - Family preservation [Concept: Family preservation]

0040. B - Family preservation: Offering practical, culturally responsive supports that address identified safety needs. / Confidentiality in child welfare: Sharing only information necessary for authorized care and checking applicable rules. [Concept: Family preservation and Confidentiality in child welfare]

0041. C - Care provided by relatives or people with significant prior relationships to the child. [Concept: Kinship care]

0042. C - Child welfare permanency: Weighing safety and continuity when considering a permanency plan. / Conflict of interest: Disclosing a relevant relationship and seeking guidance to protect independent decision-making. [Concept: Child welfare permanency and Conflict of interest]

0043. D - Trauma-informed case planning [Concept: Trauma-informed case planning]

0044. C - Child participation [Concept: Child participation]

0045. A - Child participation: Meaningful, developmentally appropriate inclusion of a child's perspective in decisions affecting them. / Cultural continuity: Preserving a child's meaningful cultural, linguistic, familial, and community connections when safe and appropriate. [Concept: Child participation and Cultural continuity]

0046. B - Child welfare permanency: Weighing safety and continuity when considering a permanency plan. / Permanency planning: Reviewing progress and barriers toward a lasting, safe caregiving plan. [Concept: Child welfare permanency and Permanency planning]

0047. D - Planning that accounts for trauma impacts and prioritizes safety, predictability, and relational support. [Concept: Trauma-informed case planning]

0048. C - Permanency planning [Concept: Permanency planning]

0049. C - Kinship care: Care provided by relatives or people with significant prior relationships to the child. / Cultural continuity: Preserving a child's meaningful cultural, linguistic, familial, and community connections when safe and appropriate. [Concept: Kinship care and Cultural continuity]

0050. D - Kinship care: Care provided by relatives or people with significant prior relationships to the child. / Cultural continuity: Preserving a child's meaningful cultural, linguistic, familial, and community connections when safe and appropriate. [Concept: Kinship care and Cultural continuity]

0051. D - Kinship care [Concept: Kinship care]

0052. D - Considering supports that protect the child while avoiding unnecessary family separation. [Concept: Least intrusive intervention]

0053. B - Least intrusive intervention: Considering supports that protect the child while avoiding unnecessary family separation. / Child participation: Explaining options in accessible terms and recording the child's views. [Concept: Least intrusive intervention and Child participation]

0054. B - Kinship care: Assessing kinship options with attention to safety, continuity, and available support. / Permanency planning: Reviewing progress and barriers toward a lasting, safe caregiving plan. [Concept: Kinship care and Permanency planning]

0055. B - Offering practical, culturally responsive supports that address identified safety needs. [Concept: Family preservation]

0056. A - Least intrusive intervention: Using the least restrictive effective action consistent with child safety and governing law. / Trauma-informed case planning: Planning that accounts for trauma impacts and prioritizes safety, predictability, and relational support. [Concept: Least intrusive intervention and Trauma-informed case planning]

0057. D - Confidentiality in child welfare [Concept: Confidentiality in child welfare]

CAC.924 | Ethical Issues in Child Welfare

QUESTION | CORRECT OPTION AND CONCEPT

0058. C - Permanency planning: A structured process for securing a safe, stable, enduring family arrangement for a child. / Conflict of interest: A competing personal or professional interest that could impair impartial judgment or create that appearance. [Concept: Permanency planning and Conflict of interest]

0059. A - Child welfare permanency: A planning goal focused on stable, enduring caregiving relationships and continuity for a child. / Kinship care: Care provided by relatives or people with significant prior relationships to the child. [Concept: Child welfare permanency and Kinship care]

0060. A - Child welfare permanency: A planning goal focused on stable, enduring caregiving relationships and continuity for a child. / Family preservation: Services intended to strengthen family capacity and maintain safe family relationships when possible. [Concept: Child welfare permanency and Family preservation]

0061. D - Family preservation: Offering practical, culturally responsive supports that address identified safety needs. / Kinship care: Assessing kinship options with attention to safety, continuity, and available support. [Concept: Family preservation and Kinship care]

0062. C - Child welfare permanency: Weighing safety and continuity when considering a permanency plan. / Trauma-informed case planning: Avoiding unnecessary repeated interviews and coordinating consistent care. [Concept: Child welfare permanency and Trauma-informed case planning]

0063. A - Kinship care: Care provided by relatives or people with significant prior relationships to the child. / Conflict of interest: A competing personal or professional interest that could impair impartial judgment or create that appearance. [Concept: Kinship care and Conflict of interest]

0064. C - Child participation: Explaining options in accessible terms and recording the child's views. / Kinship care: Assessing kinship options with attention to safety, continuity, and available support. [Concept: Child participation and Kinship care]

0065. B - Kinship care [Concept: Kinship care]

0066. B - Disclosing a relevant relationship and seeking guidance to protect independent decision-making. [Concept: Conflict of interest]

0067. B - Conflict of interest [Concept: Conflict of interest]

0068. D - Assessing kinship options with attention to safety, continuity, and available support. [Concept: Kinship care]

0069. D - Least intrusive intervention: Considering supports that protect the child while avoiding unnecessary family separation. / Confidentiality in child welfare: Sharing only information necessary for authorized care and checking applicable rules. [Concept: Least intrusive intervention and Confidentiality in child welfare]

0070. B - Confidentiality in child welfare [Concept: Confidentiality in child welfare]

0071. D - Child welfare permanency: Weighing safety and continuity when considering a permanency plan. / Kinship care: Assessing kinship options with attention to safety, continuity, and available support. [Concept: Child welfare permanency and Kinship care]

0072. C - Trauma-informed case planning: Avoiding unnecessary repeated interviews and coordinating consistent care. / Conflict of interest: Disclosing a relevant relationship and seeking guidance to protect independent decision-making. [Concept: Trauma-informed case planning and Conflict of interest]

0073. B - Confidentiality in child welfare [Concept: Confidentiality in child welfare]

0074. A - Family preservation: Services intended to strengthen family capacity and maintain safe family relationships when possible. / Kinship care: Care provided by relatives or people with significant prior relationships to the child. [Concept: Family preservation and Kinship care]

0075. B - Child participation: Explaining options in accessible terms and recording the child's views. / Confidentiality in child welfare: Sharing only information necessary for authorized care and checking applicable rules. [Concept: Child participation and Confidentiality in child welfare]

0076. C - Permanency planning [Concept: Permanency planning]

0077. C - Confidentiality in child welfare [Concept: Confidentiality in child welfare]

0078. D - Trauma-informed case planning [Concept: Trauma-informed case planning]

0079. C - Least intrusive intervention [Concept: Least intrusive intervention]

0080. A - Trauma-informed case planning: Planning that accounts for trauma impacts and prioritizes safety, predictability, and relational support. / Confidentiality in child welfare: Careful, lawful protection and sharing of sensitive child and family information. [Concept: Trauma-informed case planning and Confidentiality in child welfare]

0081. D - Child participation: Explaining options in accessible terms and recording the child's views. / Conflict of interest: Disclosing a relevant relationship and seeking guidance to protect independent decision-making. [Concept: Child participation and Conflict of interest]

0082. D - Permanency planning [Concept: Permanency planning]

0083. D - Permanency planning: Reviewing progress and barriers toward a lasting, safe caregiving plan. / Conflict of interest: Disclosing a relevant relationship and seeking guidance to protect independent decision-making. [Concept: Permanency planning and Conflict of interest]

0084. D - Confidentiality in child welfare [Concept: Confidentiality in child welfare]

0085. C - Child participation: Explaining options in accessible terms and recording the child's views. / Cultural continuity: Considering how placement decisions can maintain important cultural relationships. [Concept: Child participation and Cultural continuity]

0086. C - Family preservation: Services intended to strengthen family capacity and maintain safe family relationships when possible. / Least intrusive intervention: Using the least restrictive effective action consistent with child safety and governing law. [Concept: Family preservation and Least intrusive intervention]

0087. A - Conflict of interest [Concept: Conflict of interest]

0088. B - Planning that accounts for trauma impacts and prioritizes safety, predictability, and relational support. [Concept: Trauma-informed case planning]

0089. D - Permanency planning: A structured process for securing a safe, stable, enduring family arrangement for a child. / Cultural continuity: Preserving a child's meaningful cultural, linguistic, familial, and community connections when safe and appropriate. [Concept: Permanency planning and Cultural continuity]

0090. D - Permanency planning [Concept: Permanency planning]

0091. D - Family preservation: Services intended to strengthen family capacity and maintain safe family relationships when possible. / Confidentiality in child welfare: Careful, lawful protection and sharing of sensitive child and family information. [Concept: Family preservation and Confidentiality in child welfare]

0092. D - Child participation [Concept: Child participation]

0093. A - Trauma-informed case planning: Planning that accounts for trauma impacts and prioritizes safety, predictability, and relational support. / Confidentiality in child welfare: Careful, lawful protection and sharing of sensitive child and family information. [Concept: Trauma-informed case planning and Confidentiality in child welfare]

0094. D - Kinship care: Care provided by relatives or people with significant prior relationships to the child. / Cultural continuity: Preserving a child's meaningful cultural, linguistic, familial, and community connections when safe and appropriate. [Concept: Kinship care and Cultural continuity]

0095. C - Child participation: Explaining options in accessible terms and recording the child's views. / Trauma-informed case planning: Avoiding unnecessary repeated interviews and coordinating consistent care. [Concept: Child participation and Trauma-informed case planning]

0096. D - Child participation: Meaningful, developmentally appropriate inclusion of a child's perspective in decisions affecting them. / Conflict of interest: A competing personal or professional interest that could impair impartial judgment or create that appearance. [Concept: Child participation and Conflict of interest]

0097. D - Child participation [Concept: Child participation]

0098. D - Child welfare permanency [Concept: Child welfare permanency]

0099. C - Explaining options in accessible terms and recording the child's views. [Concept: Child participation]

0100. D - Permanency planning: A structured process for securing a safe, stable, enduring family arrangement for a child. / Conflict of interest: A competing personal or professional interest that could impair impartial judgment or create that appearance. [Concept: Permanency planning and Conflict of interest]

0101. D - Cultural continuity [Concept: Cultural continuity]

0102. C - Child welfare permanency: A planning goal focused on stable, enduring caregiving relationships and continuity for a child. / Conflict of interest: A competing personal or professional interest that could impair impartial judgment or create that appearance. [Concept: Child welfare permanency and Conflict of interest]

0103. D - Kinship care: Assessing kinship options with attention to safety, continuity, and available support. / Permanency planning: Reviewing progress and barriers toward a lasting, safe caregiving plan. [Concept: Kinship care and Permanency planning]

0104. B - Family preservation: Offering practical, culturally responsive supports that address identified safety needs. / Kinship care: Assessing kinship options with attention to safety, continuity, and available support. [Concept: Family preservation and Kinship care]

0105. A - Confidentiality in child welfare [Concept: Confidentiality in child welfare]

0106. C - Disclosing a relevant relationship and seeking guidance to protect independent decision-making. [Concept: Conflict of interest]

0107. A - Conflict of interest [Concept: Conflict of interest]

0108. B - Child welfare permanency [Concept: Child welfare permanency]

0109. A - Kinship care: Care provided by relatives or people with significant prior relationships to the child. / Trauma-informed case planning: Planning that accounts for trauma impacts and prioritizes safety, predictability, and relational support. [Concept: Kinship care and Trauma-informed case planning]

0110. D - Family preservation [Concept: Family preservation]

0111. D - Child participation: Explaining options in accessible terms and recording the child's views. / Kinship care: Assessing kinship options with attention to safety, continuity, and available support. [Concept: Child participation and Kinship care]

0112. A - Family preservation: Offering practical, culturally responsive supports that address identified safety needs. / Least intrusive intervention: Considering supports that protect the child while avoiding unnecessary family separation. [Concept: Family preservation and Least intrusive intervention]

0113. D - Family preservation [Concept: Family preservation]

CAC.924 | Ethical Issues in Child Welfare

QUESTION | CORRECT OPTION AND CONCEPT

0114. B - Trauma-informed case planning [Concept: Trauma-informed case planning]

0115. B - Child participation: Explaining options in accessible terms and recording the child's views. / Cultural continuity: Considering how placement decisions can maintain important cultural relationships. [Concept: Child participation and Cultural continuity]

0116. C - Least intrusive intervention [Concept: Least intrusive intervention]

0117. D - Avoiding unnecessary repeated interviews and coordinating consistent care. [Concept: Trauma-informed case planning]

0118. D - Assessing kinship options with attention to safety, continuity, and available support. [Concept: Kinship care]

0119. A - Child participation: Meaningful, developmentally appropriate inclusion of a child's perspective in decisions affecting them. / Trauma-informed case planning: Planning that accounts for trauma impacts and prioritizes safety, predictability, and relational support. [Concept: Child participation and Trauma-informed case planning]

0120. A - Least intrusive intervention: Using the least restrictive effective action consistent with child safety and governing law. / Trauma-informed case planning: Planning that accounts for trauma impacts and prioritizes safety, predictability, and relational support. [Concept: Least intrusive intervention and Trauma-informed case planning]

0121. B - Cultural continuity: Considering how placement decisions can maintain important cultural relationships. / Confidentiality in child welfare: Sharing only information necessary for authorized care and checking applicable rules. [Concept: Cultural continuity and Confidentiality in child welfare]

0122. B - Trauma-informed case planning: Planning that accounts for trauma impacts and prioritizes safety, predictability, and relational support. / Cultural continuity: Preserving a child's meaningful cultural, linguistic, familial, and community connections when safe and appropriate. 0520. A - Kinship care: Care provided by relatives or people with significant prior relationships to the child. / Permanency planning: A structured process for securing a safe, stable, enduring family arrangement for a child. [Concept: Kinship care and Permanency planning]

0521. A - Family preservation: Offering practical, culturally responsive supports that address identified safety needs. / Permanency planning: Reviewing progress and barriers toward a lasting, safe caregiving plan. [Concept: Family preservation and Permanency planning]

0522. A - Preserving a child's meaningful cultural, linguistic, familial, and community connections when safe and appropriate. [Concept: Cultural continuity]

0523. D - Child participation: Meaningful, developmentally appropriate inclusion of a child's perspective in decisions affecting them. / Cultural continuity: Preserving a child's meaningful cultural, linguistic, familial, and community connections when safe and appropriate. [Concept: Child participation and Cultural continuity]

0524. B - Cultural continuity: Considering how placement decisions can maintain important cultural relationships. / Conflict of interest: Disclosing a relevant relationship and seeking guidance to protect independent decision-making. [Concept: Cultural continuity and Conflict of interest]

0525. B - Child participation: Explaining options in accessible terms and recording the child's views. / Permanency planning: Reviewing progress and barriers toward a lasting, safe caregiving plan. [Concept: Child participation and Permanency planning]

0526. C - A planning goal focused on stable, enduring caregiving relationships and continuity for a child. [Concept: Child welfare permanency]

0527. C - Child participation: Meaningful, developmentally appropriate inclusion of a child's perspective in decisions affecting them. / Conflict of interest: A competing personal or professional interest that could impair impartial judgment or create that appearance. [Concept: Child participation and Conflict of interest]

0528. B - Family preservation: Offering practical, culturally responsive supports that address identified safety needs. / Cultural continuity: Considering how placement decisions can maintain important cultural relationships. [Concept: Family preservation and Cultural continuity]

CAC.924 | Ethical Issues in Child Welfare

QUESTION | CORRECT OPTION AND CONCEPT

0529. A - Kinship care [Concept: Kinship care]

0530. D - Family preservation [Concept: Family preservation]

0531. D - Cultural continuity: Considering how placement decisions can maintain important cultural relationships. / Confidentiality in child welfare: Sharing only information necessary for authorized care and checking applicable rules. [Concept: Cultural continuity and Confidentiality in child welfare]

0532. B - Trauma-informed case planning: Avoiding unnecessary repeated interviews and coordinating consistent care. / Confidentiality in child welfare: Sharing only information necessary for authorized care and checking applicable rules. [Concept: Trauma-informed case planning and Confidentiality in child welfare]

0533. D - Family preservation [Concept: Family preservation]

0534. D - Least intrusive intervention: Considering supports that protect the child while avoiding unnecessary family separation. / Conflict of interest: Disclosing a relevant relationship and seeking guidance to protect independent decision-making. [Concept: Least intrusive intervention and Conflict of interest]

0535. C - Child welfare permanency: A planning goal focused on stable, enduring caregiving relationships and continuity for a child. / Kinship care: Care provided by relatives or people with significant prior relationships to the child. [Concept: Child welfare permanency and Kinship care]

0536. B - Least intrusive intervention: Using the least restrictive effective action consistent with child safety and governing law. / Confidentiality in child welfare: Careful, lawful protection and sharing of sensitive child and family information. [Concept: Least intrusive intervention and Confidentiality in child welfare]

0537. A - Conflict of interest [Concept: Conflict of interest]

0538. A - Child participation [Concept: Child participation]

0539. D - Family preservation [Concept: Family preservation]

0540. D - Child welfare permanency: A planning goal focused on stable, enduring caregiving relationships and continuity for a child. / Child participation: Meaningful, developmentally appropriate inclusion of a child's perspective in decisions affecting them. [Concept: Child welfare permanency and Child participation]

0541. C - Permanency planning [Concept: Permanency planning]

0542. C - Child participation: Meaningful, developmentally appropriate inclusion of a child's perspective in decisions affecting them. / Conflict of interest: A competing personal or professional interest that could impair impartial judgment or create that appearance. [Concept: Child participation and Conflict of interest]

0543. C - Meaningful, developmentally appropriate inclusion of a child's perspective in decisions affecting them. [Concept: Child participation]

0544. C - Least intrusive intervention: Considering supports that protect the child while avoiding unnecessary family separation. / Conflict of interest: Disclosing a relevant relationship and seeking guidance to protect independent decision-making. [Concept: Least intrusive intervention and Conflict of interest]

0545. B - Trauma-informed case planning [Concept: Trauma-informed case planning]

0546. D - Child welfare permanency: Weighing safety and continuity when considering a permanency plan. / Confidentiality in child welfare: Sharing only information necessary for authorized care and checking applicable rules. [Concept: Child welfare permanency and Confidentiality in child welfare]

0547. C - Child welfare permanency: Weighing safety and continuity when considering a permanency plan. / Child participation: Explaining options in accessible terms and recording the child's views. [Concept: Child welfare permanency and Child participation]

0548. C - Conflict of interest [Concept: Conflict of interest]

0549. D - Trauma-informed case planning [Concept: Trauma-informed case planning]

0550. D - Child welfare permanency: Weighing safety and continuity when considering a permanency plan. / Permanency planning: Reviewing progress and barriers toward a lasting, safe caregiving plan. [Concept: Child welfare permanency and Permanency planning]

0551. B - Child participation: Explaining options in accessible terms and recording the child's views. / Kinship care: Assessing kinship options with attention to safety, continuity, and available support. [Concept: Child participation and Kinship care]

0552. B - Child participation: Meaningful, developmentally appropriate inclusion of a child's perspective in decisions affecting them. / Confidentiality in child welfare: Careful, lawful protection and sharing of sensitive child and family information. [Concept: Child participation and Confidentiality in child welfare]

0553. A - Trauma-informed case planning: Avoiding unnecessary repeated interviews and coordinating consistent care. / Cultural continuity: Considering how placement decisions can maintain important cultural relationships. [Concept: Trauma-informed case planning and Cultural continuity]

0554. B - Child welfare permanency [Concept: Child welfare permanency]

0555. D - Least intrusive intervention [Concept: Least intrusive intervention]

0556. C - Confidentiality in child welfare: Careful, lawful protection and sharing of sensitive child and family information. / Conflict of interest: A competing personal or professional interest that could impair impartial judgment or create that appearance. [Concept: Confidentiality in child welfare and Conflict of interest]

0930. D - A competing personal or professional interest that could impair impartial judgment or create that appearance. [Concept: Conflict of interest]

0931. D - Cultural continuity [Concept: Cultural continuity]

0932. C - Kinship care [Concept: Kinship care]

0933. D - Permanency planning: A structured process for securing a safe, stable, enduring family arrangement for a child. / Confidentiality in child welfare: Careful, lawful protection and sharing of sensitive child and family information. [Concept: Permanency planning and Confidentiality in child welfare]

0934. C - Trauma-informed case planning [Concept: Trauma-informed case planning]

0935. D - Permanency planning: Reviewing progress and barriers toward a lasting, safe caregiving plan. / Trauma-informed case planning: Avoiding unnecessary repeated interviews and coordinating consistent care. [Concept: Permanency planning and Trauma-informed case planning]

0936. C - Permanency planning [Concept: Permanency planning]

0937. B - Family preservation [Concept: Family preservation]

0938. B - Least intrusive intervention: Considering supports that protect the child while avoiding unnecessary family separation. / Confidentiality in child welfare: Sharing only information necessary for authorized care and checking applicable rules. [Concept: Least intrusive intervention and Confidentiality in child welfare]

0939. B - Trauma-informed case planning [Concept: Trauma-informed case planning]

0940. B - Family preservation [Concept: Family preservation]

0941. A - Services intended to strengthen family capacity and maintain safe family relationships when possible. [Concept: Family preservation]

0942. A - Least intrusive intervention [Concept: Least intrusive intervention]

0943. C - Child welfare permanency: A planning goal focused on stable, enduring caregiving relationships and continuity for a child. / Kinship care: Care provided by relatives or people with significant prior relationships to the child. [Concept: Child welfare permanency and Kinship care]

0944. B - Child welfare permanency [Concept: Child welfare permanency]

0945. D - Child welfare permanency [Concept: Child welfare permanency]

0946. B - Trauma-informed case planning: Avoiding unnecessary repeated interviews and coordinating consistent care. / Cultural continuity: Considering how placement decisions can maintain important cultural relationships. [Concept: Trauma-informed case planning and Cultural continuity]

0947. C - Kinship care [Concept: Kinship care]

0948. D - Considering supports that protect the child while avoiding unnecessary family separation. [Concept: Least intrusive intervention]

0949. D - Confidentiality in child welfare [Concept: Confidentiality in child welfare]

0950. A - Sharing only information necessary for authorized care and checking applicable rules. [Concept: Confidentiality in child welfare]

0951. D - Cultural continuity [Concept: Cultural continuity]

0952. D - Permanency planning [Concept: Permanency planning]

0953. B - Kinship care: Care provided by relatives or people with significant prior relationships to the child. / Confidentiality in child welfare: Careful, lawful protection and sharing of sensitive child and family information. [Concept: Kinship care and Confidentiality in child welfare]

0954. A - Child welfare permanency: A planning goal focused on stable, enduring caregiving relationships and continuity for a child. / Permanency planning: A structured process for securing a safe, stable, enduring family arrangement for a child. [Concept: Child welfare permanency and Permanency planning]

CAC.924 | Ethical Issues in Child Welfare

QUESTION | CORRECT OPTION AND CONCEPT

0955. A - Family preservation: Offering practical, culturally responsive supports that address identified safety needs. / Permanency planning: Reviewing progress and barriers toward a lasting, safe caregiving plan. [Concept: Family preservation and Permanency planning]

0956. B - Disclosing a relevant relationship and seeking guidance to protect independent decision-making. [Concept: Conflict of interest]

0957. D - Child participation: Meaningful, developmentally appropriate inclusion of a child's perspective in decisions affecting them. / Trauma-informed case planning: Planning that accounts for trauma impacts and prioritizes safety, predictability, and relational support. [Concept: Child participation and Trauma-informed case planning]

0958. C - Child welfare permanency: A planning goal focused on stable, enduring caregiving relationships and continuity for a child. / Least intrusive intervention: Using the least restrictive effective action consistent with child safety and governing law. [Concept: Child welfare permanency and Least intrusive intervention]

0959. C - Family preservation: Offering practical, culturally responsive supports that address identified safety needs. / Conflict of interest: Disclosing a relevant relationship and seeking guidance to protect independent decision-making. [Concept: Family preservation and Conflict of interest]

0960. C - Reviewing progress and barriers toward a lasting, safe caregiving plan. [Concept: Permanency planning]

0961. B - Reviewing progress and barriers toward a lasting, safe caregiving plan. [Concept: Permanency planning]

0962. C - Child welfare permanency [Concept: Child welfare permanency]

0963. D - Cultural continuity [Concept: Cultural continuity]

0964. B - Weighing safety and continuity when considering a permanency plan. [Concept: Child welfare permanency]

0965. A - Conflict of interest [Concept: Conflict of interest]

0966. C - Family preservation [Concept: Family preservation]

0967. D - Cultural continuity [Concept: Cultural continuity]

0968. B - Kinship care: Care provided by relatives or people with significant prior relationships to the child. / Permanency planning: A structured process for securing a safe, stable, enduring family arrangement for a child. [Concept: Kinship care and Permanency planning]

0969. D - Permanency planning: Reviewing progress and barriers toward a lasting, safe caregiving plan. / Cultural continuity: Considering how placement decisions can maintain important cultural relationships. [Concept: Permanency planning and Cultural continuity]

0970. C - Cultural continuity [Concept: Cultural continuity]

0971. A - Child participation: Explaining options in accessible terms and recording the child's views. / Cultural continuity: Considering how placement decisions can maintain important cultural relationships. [Concept: Child participation and Cultural continuity]

0972. B - Family preservation: Offering practical, culturally responsive supports that address identified safety needs. / Cultural continuity: Considering how placement decisions can maintain important cultural relationships. [Concept: Family preservation and Cultural continuity]

0973. C - Family preservation: Offering practical, culturally responsive supports that address identified safety needs. / Trauma-informed case planning: Avoiding unnecessary repeated interviews and coordinating consistent care. [Concept: Family preservation and Trauma-informed case planning]

0974. A - Confidentiality in child welfare [Concept: Confidentiality in child welfare]

0975. B - Family preservation: Offering practical, culturally responsive supports that address identified safety needs. / Permanency planning: Reviewing progress and barriers toward a lasting, safe caregiving plan. [Concept: Family preservation and Permanency planning]

0976. D - Kinship care [Concept: Kinship care]

0977. B - Child participation: Explaining options in accessible terms and recording the child's views. / Cultural continuity: Considering how placement decisions can maintain important cultural relationships. [Concept: Child participation and Cultural continuity]

0978. C - Kinship care [Concept: Kinship care]

0979. C - Confidentiality in child welfare: Careful, lawful protection and sharing of sensitive child and family information. / Conflict of interest: A competing personal or professional interest that could impair impartial judgment or create that appearance. [Concept: Confidentiality in child welfare and Conflict of interest]

0980. D - Child participation [Concept: Child participation]

0981. C - Child welfare permanency [Concept: Child welfare permanency]

0982. D - Least intrusive intervention: Considering supports that protect the child while avoiding unnecessary family separation. / Trauma-informed case planning: Avoiding unnecessary repeated interviews and coordinating consistent care. [Concept: Least intrusive intervention and Trauma-informed case planning]

0983. C - Trauma-informed case planning [Concept: Trauma-informed case planning]

0984. D - Kinship care: Care provided by relatives or people with significant prior relationships to the child. / Confidentiality in child welfare: Careful, lawful protection and sharing of sensitive child and family information. [Concept: Kinship care and Confidentiality in child welfare]

0985. B - Family preservation [Concept: Family preservation]

0986. D - Trauma-informed case planning: Avoiding unnecessary repeated interviews and coordinating consistent care. / Confidentiality in child welfare: Sharing only information necessary for authorized care and checking applicable rules. [Concept: Trauma-informed case planning and Confidentiality in child welfare]

0987. C - Confidentiality in child welfare [Concept: Confidentiality in child welfare]

0988. B - Kinship care: Assessing kinship options with attention to safety, continuity, and available support. / Cultural continuity: Considering how placement decisions can maintain important cultural relationships. [Concept: Kinship care and Cultural continuity]

0989. A - Least intrusive intervention [Concept: Least intrusive intervention]

0990. D - Kinship care: Care provided by relatives or people with significant prior relationships to the child. / Permanency planning: A structured process for securing a safe, stable, enduring family arrangement for a child. [Concept: Kinship care and Permanency planning]

0991. D - Conflict of interest [Concept: Conflict of interest]

0992. A - Child welfare permanency: A planning goal focused on stable, enduring caregiving relationships and continuity for a child. / Trauma-informed case planning: Planning that accounts for trauma impacts and prioritizes safety, predictability, and relational support. [Concept: Child welfare permanency and Trauma-informed case planning]

0993. B - Confidentiality in child welfare [Concept: Confidentiality in child welfare]

0994. D - Kinship care: Assessing kinship options with attention to safety, continuity, and available support. / Confidentiality in child welfare: Sharing only information necessary for authorized care and checking applicable rules. [Concept: Kinship care and Confidentiality in child welfare]

0995. B - Least intrusive intervention: Using the least restrictive effective action consistent with child safety and governing law. / Kinship care: Care provided by relatives or people with significant prior relationships to the child. [Concept: Least intrusive intervention and Kinship care]

0996. A - Kinship care: Care provided by relatives or people with significant prior relationships to the child. / Trauma-informed case planning: Planning that accounts for trauma impacts and prioritizes safety, predictability, and relational support. [Concept: Kinship care and Trauma-informed case planning]

0997. A - Cultural continuity [Concept: Cultural continuity]

0998. C - Cultural continuity [Concept: Cultural continuity]

0999. A - Child welfare permanency: Weighing safety and continuity when considering a permanency plan. / Permanency planning: Reviewing progress and barriers toward a lasting, safe caregiving plan. [Concept: Child welfare permanency and Permanency planning]

1000. B - Least intrusive intervention: Considering supports that protect the child while avoiding unnecessary family separation. / Confidentiality in child welfare: Sharing only information necessary for authorized care and checking applicable rules. [Concept: Least intrusive intervention and Confidentiality in child welfare]

CAC.925 | Mindfulness and Stress Reduction Techniques

QUESTION | CORRECT OPTION AND CONCEPT

0001. B - Mindfulness: Purposeful, present-moment attention with an attitude of openness and reduced automatic judgment. / Coping flexibility: The capacity to select and adapt coping strategies to fit changing demands and context. [Concept: Mindfulness and Coping flexibility]

0002. A - The capacity to select and adapt coping strategies to fit changing demands and context. [Concept: Coping flexibility]

0003. B - Stress appraisal [Concept: Stress appraisal]

0004. B - Mindfulness [Concept: Mindfulness]

0005. D - Stress appraisal: Exploring how a young person interprets a demand and what coping resources seem available. / Contraindication-sensitive practice: Offering choice to stop or use an alternative when inward attention feels unsafe or uncomfortable. [Concept: Stress appraisal and Contraindication-sensitive practice]

0006. B - Coping flexibility [Concept: Coping flexibility]

0007. C - Body scan [Concept: Body scan]

0008. C - Diaphragmatic breathing [Concept: Diaphragmatic breathing]

0009. A - Body scan [Concept: Body scan]

0010. A - Stress appraisal [Concept: Stress appraisal]

0011. C - Mindfulness: Guiding attention to current experience while allowing thoughts to come and go. / Stress appraisal: Exploring how a young person interprets a demand and what coping resources seem available. [Concept: Mindfulness and Stress appraisal]

0012. A - Practicing a calming skill in session and then in a planned everyday situation. [Concept: Progressive exposure to relaxation]

0013. B - Diaphragmatic breathing: Inviting slow, comfortable abdominal breathing without forcing depth or pace. / Grounding: Noticing neutral sights or sounds in the room when distress makes attention feel disconnected. [Concept: Diaphragmatic breathing and Grounding]

0014. C - Contraindication-sensitive practice [Concept: Contraindication-sensitive practice]

0015. A - Progressive muscle relaxation: A structured practice of tensing and releasing muscle groups to increase awareness of bodily tension. / Coping flexibility: The capacity to select and adapt coping strategies to fit changing demands and context. [Concept: Progressive muscle relaxation and Coping flexibility]

0016. D - Stress appraisal: The process of evaluating whether a situation is threatening, manageable, or relevant to one's resources. / Progressive exposure to relaxation: Gradually practicing a regulation technique in increasingly challenging but manageable contexts. [Concept: Stress appraisal and Progressive exposure to relaxation]

0017. D - Diaphragmatic breathing: Inviting slow, comfortable abdominal breathing without forcing depth or pace. / Contraindication-sensitive practice: Offering choice to stop or use an alternative when inward attention feels unsafe or uncomfortable. [Concept: Diaphragmatic breathing and Contraindication-sensitive practice]

0018. A - Coping flexibility: Helping a client compare strategies and choose one suited to the current stressor. / Progressive exposure to relaxation: Practicing a calming skill in session and then in a planned everyday situation. [Concept: Coping flexibility and Progressive exposure to relaxation]

0019. D - Body scan: Inviting nonjudgmental attention to sensations from one body area to another. / Coping flexibility: Helping a client compare strategies and choose one suited to the current stressor. [Concept: Body scan and Coping flexibility]

0020. D - Mindfulness: Purposeful, present-moment attention with an attitude of openness and reduced automatic judgment. / Mindful self-compassion: A stance combining awareness of distress, common humanity, and kindness toward oneself. [Concept: Mindfulness and Mindful self-compassion]

0021. D - Diaphragmatic breathing: A breathing practice emphasizing comfortable movement of the diaphragm to support regulation. / Progressive muscle relaxation: A structured practice of tensing and releasing muscle groups to increase awareness of bodily tension. [Concept: Diaphragmatic breathing and Progressive muscle relaxation]

0022. B - Coping flexibility [Concept: Coping flexibility]

0023. A - Mindfulness: Purposeful, present-moment attention with an attitude of openness and reduced automatic judgment. / Body scan: A guided practice of noticing sensations across body regions without requiring a particular sensation. [Concept: Mindfulness and Body scan]

0024. D - Mindfulness: Purposeful, present-moment attention with an attitude of openness and reduced automatic judgment. / Progressive muscle relaxation: A structured practice of tensing and releasing muscle groups to increase awareness of bodily tension. [Concept: Mindfulness and Progressive muscle relaxation]

0025. A - Coping flexibility [Concept: Coping flexibility]

0026. A - Diaphragmatic breathing: A breathing practice emphasizing comfortable movement of the diaphragm to support regulation. / Progressive muscle relaxation: A structured practice of tensing and releasing muscle groups to increase awareness of bodily tension. [Concept: Diaphragmatic breathing and Progressive muscle relaxation]

0027. D - Body scan [Concept: Body scan]

0028. A - Mindfulness: Guiding attention to current experience while allowing thoughts to come and go. / Contraindication-sensitive practice: Offering choice to stop or use an alternative when inward attention feels unsafe or uncomfortable. [Concept: Mindfulness and Contraindication-sensitive practice]

0029. D - Grounding: Present-focused orientation using sensory or environmental cues to reconnect with the immediate moment. / Stress appraisal: The process of evaluating whether a situation is threatening, manageable, or relevant to one's resources. [Concept: Grounding and Stress appraisal]

0030. D - Progressive muscle relaxation: Teaching gradual muscle release and adapting the exercise if it causes discomfort. / Grounding: Noticing neutral sights or sounds in the room when distress makes attention feel disconnected. [Concept: Progressive muscle relaxation and Grounding]

0031. B - Coping flexibility [Concept: Coping flexibility]

0032. A - Mindfulness [Concept: Mindfulness]

0033. D - Progressive muscle relaxation: Teaching gradual muscle release and adapting the exercise if it causes discomfort. / Body scan: Inviting nonjudgmental attention to sensations from one body area to another. [Concept: Progressive muscle relaxation and Body scan]

0034. D - Stress appraisal: The process of evaluating whether a situation is threatening, manageable, or relevant to one's resources. / Contraindication-sensitive practice: Adapting or pausing an exercise when it increases distress, discomfort, or is not a good fit. [Concept: Stress appraisal and Contraindication-sensitive practice]

0035. C - Mindfulness: Purposeful, present-moment attention with an attitude of openness and reduced automatic judgment. / Mindful self-compassion: A stance combining awareness of distress, common humanity, and kindness toward oneself. [Concept: Mindfulness and Mindful self-compassion]

0036. D - Mindful self-compassion [Concept: Mindful self-compassion]

0037. D - Noticing neutral sights or sounds in the room when distress makes attention feel disconnected. [Concept: Grounding]

0038. B - Mindfulness: Guiding attention to current experience while allowing thoughts to come and go. / Contraindication-sensitive practice: Offering choice to stop or use an alternative when inward attention feels unsafe or uncomfortable. [Concept: Mindfulness and Contraindication-sensitive practice]

0039. B - Grounding [Concept: Grounding]

0040. A - Mindfulness: Purposeful, present-moment attention with an attitude of openness and reduced automatic judgment. / Mindful self-compassion: A stance combining awareness of distress, common humanity, and kindness toward oneself. [Concept: Mindfulness and Mindful self-compassion]

0041. C - Mindfulness: Guiding attention to current experience while allowing thoughts to come and go. / Body scan: Inviting nonjudgmental attention to sensations from one body area to another. [Concept: Mindfulness and Body scan]

0042. A - Diaphragmatic breathing: Inviting slow, comfortable abdominal breathing without forcing depth or pace. / Grounding: Noticing neutral sights or sounds in the room when distress makes attention feel disconnected. [Concept: Diaphragmatic breathing and Grounding]

0043. D - Grounding [Concept: Grounding]

0044. B - Grounding [Concept: Grounding]

0045. B - Stress appraisal: Exploring how a young person interprets a demand and what coping resources seem available. / Contraindication-sensitive practice: Offering choice to stop or use an alternative when inward attention feels unsafe or uncomfortable. [Concept: Stress appraisal and Contraindication-sensitive practice]

0046. D - Coping flexibility [Concept: Coping flexibility]

0047. A - Present-focused orientation using sensory or environmental cues to reconnect with the immediate moment. [Concept: Grounding]

0048. B - Stress appraisal [Concept: Stress appraisal]

0049. B - Contraindication-sensitive practice [Concept: Contraindication-sensitive practice]

0050. D - Stress appraisal: The process of evaluating whether a situation is threatening, manageable, or relevant to one's resources. / Coping flexibility: The capacity to select and adapt coping strategies to fit changing demands and context. [Concept: Stress appraisal and Coping flexibility]

0051. B - Mindfulness: Guiding attention to current experience while allowing thoughts to come and go. / Grounding: Noticing neutral sights or sounds in the room when distress makes attention feel disconnected. [Concept: Mindfulness and Grounding]

0052. C - Mindfulness: Purposeful, present-moment attention with an attitude of openness and reduced automatic judgment. / Grounding: Present-focused orientation using sensory or environmental cues to reconnect with the immediate moment. [Concept: Mindfulness and Grounding]

0053. B - Stress appraisal [Concept: Stress appraisal]

0054. C - Grounding: Noticing neutral sights or sounds in the room when distress makes attention feel disconnected. / Coping flexibility: Helping a client compare strategies and choose one suited to the current stressor. [Concept: Grounding and Coping flexibility]

0128. C - Diaphragmatic breathing: A breathing practice emphasizing comfortable movement of the diaphragm to support regulation. / Grounding: Present-focused orientation using sensory or environmental cues to reconnect with the immediate moment. [Concept: Diaphragmatic breathing and Grounding]

0129. D - Body scan [Concept: Body scan]

0130. A - Coping flexibility: The capacity to select and adapt coping strategies to fit changing demands and context. / Progressive exposure to relaxation: Gradually practicing a regulation technique in increasingly challenging but manageable contexts. [Concept: Coping flexibility and Progressive exposure to relaxation]

0131. C - Contraindication-sensitive practice [Concept: Contraindication-sensitive practice]

0132. B - Gradually practicing a regulation technique in increasingly challenging but manageable contexts. [Concept: Progressive exposure to relaxation]

0133. C - Contraindication-sensitive practice [Concept: Contraindication-sensitive practice]

0134. C - Progressive exposure to relaxation: Practicing a calming skill in session and then in a planned everyday situation. / Contraindication-sensitive practice: Offering choice to stop or use an alternative when inward attention feels unsafe or uncomfortable. [Concept: Progressive exposure to relaxation and Contraindication-sensitive practice]

0135. C - Body scan [Concept: Body scan]

0136. B - Mindfulness: Purposeful, present-moment attention with an attitude of openness and reduced automatic judgment. / Progressive muscle relaxation: A structured practice of tensing and releasing muscle groups to increase awareness of bodily tension. [Concept: Mindfulness and Progressive muscle relaxation]

0137. A - Body scan [Concept: Body scan]

0138. C - Body scan: Inviting nonjudgmental attention to sensations from one body area to another. / Contraindication-sensitive practice: Offering choice to stop or use an alternative when inward attention feels unsafe or uncomfortable. [Concept: Body scan and Contraindication-sensitive practice]

0139. B - Grounding [Concept: Grounding]

0140. A - Inviting nonjudgmental attention to sensations from one body area to another. [Concept: Body scan]

0141. B - Body scan: A guided practice of noticing sensations across body regions without requiring a particular sensation. / Stress appraisal: The process of evaluating whether a situation is threatening, manageable, or relevant to one’s resources. [Concept: Body scan and Stress appraisal]

0142. B - A stance combining awareness of distress, common humanity, and kindness toward oneself. [Concept: Mindful self-compassion]

0143. B - Mindfulness [Concept: Mindfulness]

0144. D - Diaphragmatic breathing [Concept: Diaphragmatic breathing]

0145. B - Purposeful, present-moment attention with an attitude of openness and reduced automatic judgment. [Concept: Mindfulness]

0146. C - Diaphragmatic breathing: A breathing practice emphasizing comfortable movement of the diaphragm to support regulation. / Coping flexibility: The capacity to select and adapt coping strategies to fit changing demands and context. [Concept: Diaphragmatic breathing and Coping flexibility]

0147. A - Coping flexibility [Concept: Coping flexibility]

0148. A - Progressive muscle relaxation: Teaching gradual muscle release and adapting the exercise if it causes discomfort. / Progressive exposure to relaxation: Practicing a calming skill in session and then in a planned everyday situation. [Concept: Progressive muscle relaxation and Progressive exposure to relaxation]

0149. C - Mindfulness [Concept: Mindfulness]

0150. A - Mindfulness [Concept: Mindfulness]

0151. A - Stress appraisal [Concept: Stress appraisal]

0152. A - Body scan [Concept: Body scan]

0153. C - Exploring how a young person interprets a demand and what coping resources seem available. [Concept: Stress appraisal]

0154. C - Mindful self-compassion [Concept: Mindful self-compassion]

0155. B - Progressive muscle relaxation [Concept: Progressive muscle relaxation]

0156. C - Body scan: A guided practice of noticing sensations across body regions without requiring a particular sensation. / Progressive exposure to relaxation: Gradually practicing a regulation technique in increasingly challenging but manageable contexts. [Concept: Body scan and Progressive exposure to relaxation]

0157. D - Grounding [Concept: Grounding]

0158. C - Coping flexibility [Concept: Coping flexibility]

0159. A - Progressive exposure to relaxation [Concept: Progressive exposure to relaxation]

0160. A - Diaphragmatic breathing [Concept: Diaphragmatic breathing]

0161. D - Progressive muscle relaxation [Concept: Progressive muscle relaxation]

0162. A - Diaphragmatic breathing [Concept: Diaphragmatic breathing]

0163. D - Diaphragmatic breathing: A breathing practice emphasizing comfortable movement of the diaphragm to support regulation. / Mindful self-compassion: A stance combining awareness of distress, common humanity, and kindness toward oneself. [Concept: Diaphragmatic breathing and Mindful self-compassion]

0164. A - Mindfulness: Purposeful, present-moment attention with an attitude of openness and reduced automatic judgment. / Stress appraisal: The process of evaluating whether a situation is threatening, manageable, or relevant to one’s resources. [Concept: Mindfulness and Stress appraisal]

0165. D - Contraindication-sensitive practice [Concept: Contraindication-sensitive practice]

0166. D - Mindful self-compassion: A stance combining awareness of distress, common humanity, and kindness toward oneself. / Contraindication-sensitive practice: Adapting or pausing an exercise when it increases distress, discomfort, or is not a good fit. [Concept: Mindful self-compassion and Contraindication-sensitive practice]

0167. A - Contraindication-sensitive practice [Concept: Contraindication-sensitive practice]

0168. A - Mindfulness [Concept: Mindfulness]

0169. C - Diaphragmatic breathing: Inviting slow, comfortable abdominal breathing without forcing depth or pace. / Mindful self-compassion: Supporting a young person to acknowledge difficulty without harsh self-judgment. [Concept: Diaphragmatic breathing and Mindful self-compassion]

CAC.925 | Mindfulness and Stress Reduction Techniques

0331. A - Progressive muscle relaxation [Concept: Progressive muscle relaxation]

0332. A - Mindful self-compassion: A stance combining awareness of distress, common humanity, and kindness toward oneself. / Contraindication-sensitive practice: Adapting or pausing an exercise when it increases distress, discomfort, or is not a good fit. [Concept: Mindful self-compassion and Contraindication-sensitive practice]

0333. B - Mindful self-compassion: A stance combining awareness of distress, common humanity, and kindness toward oneself. / Progressive exposure to relaxation: Gradually practicing a regulation technique in increasingly challenging but manageable contexts. [Concept: Mindful self-compassion and Progressive exposure to relaxation]

0334. D - Coping flexibility [Concept: Coping flexibility]

0335. A - Progressive muscle relaxation: Teaching gradual muscle release and adapting the exercise if it causes discomfort. / Contraindication-sensitive practice: Offering choice to stop or use an alternative when inward attention feels unsafe or uncomfortable. [Concept: Progressive muscle relaxation and Contraindication-sensitive practice]

0336. B - Exploring how a young person interprets a demand and what coping resources seem available. [Concept: Stress appraisal]

0337. A - Progressive muscle relaxation [Concept: Progressive muscle relaxation]

0338. D - Coping flexibility [Concept: Coping flexibility]

0339. D - Diaphragmatic breathing: A breathing practice emphasizing comfortable movement of the diaphragm to support regulation. / Body scan: A guided practice of noticing sensations across body regions without requiring a particular sensation. [Concept: Diaphragmatic breathing and Body scan]

0340. B - Grounding: Noticing neutral sights or sounds in the room when distress makes attention feel disconnected. / Contraindication-sensitive practice: Offering choice to stop or use an alternative when inward attention feels unsafe or uncomfortable. [Concept: Grounding and Contraindication-sensitive practice]

0341. C - Grounding [Concept: Grounding]

CAC.925 | Mindfulness and Stress Reduction Techniques

QUESTION | CORRECT OPTION AND CONCEPT

0342. D - Inviting slow, comfortable abdominal breathing without forcing depth or pace. [Concept: Diaphragmatic breathing]

0343. D - Body scan: Inviting nonjudgmental attention to sensations from one body area to another. / Grounding: Noticing neutral sights or sounds in the room when distress makes attention feel disconnected. [Concept: Body scan and Grounding]

0344. A - Grounding: Present-focused orientation using sensory or environmental cues to reconnect with the immediate moment. / Stress appraisal: The process of evaluating whether a situation is threatening, manageable, or relevant to one's resources. [Concept: Grounding and Stress appraisal]

0345. B - Mindful self-compassion: Supporting a young person to acknowledge difficulty without harsh self-judgment. / Contraindication-sensitive practice: Offering choice to stop or use an alternative when inward attention feels unsafe or uncomfortable. [Concept: Mindful self-compassion and Contraindication-sensitive practice]

0346. A - Stress appraisal [Concept: Stress appraisal]

0347. D - Body scan: A guided practice of noticing sensations across body regions without requiring a particular sensation. / Stress appraisal: The process of evaluating whether a situation is threatening, manageable, or relevant to one's resources. [Concept: Body scan and Stress appraisal]

0348. A - Body scan [Concept: Body scan]

0349. D - Progressive exposure to relaxation: Gradually practicing a regulation technique in increasingly challenging but manageable contexts. / Contraindication-sensitive practice: Adapting or pausing an exercise when it increases distress, discomfort, or is not a good fit. [Concept: Progressive exposure to relaxation and Contraindication-sensitive practice]

0350. B - Diaphragmatic breathing: A breathing practice emphasizing comfortable movement of the diaphragm to support regulation. / Contraindication-sensitive practice: Adapting or pausing an exercise when it increases distress, discomfort, or is not a good fit. [Concept: Diaphragmatic breathing and Contraindication-sensitive practice]

0351. C - Progressive muscle relaxation: A structured practice of tensing and releasing muscle groups to increase awareness of bodily tension. / Coping flexibility: The capacity to select and adapt coping strategies to fit changing demands and context. [Concept: Progressive muscle relaxation and Coping flexibility]

0352. A - Contraindication-sensitive practice [Concept: Contraindication-sensitive practice]

0353. B - Body scan [Concept: Body scan]

0354. B - Contraindication-sensitive practice [Concept: Contraindication-sensitive practice]

0355. A - Mindfulness: Purposeful, present-moment attention with an attitude of openness and reduced automatic judgment. / Stress appraisal: The process of evaluating whether a situation is threatening, manageable, or relevant to one's resources. [Concept: Mindfulness and Stress appraisal]

0356. B - Mindfulness [Concept: Mindfulness]

0357. B - Diaphragmatic breathing [Concept: Diaphragmatic breathing]

0358. B - Grounding: Noticing neutral sights or sounds in the room when distress makes attention feel disconnected. / Progressive exposure to relaxation: Practicing a calming skill in session and then in a planned everyday situation. [Concept: Grounding and Progressive exposure to relaxation]

0359. A - Grounding: Present-focused orientation using sensory or environmental cues to reconnect with the immediate moment. / Coping flexibility: The capacity to select and adapt coping strategies to fit changing demands and context. [Concept: Grounding and Coping flexibility]

0360. A - Diaphragmatic breathing: Inviting slow, comfortable abdominal breathing without forcing depth or pace. / Body scan: Inviting nonjudgmental attention to sensations from one body area to another. [Concept: Diaphragmatic breathing and Body scan]

0361. C - Stress appraisal [Concept: Stress appraisal]

0362. A - Contraindication-sensitive practice [Concept: Contraindication-sensitive practice]

0363. B - Grounding: Noticing neutral sights or sounds in the room when distress makes attention feel disconnected. / Progressive exposure to relaxation: Practicing a calming skill in session and then in a planned everyday situation. [Concept: Grounding and Progressive exposure to relaxation]

0364. C - Progressive exposure to relaxation [Concept: Progressive exposure to relaxation]

0365. A - Purposeful, present-moment attention with an attitude of openness and reduced automatic judgment. [Concept: Mindfulness]

0366. A - Mindful self-compassion [Concept: Mindful self-compassion]

0367. B - Mindfulness: Guiding attention to current experience while allowing thoughts to come and go. / Coping flexibility: Helping a client compare strategies and choose one suited to the current stressor. [Concept: Mindfulness and Coping flexibility]

0368. A - Body scan: Inviting nonjudgmental attention to sensations from one body area to another. / Grounding: Noticing neutral sights or sounds in the room when distress makes attention feel disconnected. [Concept: Body scan and Grounding]

0369. B - Diaphragmatic breathing [Concept: Diaphragmatic breathing]

0370. C - Body scan: A guided practice of noticing sensations across body regions without requiring a particular sensation. / Grounding: Present-focused orientation using sensory or environmental cues to reconnect with the immediate moment. [Concept: Body scan and Grounding]

0371. A - Progressive exposure to relaxation [Concept: Progressive exposure to relaxation]

0372. B - Mindful self-compassion [Concept: Mindful self-compassion]

0373. C - Mindfulness: Guiding attention to current experience while allowing thoughts to come and go. / Grounding: Noticing neutral sights or sounds in the room when distress makes attention feel disconnected. [Concept: Mindfulness and Grounding]

0374. B - Progressive muscle relaxation [Concept: Progressive muscle relaxation]

0375. D - Mindfulness: Purposeful, present-moment attention with an attitude of openness and reduced automatic judgment. / Contraindication-sensitive practice: Adapting or pausing an exercise when it increases distress, discomfort, or is not a good fit. 0729. D - Coping flexibility: The capacity to select and adapt coping strategies to fit changing demands and context. / Mindful self-compassion: A stance combining awareness of distress, common humanity, and kindness toward oneself. [Concept: Coping flexibility and Mindful self-compassion]

0730. C - Stress appraisal: The process of evaluating whether a situation is threatening, manageable, or relevant to one’s resources. / Mindful self-compassion: A stance combining awareness of distress, common humanity, and kindness toward oneself. [Concept: Stress appraisal and Mindful self-compassion]

0731. A - Stress appraisal: The process of evaluating whether a situation is threatening, manageable, or relevant to one’s resources. / Contraindication-sensitive practice: Adapting or pausing an exercise when it increases distress, discomfort, or is not a good fit. [Concept: Stress appraisal and Contraindication-sensitive practice]

0732. D - Stress appraisal: Exploring how a young person interprets a demand and what coping resources seem available. / Progressive exposure to relaxation: Practicing a calming skill in session and then in a planned everyday situation. [Concept: Stress appraisal and Progressive exposure to relaxation]

0733. C - Progressive exposure to relaxation [Concept: Progressive exposure to relaxation]

0734. D - Progressive exposure to relaxation [Concept: Progressive exposure to relaxation]

0735. C - Mindfulness: Purposeful, present-moment attention with an attitude of openness and reduced automatic judgment. / Diaphragmatic breathing: A breathing practice emphasizing comfortable movement of the diaphragm to support regulation. [Concept: Mindfulness and Diaphragmatic breathing]

0736. D - Mindfulness [Concept: Mindfulness]

0737. B - Grounding: Noticing neutral sights or sounds in the room when distress makes attention feel disconnected. / Coping flexibility: Helping a client compare strategies and choose one suited to the current stressor. [Concept: Grounding and Coping flexibility]

0738. A - Progressive muscle relaxation: A structured practice of tensing and releasing muscle groups to increase awareness of bodily tension. / Contraindication-sensitive practice: Adapting or pausing an exercise when it increases distress, discomfort, or is not a good fit. [Concept: Progressive muscle relaxation and Contraindication-sensitive practice]

0739. A - Grounding [Concept: Grounding]

0740. A - Body scan: Inviting nonjudgmental attention to sensations from one body area to another. / Coping flexibility: Helping a client compare strategies and choose one suited to the current stressor. [Concept: Body scan and Coping flexibility]

0741. B - Diaphragmatic breathing [Concept: Diaphragmatic breathing]

0742. C - Diaphragmatic breathing [Concept: Diaphragmatic breathing]

0743. A - Mindfulness: Guiding attention to current experience while allowing thoughts to come and go. / Progressive exposure to relaxation: Practicing a calming skill in session and then in a planned everyday situation. [Concept: Mindfulness and Progressive exposure to relaxation]

0744. A - Mindfulness: Guiding attention to current experience while allowing thoughts to come and go. / Progressive muscle relaxation: Teaching gradual muscle release and adapting the exercise if it causes discomfort. [Concept: Mindfulness and Progressive muscle relaxation]

0745. D - Diaphragmatic breathing [Concept: Diaphragmatic breathing]

0746. D - Mindfulness: Guiding attention to current experience while allowing thoughts to come and go. / Body scan: Inviting nonjudgmental attention to sensations from one body area to another. [Concept: Mindfulness and Body scan]

0747. A - A structured practice of tensing and releasing muscle groups to increase awareness of bodily tension. [Concept: Progressive muscle relaxation]

0926. A - Progressive muscle relaxation: Teaching gradual muscle release and adapting the exercise if it causes discomfort. / Coping flexibility: Helping a client compare strategies and choose one suited to the current stressor. [Concept: Progressive muscle relaxation and Coping flexibility]

0927. B - Diaphragmatic breathing: Inviting slow, comfortable abdominal breathing without forcing depth or pace. / Progressive exposure to relaxation: Practicing a calming skill in session and then in a planned everyday situation. [Concept: Diaphragmatic breathing and Progressive exposure to relaxation]

0928. C - Diaphragmatic breathing [Concept: Diaphragmatic breathing]

0929. A - Progressive exposure to relaxation: Gradually practicing a regulation technique in increasingly challenging but manageable contexts. / Contraindication-sensitive practice: Adapting or pausing an exercise when it increases distress, discomfort, or is not a good fit. [Concept: Progressive exposure to relaxation and Contraindication-sensitive practice]

0930. D - Mindfulness [Concept: Mindfulness]

0931. C - Mindfulness [Concept: Mindfulness]

0932. D - Diaphragmatic breathing: A breathing practice emphasizing comfortable movement of the diaphragm to support regulation. / Grounding: Present-focused orientation using sensory or environmental cues to reconnect with the immediate moment. [Concept: Diaphragmatic breathing and Grounding]

0933. B - Mindfulness [Concept: Mindfulness]

0934. B - Stress appraisal [Concept: Stress appraisal]

0935. D - Grounding [Concept: Grounding]

0936. C - Grounding: Noticing neutral sights or sounds in the room when distress makes attention feel disconnected. / Mindful self-compassion: Supporting a young person to acknowledge difficulty without harsh self-judgment. [Concept: Grounding and Mindful self-compassion]

0937. A - Contraindication-sensitive practice [Concept: Contraindication-sensitive practice]

0938. C - Diaphragmatic breathing: Inviting slow, comfortable abdominal breathing without forcing depth or pace. / Contraindication-sensitive practice: Offering choice to stop or use an alternative when inward attention feels unsafe or uncomfortable. [Concept: Diaphragmatic breathing and Contraindication-sensitive practice]

0939. A - Grounding: Present-focused orientation using sensory or environmental cues to reconnect with the immediate moment. / Coping flexibility: The capacity to select and adapt coping strategies to fit changing demands and context. [Concept: Grounding and Coping flexibility]

0940. C - Mindfulness: Guiding attention to current experience while allowing thoughts to come and go. / Grounding: Noticing neutral sights or sounds in the room when distress makes attention feel disconnected. [Concept: Mindfulness and Grounding]

0941. C - Progressive muscle relaxation: Teaching gradual muscle release and adapting the exercise if it causes discomfort. / Contraindication-sensitive practice: Offering choice to stop or use an alternative when inward attention feels unsafe or uncomfortable. [Concept: Progressive muscle relaxation and Contraindication-sensitive practice]

0942. A - Diaphragmatic breathing: Inviting slow, comfortable abdominal breathing without forcing depth or pace. / Mindful self-compassion: Supporting a young person to acknowledge difficulty without harsh self-judgment. [Concept: Diaphragmatic breathing and Mindful self-compassion]

0943. B - Progressive muscle relaxation [Concept: Progressive muscle relaxation]

0944. C - Diaphragmatic breathing [Concept: Diaphragmatic breathing]

0945. C - Contraindication-sensitive practice [Concept: Contraindication-sensitive practice]

0946. A - Mindful self-compassion [Concept: Mindful self-compassion]

0947. B - Mindfulness [Concept: Mindfulness]

0948. C - Stress appraisal [Concept: Stress appraisal]

0949. D - Coping flexibility: The capacity to select and adapt coping strategies to fit changing demands and context. / Contraindication-sensitive practice: Adapting or pausing an exercise when it increases distress, discomfort, or is not a good fit. [Concept: Coping flexibility and Contraindication-sensitive practice]

0950. C - Body scan [Concept: Body scan]

0951. B - Diaphragmatic breathing: Inviting slow, comfortable abdominal breathing without forcing depth or pace. / Coping flexibility: Helping a client compare strategies and choose one suited to the current stressor. [Concept: Diaphragmatic breathing and Coping flexibility]

0952. D - Coping flexibility: Helping a client compare strategies and choose one suited to the current stressor. / Contraindication-sensitive practice: Offering choice to stop or use an alternative when inward attention feels unsafe or uncomfortable. [Concept: Coping flexibility and Contraindication-sensitive practice]

0953. C - Contraindication-sensitive practice [Concept: Contraindication-sensitive practice]

0954. C - Progressive muscle relaxation [Concept: Progressive muscle relaxation]

0955. D - Progressive muscle relaxation: Teaching gradual muscle release and adapting the exercise if it causes discomfort. / Stress appraisal: Exploring how a young person interprets a demand and what coping resources seem available. [Concept: Progressive muscle relaxation and Stress appraisal]

0956. D - Stress appraisal [Concept: Stress appraisal]

0957. A - Noticing neutral sights or sounds in the room when distress makes attention feel disconnected. [Concept: Grounding]

0958. C - Mindful self-compassion [Concept: Mindful self-compassion]

0959. C - Mindfulness: Purposeful, present-moment attention with an attitude of openness and reduced automatic judgment. / Progressive exposure to relaxation: Gradually practicing a regulation technique in increasingly challenging but manageable contexts. [Concept: Mindfulness and Progressive exposure to relaxation]

0960. B - Coping flexibility [Concept: Coping flexibility]

0961. A - Diaphragmatic breathing [Concept: Diaphragmatic breathing]

0962. C - Body scan [Concept: Body scan]

0963. C - Coping flexibility: Helping a client compare strategies and choose one suited to the current stressor. / Mindful self-compassion: Supporting a young person to acknowledge difficulty without harsh self-judgment. [Concept: Coping flexibility and Mindful self-compassion]

0964. D - Mindfulness: Purposeful, present-moment attention with an attitude of openness and reduced automatic judgment. / Body scan: A guided practice of noticing sensations across body regions without requiring a particular sensation. [Concept: Mindfulness and Body scan]

0965. C - Progressive muscle relaxation [Concept: Progressive muscle relaxation]

0966. B - Progressive exposure to relaxation [Concept: Progressive exposure to relaxation]

0967. B - Progressive exposure to relaxation [Concept: Progressive exposure to relaxation]

0968. A - Diaphragmatic breathing: Inviting slow, comfortable abdominal breathing without forcing depth or pace. / Progressive exposure to relaxation: Practicing a calming skill in session and then in a planned everyday situation. [Concept: Diaphragmatic breathing and Progressive exposure to relaxation]

0969. D - Contraindication-sensitive practice [Concept: Contraindication-sensitive practice]

0970. B - Exploring how a young person interprets a demand and what coping resources seem available. [Concept: Stress appraisal]

0971. A - Diaphragmatic breathing: Inviting slow, comfortable abdominal breathing without forcing depth or pace. / Contraindication-sensitive practice: Offering choice to stop or use an alternative when inward attention feels unsafe or uncomfortable. [Concept: Diaphragmatic breathing and Contraindication-sensitive practice]

0972. D - Grounding [Concept: Grounding]

0973. C - Grounding [Concept: Grounding]

0974. D - Body scan: Inviting nonjudgmental attention to sensations from one body area to another. / Coping flexibility: Helping a client compare strategies and choose one suited to the current stressor. [Concept: Body scan and Coping flexibility]

0975. B - Body scan: A guided practice of noticing sensations across body regions without requiring a particular sensation. / Grounding: Present-focused orientation using sensory or environmental cues to reconnect with the immediate moment. [Concept: Body scan and Grounding]

0976. C - Mindful self-compassion [Concept: Mindful self-compassion]

0977. B - Progressive muscle relaxation [Concept: Progressive muscle relaxation]

0978. A - A stance combining awareness of distress, common humanity, and kindness toward oneself. [Concept: Mindful self-compassion]

0979. A - Progressive muscle relaxation [Concept: Progressive muscle relaxation]

0980. A - Mindfulness: Purposeful, present-moment attention with an attitude of openness and reduced automatic judgment. / Progressive exposure to relaxation: Gradually practicing a regulation technique in increasingly challenging but manageable contexts. [Concept: Mindfulness and Progressive exposure to relaxation]

0981. D - Coping flexibility: The capacity to select and adapt coping strategies to fit changing demands and context. / Contraindication-sensitive practice: Adapting or pausing an exercise when it increases distress, discomfort, or is not a good fit. [Concept: Coping flexibility and Contraindication-sensitive practice]

0982. B - Mindfulness [Concept: Mindfulness]

CAC.925 | Mindfulness and Stress Reduction Techniques

QUESTION | CORRECT OPTION AND CONCEPT

0983. A - Body scan: A guided practice of noticing sensations across body regions without requiring a particular sensation. / Contraindication-sensitive practice: Adapting or pausing an exercise when it increases distress, discomfort, or is not a good fit. [Concept: Body scan and Contraindication-sensitive practice]

0984. D - Mindful self-compassion [Concept: Mindful self-compassion]

0985. B - Mindfulness: Purposeful, present-moment attention with an attitude of openness and reduced automatic judgment. / Coping flexibility: The capacity to select and adapt coping strategies to fit changing demands and context. [Concept: Mindfulness and Coping flexibility]

0986. C - Mindful self-compassion: Supporting a young person to acknowledge difficulty without harsh self-judgment. / Progressive exposure to relaxation: Practicing a calming skill in session and then in a planned everyday situation. [Concept: Mindful self-compassion and Progressive exposure to relaxation]

0987. A - Grounding: Noticing neutral sights or sounds in the room when distress makes attention feel disconnected. / Progressive exposure to relaxation: Practicing a calming skill in session and then in a planned everyday situation. [Concept: Grounding and Progressive exposure to relaxation]

[Concept: Technology access equity and AI use transparency]

0130. A - Cybersecurity hygiene: Routine practices such as strong authentication, updates, and secure handling that reduce digital risk. / Technology contingency planning: A plan for continuing or safely pausing care when devices, connectivity, or platforms fail. [Concept: Cybersecurity hygiene and Technology contingency planning]

0131. C - Digital boundaries: Clarifying approved communication channels and response times with families. / AI use transparency: Checking policy, privacy, and professional guidance and informing clients as appropriate before using an AI-enabled tool. [Concept: Digital boundaries and AI use transparency]

0132. A - Telehealth informed consent: Reviewing privacy, technology limitations, emergency procedures, and alternatives before remote care. / AI use transparency: Checking policy, privacy, and professional guidance and informing clients as appropriate before using an AI-enabled tool. [Concept: Telehealth informed consent and AI use transparency]

0133. A - Digital boundaries [Concept: Digital boundaries]

0134. A - Therapeutic app evaluation: Reviewing privacy terms and evidence rather than assuming a popular app is clinically appropriate. / AI use transparency: Checking policy, privacy, and professional guidance and informing clients as appropriate before using an AI-enabled tool. [Concept: Therapeutic app evaluation and AI use transparency]

0135. B - Cybersecurity hygiene [Concept: Cybersecurity hygiene]

0136. D - Therapeutic app evaluation [Concept: Therapeutic app evaluation]

0137. D - Cybersecurity hygiene [Concept: Cybersecurity hygiene]

0138. C - Cybersecurity hygiene [Concept: Cybersecurity hygiene]

0139. D - Digital boundaries: Professional limits governing online contact, social media, and technology-mediated relationships. / Data minimization: Collecting and retaining only the personal information necessary for a defined legitimate purpose. [Concept: Digital boundaries and Data minimization]

0140. B - Digital confidentiality: Using approved secure systems and avoiding sensitive information on shared or unsecured channels. / Technology access equity: Asking about device and privacy barriers before assuming a youth can participate remotely. [Concept: Digital confidentiality and Technology access equity]

0141. B - Therapeutic app evaluation [Concept: Therapeutic app evaluation]

0142. C - Digital confidentiality [Concept: Digital confidentiality]

0143. D - Technology contingency planning [Concept: Technology contingency planning]

0144. C - Telehealth informed consent: Reviewing privacy, technology limitations, emergency procedures, and alternatives before remote care. / Telehealth emergency planning: Confirming current location and emergency contacts at the start of a remote session as appropriate. [Concept: Telehealth informed consent and Telehealth emergency planning]

0145. C - Digital boundaries: Professional limits governing online contact, social media, and technology-mediated relationships. / Technology contingency planning: A plan for continuing or safely pausing care when devices, connectivity, or platforms fail. [Concept: Digital boundaries and Technology contingency planning]

0146. B - Digital boundaries [Concept: Digital boundaries]

0147. D - Telehealth emergency planning: Confirming current location and emergency contacts at the start of a remote session as appropriate. / Technology access equity: Asking about device and privacy barriers before assuming a youth can participate remotely. [Concept: Telehealth emergency planning and Technology access equity]

0148. A - Technology contingency planning [Concept: Technology contingency planning]

0149. B - Therapeutic app evaluation [Concept: Therapeutic app evaluation]

0150. B - Telehealth informed consent: An explanation and voluntary agreement addressing the telehealth format, benefits, risks, privacy, and contingency plans. / Technology contingency planning: A plan for continuing or safely pausing care when devices, connectivity, or platforms fail. [Concept: Telehealth informed consent and Technology contingency planning]

0151. D - Telehealth informed consent [Concept: Telehealth informed consent]

0152. B - AI use transparency: Clear disclosure and oversight when artificial intelligence tools materially affect clinical work or client information. / Technology contingency planning: A plan for continuing or safely pausing care when devices, connectivity, or platforms fail. [Concept: AI use transparency and Technology contingency planning]

0153. D - Digital boundaries: Clarifying approved communication channels and response times with families. / Therapeutic app evaluation: Reviewing privacy terms and evidence rather than assuming a popular app is clinically appropriate. [Concept: Digital boundaries and Therapeutic app evaluation]

0154. B - Technology contingency planning [Concept: Technology contingency planning]

0155. A - Telehealth informed consent: An explanation and voluntary agreement addressing the telehealth format, benefits, risks, privacy, and contingency plans. / Technology access equity: Attention to unequal access to devices, bandwidth, private space, and digital skills. [Concept: Telehealth informed consent and Technology access equity]

0156. A - Technology contingency planning [Concept: Technology contingency planning]

0157. C - Digital boundaries [Concept: Digital boundaries]

0158. D - Data minimization [Concept: Data minimization]

0159. C - Data minimization [Concept: Data minimization]

0160. C - Therapeutic app evaluation [Concept: Therapeutic app evaluation]

0161. D - Technology contingency planning [Concept: Technology contingency planning]

0162. B - Telehealth informed consent: Reviewing privacy, technology limitations, emergency procedures, and alternatives before remote care. / Telehealth emergency planning: Confirming current location and emergency contacts at the start of a remote session as appropriate. [Concept: Telehealth informed consent and Telehealth emergency planning]

0163. C - Data minimization [Concept: Data minimization]

0164. D - Telehealth informed consent: An explanation and voluntary agreement addressing the telehealth format, benefits, risks, privacy, and contingency plans. / Telehealth emergency planning: Advance procedures for responding to an urgent event during remote care, including location and contacts. [Concept: Telehealth informed consent and Telehealth emergency planning]

0165. A - AI use transparency: Clear disclosure and oversight when artificial intelligence tools materially affect clinical work or client information. / Technology contingency planning: A plan for continuing or safely pausing care when devices, connectivity, or platforms fail. [Concept: AI use transparency and Technology contingency planning]

0166. A - Cybersecurity hygiene: Routine practices such as strong authentication, updates, and secure handling that reduce digital risk. / Therapeutic app evaluation: Assessment of an app's evidence, privacy, accessibility, usability, and fit before recommending it. [Concept: Cybersecurity hygiene and Therapeutic app evaluation]

0167. C - Digital confidentiality: Using approved secure systems and avoiding sensitive information on shared or unsecured channels. / Digital boundaries: Clarifying approved communication channels and response times with families. [Concept: Digital confidentiality and Digital boundaries]

0168. D - Attention to unequal access to devices, bandwidth, private space, and digital skills. [Concept: Technology access equity]

0169. B - Data minimization: Avoiding unnecessary data capture and retaining only what policy and law require. / Therapeutic app evaluation: Reviewing privacy terms and evidence rather than assuming a popular app is clinically appropriate. [Concept: Data minimization and Therapeutic app evaluation]

0170. C - Technology access equity: Attention to unequal access to devices, bandwidth, private space, and digital skills. / Digital boundaries: Professional limits governing online contact, social media, and technology-mediated relationships. [Concept: Technology access equity and Digital boundaries]

0171. D - Technology access equity [Concept: Technology access equity]

0172. B - Using access controls and keeping approved systems updated. [Concept: Cybersecurity hygiene]

CAC.926 | Technology in Counseling Practice

QUESTION | CORRECT OPTION AND CONCEPT

0173. B - Technology access equity [Concept: Technology access equity]

0174. A - Data minimization [Concept: Data minimization]

0175. C - Digital confidentiality: Using approved secure systems and avoiding sensitive information on shared or unsecured channels. / AI use transparency: Checking policy, privacy, and professional guidance and informing clients as appropriate before using an AI-enabled tool. [Concept: Digital confidentiality and AI use transparency]

0176. B - Telehealth informed consent: Reviewing privacy, technology limitations, emergency procedures, and alternatives before remote care. / Data minimization: Avoiding unnecessary data capture and retaining only what policy and law require. [Concept: Telehealth informed consent and Data minimization]

0177. A - Telehealth emergency planning: Confirming current location and emergency contacts at the start of a remote session as appropriate. / Technology contingency planning: Agreeing on a backup contact method and next step if a session disconnects. [Concept: Telehealth emergency planning and Technology contingency planning]

0178. C - Data minimization [Concept: Data minimization]

0179. A - Digital boundaries: Clarifying approved communication channels and response times with families. / Cybersecurity hygiene: Using access controls and keeping approved systems updated. [Concept: Digital boundaries and Cybersecurity hygiene]

0180. C - AI use transparency [Concept: AI use transparency]

0181. C - Telehealth emergency planning [Concept: Telehealth emergency planning]

0182. A - AI use transparency [Concept: AI use transparency]

0183. B - Technology contingency planning [Concept: Technology contingency planning]

0184. C - Cybersecurity hygiene: Using access controls and keeping approved systems updated. / AI use transparency: Checking policy, privacy, and professional guidance and informing clients as appropriate before using an AI-enabled tool. [Concept: Cybersecurity hygiene and AI use transparency]

0185. C - Technology access equity: Attention to unequal access to devices, bandwidth, private space, and digital skills. / Digital boundaries: Professional limits governing online contact, social media, and technology-mediated relationships. [Concept: Technology access equity and Digital boundaries]

0186. C - Digital confidentiality: Using approved secure systems and avoiding sensitive information on shared or unsecured channels. / Telehealth emergency planning: Confirming current location and emergency contacts at the start of a remote session as appropriate. [Concept: Digital confidentiality and Telehealth emergency planning]

0187. A - AI use transparency: Checking policy, privacy, and professional guidance and informing clients as appropriate before using an AI-enabled tool. / Technology contingency planning: Agreeing on a backup contact method and next step if a session disconnects. [Concept: AI use transparency and Technology contingency planning]

0188. B - Telehealth emergency planning [Concept: Telehealth emergency planning]

0189. A - Technology access equity: Asking about device and privacy barriers before assuming a youth can participate remotely. / AI use transparency: Checking policy, privacy, and professional guidance and informing clients as appropriate before using an AI-enabled tool. [Concept: Technology access equity and AI use transparency]

0190. B - Telehealth emergency planning: Advance procedures for responding to an urgent event during remote care, including location and contacts. / Digital boundaries: Professional limits governing online contact, social media, and technology-mediated relationships. [Concept: Telehealth emergency planning and Digital boundaries]

0191. C - Technology contingency planning [Concept: Technology contingency planning]

0192. D - Therapeutic app evaluation [Concept: Therapeutic app evaluation]

0193. A - Technology contingency planning [Concept: Technology contingency planning]

0194. B - Cybersecurity hygiene [Concept: Cybersecurity hygiene]

0195. C - A plan for continuing or safely pausing care when devices, connectivity, or platforms fail. [Concept: Technology contingency planning]

0196. D - Digital boundaries [Concept: Digital boundaries]

0197. D - Reviewing privacy terms and evidence rather than assuming a popular app is clinically appropriate. [Concept: Therapeutic app evaluation]

0198. B - Telehealth informed consent [Concept: Telehealth informed consent]

0199. C - Cybersecurity hygiene: Routine practices such as strong authentication, updates, and secure handling that reduce digital risk. / Technology contingency planning: A plan for continuing or safely pausing care when devices, connectivity, or platforms fail. [Concept: Cybersecurity hygiene and Technology contingency planning]

0200. D - Cybersecurity hygiene [Concept: Cybersecurity hygiene]

0201. B - Telehealth emergency planning: Advance procedures for responding to an urgent event during remote care, including location and contacts. / Technology access equity: Attention to unequal access to devices, bandwidth, private space, and digital skills. [Concept: Telehealth emergency planning and Technology access equity]

0202. C - Telehealth emergency planning [Concept: Telehealth emergency planning]

0203. B - Digital boundaries: Clarifying approved communication channels and response times with families. / Cybersecurity hygiene: Using access controls and keeping approved systems updated. [Concept: Digital boundaries and Cybersecurity hygiene]

0204. A - Cybersecurity hygiene: Using access controls and keeping approved systems updated. / Technology contingency planning: Agreeing on a backup contact method and next step if a session disconnects. [Concept: Cybersecurity hygiene and Technology contingency planning]

0205. B - Technology contingency planning [Concept: Technology contingency planning]

0206. B - Telehealth informed consent: Reviewing privacy, technology limitations, emergency procedures, and alternatives before remote care. / AI use transparency: Checking policy, privacy, and professional guidance and informing clients as appropriate before using an AI-enabled tool. [Concept: Telehealth informed consent and AI use transparency]

0207. C - Digital confidentiality [Concept: Digital confidentiality]

0208. B - Telehealth informed consent [Concept: Telehealth informed consent]

0209. B - Assessment of an app's evidence, privacy, accessibility, usability, and fit before recommending it. [Concept: Therapeutic app evaluation]

0210. C - Data minimization: Avoiding unnecessary data capture and retaining only what policy and law require. / Cybersecurity hygiene: Using access controls and keeping approved systems updated. [Concept: Data minimization and Cybersecurity hygiene]

0211. B - AI use transparency: Clear disclosure and oversight when artificial intelligence tools materially affect clinical work or client information. / Technology contingency planning: A plan for continuing or safely pausing care when devices, connectivity, or platforms fail. [Concept: AI use transparency and Technology contingency planning]

0212. A - Telehealth informed consent: Reviewing privacy, technology limitations, emergency procedures, and alternatives before remote care. / Data minimization: Avoiding unnecessary data capture and retaining only what policy and law require. [Concept: Telehealth informed consent and Data minimization]

0213. D - Using access controls and keeping approved systems updated. [Concept: Cybersecurity hygiene]

0214. B - Reviewing privacy, technology limitations, emergency procedures, and alternatives before remote care. [Concept: Telehealth informed consent]

0215. C - Digital confidentiality: Protection of sensitive information across devices, networks, platforms, and communications. / Therapeutic app evaluation: Assessment of an app's evidence, privacy, accessibility, usability, and fit before recommending it. [Concept: Digital confidentiality and Therapeutic app evaluation]

0216. A - Telehealth emergency planning [Concept: Telehealth emergency planning]

0217. B - Digital confidentiality: Using approved secure systems and avoiding sensitive information on shared or unsecured channels. / Digital boundaries: Clarifying approved communication channels and response times with families. [Concept: Digital confidentiality and Digital boundaries]

0218. B - Advance procedures for responding to an urgent event during remote care, including location and contacts. [Concept: Telehealth emergency planning]

0219. C - Telehealth emergency planning [Concept: Telehealth emergency planning]

0220. C - Telehealth informed consent: An explanation and voluntary agreement addressing the telehealth format, benefits, risks, privacy, and contingency plans. / Telehealth emergency planning: Advance procedures for responding to an urgent event during remote care, including location and contacts. [Concept: Telehealth informed consent and Telehealth emergency planning]

0221. C - Telehealth informed consent [Concept: Telehealth informed consent]

0222. A - Therapeutic app evaluation [Concept: Therapeutic app evaluation]

0223. B - Reviewing privacy, technology limitations, emergency procedures, and alternatives before remote care. [Concept: Telehealth informed consent]

0224. A - Telehealth emergency planning: Confirming current location and emergency contacts at the start of a remote session as appropriate. / Technology contingency planning: Agreeing on a backup contact method and next step if a session disconnects. A - Telehealth emergency planning: Confirming current location and emergency contacts at the start of a remote session as appropriate. / Data minimization: Avoiding unnecessary data capture and retaining only what policy and law require. [Concept: Telehealth emergency planning and Data minimization]

0526. B - Digital boundaries [Concept: Digital boundaries]

0527. D - Digital boundaries: Clarifying approved communication channels and response times with families. / Cybersecurity hygiene: Using access controls and keeping approved systems updated. [Concept: Digital boundaries and Cybersecurity hygiene]

0528. A - Digital boundaries [Concept: Digital boundaries]

0529. A - Telehealth emergency planning [Concept: Telehealth emergency planning]

0530. A - Digital confidentiality: Protection of sensitive information across devices, networks, platforms, and communications. / Therapeutic app evaluation: Assessment of an app's evidence, privacy, accessibility, usability, and fit before recommending it. [Concept: Digital confidentiality and Therapeutic app evaluation]

0531. C - Telehealth informed consent [Concept: Telehealth informed consent]

0532. A - Digital confidentiality: Protection of sensitive information across devices, networks, platforms, and communications. / Telehealth emergency planning: Advance procedures for responding to an urgent event during remote care, including location and contacts. [Concept: Digital confidentiality and Telehealth emergency planning]

0533. C - Data minimization: Collecting and retaining only the personal information necessary for a defined legitimate purpose. / AI use transparency: Clear disclosure and oversight when artificial intelligence tools materially affect clinical work or client information. [Concept: Data minimization and AI use transparency]

0534. A - Cybersecurity hygiene [Concept: Cybersecurity hygiene]

0535. C - Data minimization: Collecting and retaining only the personal information necessary for a defined legitimate purpose. / Therapeutic app evaluation: Assessment of an app's evidence, privacy, accessibility, usability, and fit before recommending it. [Concept: Data minimization and Therapeutic app evaluation]

0536. A - Data minimization: Collecting and retaining only the personal information necessary for a defined legitimate purpose. / Cybersecurity hygiene: Routine practices such as strong authentication, updates, and secure handling that reduce digital risk. [Concept: Data minimization and Cybersecurity hygiene]

0537. C - Therapeutic app evaluation [Concept: Therapeutic app evaluation]

0538. D - Technology access equity [Concept: Technology access equity]

0539. D - Advance procedures for responding to an urgent event during remote care, including location and contacts. [Concept: Telehealth emergency planning]

0540. B - Collecting and retaining only the personal information necessary for a defined legitimate purpose. [Concept: Data minimization]

0541. A - Telehealth emergency planning: Advance procedures for responding to an urgent event during remote care, including location and contacts. / Technology access equity: Attention to unequal access to devices, bandwidth, private space, and digital skills. [Concept: Telehealth emergency planning and Technology access equity]

0542. B - Telehealth emergency planning [Concept: Telehealth emergency planning]

0543. D - Technology access equity [Concept: Technology access equity]

0544. A - Telehealth informed consent [Concept: Telehealth informed consent]

0545. C - Digital confidentiality: Protection of sensitive information across devices, networks, platforms, and communications. / Digital boundaries: Professional limits governing online contact, social media, and technology-mediated relationships. [Concept: Digital confidentiality and Digital boundaries]

0546. D - Telehealth informed consent [Concept: Telehealth informed consent]

0547. C - Data minimization: Collecting and retaining only the personal information necessary for a defined legitimate purpose. / AI use transparency: Clear disclosure and oversight when artificial intelligence tools materially affect clinical work or client information. [Concept: Data minimization and AI use transparency]

0548. B - Data minimization [Concept: Data minimization]

0549. D - Telehealth emergency planning: Advance procedures for responding to an urgent event during remote care, including location and contacts. / Data minimization: Collecting and retaining only the personal information necessary for a defined legitimate purpose. [Concept: Telehealth emergency planning and Data minimization]

0550. C - Technology access equity: Asking about device and privacy barriers before assuming a youth can participate remotely. / Technology contingency planning: Agreeing on a backup contact method and next step if a session disconnects. [Concept: Technology access equity and Technology contingency planning]

0551. D - Telehealth emergency planning: Advance procedures for responding to an urgent event during remote care, including location and contacts. / Technology access equity: Attention to unequal access to devices, bandwidth, private space, and digital skills. [Concept: Telehealth emergency planning and Technology access equity]

0552. A - Digital confidentiality: Using approved secure systems and avoiding sensitive information on shared or unsecured channels. / Digital boundaries: Clarifying approved communication channels and response times with families. [Concept: Digital confidentiality and Digital boundaries]

0553. D - Data minimization [Concept: Data minimization]

0554. A - Cybersecurity hygiene: Using access controls and keeping approved systems updated. / Technology contingency planning: Agreeing on a backup contact method and next step if a session disconnects. [Concept: Cybersecurity hygiene and Technology contingency planning]

0555. B - Digital confidentiality [Concept: Digital confidentiality]

0556. B - Digital confidentiality: Using approved secure systems and avoiding sensitive information on shared or unsecured channels. / Cybersecurity hygiene: Using access controls and keeping approved systems updated. [Concept: Digital confidentiality and Cybersecurity hygiene]

0557. B - Telehealth emergency planning: Advance procedures for responding to an urgent event during remote care, including location and contacts. / Cybersecurity hygiene: Routine practices such as strong authentication, updates, and secure handling that reduce digital risk. [Concept: Telehealth emergency planning and Cybersecurity hygiene]

0558. D - Telehealth emergency planning: Confirming current location and emergency contacts at the start of a remote session as appropriate. / Therapeutic app evaluation: Reviewing privacy terms and evidence rather than assuming a popular app is clinically appropriate. [Concept: Telehealth emergency planning and Therapeutic app evaluation]

0559. A - Telehealth informed consent: Reviewing privacy, technology limitations, emergency procedures, and alternatives before remote care. / Digital boundaries: Clarifying approved communication channels and response times with families. [Concept: Telehealth informed consent and Digital boundaries]

0560. D - Telehealth informed consent: Reviewing privacy, technology limitations, emergency procedures, and alternatives before remote care. / Digital confidentiality: Using approved secure systems and avoiding sensitive information on shared or unsecured channels. [Concept: Telehealth informed consent and Digital confidentiality]

0561. D - Digital boundaries: Clarifying approved communication channels and response times with families. / Therapeutic app evaluation: Reviewing privacy terms and evidence rather than assuming a popular app is clinically appropriate. [Concept: Digital boundaries and Therapeutic app evaluation]

0562. A - Assessment of an app's evidence, privacy, accessibility, usability, and fit before recommending it. [Concept: Therapeutic app evaluation]

0563. D - Digital confidentiality [Concept: Digital confidentiality]

0564. B - Technology access equity: Attention to unequal access to devices, bandwidth, private space, and digital skills. / AI use transparency: Clear disclosure and oversight when artificial intelligence tools materially affect clinical work or client information. [Concept: Technology access equity and AI use transparency]

CAC.926 | Technology in Counseling Practice

QUESTION | CORRECT OPTION AND CONCEPT

0565. B - Digital confidentiality: Using approved secure systems and avoiding sensitive information on shared or unsecured channels. / Therapeutic app evaluation: Reviewing privacy terms and evidence rather than assuming a popular app is clinically appropriate. [Concept: Digital confidentiality and Therapeutic app evaluation]

0566. D - Telehealth emergency planning: Confirming current location and emergency contacts at the start of a remote session as appropriate. / Technology access equity: Asking about device and privacy barriers before assuming a youth can participate remotely. [Concept: Telehealth emergency planning and Technology access equity]

0567. A - Telehealth informed consent: An explanation and voluntary agreement addressing the telehealth format, benefits, risks, privacy, and contingency plans. / Technology access equity: Attention to unequal access to devices, bandwidth, private space, and digital skills. [Concept: Telehealth informed consent and Technology access equity]

0568. C - Technology contingency planning [Concept: Technology contingency planning]

0569. D - Telehealth informed consent: Reviewing privacy, technology limitations, emergency procedures, and alternatives before remote care. / Technology contingency planning: Agreeing on a backup contact method and next step if a session disconnects. [Concept: Telehealth informed consent and Technology contingency planning]

0570. A - Technology access equity: Attention to unequal access to devices, bandwidth, private space, and digital skills. / AI use transparency: Clear disclosure and oversight when artificial intelligence tools materially affect clinical work or client information. [Concept: Technology access equity and AI use transparency]

0571. B - Digital confidentiality [Concept: Digital confidentiality]

0572. C - Digital boundaries: Clarifying approved communication channels and response times with families. / Technology contingency planning: Agreeing on a backup contact method and next step if a session disconnects. [Concept: Digital boundaries and Technology contingency planning]

0573. D - Telehealth emergency planning: Confirming current location and emergency contacts at the start of a remote session as appropriate. / Digital boundaries: Clarifying approved communication channels and response times with families. [Concept: Telehealth emergency planning and Digital boundaries]

0574. B - Telehealth informed consent: An explanation and voluntary agreement addressing the telehealth format, benefits, risks, privacy, and contingency plans. / Telehealth emergency planning: Advance procedures for responding to an urgent event during remote care, including location and contacts. [Concept: Telehealth informed consent and Telehealth emergency planning]

0575. B - Digital confidentiality: Protection of sensitive information across devices, networks, platforms, and communications. / Therapeutic app evaluation: Assessment of an app's evidence, privacy, accessibility, usability, and fit before recommending it. [Concept: Digital confidentiality and Therapeutic app evaluation]

0576. C - Digital confidentiality: Protection of sensitive information across devices, networks, platforms, and communications. / Telehealth emergency planning: Advance procedures for responding to an urgent event during remote care, including location and contacts. [Concept: Digital confidentiality and Telehealth emergency planning]

0577. D - Technology access equity [Concept: Technology access equity]

0578. B - Digital confidentiality [Concept: Digital confidentiality]

0579. C - Cybersecurity hygiene [Concept: Cybersecurity hygiene]

0580. C - Telehealth informed consent [Concept: Telehealth informed consent]

0581. D - Digital confidentiality: Using approved secure systems and avoiding sensitive information on shared or unsecured channels. / Telehealth emergency planning: Confirming current location and emergency contacts at the start of a remote session as appropriate. [Concept: Digital confidentiality and Telehealth emergency planning]

0582. D - Telehealth informed consent: An explanation and voluntary agreement addressing the telehealth format, benefits, risks, privacy, and contingency plans. / Therapeutic app evaluation: Assessment of an app's evidence, privacy, accessibility, usability, and fit before recommending it. [Concept: Telehealth informed consent and Therapeutic app evaluation]

0583. B - Technology access equity [Concept: Technology access equity]

0584. B - Digital boundaries [Concept: Digital boundaries]

0585. A - AI use transparency [Concept: AI use transparency]

0586. A - Digital boundaries: Professional limits governing online contact, social media, and technology-mediated relationships. / AI use transparency: Clear disclosure and oversight when artificial intelligence tools materially affect clinical work or client information. [Concept: Digital boundaries and AI use transparency]

0587. B - Technology access equity: Attention to unequal access to devices, bandwidth, private space, and digital skills. / Therapeutic app evaluation: Assessment of an app's evidence, privacy, accessibility, usability, and fit before recommending it. [Concept: Technology access equity and Therapeutic app evaluation]

0588. A - Therapeutic app evaluation [Concept: Therapeutic app evaluation]

0589. C - Telehealth informed consent [Concept: Telehealth informed consent]

0590. A - Digital confidentiality [Concept: Digital confidentiality]

0591. D - Therapeutic app evaluation [Concept: Therapeutic app evaluation]

0592. C - Therapeutic app evaluation [Concept: Therapeutic app evaluation]

0593. B - Technology access equity: Asking about device and privacy barriers before assuming a youth can participate remotely. / Therapeutic app evaluation: Reviewing privacy terms and evidence rather than assuming a popular app is clinically appropriate. [Concept: Technology access equity and Therapeutic app evaluation]

0594. A - Digital confidentiality [Concept: Digital confidentiality]

0595. D - Telehealth informed consent: Reviewing privacy, technology limitations, emergency procedures, and alternatives before remote care. / AI use transparency: Checking policy, privacy, and professional guidance and informing clients as appropriate before using an AI-enabled tool. [Concept: Telehealth informed consent and AI use transparency]

0596. B - Digital boundaries [Concept: Digital boundaries]

0597. A - Telehealth emergency planning: Advance procedures for responding to an urgent event during remote care, including location and contacts. / AI use transparency: Clear disclosure and oversight when artificial intelligence tools materially affect clinical work or client information. [Concept: Telehealth emergency planning and AI use transparency]

0598. C - Telehealth emergency planning: Confirming current location and emergency contacts at the start of a remote session as appropriate. / Therapeutic app evaluation: Reviewing privacy terms and evidence rather than assuming a popular app is clinically appropriate. [Concept: Telehealth emergency planning and Therapeutic app evaluation]

0599. B - Telehealth informed consent: Reviewing privacy, technology limitations, emergency procedures, and alternatives before remote care. / Therapeutic app evaluation: Reviewing privacy terms and evidence rather than assuming a popular app is clinically appropriate. [Concept: Telehealth informed consent and Therapeutic app evaluation]

0600. A - Digital confidentiality [Concept: Digital confidentiality]

0601. D - Telehealth informed consent: Reviewing privacy, technology limitations, emergency procedures, and alternatives before remote care. / Data minimization: Avoiding unnecessary data capture and retaining only what policy and law require. [Concept: Telehealth informed consent and Data minimization]

0602. A - Digital boundaries: Clarifying approved communication channels and response times with families. / Therapeutic app evaluation: Reviewing privacy terms and evidence rather than assuming a popular app is clinically appropriate. [Concept: Digital boundaries and Therapeutic app evaluation]

0603. D - Technology contingency planning [Concept: Technology contingency planning]

0604. D - Technology access equity: Asking about device and privacy barriers before assuming a youth can participate remotely. / AI use transparency: Checking policy, privacy, and professional guidance and informing clients as appropriate before using an AI-enabled tool. [Concept: Technology access equity and AI use transparency]

0605. B - AI use transparency [Concept: AI use transparency]

0606. C - AI use transparency [Concept: AI use transparency]

0607. D - Collecting and retaining only the personal information necessary for a defined legitimate purpose. [Concept: Data minimization]

0608. B - Technology access equity: Attention to unequal access to devices, bandwidth, private space, and digital skills. / Technology contingency planning: A plan for continuing or safely pausing care when devices, connectivity, or platforms fail. [Concept: Technology access equity and Technology contingency planning]

0609. C - Digital boundaries: Professional limits governing online contact, social media, and technology-mediated relationships. / Technology contingency planning: A plan for continuing or safely pausing care when devices, connectivity, or platforms fail. [Concept: Digital boundaries and Technology contingency planning]

0610. A - Technology access equity: Attention to unequal access to devices, bandwidth, private space, and digital skills. / AI use transparency: Clear disclosure and oversight when artificial intelligence tools materially affect clinical work or client information. [Concept: Technology access equity and AI use transparency]

0611. B - Telehealth informed consent: An explanation and voluntary agreement addressing the telehealth format, benefits, risks, privacy, and contingency plans. / Technology contingency planning: A plan for continuing or safely pausing care when devices, connectivity, or platforms fail. [Concept: Telehealth informed consent and Technology contingency planning]

0718. B - Therapeutic app evaluation [Concept: Therapeutic app evaluation]

0719. C - Technology contingency planning [Concept: Technology contingency planning]

0720. D - Digital confidentiality: Protection of sensitive information across devices, networks, platforms, and communications. / Therapeutic app evaluation: Assessment of an app's evidence, privacy, accessibility, usability, and fit before recommending it. [Concept: Digital confidentiality and Therapeutic app evaluation]

0721. C - AI use transparency [Concept: AI use transparency]

0722. B - Telehealth informed consent: Reviewing privacy, technology limitations, emergency procedures, and alternatives before remote care. / Technology contingency planning: Agreeing on a backup contact method and next step if a session disconnects. [Concept: Telehealth informed consent and Technology contingency planning]

0723. D - Data minimization [Concept: Data minimization]

0724. B - Therapeutic app evaluation: Assessment of an app's evidence, privacy, accessibility, usability, and fit before recommending it. / AI use transparency: Clear disclosure and oversight when artificial intelligence tools materially affect clinical work or client information. [Concept: Therapeutic app evaluation and AI use transparency]

0725. C - Telehealth informed consent: An explanation and voluntary agreement addressing the telehealth format, benefits, risks, privacy, and contingency plans. / Telehealth emergency planning: Advance procedures for responding to an urgent event during remote care, including location and contacts. [Concept: Telehealth informed consent and Telehealth emergency planning]

0726. D - Digital confidentiality: Protection of sensitive information across devices, networks, platforms, and communications. / Technology access equity: Attention to unequal access to devices, bandwidth, private space, and digital skills. [Concept: Digital confidentiality and Technology access equity]

0727. A - Telehealth emergency planning: Advance procedures for responding to an urgent event during remote care, including location and contacts. / Technology contingency planning: A plan for continuing or safely pausing care when devices, connectivity, or platforms fail. [Concept: Telehealth emergency planning and Technology contingency planning]

0728. D - Therapeutic app evaluation [Concept: Therapeutic app evaluation]

CAC.926 | Technology in Counseling Practice

QUESTION | CORRECT OPTION AND CONCEPT

0729. C - Technology contingency planning [Concept: Technology contingency planning]

0730. B - Technology access equity [Concept: Technology access equity]

0731. C - Technology access equity: Asking about device and privacy barriers before assuming a youth can participate remotely. / Data minimization: Avoiding unnecessary data capture and retaining only what policy and law require. [Concept: Technology access equity and Data minimization]

0732. A - Data minimization [Concept: Data minimization]

0733. A - Telehealth emergency planning: Confirming current location and emergency contacts at the start of a remote session as appropriate. / Data minimization: Avoiding unnecessary data capture and retaining only what policy and law require. [Concept: Telehealth emergency planning and Data minimization]

0734. C - Therapeutic app evaluation: Reviewing privacy terms and evidence rather than assuming a popular app is clinically appropriate. / AI use transparency: Checking policy, privacy, and professional guidance and informing clients as appropriate before using an AI-enabled tool. [Concept: Therapeutic app evaluation and AI use transparency]

0735. C - Telehealth emergency planning: Advance procedures for responding to an urgent event during remote care, including location and contacts. / Therapeutic app evaluation: Assessment of an app's evidence, privacy, accessibility, usability, and fit before recommending it. [Concept: Telehealth emergency planning and Therapeutic app evaluation]

0736. A - Telehealth emergency planning: Advance procedures for responding to an urgent event during remote care, including location and contacts. / Technology access equity: Attention to unequal access to devices, bandwidth, private space, and digital skills. [Concept: Telehealth emergency planning and Technology access equity]

0737. A - Digital confidentiality: Using approved secure systems and avoiding sensitive information on shared or unsecured channels. / Data minimization: Avoiding unnecessary data capture and retaining only what policy and law require. [Concept: Digital confidentiality and Data minimization]

0738. D - Cybersecurity hygiene [Concept: Cybersecurity hygiene]

0739. B - Digital boundaries: Clarifying approved communication channels and response times with families. / Cybersecurity hygiene: Using access controls and keeping approved systems updated. [Concept: Digital boundaries and Cybersecurity hygiene]

0740. D - Data minimization [Concept: Data minimization]

0741. A - AI use transparency [Concept: AI use transparency]

0742. C - Technology access equity: Asking about device and privacy barriers before assuming a youth can participate remotely. / Technology contingency planning: Agreeing on a backup contact method and next step if a session disconnects. 0919. C - Data minimization [Concept: Data minimization]

0920. C - Therapeutic app evaluation: Assessment of an app's evidence, privacy, accessibility, usability, and fit before recommending it. / AI use transparency: Clear disclosure and oversight when artificial intelligence tools materially affect clinical work or client information. [Concept: Therapeutic app evaluation and AI use transparency]

0921. C - Telehealth informed consent [Concept: Telehealth informed consent]

0922. A - Cybersecurity hygiene [Concept: Cybersecurity hygiene]

0923. D - Clarifying approved communication channels and response times with families. [Concept: Digital boundaries]

0924. B - Avoiding unnecessary data capture and retaining only what policy and law require. [Concept: Data minimization]

0925. C - Digital confidentiality: Using approved secure systems and avoiding sensitive information on shared or unsecured channels. / Data minimization: Avoiding unnecessary data capture and retaining only what policy and law require. [Concept: Digital confidentiality and Data minimization]

0926. C - Digital boundaries [Concept: Digital boundaries]

0927. B - Telehealth informed consent [Concept: Telehealth informed consent]

0928. C - Technology access equity [Concept: Technology access equity]

0929. B - Digital confidentiality: Using approved secure systems and avoiding sensitive information on shared or unsecured channels. / Technology access equity: Asking about device and privacy barriers before assuming a youth can participate remotely. [Concept: Digital confidentiality and Technology access equity]

0930. D - Digital confidentiality: Protection of sensitive information across devices, networks, platforms, and communications. / AI use transparency: Clear disclosure and oversight when artificial intelligence tools materially affect clinical work or client information. [Concept: Digital confidentiality and AI use transparency]

0931. A - Telehealth informed consent: An explanation and voluntary agreement addressing the telehealth format, benefits, risks, privacy, and contingency plans. / Cybersecurity hygiene: Routine practices such as strong authentication, updates, and secure handling that reduce digital risk. [Concept: Telehealth informed consent and Cybersecurity hygiene]

0932. B - Cybersecurity hygiene [Concept: Cybersecurity hygiene]

0933. D - Telehealth informed consent: Reviewing privacy, technology limitations, emergency procedures, and alternatives before remote care. / Digital boundaries: Clarifying approved communication channels and response times with families. [Concept: Telehealth informed consent and Digital boundaries]

0934. A - Digital confidentiality: Using approved secure systems and avoiding sensitive information on shared or unsecured channels. / Technology access equity: Asking about device and privacy barriers before assuming a youth can participate remotely. [Concept: Digital confidentiality and Technology access equity]

0935. A - AI use transparency [Concept: AI use transparency]

0936. D - Data minimization: Collecting and retaining only the personal information necessary for a defined legitimate purpose. / AI use transparency: Clear disclosure and oversight when artificial intelligence tools materially affect clinical work or client information. [Concept: Data minimization and AI use transparency]

0937. A - AI use transparency [Concept: AI use transparency]

0938. A - Telehealth informed consent [Concept: Telehealth informed consent]

0939. D - Technology access equity: Asking about device and privacy barriers before assuming a youth can participate remotely. / Data minimization: Avoiding unnecessary data capture and retaining only what policy and law require. [Concept: Technology access equity and Data minimization]

0940. C - Telehealth informed consent: An explanation and voluntary agreement addressing the telehealth format, benefits, risks, privacy, and contingency plans. / Digital boundaries: Professional limits governing online contact, social media, and technology-mediated relationships. [Concept: Telehealth informed consent and Digital boundaries]

0941. C - Therapeutic app evaluation [Concept: Therapeutic app evaluation]

0942. A - Digital boundaries: Professional limits governing online contact, social media, and technology-mediated relationships. / Cybersecurity hygiene: Routine practices such as strong authentication, updates, and secure handling that reduce digital risk. [Concept: Digital boundaries and Cybersecurity hygiene]

0943. C - Attention to unequal access to devices, bandwidth, private space, and digital skills. [Concept: Technology access equity]

0944. D - Data minimization [Concept: Data minimization]

0945. C - Digital confidentiality: Using approved secure systems and avoiding sensitive information on shared or unsecured channels. / AI use transparency: Checking policy, privacy, and professional guidance and informing clients as appropriate before using an AI-enabled tool. [Concept: Digital confidentiality and AI use transparency]

0946. A - Digital boundaries: Professional limits governing online contact, social media, and technology-mediated relationships. / AI use transparency: Clear disclosure and oversight when artificial intelligence tools materially affect clinical work or client information. [Concept: Digital boundaries and AI use transparency]

0947. B - Digital boundaries: Professional limits governing online contact, social media, and technology-mediated relationships. / Data minimization: Collecting and retaining only the personal information necessary for a defined legitimate purpose. [Concept: Digital boundaries and Data minimization]

0948. D - Telehealth informed consent: Reviewing privacy, technology limitations, emergency procedures, and alternatives before remote care. / Cybersecurity hygiene: Using access controls and keeping approved systems updated. [Concept: Telehealth informed consent and Cybersecurity hygiene]

0949. D - AI use transparency [Concept: AI use transparency]

0950. A - Data minimization: Avoiding unnecessary data capture and retaining only what policy and law require. / AI use transparency: Checking policy, privacy, and professional guidance and informing clients as appropriate before using an AI-enabled tool. [Concept: Data minimization and AI use transparency]

0951. B - Telehealth informed consent: Reviewing privacy, technology limitations, emergency procedures, and alternatives before remote care. / Digital boundaries: Clarifying approved communication channels and response times with families. [Concept: Telehealth informed consent and Digital boundaries]

0952. D - Telehealth emergency planning: Advance procedures for responding to an urgent event during remote care, including location and contacts. / AI use transparency: Clear disclosure and oversight when artificial intelligence tools materially affect clinical work or client information. [Concept: Telehealth emergency planning and AI use transparency]

0953. B - Telehealth emergency planning [Concept: Telehealth emergency planning]

0954. C - Technology access equity [Concept: Technology access equity]

0955. D - Digital confidentiality: Protection of sensitive information across devices, networks, platforms, and communications. / Technology access equity: Attention to unequal access to devices, bandwidth, private space, and digital skills. CAC.927 | Collaborative Practices with Schools and Communities

QUESTION | CORRECT OPTION AND CONCEPT

0001. D - Interprofessional collaboration: Coordinated work among professionals who contribute distinct expertise toward shared client goals. / Consent-based information sharing: Exchange of relevant information under valid permission and applicable privacy requirements. [Concept: Interprofessional collaboration and Consent-based information sharing]

0002. D - Outcome feedback loop [Concept: Outcome feedback loop]

0003. A - Shared care plan [Concept: Shared care plan]

0004. B - Warm referral: Helping the family make contact with a community service and checking whether connection occurred. / Community-based participatory practice: Involving youth and community partners in decisions throughout a project, not only at launch. [Concept: Warm referral and Community-based participatory practice]

0005. B - Consent-based information sharing [Concept: Consent-based information sharing]

0006. D - Community-based participatory practice [Concept: Community-based participatory practice]

0007. B - Agreeing on a measurable concern, trying one support, and reconvening to evaluate it. [Concept: Collaborative problem solving]

0008. B - Interprofessional collaboration: Agreeing on roles and communication with school and community partners, subject to permission. / Shared care plan: Documenting who will take each agreed next step and when progress will be reviewed. [Concept: Interprofessional collaboration and Shared care plan]

0009. B - Community asset mapping: Identification of local strengths, organizations, relationships, and resources relevant to community goals. / Consent-based information sharing: Exchange of relevant information under valid permission and applicable privacy requirements. [Concept: Community asset mapping and Consent-based information sharing]

0010. B - Interprofessional collaboration: Coordinated work among professionals who contribute distinct expertise toward shared client goals. / Community asset mapping: Identification of local strengths, organizations, relationships, and resources relevant to community goals. [Concept: Interprofessional collaboration and Community asset mapping]

0011. B - Collaborative problem solving [Concept: Collaborative problem solving]

0012. A - Community-based participatory practice [Concept: Community-based participatory practice]

0013. A - Warm referral: Helping the family make contact with a community service and checking whether connection occurred. / Outcome feedback loop: Reviewing attendance or wellbeing data together and adjusting supports with permission. [Concept: Warm referral and Outcome feedback loop]

0014. C - Translating needs across systems without taking over another partner's responsibilities. [Concept: Boundary spanning]

0015. C - Interprofessional collaboration: Agreeing on roles and communication with school and community partners, subject to permission. / Warm referral: Helping the family make contact with a community service and checking whether connection occurred. [Concept: Interprofessional collaboration and Warm referral]

0016. C - Warm referral: Helping the family make contact with a community service and checking whether connection occurred. / Boundary spanning: Translating needs across systems without taking over another partner's responsibilities. [Concept: Warm referral and Boundary spanning]

0017. D - Role clarification [Concept: Role clarification]

0018. D - Community asset mapping [Concept: Community asset mapping]

0019. A - Shared care plan: Documenting who will take each agreed next step and when progress will be reviewed. / Community asset mapping: Mapping existing youth programs and trusted community networks before planning a new service. [Concept: Shared care plan and Community asset mapping]

0020. A - Shared care plan: A coordinated, mutually understood set of goals, responsibilities, and follow-up steps across helpers. / Role clarification: Explicit agreement about each partner's responsibilities, authority, and limits. [Concept: Shared care plan and Role clarification]

0021. C - Role clarification [Concept: Role clarification]

0022. B - Boundary spanning [Concept: Boundary spanning]

0023. D - Interprofessional collaboration: Agreeing on roles and communication with school and community partners, subject to permission. / Shared care plan: Documenting who will take each agreed next step and when progress will be reviewed. [Concept: Interprofessional collaboration and Shared care plan]

0024. B - Warm referral [Concept: Warm referral]

0025. A - An active, supported connection from one service to another that reduces barriers to follow-through. [Concept: Warm referral]

0026. B - Consent-based information sharing: Confirming authorization and sharing only information needed for coordinated support. / Boundary spanning: Translating needs across systems without taking over another partner's responsibilities. [Concept: Consent-based information sharing and Boundary spanning]

0027. A - Interprofessional collaboration [Concept: Interprofessional collaboration]

0028. D - Consent-based information sharing [Concept: Consent-based information sharing]

0029. B - Warm referral [Concept: Warm referral]

0030. A - Shared care plan: Documenting who will take each agreed next step and when progress will be reviewed. / Outcome feedback loop: Reviewing attendance or wellbeing data together and adjusting supports with permission. [Concept: Shared care plan and Outcome feedback loop]

0031. B - Helping the family make contact with a community service and checking whether connection occurred. [Concept: Warm referral]

0032. D - Interprofessional collaboration: Agreeing on roles and communication with school and community partners, subject to permission. / Community-based participatory practice: Involving youth and community partners in decisions throughout a project, not only at launch. [Concept: Interprofessional collaboration and Community-based participatory practice]

0033. C - Warm referral [Concept: Warm referral]

0034. D - Shared care plan: Documenting who will take each agreed next step and when progress will be reviewed. / Community asset mapping: Mapping existing youth programs and trusted community networks before planning a new service. [Concept: Shared care plan and Community asset mapping]

0035. B - Collaborative problem solving: Agreeing on a measurable concern, trying one support, and reconvening to evaluate it. / Boundary spanning: Translating needs across systems without taking over another partner's responsibilities. [Concept: Collaborative problem solving and Boundary spanning]

0036. C - Interprofessional collaboration: Coordinated work among professionals who contribute distinct expertise toward shared client goals. / Outcome feedback loop: Regular use of shared outcome information to adapt coordinated services. [Concept: Interprofessional collaboration and Outcome feedback loop]

0037. D - Role clarification [Concept: Role clarification]

0038. A - Role clarification: Explicit agreement about each partner's responsibilities, authority, and limits. / Community-based participatory practice: A partnership in which community members share influence in defining questions, actions, and interpretation. [Concept: Role clarification and Community-based participatory practice]

0039. B - Warm referral: An active, supported connection from one service to another that reduces barriers to follow-through. / Community-based participatory practice: A partnership in which community members share influence in defining questions, actions, and interpretation. [Concept: Warm referral and Community-based participatory practice]

0040. B - Community asset mapping [Concept: Community asset mapping]

0041. B - Role clarification [Concept: Role clarification]

0042. A - Shared care plan [Concept: Shared care plan]

0043. B - Boundary spanning: Connecting organizations or professional groups while respecting each role's authority and accountability. / Outcome feedback loop: Regular use of shared outcome information to adapt coordinated services. [Concept: Boundary spanning and Outcome feedback loop]

0044. B - Shared care plan: Documenting who will take each agreed next step and when progress will be reviewed. / Boundary spanning: Translating needs across systems without taking over another partner's responsibilities. [Concept: Shared care plan and Boundary spanning]

0045. D - Identification of local strengths, organizations, relationships, and resources relevant to community goals. [Concept: Community asset mapping]

0046. 0118. A - Shared care plan [Concept: Shared care plan]

0119. C - Community-based participatory practice: Involving youth and community partners in decisions throughout a project, not only at launch. / Boundary spanning: Translating needs across systems without taking over another partner's responsibilities. [Concept: Community-based participatory practice and Boundary spanning]

0120. B - Collaborative problem solving: Agreeing on a measurable concern, trying one support, and reconvening to evaluate it. / Outcome feedback loop: Reviewing attendance or wellbeing data together and adjusting supports with permission. [Concept: Collaborative problem solving and Outcome feedback loop]

0121. B - Shared care plan [Concept: Shared care plan]

0122. C - Warm referral: An active, supported connection from one service to another that reduces barriers to follow-through. / Boundary spanning: Connecting organizations or professional groups while respecting each role's authority and accountability. [Concept: Warm referral and Boundary spanning]

0123. B - Shared care plan: Documenting who will take each agreed next step and when progress will be reviewed. / Warm referral: Helping the family make contact with a community service and checking whether connection occurred. [Concept: Shared care plan and Warm referral]

0124. D - Warm referral [Concept: Warm referral]

0125. B - Warm referral [Concept: Warm referral]

0126. C - Role clarification [Concept: Role clarification]

0127. B - Consent-based information sharing: Confirming authorization and sharing only information needed for coordinated support. / Boundary spanning: Translating needs across systems without taking over another partner's responsibilities. [Concept: Consent-based information sharing and Boundary spanning]

0128. D - Shared care plan: A coordinated, mutually understood set of goals, responsibilities, and follow-up steps across helpers. / Outcome feedback loop: Regular use of shared outcome information to adapt coordinated services. [Concept: Shared care plan and Outcome feedback loop]

0129. C - Consent-based information sharing: Confirming authorization and sharing only information needed for coordinated support. / Warm referral: Helping the family make contact with a community service and checking whether connection occurred. [Concept: Consent-based information sharing and Warm referral]

0130. D - Consent-based information sharing [Concept: Consent-based information sharing]

0131. C - Boundary spanning: Translating needs across systems without taking over another partner's responsibilities. / Outcome feedback loop: Reviewing attendance or wellbeing data together and adjusting supports with permission. [Concept: Boundary spanning and Outcome feedback loop]

0132. D - Consent-based information sharing [Concept: Consent-based information sharing]

0133. B - Interprofessional collaboration: Coordinated work among professionals who contribute distinct expertise toward shared client goals. / Community-based participatory practice: A partnership in which community members share influence in defining questions, actions, and interpretation. [Concept: Interprofessional collaboration and Community-based participatory practice]

0134. A - Consent-based information sharing: Confirming authorization and sharing only information needed for coordinated support. / Community-based participatory practice: Involving youth and community partners in decisions throughout a project, not only at launch. [Concept: Consent-based information sharing and Community-based participatory practice]

0135. B - Collaborative problem solving: A structured process in which partners define a concern, generate options, test a plan, and review outcomes. / Warm referral: An active, supported connection from one service to another that reduces barriers to follow-through. [Concept: Collaborative problem solving and Warm referral]

0136. C - Shared care plan: Documenting who will take each agreed next step and when progress will be reviewed. / Role clarification: Clarifying who contacts caregivers and who monitors a school support. [Concept: Shared care plan and Role clarification]

0137. D - Community asset mapping [Concept: Community asset mapping]

0138. D - Regular use of shared outcome information to adapt coordinated services. [Concept: Outcome feedback loop]

0139. B - Consent-based information sharing [Concept: Consent-based information sharing]

0140. C - Community asset mapping: Mapping existing youth programs and trusted community networks before planning a new service. / Outcome feedback loop: Reviewing attendance or wellbeing data together and adjusting supports with permission. [Concept: Community asset mapping and Outcome feedback loop]

0141. D - Community asset mapping [Concept: Community asset mapping]

0142. C - A structured process in which partners define a concern, generate options, test a plan, and review outcomes. [Concept: Collaborative problem solving]

0143. C - Role clarification: Explicit agreement about each partner's responsibilities, authority, and limits. / Outcome feedback loop: Regular use of shared outcome information to adapt coordinated services. [Concept: Role clarification and Outcome feedback loop]

0144. B - Boundary spanning [Concept: Boundary spanning]

0145. D - Community-based participatory practice: Involving youth and community partners in decisions throughout a project, not only at launch. / Outcome feedback loop: Reviewing attendance or wellbeing data together and adjusting supports with permission. [Concept: Community-based participatory practice and Outcome feedback loop]

0146. B - Community asset mapping: Identification of local strengths, organizations, relationships, and resources relevant to community goals. / Role clarification: Explicit agreement about each partner's responsibilities, authority, and limits. [Concept: Community asset mapping and Role clarification]

0147. D - Community asset mapping: Identification of local strengths, organizations, relationships, and resources relevant to community goals. / Collaborative problem solving: A structured process in which partners define a concern, generate options, test a plan, and review outcomes. [Concept: Community asset mapping and Collaborative problem solving]

0148. A - Connecting organizations or professional groups while respecting each role's authority and accountability. [Concept: Boundary spanning]

0149. B - Consent-based information sharing: Exchange of relevant information under valid permission and applicable privacy requirements. / Community-based participatory practice: A partnership in which community members share influence in defining questions, actions, and interpretation. [Concept: Consent-based information sharing and Community-based participatory practice]

0150. C - Role clarification: Explicit agreement about each partner's responsibilities, authority, and limits. / Boundary spanning: Connecting organizations or professional groups while respecting each role's authority and accountability. [Concept: Role clarification and Boundary spanning]

0151. D - Role clarification: Clarifying who contacts caregivers and who monitors a school support. / Warm referral: Helping the family make contact with a community service and checking whether connection occurred. [Concept: Role clarification and Warm referral]

0152. D - Shared care plan: Documenting who will take each agreed next step and when progress will be reviewed. / Collaborative problem solving: Agreeing on a measurable concern, trying one support, and reconvening to evaluate it. [Concept: Shared care plan and Collaborative problem solving]

0153. D - Community asset mapping: Identification of local strengths, organizations, relationships, and resources relevant to community goals. / Boundary spanning: Connecting organizations or professional groups while respecting each role's authority and accountability. [Concept: Community asset mapping and Boundary spanning]

0154. B - Collaborative problem solving: Agreeing on a measurable concern, trying one support, and reconvening to evaluate it. / Warm referral: Helping the family make contact with a community service and checking whether connection occurred. [Concept: Collaborative problem solving and Warm referral]

0155. A - Community-based participatory practice: A partnership in which community members share influence in defining questions, actions, and interpretation. / Outcome feedback loop: Regular use of shared outcome information to adapt coordinated services. [Concept: Community-based participatory practice and Outcome feedback loop]

0156. A - Boundary spanning [Concept: Boundary spanning]

0509. B - Confirming authorization and sharing only information needed for coordinated support. [Concept: Consent-based information sharing]

0510. C - A partnership in which community members share influence in defining questions, actions, and interpretation. [Concept: Community-based participatory practice]

0511. B - Warm referral [Concept: Warm referral]

0512. B - Warm referral [Concept: Warm referral]

0513. B - Shared care plan [Concept: Shared care plan]

0514. C - Role clarification [Concept: Role clarification]

0515. D - Outcome feedback loop [Concept: Outcome feedback loop]

0516. B - Role clarification: Explicit agreement about each partner's responsibilities, authority, and limits. / Community-based participatory practice: A partnership in which community members share influence in defining questions, actions, and interpretation. [Concept: Role clarification and Community-based participatory practice]

0517. C - Interprofessional collaboration [Concept: Interprofessional collaboration]

0518. B - Community asset mapping: Identification of local strengths, organizations, relationships, and resources relevant to community goals. / Role clarification: Explicit agreement about each partner's responsibilities, authority, and limits. [Concept: Community asset mapping and Role clarification]

0519. D - Shared care plan: A coordinated, mutually understood set of goals, responsibilities, and follow-up steps across helpers. / Collaborative problem solving: A structured process in which partners define a concern, generate options, test a plan, and review outcomes. [Concept: Shared care plan and Collaborative problem solving]

0520. B - Collaborative problem solving [Concept: Collaborative problem solving]

0521. D - Consent-based information sharing: Exchange of relevant information under valid permission and applicable privacy requirements. / Collaborative problem solving: A structured process in which partners define a concern, generate options, test a plan, and review outcomes. [Concept: Consent-based information sharing and Collaborative problem solving]

0522. D - Community asset mapping [Concept: Community asset mapping]

0523. D - Consent-based information sharing: Exchange of relevant information under valid permission and applicable privacy requirements. / Boundary spanning: Connecting organizations or professional groups while respecting each role's authority and accountability. [Concept: Consent-based information sharing and Boundary spanning]

0524. B - Shared care plan [Concept: Shared care plan]

0525. A - Role clarification: Clarifying who contacts caregivers and who monitors a school support. / Outcome feedback loop: Reviewing attendance or wellbeing data together and adjusting supports with permission. [Concept: Role clarification and Outcome feedback loop]

0526. A - Community-based participatory practice [Concept: Community-based participatory practice]

0527. C - Involving youth and community partners in decisions throughout a project, not only at launch. [Concept: Community-based participatory practice]

0528. B - Boundary spanning [Concept: Boundary spanning]

0529. C - Warm referral [Concept: Warm referral]

0530. B - Regular use of shared outcome information to adapt coordinated services. [Concept: Outcome feedback loop]

0531. B - Interprofessional collaboration [Concept: Interprofessional collaboration]

0532. C - Consent-based information sharing: Confirming authorization and sharing only information needed for coordinated support. / Boundary spanning: Translating needs across systems without taking over another partner's responsibilities. [Concept: Consent-based information sharing and Boundary spanning]

0533. B - Community asset mapping: Identification of local strengths, organizations, relationships, and resources relevant to community goals. / Role clarification: Explicit agreement about each partner's responsibilities, authority, and limits. [Concept: Community asset mapping and Role clarification]

0534. B - Role clarification: Clarifying who contacts caregivers and who monitors a school support. / Outcome feedback loop: Reviewing attendance or wellbeing data together and adjusting supports with permission. [Concept: Role clarification and Outcome feedback loop]

0535. D - Connecting organizations or professional groups while respecting each role's authority and accountability. [Concept: Boundary spanning]

0536. A - Shared care plan: A coordinated, mutually understood set of goals, responsibilities, and follow-up steps across helpers. / Outcome feedback loop: Regular use of shared outcome information to adapt coordinated services. [Concept: Shared care plan and Outcome feedback loop]

0537. C - Outcome feedback loop [Concept: Outcome feedback loop]

0538. C - Coordinated work among professionals who contribute distinct expertise toward shared client goals. [Concept: Interprofessional collaboration]

0539. C - Consent-based information sharing: Exchange of relevant information under valid permission and applicable privacy requirements. / Boundary spanning: Connecting organizations or professional groups while respecting each role's authority and accountability. [Concept: Consent-based information sharing and Boundary spanning]

0540. B - Consent-based information sharing: Confirming authorization and sharing only information needed for coordinated support. / Outcome feedback loop: Reviewing attendance or wellbeing data together and adjusting supports with permission. [Concept: Consent-based information sharing and Outcome feedback loop]

0541. A - Collaborative problem solving: A structured process in which partners define a concern, generate options, test a plan, and review outcomes. / Outcome feedback loop: Regular use of shared outcome information to adapt coordinated services. [Concept: Collaborative problem solving and Outcome feedback loop]

0542. A - Community asset mapping: Mapping existing youth programs and trusted community networks before planning a new service. / Collaborative problem solving: Agreeing on a measurable concern, trying one support, and reconvening to evaluate it. [Concept: Community asset mapping and Collaborative problem solving]

0543. D - Agreeing on roles and communication with school and community partners, subject to permission. [Concept: Interprofessional collaboration]

0544. D - Collaborative problem solving: Agreeing on a measurable concern, trying one support, and reconvening to evaluate it. / Boundary spanning: Translating needs across systems without taking over another partner's responsibilities. [Concept: Collaborative problem solving and Boundary spanning]

0545. D - Boundary spanning [Concept: Boundary spanning]

0546. B - Role clarification [Concept: Role clarification]

0547. A - Community-based participatory practice [Concept: Community-based participatory practice]

0548. B - Warm referral: Helping the family make contact with a community service and checking whether connection occurred. / Outcome feedback loop: Reviewing attendance or wellbeing data together and adjusting supports with permission. [Concept: Warm referral and Outcome feedback loop]

0549. C - Role clarification [Concept: Role clarification]

0550. D - Warm referral: An active, supported connection from one service to another that reduces barriers to follow-through. / Boundary spanning: Connecting organizations or professional groups while respecting each role's authority and accountability. [Concept: Warm referral and Boundary spanning]

0551. A - Consent-based information sharing: Exchange of relevant information under valid permission and applicable privacy requirements. / Collaborative problem solving: A structured process in which partners define a concern, generate options, test a plan, and review outcomes. [Concept: Consent-based information sharing and Collaborative problem solving]

0552. D - Consent-based information sharing [Concept: Consent-based information sharing]

0553. D - Warm referral: An active, supported connection from one service to another that reduces barriers to follow-through. / Outcome feedback loop: Regular use of shared outcome information to adapt coordinated services. [Concept: Warm referral and Outcome feedback loop]

0554. B - Collaborative problem solving: A structured process in which partners define a concern, generate options, test a plan, and review outcomes. / Warm referral: An active, supported connection from one service to another that reduces barriers to follow-through. [Concept: Collaborative problem solving and Warm referral]

0555. B - Interprofessional collaboration: Agreeing on roles and communication with school and community partners, subject to permission. / Outcome feedback loop: Reviewing attendance or wellbeing data together and adjusting supports with permission. [Concept: Interprofessional collaboration and Outcome feedback loop]

0556. C - Community-based participatory practice [Concept: Community-based participatory practice]

0557. B - Community-based participatory practice [Concept: Community-based participatory practice]

CAC.928 | Advanced Techniques in Family Therapy

QUESTION | CORRECT OPTION AND CONCEPT

0001. D - Circular questioning: Questions that explore differences in perceptions and reciprocal interaction among family members. / Joining: A therapist's process of building rapport and adapting to a family's communication style while maintaining clinical purpose. [Concept: Circular questioning and Joining]

0002. B - Enactment: Asking family members to discuss a current issue directly while the therapist observes interaction. / Circular questioning: Asking one person how another reacts when a third person withdraws. [Concept: Enactment and Circular questioning]

0003. B - Reframing: Offering an alternative meaning for a behavior or interaction to support a less blaming and more useful understanding. / Exception seeking: Identifying times a problem is absent or less influential to discover resources and conditions for change. [Concept: Reframing and Exception seeking]

0004. B - Exception seeking [Concept: Exception seeking]

0005. D - Circular questioning: Questions that explore differences in perceptions and reciprocal interaction among family members. / Systemic hypothesis: A tentative explanation linking a concern to interactional patterns, to be collaboratively tested and revised. [Concept: Circular questioning and Systemic hypothesis]

0006. C - Therapeutic interventions intended to alter interaction patterns, boundaries, or family organization. [Concept: Restructuring]

0007. A - Reframing [Concept: Reframing]

0008. D - Reframing: Describing a behavior's possible protective intent while still addressing its impact. / Family sculpting: Inviting voluntary spatial representation of closeness or distance and processing members' meanings. [Concept: Reframing and Family sculpting]

0009. D - A tentative explanation linking a concern to interactional patterns, to be collaboratively tested and revised. [Concept: Systemic hypothesis]

0010. B - Asking family members to discuss a current issue directly while the therapist observes interaction. [Concept: Enactment]

0011. C - Enactment [Concept: Enactment]

0012. D - Enactment [Concept: Enactment]

0013. D - Restructuring [Concept: Restructuring]

0014. B - A structural family therapy technique inviting family members to interact in session so patterns can be observed. [Concept: Enactment]

0015. A - Restructuring [Concept: Restructuring]

0016. D - De-triangulation [Concept: De-triangulation]

0017. C - Family sculpting [Concept: Family sculpting]

0018. A - Exception seeking: Asking when the family concern is less intense and what is different at those times. / Family sculpting: Inviting voluntary spatial representation of closeness or distance and processing members' meanings. [Concept: Exception seeking and Family sculpting]

0019. A - Enactment: Asking family members to discuss a current issue directly while the therapist observes interaction. / Restructuring: Supporting a caregiver subsystem to take a clearer leadership role during a family interaction. [Concept: Enactment and Restructuring]

0020. C - Restructuring: Therapeutic interventions intended to alter interaction patterns, boundaries, or family organization. / Systemic hypothesis: A tentative explanation linking a concern to interactional patterns, to be collaboratively tested and revised. [Concept: Restructuring and Systemic hypothesis]

0021. C - Circular questioning [Concept: Circular questioning]

0022. C - Reframing [Concept: Reframing]

0023. B - Restructuring: Supporting a caregiver subsystem to take a clearer leadership role during a family interaction. / Systemic hypothesis: Offering a provisional relational hypothesis and checking whether family members find it useful. [Concept: Restructuring and Systemic hypothesis]

0024. C - Circular questioning: Asking one person how another reacts when a third person withdraws. / Family sculpting: Inviting voluntary spatial representation of closeness or distance and processing members' meanings. [Concept: Circular questioning and Family sculpting]

0025. B - Enactment: A structural family therapy technique inviting family members to interact in session so patterns can be observed. / Exception seeking: Identifying times a problem is absent or less influential to discover resources and conditions for change. [Concept: Enactment and Exception seeking]

0026. A - Reframing: Describing a behavior's possible protective intent while still addressing its impact. / Exception seeking: Asking when the family concern is less intense and what is different at those times. [Concept: Reframing and Exception seeking]

0027. D - Enactment [Concept: Enactment]

0028. D - Enactment: Asking family members to discuss a current issue directly while the therapist observes interaction. / Restructuring: Supporting a caregiver subsystem to take a clearer leadership role during a family interaction. [Concept: Enactment and Restructuring]

0029. D - Restructuring: Therapeutic interventions intended to alter interaction patterns, boundaries, or family organization. / Family sculpting: An experiential technique in which members arrange positions or posture to represent relational experience. [Concept: Restructuring and Family sculpting]

0030. C - Joining: Respectfully matching a family's pace and language to build a working alliance. / De-triangulation: Helping caregivers address their disagreement directly rather than recruiting the child as messenger. [Concept: Joining and De-triangulation]

0031. D - Enactment: A structural family therapy technique inviting family members to interact in session so patterns can be observed. / Restructuring: Therapeutic interventions intended to alter interaction patterns, boundaries, or family organization. [Concept: Enactment and Restructuring]

0032. B - De-triangulation [Concept: De-triangulation]

0033. B - Circular questioning: Asking one person how another reacts when a third person withdraws. / Exception seeking: Asking when the family concern is less intense and what is different at those times. [Concept: Circular questioning and Exception seeking]

0034. B - Circular questioning: Asking one person how another reacts when a third person withdraws. / Family sculpting: Inviting voluntary spatial representation of closeness or distance and processing members' meanings. [Concept: Circular questioning and Family sculpting]

0035. C - Restructuring [Concept: Restructuring]

0036. B - De-triangulation [Concept: De-triangulation]

0037. D - Enactment: Asking family members to discuss a current issue directly while the therapist observes interaction. / Joining: Respectfully matching a family's pace and language to build a working alliance. [Concept: Enactment and Joining]

0038. C - Enactment [Concept: Enactment]

0039. A - Family sculpting [Concept: Family sculpting]

0040. B - A structural family therapy technique inviting family members to interact in session so patterns can be observed. [Concept: Enactment]

0041. D - Joining: A therapist's process of building rapport and adapting to a family's communication style while maintaining clinical purpose. / Family sculpting: An experiential technique in which members arrange positions or posture to represent relational experience. [Concept: Joining and Family sculpting]

0042. B - Reframing [Concept: Reframing]

0043. A - A diagram of family relationships and patterns across generations. [Concept: Genogram]

0044. D - Family sculpting [Concept: Family sculpting]

0045. A - Family sculpting: An experiential technique in which members arrange positions or posture to represent relational experience. / Systemic hypothesis: A tentative explanation linking a concern to interactional patterns, to be collaboratively tested and revised. [Concept: Family sculpting and Systemic hypothesis]

0046. B - Genogram [Concept: Genogram]

0047. B - Enactment [Concept: Enactment]

0048. D - Systemic hypothesis [Concept: Systemic hypothesis]

0049. B - Exception seeking [Concept: Exception seeking]

A - Circular questioning: Questions that explore differences in perceptions and reciprocal interaction among family members. / Restructuring: Therapeutic interventions intended to alter interaction patterns, boundaries, or family organization. [Concept: Circular questioning and Restructuring]

0323. B - Circular questioning: Asking one person how another reacts when a third person withdraws. / De-triangulation: Helping caregivers address their disagreement directly rather than recruiting the child as messenger. [Concept: Circular questioning and De-triangulation]

0324. D - Enactment: Asking family members to discuss a current issue directly while the therapist observes interaction. / Genogram: Mapping relationships and recurring patterns across multiple generations. [Concept: Enactment and Genogram]

0325. C - Exception seeking: Asking when the family concern is less intense and what is different at those times. / Systemic hypothesis: Offering a provisional relational hypothesis and checking whether family members find it useful. [Concept: Exception seeking and Systemic hypothesis]

0326. C - Reframing: Offering an alternative meaning for a behavior or interaction to support a less blaming and more useful understanding. / Systemic hypothesis: A tentative explanation linking a concern to interactional patterns, to be collaboratively tested and revised. [Concept: Reframing and Systemic hypothesis]

0327. C - De-triangulation: Helping caregivers address their disagreement directly rather than recruiting the child as messenger. / Systemic hypothesis: Offering a provisional relational hypothesis and checking whether family members find it useful. [Concept: De-triangulation and Systemic hypothesis]

0328. D - Joining [Concept: Joining]

0329. C - Enactment: A structural family therapy technique inviting family members to interact in session so patterns can be observed. / Family sculpting: An experiential technique in which members arrange positions or posture to represent relational experience. [Concept: Enactment and Family sculpting]

0330. B - Circular questioning: Asking one person how another reacts when a third person withdraws. / Restructuring: Supporting a caregiver subsystem to take a clearer leadership role during a family interaction. [Concept: Circular questioning and Restructuring]

0331. B - Describing a behavior's possible protective intent while still addressing its impact. [Concept: Reframing]

0332. C - Enactment: A structural family therapy technique inviting family members to interact in session so patterns can be observed. / Circular questioning: Questions that explore differences in perceptions and reciprocal interaction among family members. [Concept: Enactment and Circular questioning]

0333. B - Genogram: A diagram of family relationships and patterns across generations. / Systemic hypothesis: A tentative explanation linking a concern to interactional patterns, to be collaboratively tested and revised. [Concept: Genogram and Systemic hypothesis]

0334. B - Joining [Concept: Joining]

0335. C - Enactment: Asking family members to discuss a current issue directly while the therapist observes interaction. / Joining: Respectfully matching a family's pace and language to build a working alliance. [Concept: Enactment and Joining]

0336. D - Exception seeking [Concept: Exception seeking]

0337. A - Circular questioning [Concept: Circular questioning]

0338. C - Genogram: A diagram of family relationships and patterns across generations. / Circular questioning: Questions that explore differences in perceptions and reciprocal interaction among family members. [Concept: Genogram and Circular questioning]

0339. C - Joining: A therapist's process of building rapport and adapting to a family's communication style while maintaining clinical purpose. / Systemic hypothesis: A tentative explanation linking a concern to interactional patterns, to be collaboratively tested and revised. [Concept: Joining and Systemic hypothesis]

0340. B - Systemic hypothesis [Concept: Systemic hypothesis]

0341. D - Reframing [Concept: Reframing]

0342. C - Reframing [Concept: Reframing]

0343. C - Joining [Concept: Joining]

0344. D - Family sculpting [Concept: Family sculpting]

0345. A - Systemic hypothesis [Concept: Systemic hypothesis]

0346. A - Restructuring: Therapeutic interventions intended to alter interaction patterns, boundaries, or family organization. / De-triangulation: Reducing a pattern in which a third person is drawn into tension between two others. [Concept: Restructuring and De-triangulation]

0347. A - A therapist's process of building rapport and adapting to a family's communication style while maintaining clinical purpose. [Concept: Joining]

0348. D - Reframing [Concept: Reframing]

0349. A - Genogram [Concept: Genogram]

0350. D - Exception seeking: Identifying times a problem is absent or less influential to discover resources and conditions for change. / Family sculpting: An experiential technique in which members arrange positions or posture to represent relational experience. [Concept: Exception seeking and Family sculpting]

0351. A - Exception seeking [Concept: Exception seeking]

0352. D - Enactment [Concept: Enactment]

0353. A - Exception seeking [Concept: Exception seeking]

0354. B - Joining: Respectfully matching a family's pace and language to build a working alliance. / Systemic hypothesis: Offering a provisional relational hypothesis and checking whether family members find it useful. [Concept: Joining and Systemic hypothesis]

0355. A - De-triangulation [Concept: De-triangulation]

0356. D - Family sculpting [Concept: Family sculpting]

0357. B - Joining: A therapist's process of building rapport and adapting to a family's communication style while maintaining clinical purpose. / Family sculpting: An experiential technique in which members arrange positions or posture to represent relational experience. [Concept: Joining and Family sculpting]

0358. A - Asking one person how another reacts when a third person withdraws. [Concept: Circular questioning]

0359. C - Circular questioning: Asking one person how another reacts when a third person withdraws. / Systemic hypothesis: Offering a provisional relational hypothesis and checking whether family members find it useful. [Concept: Circular questioning and Systemic hypothesis]

0360. D - Genogram: Mapping relationships and recurring patterns across multiple generations. / Joining: Respectfully matching a family's pace and language to build a working alliance. [Concept: Genogram and Joining]

0361. D - Genogram: Mapping relationships and recurring patterns across multiple generations. / Restructuring: Supporting a caregiver subsystem to take a clearer leadership role during a family interaction. [Concept: Genogram and Restructuring]

0362. D - Enactment: A structural family therapy technique inviting family members to interact in session so patterns can be observed. / Exception seeking: Identifying times a problem is absent or less influential to discover resources and conditions for change. [Concept: Enactment and Exception seeking]

0363. D - Joining [Concept: Joining]

0364. D - Exception seeking [Concept: Exception seeking]

0365. A - Family sculpting [Concept: Family sculpting]

0366. D - Reducing a pattern in which a third person is drawn into tension between two others. [Concept: De-triangulation]

0367. D - Systemic hypothesis [Concept: Systemic hypothesis]

0368. B - Offering an alternative meaning for a behavior or interaction to support a less blaming and more useful understanding. [Concept: Reframing]

0369. A - Genogram: Mapping relationships and recurring patterns across multiple generations. / Restructuring: Supporting a caregiver subsystem to take a clearer leadership role during a family interaction. [Concept: Genogram and Restructuring]

0370. A - Reframing: Offering an alternative meaning for a behavior or interaction to support a less blaming and more useful understanding. / Circular questioning: Questions that explore differences in perceptions and reciprocal interaction among family members. [Concept: Reframing and Circular questioning]

0371. B - Circular questioning: Questions that explore differences in perceptions and reciprocal interaction among family members. / Restructuring: Therapeutic interventions intended to alter interaction patterns, boundaries, or family organization. [Concept: Circular questioning and Restructuring]

CAC.928 | Advanced Techniques in Family Therapy

QUESTION | CORRECT OPTION AND CONCEPT

0372. D - Restructuring: Supporting a caregiver subsystem to take a clearer leadership role during a family interaction. / De-triangulation: Helping caregivers address their disagreement directly rather than recruiting the child as messenger. [Concept: Restructuring and De-triangulation]

0373. C - Enactment [Concept: Enactment]

0374. C - De-triangulation [Concept: De-triangulation]

[Concept: Circular questioning and Restructuring]

0547. A - Joining: Respectfully matching a family's pace and language to build a working alliance. / Family sculpting: Inviting voluntary spatial representation of closeness or distance and processing members' meanings. [Concept: Joining and Family sculpting]

0548. A - Genogram [Concept: Genogram]

0549. A - Restructuring: Supporting a caregiver subsystem to take a clearer leadership role during a family interaction. / Systemic hypothesis: Offering a provisional relational hypothesis and checking whether family members find it useful. [Concept: Restructuring and Systemic hypothesis]

0550. A - Genogram: A diagram of family relationships and patterns across generations. / Exception seeking: Identifying times a problem is absent or less influential to discover resources and conditions for change. [Concept: Genogram and Exception seeking]

0551. C - Restructuring [Concept: Restructuring]

0552. D - Exception seeking: Identifying times a problem is absent or less influential to discover resources and conditions for change. / Family sculpting: An experiential technique in which members arrange positions or posture to represent relational experience. [Concept: Exception seeking and Family sculpting]

0553. D - A therapist's process of building rapport and adapting to a family's communication style while maintaining clinical purpose. [Concept: Joining]

0554. B - Reframing: Offering an alternative meaning for a behavior or interaction to support a less blaming and more useful understanding. / De-triangulation: Reducing a pattern in which a third person is drawn into tension between two others. [Concept: Reframing and De-triangulation]

0555. A - Reframing: Describing a behavior's possible protective intent while still addressing its impact. / De-triangulation: Helping caregivers address their disagreement directly rather than recruiting the child as messenger. [Concept: Reframing and De-triangulation]

0556. A - Circular questioning [Concept: Circular questioning]

0557. D - Genogram [Concept: Genogram]

0558. C - Enactment: A structural family therapy technique inviting family members to interact in session so patterns can be observed. / Systemic hypothesis: A tentative explanation linking a concern to interactional patterns, to be collaboratively tested and revised. [Concept: Enactment and Systemic hypothesis]

0559. B - Family sculpting [Concept: Family sculpting]

0560. D - Restructuring [Concept: Restructuring]

0561. D - Reframing: Offering an alternative meaning for a behavior or interaction to support a less blaming and more useful understanding. / Systemic hypothesis: A tentative explanation linking a concern to interactional patterns, to be collaboratively tested and revised. [Concept: Reframing and Systemic hypothesis]

0562. C - Genogram: A diagram of family relationships and patterns across generations. / De-triangulation: Reducing a pattern in which a third person is drawn into tension between two others. [Concept: Genogram and De-triangulation]

0563. C - Systemic hypothesis [Concept: Systemic hypothesis]

0564. D - Genogram [Concept: Genogram]

0565. A - Circular questioning [Concept: Circular questioning]

0955. B - Circular questioning [Concept: Circular questioning]

0956. A - Reframing: Offering an alternative meaning for a behavior or interaction to support a less blaming and more useful understanding. / Restructuring: Therapeutic interventions intended to alter interaction patterns, boundaries, or family organization. [Concept: Reframing and Restructuring]

0957. C - Genogram: A diagram of family relationships and patterns across generations. / Circular questioning: Questions that explore differences in perceptions and reciprocal interaction among family members. [Concept: Genogram and Circular questioning]

0958. C - Genogram [Concept: Genogram]

0959. B - Joining: A therapist's process of building rapport and adapting to a family's communication style while maintaining clinical purpose. / De-triangulation: Reducing a pattern in which a third person is drawn into tension between two others. [Concept: Joining and De-triangulation]

0960. D - Joining [Concept: Joining]

0961. D - An experiential technique in which members arrange positions or posture to represent relational experience. [Concept: Family sculpting]

0962. A - Enactment: Asking family members to discuss a current issue directly while the therapist observes interaction. / Reframing: Describing a behavior's possible protective intent while still addressing its impact. [Concept: Enactment and Reframing]

0963. B - Systemic hypothesis [Concept: Systemic hypothesis]

0964. C - An experiential technique in which members arrange positions or posture to represent relational experience. [Concept: Family sculpting]

0965. C - Circular questioning [Concept: Circular questioning]

0966. D - Enactment [Concept: Enactment]

0967. B - Genogram: A diagram of family relationships and patterns across generations. / Systemic hypothesis: A tentative explanation linking a concern to interactional patterns, to be collaboratively tested and revised. [Concept: Genogram and Systemic hypothesis]

0968. B - Exception seeking: Identifying times a problem is absent or less influential to discover resources and conditions for change. / Systemic hypothesis: A tentative explanation linking a concern to interactional patterns, to be collaboratively tested and revised. [Concept: Exception seeking and Systemic hypothesis]

0969. C - Restructuring: Therapeutic interventions intended to alter interaction patterns, boundaries, or family organization. / Systemic hypothesis: A tentative explanation linking a concern to interactional patterns, to be collaboratively tested and revised. [Concept: Restructuring and Systemic hypothesis]

0970. C - Offering an alternative meaning for a behavior or interaction to support a less blaming and more useful understanding. [Concept: Reframing]

0971. D - Family sculpting [Concept: Family sculpting]

0972. C - Genogram [Concept: Genogram]

0973. D - A diagram of family relationships and patterns across generations. [Concept: Genogram]

0974. C - Circular questioning [Concept: Circular questioning]

0975. D - Reframing: Offering an alternative meaning for a behavior or interaction to support a less blaming and more useful understanding. / Systemic hypothesis: A tentative explanation linking a concern to interactional patterns, to be collaboratively tested and revised. [Concept: Reframing and Systemic hypothesis]

0976. A - Circular questioning [Concept: Circular questioning]

0977. A - Restructuring [Concept: Restructuring]

0978. A - Restructuring [Concept: Restructuring]

0979. C - Circular questioning [Concept: Circular questioning]

CAC.928 | Advanced Techniques in Family Therapy

QUESTION | CORRECT OPTION AND CONCEPT

0980. D - Exception seeking: Asking when the family concern is less intense and what is different at those times. / Family sculpting: Inviting voluntary spatial representation of closeness or distance and processing members' meanings. [Concept: Exception seeking and Family sculpting]

0981. B - Family sculpting [Concept: Family sculpting]

0982. D - Reframing [Concept: Reframing]

0983. B - Systemic hypothesis [Concept: Systemic hypothesis]

0984. C - Family sculpting [Concept: Family sculpting]

0985. C - Enactment [Concept: Enactment]

0986. A - Family sculpting [Concept: Family sculpting]

0987. C - Genogram: A diagram of family relationships and patterns across generations. / De-triangulation: Reducing a pattern in which a third person is drawn into tension between two others. [Concept: Genogram and De-triangulation]

0988. C - Joining: Respectfully matching a family's pace and language to build a working alliance. / Systemic hypothesis: Offering a provisional relational hypothesis and checking whether family members find it useful. [Concept: Joining and Systemic hypothesis]

0989. C - Genogram [Concept: Genogram]

0990. D - De-triangulation [Concept: De-triangulation]

0991. B - De-triangulation: Helping caregivers address their disagreement directly rather than recruiting the child as messenger. / Systemic hypothesis: Offering a provisional relational hypothesis and checking whether family members find it useful. [Concept: De-triangulation and Systemic hypothesis]

0992. A - Genogram [Concept: Genogram]

0993. D - Enactment [Concept: Enactment]

0994. D - Restructuring: Supporting a caregiver subsystem to take a clearer leadership role during a family interaction. / Systemic hypothesis: Offering a provisional relational hypothesis and checking whether family members find it useful. [Concept: Restructuring and Systemic hypothesis]

0995. A - Restructuring: Therapeutic interventions intended to alter interaction patterns, boundaries, or family organization. / De-triangulation: Reducing a pattern in which a third person is drawn into tension between two others. [Concept: Restructuring and De-triangulation]

0996. B - Exception seeking [Concept: Exception seeking]

0997. D - Mapping relationships and recurring patterns across multiple generations. [Concept: Genogram]

0998. C - Genogram: A diagram of family relationships and patterns across generations. / Exception seeking: Identifying times a problem is absent or less influential to discover resources and conditions for change. [Concept: Genogram and Exception seeking]

0999. D - De-triangulation: Reducing a pattern in which a third person is drawn into tension between two others. / Systemic hypothesis: A tentative explanation linking a concern to interactional patterns, to be collaboratively tested and revised. [Concept: De-triangulation and Systemic hypothesis]

1000. D - Genogram: A diagram of family relationships and patterns across generations. / Systemic hypothesis: A tentative explanation linking a concern to interactional patterns, to be collaboratively tested and revised. [Concept: Genogram and Systemic hypothesis]

CAC.929 | Clinical Supervision and Consultation

QUESTION | CORRECT OPTION AND CONCEPT

0001. C - Formative supervision: Supervision focused on developing supervisee knowledge, skills, and clinical judgment. / Reflective practice: Systematic examination of one's decisions, assumptions, emotions, and effects on practice. [Concept: Formative supervision and Reflective practice]

0002. C - Reflective practice [Concept: Reflective practice]

0003. B - Gatekeeping: Documenting concerns, providing remediation, and taking protective action when competence is insufficient. / Cultural responsiveness in supervision: Inviting discussion of cultural assumptions and power dynamics affecting supervision or client care. [Concept: Gatekeeping and Cultural responsiveness in supervision]

0004. B - Reflective practice [Concept: Reflective practice]

0005. C - Supervisory alliance [Concept: Supervisory alliance]

0006. B - Formative supervision: Supervision focused on developing supervisee knowledge, skills, and clinical judgment. / Gatekeeping: The supervisor's responsibility to assess competence and address impairment to protect clients and the profession. [Concept: Formative supervision and Gatekeeping]

0007. A - Setting learning goals and providing feedback on observed counseling skills. [Concept: Formative supervision]

0008. A - Gatekeeping: Documenting concerns, providing remediation, and taking protective action when competence is insufficient. / Cultural responsiveness in supervision: Inviting discussion of cultural assumptions and power dynamics affecting supervision or client care. [Concept: Gatekeeping and Cultural responsiveness in supervision]

0009. D - Formative supervision [Concept: Formative supervision]

0010. C - Supervision that supports supervisee wellbeing and sustainable professional functioning. [Concept: Restorative supervision]

0011. B - Cultural responsiveness in supervision [Concept: Cultural responsiveness in supervision]

0012. D - Supervisory alliance: Checking agreement about supervision goals and whether feedback feels usable. / Feedback specificity: Describing an observed skill and one practice step rather than giving a global judgment. [Concept: Supervisory alliance and Feedback specificity]

0013. D - Formative supervision: Setting learning goals and providing feedback on observed counseling skills. / Informed supervision consent: Explaining supervision and protecting client identity when discussing cases. [Concept: Formative supervision and Informed supervision consent]

0014. D - Supervision focused on developing supervisee knowledge, skills, and clinical judgment. [Concept: Formative supervision]

0015. D - Restorative supervision [Concept: Restorative supervision]

0016. D - Supervisory alliance: Checking agreement about supervision goals and whether feedback feels usable. / Consultation: Providing a teacher with options while leaving implementation decisions within agreed roles. [Concept: Supervisory alliance and Consultation]

0017. B - Cultural responsiveness in supervision [Concept: Cultural responsiveness in supervision]

0018. A - Reflective practice: Systematic examination of one's decisions, assumptions, emotions, and effects on practice. / Informed supervision consent: Clear explanation to clients about supervision's role, confidentiality, and possible review of case material. [Concept: Reflective practice and Informed supervision consent]

0019. A - Normative supervision: Reviewing documentation, boundaries, and risk procedures to safeguard clients. / Reflective practice: Reviewing a difficult session and considering how the counselor's reactions shaped it. [Concept: Normative supervision and Reflective practice]

0020. B - Reflective practice [Concept: Reflective practice]

0021. B - Informed supervision consent [Concept: Informed supervision consent]

0022. C - Formative supervision: Setting learning goals and providing feedback on observed counseling skills. / Normative supervision: Reviewing documentation, boundaries, and risk procedures to safeguard clients. [Concept: Formative supervision and Normative supervision]

0023. B - Formative supervision [Concept: Formative supervision]

0024. B - Formative supervision: Supervision focused on developing supervisee knowledge, skills, and clinical judgment. / Supervisory alliance: The collaborative relationship involving shared goals, tasks, and trust between supervisor and supervisee. [Concept: Formative supervision and Supervisory alliance]

0025. C - Formative supervision: Supervision focused on developing supervisee knowledge, skills, and clinical judgment. / Consultation: A voluntary, collaborative process in which a consultant offers expertise while responsibility for action remains with the consultee. [Concept: Formative supervision and Consultation]

0026. C - Informed supervision consent [Concept: Informed supervision consent]

0027. B - Supervisory alliance: The collaborative relationship involving shared goals, tasks, and trust between supervisor and supervisee. / Feedback specificity: Feedback that identifies observable behavior, its impact, and a concrete next step. [Concept: Supervisory alliance and Feedback specificity]

0028. C - Reflective practice: Reviewing a difficult session and considering how the counselor's reactions shaped it. / Informed supervision consent: Explaining supervision and protecting client identity when discussing cases. [Concept: Reflective practice and Informed supervision consent]

0029. D - Consultation [Concept: Consultation]

0030. A - Informed supervision consent: Clear explanation to clients about supervision's role, confidentiality, and possible review of case material. / Cultural responsiveness in supervision: Attention to identity, power, and culture in the supervisory relationship and case formulation. [Concept: Informed supervision consent and Cultural responsiveness in supervision]

0031. C - Restorative supervision: Making space to process emotional impact and identify support needs. / Cultural responsiveness in supervision: Inviting discussion of cultural assumptions and power dynamics affecting supervision or client care. [Concept: Restorative supervision and Cultural responsiveness in supervision]

0032. C - Formative supervision [Concept: Formative supervision]

0033. B - Supervisory alliance [Concept: Supervisory alliance]

0034. D - Normative supervision: Supervision focused on ethical, legal, and professional standards and client protection. / Consultation: A voluntary, collaborative process in which a consultant offers expertise while responsibility for action remains with the consultee. [Concept: Normative supervision and Consultation]

0035. D - Formative supervision [Concept: Formative supervision]

0036. C - Supervisory alliance: Checking agreement about supervision goals and whether feedback feels usable. / Cultural responsiveness in supervision: Inviting discussion of cultural assumptions and power dynamics affecting supervision or client care. [Concept: Supervisory alliance and Cultural responsiveness in supervision]

0037. D - Feedback specificity [Concept: Feedback specificity]

0038. B - The supervisor's responsibility to assess competence and address impairment to protect clients and the profession. [Concept: Gatekeeping]

0039. D - Feedback specificity [Concept: Feedback specificity]

0040. B - Normative supervision: Supervision focused on ethical, legal, and professional standards and client protection. / Restorative supervision: Supervision that supports supervisee wellbeing and sustainable professional functioning. [Concept: Normative supervision and Restorative supervision]

0041. D - Supervisory alliance: Checking agreement about supervision goals and whether feedback feels usable. / Feedback specificity: Describing an observed skill and one practice step rather than giving a global judgment. [Concept: Supervisory alliance and Feedback specificity]

0042. B - Normative supervision: Reviewing documentation, boundaries, and risk procedures to safeguard clients. / Consultation: Providing a teacher with options while leaving implementation decisions within agreed roles. [Concept: Normative supervision and Consultation]

0043. C - Restorative supervision: Making space to process emotional impact and identify support needs. / Consultation: Providing a teacher with options while leaving implementation decisions within agreed roles. [Concept: Restorative supervision and Consultation]

0044. D - Reflective practice [Concept: Reflective practice]

0045. C - Restorative supervision: Supervision that supports supervisee wellbeing and sustainable professional functioning. / Reflective practice: Systematic examination of one's decisions, assumptions, emotions, and effects on practice. [Concept: Restorative supervision and Reflective practice]

0046. C - Cultural responsiveness in supervision [Concept: Cultural responsiveness in supervision]

0047. C - Restorative supervision [Concept: Restorative supervision]

0048. C - Gatekeeping [Concept: Gatekeeping]

0049. C - Feedback specificity [Concept: Feedback specificity]

0050. A - Normative supervision: Supervision focused on ethical, legal, and professional standards and client protection. / Feedback specificity: Feedback that identifies observable behavior, its impact, and a concrete next step. [Concept: Normative supervision and Feedback specificity]

0051. B - Reflective practice [Concept: Reflective practice]

0052. C - Reflective practice: Reviewing a difficult session and considering how the counselor's reactions shaped it. / Supervisory alliance: Checking agreement about supervision goals and whether feedback feels usable. [Concept: Reflective practice and Supervisory alliance]

0053. C - Describing an observed skill and one practice step rather than giving a global judgment. [Concept: Feedback specificity]

0054. A - Normative supervision [Concept: Normative supervision]

0055. B - Reflective practice: Reviewing a difficult session and considering how the counselor's reactions shaped it. / Gatekeeping: Documenting concerns, providing remediation, and taking protective action when competence is insufficient. [Concept: Reflective practice and Gatekeeping]

0056. D - Consultation [Concept: Consultation]

0057. C - Supervision focused on developing supervisee knowledge, skills, and clinical judgment. [Concept: Formative supervision]

0009. D - Formative evaluation: Evaluation conducted during program development or implementation to improve delivery. / Continuous quality improvement: An iterative use of data to identify changes, test them, and refine service delivery. [Concept: Formative evaluation and Continuous quality improvement]

0010. A - Practical significance [Concept: Practical significance]

0011. B - Process evaluation: Assessment of how a program was implemented, including reach, dose, fidelity, and context. / Outcome indicator: A measurable variable used as evidence of progress toward a specified outcome. [Concept: Process evaluation and Outcome indicator]

0012. A - Reach [Concept: Reach]

0013. C - Logic model: A visual or narrative map linking program resources, activities, outputs, and intended outcomes. / Reach: The proportion and characteristics of the intended population engaged by a program. [Concept: Logic model and Reach]

0014. B - Formative evaluation [Concept: Formative evaluation]

0015. A - Logic model: Showing how staff and activities are expected to lead to measurable youth outcomes. / Practical significance: Asking whether a measured difference matters to students and service decisions. [Concept: Logic model and Practical significance]

0016. D - Logic model: Showing how staff and activities are expected to lead to measurable youth outcomes. / Process evaluation: Checking who received the intervention and whether it was delivered as planned. [Concept: Logic model and Process evaluation]

0017. B - Logic model: A visual or narrative map linking program resources, activities, outputs, and intended outcomes. / Outcome evaluation: Assessment of changes or results associated with a program's goals. [Concept: Logic model and Outcome evaluation]

0018. D - Process evaluation [Concept: Process evaluation]

0019. C - Logic model: A visual or narrative map linking program resources, activities, outputs, and intended outcomes. / Reach: The proportion and characteristics of the intended population engaged by a program. [Concept: Logic model and Reach]

0020. D - Implementation fidelity [Concept: Implementation fidelity]

0021. B - Outcome indicator [Concept: Outcome indicator]

0022. C - Summative evaluation: Evaluation that judges a program's overall merit, effectiveness, or outcomes after implementation. / Process evaluation: Assessment of how a program was implemented, including reach, dose, fidelity, and context. [Concept: Summative evaluation and Process evaluation]

0023. A - Formative evaluation [Concept: Formative evaluation]

0024. A - A visual or narrative map linking program resources, activities, outputs, and intended outcomes. [Concept: Logic model]

0025. D - Formative evaluation: Collecting early feedback to refine a new group before full-scale implementation. / Outcome evaluation: Measuring change in the student outcome the program was designed to influence. [Concept: Formative evaluation and Outcome evaluation]

0026. D - An iterative use of data to identify changes, test them, and refine service delivery. [Concept: Continuous quality improvement]

0027. A - Outcome indicator [Concept: Outcome indicator]

0028. D - Summative evaluation: Assessing whether a completed program achieved its stated goals. / Process evaluation: Checking who received the intervention and whether it was delivered as planned. [Concept: Summative evaluation and Process evaluation]

0029. C - Implementation fidelity [Concept: Implementation fidelity]

0030. D - A measurable variable used as evidence of progress toward a specified outcome. [Concept: Outcome indicator]

0031. A - Process evaluation [Concept: Process evaluation]

0032. C - Assessing whether a completed program achieved its stated goals. [Concept: Summative evaluation]

0033. B - Showing how staff and activities are expected to lead to measurable youth outcomes. [Concept: Logic model]

0034. B - Implementation fidelity: The extent to which program components are delivered as intended. / Continuous quality improvement: An iterative use of data to identify changes, test them, and refine service delivery. [Concept: Implementation fidelity and Continuous quality improvement]

0035. B - Process evaluation: Assessment of how a program was implemented, including reach, dose, fidelity, and context. / Reach: The proportion and characteristics of the intended population engaged by a program. [Concept: Process evaluation and Reach]

0036. D - Reach [Concept: Reach]

0037. D - Outcome evaluation [Concept: Outcome evaluation]

0038. C - Practical significance [Concept: Practical significance]

0039. A - Reach [Concept: Reach]

0040. A - Summative evaluation [Concept: Summative evaluation]

0041. A - Logic model: Showing how staff and activities are expected to lead to measurable youth outcomes. / Process evaluation: Checking who received the intervention and whether it was delivered as planned. [Concept: Logic model and Process evaluation]

0042. A - Summative evaluation: Evaluation that judges a program's overall merit, effectiveness, or outcomes after implementation. / Process evaluation: Assessment of how a program was implemented, including reach, dose, fidelity, and context. [Concept: Summative evaluation and Process evaluation]

0043. D - Summative evaluation: Assessing whether a completed program achieved its stated goals. / Continuous quality improvement: Testing a small improvement, reviewing results, and adjusting the next cycle. [Concept: Summative evaluation and Continuous quality improvement]

0044. A - Process evaluation: Checking who received the intervention and whether it was delivered as planned. / Outcome indicator: Selecting a defined measure that reflects the program's stated goal. [Concept: Process evaluation and Outcome indicator]

0045. B - Evaluation conducted during program development or implementation to improve delivery. [Concept: Formative evaluation]

0046. B - Formative evaluation [Concept: Formative evaluation]

0047. C - Measuring change in the student outcome the program was designed to influence. [Concept: Outcome evaluation]

0048. B - Reach: Comparing participants with the target population to identify who is not being reached. / Continuous quality improvement: Testing a small improvement, reviewing results, and adjusting the next cycle. [Concept: Reach and Continuous quality improvement]

0049. D - Logic model [Concept: Logic model]

0050. B - Practical significance [Concept: Practical significance]

0051. D - Outcome evaluation [Concept: Outcome evaluation]

0052. D - Continuous quality improvement [Concept: Continuous quality improvement]

0053. B - Outcome evaluation: Measuring change in the student outcome the program was designed to influence. / Implementation fidelity: Documenting delivery of core components before interpreting outcome differences. [Concept: Outcome evaluation and Implementation fidelity]

0054. D - Formative evaluation: Collecting early feedback to refine a new group before full-scale implementation. / Practical significance: Asking whether a measured difference matters to students and service decisions. [Concept: Formative evaluation and Practical significance]

0055. B - Formative evaluation: Evaluation conducted during program development or implementation to improve delivery. / Outcome evaluation: Assessment of changes or results associated with a program's goals. [Concept: Formative evaluation and Outcome evaluation]

0056. A - Outcome evaluation [Concept: Outcome evaluation]

0057. D - Practical significance: Asking whether a measured difference matters to students and service decisions. / Continuous quality improvement: Testing a small improvement, reviewing results, and adjusting the next cycle. [Concept: Practical significance and Continuous quality improvement]

0058. D - Logic model [Concept: Logic model]

0059. D - Process evaluation [Concept: Process evaluation]

0060. B - Summative evaluation: Evaluation that judges a program's overall merit, effectiveness, or outcomes after implementation. / Process evaluation: Assessment of how a program was implemented, including reach, dose, fidelity, and context. [Concept: Summative evaluation and Process evaluation]

0061. C - Outcome indicator: A measurable variable used as evidence of progress toward a specified outcome. / Practical significance: The real-world importance or usefulness of an observed change, beyond statistical detectability. [Concept: Outcome indicator and Practical significance]

0062. A - Implementation fidelity [Concept: Implementation fidelity]

0063. B - Reach [Concept: Reach]

0064. A - Outcome evaluation [Concept: Outcome evaluation]

CAC.930 | Program Evaluation and Outcome Measurement

QUESTION | CORRECT OPTION AND CONCEPT

0065. C - Summative evaluation: Assessing whether a completed program achieved its stated goals. / Reach: Comparing participants with the target population to identify who is not being reached. [Concept: Summative evaluation and Reach]

0066. C - Summative evaluation: Evaluation that judges a program's overall merit, effectiveness, or outcomes after implementation. / Practical significance: The real-world importance or usefulness of an observed change, beyond statistical detectability. [Concept: Summative evaluation and Practical significance]

0067. D - Formative evaluation: Collecting early feedback to refine a new group before full-scale implementation. / Continuous quality improvement: Testing a small improvement, reviewing results, and adjusting the next cycle. [Concept: Formative evaluation and Continuous quality improvement]

0068. A - Formative evaluation [Concept: Formative evaluation]

0069. C - Comparing participants with the target population to identify who is not being reached. [Concept: Reach]

0070. B - Practical significance [Concept: Practical significance]

0071. A - Selecting a defined measure that reflects the program's stated goal. [Concept: Outcome indicator]

0072. D - Outcome evaluation: Assessment of changes or results associated with a program's goals. / Implementation fidelity: The extent to which program components are delivered as intended. [Concept: Outcome evaluation and Implementation fidelity]

0073. C - Outcome evaluation [Concept: Outcome evaluation]

0074. D - Process evaluation [Concept: Process evaluation]

0075. A - Logic model: A visual or narrative map linking program resources, activities, outputs, and intended outcomes. / Continuous quality improvement: An iterative use of data to identify changes, test them, and refine service delivery. [Concept: Logic model and Continuous quality improvement]

0076. D - Outcome evaluation: Measuring change in the student outcome the program was designed to influence. / Implementation fidelity: Documenting delivery of core components before interpreting outcome differences. [Concept: Outcome evaluation and Implementation fidelity]

0077. D - Formative evaluation: Collecting early feedback to refine a new group before full-scale implementation. / Outcome indicator: Selecting a defined measure that reflects the program's stated goal. [Concept: Formative evaluation and Outcome indicator]

0078. A - Summative evaluation: Evaluation that judges a program's overall merit, effectiveness, or outcomes after implementation. / Outcome indicator: A measurable variable used as evidence of progress toward a specified outcome. [Concept: Summative evaluation and Outcome indicator]

0079. B - Logic model [Concept: Logic model]

0080. A - Process evaluation [Concept: Process evaluation]

0081. B - Outcome evaluation [Concept: Outcome evaluation]

0082. C - Practical significance [Concept: Practical significance]

0083. D - Process evaluation: Assessment of how a program was implemented, including reach, dose, fidelity, and context. / Outcome evaluation: Assessment of changes or results associated with a program's goals. [Concept: Process evaluation and Outcome evaluation]

0084. D - Implementation fidelity [Concept: Implementation fidelity]

0085. D - Formative evaluation: Collecting early feedback to refine a new group before full-scale implementation. / Process evaluation: Checking who received the intervention and whether it was delivered as planned. [Concept: Formative evaluation and Process evaluation]

0086. D - Formative evaluation: Collecting early feedback to refine a new group before full-scale implementation. / Outcome indicator: Selecting a defined measure that reflects the program's stated goal. [Concept: Formative evaluation and Outcome indicator]

0087. A - Summative evaluation [Concept: Summative evaluation]

0088. D - Practical significance [Concept: Practical significance]

0089. A - Logic model: A visual or narrative map linking program resources, activities, outputs, and intended outcomes. / Implementation fidelity: The extent to which program components are delivered as intended. [Concept: Logic model and Implementation fidelity]

0090. B - Summative evaluation: Evaluation that judges a program's overall merit, effectiveness, or outcomes after implementation. / Process evaluation: Assessment of how a program was implemented, including reach, dose, fidelity, and context. [Concept: Summative evaluation and Process evaluation]

0091. C - Process evaluation: Checking who received the intervention and whether it was delivered as planned. / Outcome evaluation: Measuring change in the student outcome the program was designed to influence. [Concept: Process evaluation and Outcome evaluation]

0092. B - Logic model [Concept: Logic model]

0093. B - Reach: The proportion and characteristics of the intended population engaged by a program. / Continuous quality improvement: An iterative use of data to identify changes, test them, and refine service delivery. [Concept: Reach and Continuous quality improvement]

0094. B - Reach [Concept: Reach]

0095. B - Logic model [Concept: Logic model]

0096. D - Assessment of how a program was implemented, including reach, dose, fidelity, and context. [Concept: Process evaluation]

0097. A - Outcome evaluation [Concept: Outcome evaluation]

0098. C - Selecting a defined measure that reflects the program's stated goal. [Concept: Outcome indicator]

0099. D - Logic model: Showing how staff and activities are expected to lead to measurable youth outcomes. / Summative evaluation: Assessing whether a completed program achieved its stated goals. [Concept: Logic model and Summative evaluation]

0100. A - Summative evaluation: Evaluation that judges a program's overall merit, effectiveness, or outcomes after implementation. / Practical significance: The real-world importance or usefulness of an observed change, beyond statistical detectability. [Concept: Summative evaluation and Practical significance]

0101. A - Logic model [Concept: Logic model]

0102. A - Summative evaluation [Concept: Summative evaluation]

0103. C - Formative evaluation [Concept: Formative evaluation]

0104. D - Continuous quality improvement [Concept: Continuous quality improvement]

0105. B - Implementation fidelity [Concept: Implementation fidelity]

0106. A - Continuous quality improvement [Concept: Continuous quality improvement]

0107. C - Logic model: Showing how staff and activities are expected to lead to measurable youth outcomes. / Formative evaluation: Collecting early feedback to refine a new group before full-scale implementation. [Concept: Logic model and Formative evaluation]

0108. D - Summative evaluation [Concept: Summative evaluation]

0109. C - Evaluation that judges a program's overall merit, effectiveness, or outcomes after implementation. [Concept: Summative evaluation]

0110. C - Outcome indicator: Selecting a defined measure that reflects the program's stated goal. / Continuous quality improvement: Testing a small improvement, reviewing results, and adjusting the next cycle. [Concept: Outcome indicator and Continuous quality improvement]

0111. D - The real-world importance or usefulness of an observed change, beyond statistical detectability. [Concept: Practical significance]

0112. B - Process evaluation [Concept: Process evaluation]

0113. D - Formative evaluation: Evaluation conducted during program development or implementation to improve delivery. / Summative evaluation: Evaluation that judges a program's overall merit, effectiveness, or outcomes after implementation. [Concept: Formative evaluation and Summative evaluation]

0114. B - Outcome indicator [Concept: Outcome indicator]

0115. A - Process evaluation [Concept: Process evaluation]

0116. A - Practical significance [Concept: Practical significance]

0117. B - Outcome indicator [Concept: Outcome indicator]

0118. A - Formative evaluation: Evaluation conducted during program development or implementation to improve delivery. / Continuous quality improvement: An iterative use of data to identify changes, test them, and refine service delivery. [Concept: Formative evaluation and Continuous quality improvement]

0119. C - Summative evaluation [Concept: Summative evaluation]

0120. A - Outcome indicator [Concept: Outcome indicator]

0121. D - Process evaluation [Concept: Process evaluation]

0122. B - Formative evaluation: Collecting early feedback to refine a new group before full-scale implementation. / Outcome evaluation: Measuring change in the student outcome the program was designed to influence. [Concept: Formative evaluation and Outcome evaluation]

0123. D - Outcome indicator [Concept: Outcome indicator]

0124. D - Outcome evaluation [Concept: Outcome evaluation]

0125. A - Reach: The proportion and characteristics of the intended population engaged by a program. / Practical significance: The real-world importance or usefulness of an observed change, beyond statistical detectability. [Concept: Reach and Practical significance]

0126. A - Reach [Concept: Reach]

0127. D - Formative evaluation [Concept: Formative evaluation]

0128. A - A measurable variable used as evidence of progress toward a specified outcome. [Concept: Outcome indicator]

0129. C - Formative evaluation [Concept: Formative evaluation]

0130. B - Summative evaluation: Assessing whether a completed program achieved its stated goals. / Practical significance: Asking whether a measured difference matters to students and service decisions. [Concept: Summative evaluation and Practical significance]

0131. B - Formative evaluation [Concept: Formative evaluation]

0132. D - Evaluation that judges a program's overall merit, effectiveness, or outcomes after implementation. [Concept: Summative evaluation]

CAC.930 | Program Evaluation and Outcome Measurement

QUESTION | CORRECT OPTION AND CONCEPT

0133. B - Summative evaluation [Concept: Summative evaluation]

0134. D - Continuous quality improvement [Concept: Continuous quality improvement]

0135. D - Formative evaluation: Collecting early feedback to refine a new group before full-scale implementation. / Outcome indicator: Selecting a defined measure that reflects the program's stated goal. [Concept: Formative evaluation and Outcome indicator]

0136. D - Process evaluation: Assessment of how a program was implemented, including reach, dose, fidelity, and context. / Reach: The proportion and characteristics of the intended population engaged by a program. [Concept: Process evaluation and Reach]

0137. D - Outcome indicator: A measurable variable used as evidence of progress toward a specified outcome. / Continuous quality improvement: An iterative use of data to identify changes, test them, and refine service delivery. [Concept: Outcome indicator and Continuous quality improvement]

0138. C - Reach: Comparing participants with the target population to identify who is not being reached. / Outcome indicator: Selecting a defined measure that reflects the program's stated goal. [Concept: Reach and Outcome indicator]

0139. B - Process evaluation [Concept: Process evaluation]

0140. D - Implementation fidelity [Concept: Implementation fidelity]

0141. B - Process evaluation: Checking who received the intervention and whether it was delivered as planned. / Outcome indicator: Selecting a defined measure that reflects the program's stated goal. [Concept: Process evaluation and Outcome indicator]

0142. B - Reach: The proportion and characteristics of the intended population engaged by a program. / Practical significance: The real-world importance or usefulness of an observed change, beyond statistical detectability. [Concept: Reach and Practical significance]

0143. B - Logic model [Concept: Logic model]

0144. D - Implementation fidelity [Concept: Implementation fidelity]

0145. D - Logic model: Showing how staff and activities are expected to lead to measurable youth outcomes. / Continuous quality improvement: Testing a small improvement, reviewing results, and adjusting the next cycle. [Concept: Logic model and Continuous quality improvement]

0146. B - Outcome evaluation [Concept: Outcome evaluation]

0147. C - Outcome evaluation: Assessment of changes or results associated with a program's goals. / Continuous quality improvement: An iterative use of data to identify changes, test them, and refine service delivery. [Concept: Outcome evaluation and Continuous quality improvement]

0148. D - Summative evaluation: Evaluation that judges a program's overall merit, effectiveness, or outcomes after implementation. / Process evaluation: Assessment of how a program was implemented, including reach, dose, fidelity, and context. [Concept: Summative evaluation and Process evaluation]

0149. A - Outcome evaluation: Measuring change in the student outcome the program was designed to influence. / Reach: Comparing participants with the target population to identify who is not being reached. [Concept: Outcome evaluation and Reach]

0150. B - Reach [Concept: Reach]

0151. B - Formative evaluation: Collecting early feedback to refine a new group before full-scale implementation. / Summative evaluation: Assessing whether a completed program achieved its stated goals. [Concept: Formative evaluation and Summative evaluation]

0152. B - Reach: Comparing participants with the target population to identify who is not being reached. / Outcome indicator: Selecting a defined measure that reflects the program's stated goal. [Concept: Reach and Outcome indicator]

0153. B - Summative evaluation: Assessing whether a completed program achieved its stated goals. / Process evaluation: Checking who received the intervention and whether it was delivered as planned. [Concept: Summative evaluation and Process evaluation]

0154. B - Practical significance [Concept: Practical significance]

0155. C - Evaluation that judges a program's overall merit, effectiveness, or outcomes after implementation. [Concept: Summative evaluation]

0156. B - Formative evaluation: Evaluation conducted during program development or implementation to improve delivery. / Implementation fidelity: The extent to which program components are delivered as intended. [Concept: Formative evaluation and Implementation fidelity]

0157. C - Logic model: A visual or narrative map linking program resources, activities, outputs, and intended outcomes. / Formative evaluation: Evaluation conducted during program development or implementation to improve delivery. [Concept: Logic model and Formative evaluation]

0158. B - Outcome indicator [Concept: Outcome indicator]

0159. C - Formative evaluation [Concept: Formative evaluation]

0160. B - Implementation fidelity: The extent to which program components are delivered as intended. / Continuous quality improvement: An iterative use of data to identify changes, test them, and refine service delivery. [Concept: Implementation fidelity and Continuous quality improvement]

0161. C - Logic model [Concept: Logic model]

0162. A - Process evaluation [Concept: Process evaluation]

0163. A - Reach [Concept: Reach]

0164. B - Assessment of how a program was implemented, including reach, dose, fidelity, and context. [Concept: Process evaluation]

0165. B - Outcome evaluation: Measuring change in the student outcome the program was designed to influence. / Reach: Comparing participants with the target population to identify who is not being reached. [Concept: Outcome evaluation and Reach]

0166. D - Formative evaluation [Concept: Formative evaluation]

0167. C - Implementation fidelity: The extent to which program components are delivered as intended. / Practical significance: The real-world importance or usefulness of an observed change, beyond statistical detectability. [Concept: Implementation fidelity and Practical significance]

0168. A - Implementation fidelity: Documenting delivery of core components before interpreting outcome differences. / Outcome indicator: Selecting a defined measure that reflects the program's stated goal. [Concept: Implementation fidelity and Outcome indicator]

0169. D - Implementation fidelity [Concept: Implementation fidelity]

0170. A - Process evaluation [Concept: Process evaluation]

0171. A - Showing how staff and activities are expected to lead to measurable youth outcomes. [Concept: Logic model]

0172. C - Practical significance [Concept: Practical significance]

0173. B - Outcome indicator [Concept: Outcome indicator]

0174. B - Process evaluation: Assessment of how a program was implemented, including reach, dose, fidelity, and context. / Outcome evaluation: Assessment of changes or results associated with a program's goals. [Concept: Process evaluation and Outcome evaluation]

0175. D - Comparing participants with the target population to identify who is not being reached. [Concept: Reach]

0176. A - Process evaluation: Checking who received the intervention and whether it was delivered as planned. / Practical significance: Asking whether a measured difference matters to students and service decisions. [Concept: Process evaluation and Practical significance]

0177. D - Summative evaluation: Evaluation that judges a program's overall merit, effectiveness, or outcomes after implementation. / Reach: The proportion and characteristics of the intended population engaged by a program. [Concept: Summative evaluation and Reach]

0178. B - Assessing whether a completed program achieved its stated goals. [Concept: Summative evaluation]

0179. A - Process evaluation [Concept: Process evaluation]

0180. B - Logic model [Concept: Logic model]

0181. D - Formative evaluation: Collecting early feedback to refine a new group before full-scale implementation. / Practical significance: Asking whether a measured difference matters to students and service decisions. [Concept: Formative evaluation and Practical significance]

0182. C - A measurable variable used as evidence of progress toward a specified outcome. [Concept: Outcome indicator]

0183. C - Logic model: A visual or narrative map linking program resources, activities, outputs, and intended outcomes. / Outcome evaluation: Assessment of changes or results associated with a program's goals. [Concept: Logic model and Outcome evaluation]

0184. C - Asking whether a measured difference matters to students and service decisions. [Concept: Practical significance]

0185. B - Logic model: Showing how staff and activities are expected to lead to measurable youth outcomes. / Outcome evaluation: Measuring change in the student outcome the program was designed to influence. [Concept: Logic model and Outcome evaluation]

0187. B - Outcome evaluation: Measuring change in the student outcome the program was designed to influence. / Implementation fidelity: Documenting delivery of core components before interpreting outcome differences. [Concept: Outcome evaluation and Implementation fidelity]

0188. C - Outcome indicator [Concept: Outcome indicator]

0189. D - Formative evaluation [Concept: Formative evaluation]

0190. D - Implementation fidelity: Documenting delivery of core components before interpreting outcome differences. / Continuous quality improvement: Testing a small improvement, reviewing results, and adjusting the next cycle. [Concept: Implementation fidelity and Continuous quality improvement]

0191. C - Outcome evaluation [Concept: Outcome evaluation]

0192. B - Summative evaluation: Evaluation that judges a program's overall merit, effectiveness, or outcomes after implementation. / Outcome evaluation: Assessment of changes or results associated with a program's goals. [Concept: Summative evaluation and Outcome evaluation]

0193. A - Reach [Concept: Reach]

CAC.930 | Program Evaluation and Outcome Measurement

QUESTION | CORRECT OPTION AND CONCEPT

0194. A - Implementation fidelity: Documenting delivery of core components before interpreting outcome differences. / Reach: Comparing participants with the target population to identify who is not being reached. [Concept: Implementation fidelity and Reach]

0195. B - Assessment of changes or results associated with a program's goals. [Concept: Outcome evaluation]

0196. C - Evaluation conducted during program development or implementation to improve delivery. [Concept: Formative evaluation]

0197. B - Formative evaluation: Collecting early feedback to refine a new group before full-scale implementation. / Continuous quality improvement: Testing a small improvement, reviewing results, and adjusting the next cycle. [Concept: Formative evaluation and Continuous quality improvement]

0198. C - Outcome indicator: Selecting a defined measure that reflects the program's stated goal. / Continuous quality improvement: Testing a small improvement, reviewing results, and adjusting the next cycle. [Concept: Outcome indicator and Continuous quality improvement]

0199. C - Logic model: Showing how staff and activities are expected to lead to measurable youth outcomes. / Outcome indicator: Selecting a defined measure that reflects the program's stated goal. [Concept: Logic model and Outcome indicator]

0200. A - Outcome evaluation [Concept: Outcome evaluation]

0201. D - Logic model: Showing how staff and activities are expected to lead to measurable youth outcomes. / Implementation fidelity: Documenting delivery of core components before interpreting outcome differences. [Concept: Logic model and Implementation fidelity]

0202. C - Implementation fidelity [Concept: Implementation fidelity]

0203. C - Outcome evaluation: Measuring change in the student outcome the program was designed to influence. / Continuous quality improvement: Testing a small improvement, reviewing results, and adjusting the next cycle. [Concept: Outcome evaluation and Continuous quality improvement]

0204. B - Outcome evaluation [Concept: Outcome evaluation]

0205. D - Summative evaluation [Concept: Summative evaluation]

0206. B - Evaluation conducted during program development or implementation to improve delivery. [Concept: Formative evaluation]

0207. B - Formative evaluation: Evaluation conducted during program development or implementation to improve delivery. / Outcome evaluation: Assessment of changes or results associated with a program's goals. [Concept: Formative evaluation and Outcome evaluation]

0208. A - Logic model: Showing how staff and activities are expected to lead to measurable youth outcomes. / Continuous quality improvement: Testing a small improvement, reviewing results, and adjusting the next cycle. [Concept: Logic model and Continuous quality improvement]

0209. B - Process evaluation: Checking who received the intervention and whether it was delivered as planned. / Implementation fidelity: Documenting delivery of core components before interpreting outcome differences. [Concept: Process evaluation and Implementation fidelity]

0210. A - Formative evaluation: Collecting early feedback to refine a new group before full-scale implementation. / Reach: Comparing participants with the target population to identify who is not being reached. [Concept: Formative evaluation and Reach]

0211. D - Process evaluation [Concept: Process evaluation]

0212. B - Process evaluation: Checking who received the intervention and whether it was delivered as planned. / Implementation fidelity: Documenting delivery of core components before interpreting outcome differences. [Concept: Process evaluation and Implementation fidelity]

0213. B - Formative evaluation [Concept: Formative evaluation]

0214. D - Formative evaluation: Evaluation conducted during program development or implementation to improve delivery. / Practical significance: The real-world importance or usefulness of an observed change, beyond statistical detectability. [Concept: Formative evaluation and Practical significance]

0215. A - Summative evaluation: Evaluation that judges a program's overall merit, effectiveness, or outcomes after implementation. / Continuous quality improvement: An iterative use of data to identify changes, test them, and refine service delivery. [Concept: Summative evaluation and Continuous quality improvement]

0216. B - Implementation fidelity [Concept: Implementation fidelity]

0217. A - Assessing whether a completed program achieved its stated goals. [Concept: Summative evaluation]

0218. B - Summative evaluation [Concept: Summative evaluation]

0219. D - Continuous quality improvement [Concept: Continuous quality improvement]

0220. B - Formative evaluation: Evaluation conducted during program development or implementation to improve delivery. / Continuous quality improvement: An iterative use of data to identify changes, test them, and refine service delivery. [Concept: Formative evaluation and Continuous quality improvement]

0221. C - Summative evaluation: Evaluation that judges a program's overall merit, effectiveness, or outcomes after implementation. / Reach: The proportion and characteristics of the intended population engaged by a program. [Concept: Summative evaluation and Reach]

0222. D - Assessment of how a program was implemented, including reach, dose, fidelity, and context. [Concept: Process evaluation]

0223. A - Implementation fidelity: The extent to which program components are delivered as intended. / Practical significance: The real-world importance or usefulness of an observed change, beyond statistical detectability. [Concept: Implementation fidelity and Practical significance]

0224. C - Process evaluation [Concept: Process evaluation]

0225. A - Practical significance: Asking whether a measured difference matters to students and service decisions. / Continuous quality improvement: Testing a small improvement, reviewing results, and adjusting the next cycle. [Concept: Practical significance and Continuous quality improvement]

0226. C - Process evaluation: Assessment of how a program was implemented, including reach, dose, fidelity, and context. / Continuous quality improvement: An iterative use of data to identify changes, test them, and refine service delivery. [Concept: Process evaluation and Continuous quality improvement]

0227. C - Outcome evaluation [Concept: Outcome evaluation]

0228. A - Formative evaluation [Concept: Formative evaluation]

0229. A - Reach: Comparing participants with the target population to identify who is not being reached. / Practical significance: Asking whether a measured difference matters to students and service decisions. [Concept: Reach and Practical significance]

0230. B - Continuous quality improvement [Concept: Continuous quality improvement]

0231. D - Implementation fidelity [Concept: Implementation fidelity]

0232. B - Summative evaluation: Assessing whether a completed program achieved its stated goals. / Process evaluation: Checking who received the intervention and whether it was delivered as planned. [Concept: Summative evaluation and Process evaluation]

0233. B - Reach [Concept: Reach]

0234. A - Logic model: A visual or narrative map linking program resources, activities, outputs, and intended outcomes. / Implementation fidelity: The extent to which program components are delivered as intended. [Concept: Logic model and Implementation fidelity]

0235. C - Implementation fidelity [Concept: Implementation fidelity]

0236. C - Summative evaluation: Evaluation that judges a program's overall merit, effectiveness, or outcomes after implementation. / Continuous quality improvement: An iterative use of data to identify changes, test them, and refine service delivery. [Concept: Summative evaluation and Continuous quality improvement]

0237. D - Formative evaluation [Concept: Formative evaluation]

0238. B - Formative evaluation: Collecting early feedback to refine a new group before full-scale implementation. / Implementation fidelity: Documenting delivery of core components before interpreting outcome differences. [Concept: Formative evaluation and Implementation fidelity]

0239. D - Logic model [Concept: Logic model]

0240. D - Process evaluation: Assessment of how a program was implemented, including reach, dose, fidelity, and context. / Continuous quality improvement: An iterative use of data to identify changes, test them, and refine service delivery. [Concept: Process evaluation and Continuous quality improvement]

0241. A - Evaluation conducted during program development or implementation to improve delivery. [Concept: Formative evaluation]

0242. A - Outcome indicator [Concept: Outcome indicator]

0243. D - Reach: The proportion and characteristics of the intended population engaged by a program. / Outcome indicator: A measurable variable used as evidence of progress toward a specified outcome. [Concept: Reach and Outcome indicator]

0244. C - Outcome evaluation [Concept: Outcome evaluation]

0245. A - Outcome indicator [Concept: Outcome indicator]

0246. C - Process evaluation: Checking who received the intervention and whether it was delivered as planned. / Continuous quality improvement: Testing a small improvement, reviewing results, and adjusting the next cycle. [Concept: Process evaluation and Continuous quality improvement]

0247. C - Summative evaluation [Concept: Summative evaluation]

0248. B - Process evaluation: Checking who received the intervention and whether it was delivered as planned. / Reach: Comparing participants with the target population to identify who is not being reached. [Concept: Process evaluation and Reach]

0249. A - Implementation fidelity [Concept: Implementation fidelity]

0250. B - Outcome indicator: Selecting a defined measure that reflects the program's stated goal. / Practical significance: Asking whether a measured difference matters to students and service decisions. [Concept: Outcome indicator and Practical significance]

0251. D - Outcome evaluation: Assessment of changes or results associated with a program's goals. / Reach: The proportion and characteristics of the intended population engaged by a program. [Concept: Outcome evaluation and Reach]

0252. B - Asking whether a measured difference matters to students and service decisions. [Concept: Practical significance]

0253. C - Continuous quality improvement [Concept: Continuous quality improvement]

CAC.930 | Program Evaluation and Outcome Measurement

QUESTION | CORRECT OPTION AND CONCEPT

0254. D - Continuous quality improvement [Concept: Continuous quality improvement]

0255. D - Summative evaluation [Concept: Summative evaluation]

0256. D - Formative evaluation: Evaluation conducted during program development or implementation to improve delivery. / Summative evaluation: Evaluation that judges a program's overall merit, effectiveness, or outcomes after implementation. [Concept: Formative evaluation and Summative evaluation]

0257. A - Formative evaluation [Concept: Formative evaluation]

0258. A - Continuous quality improvement [Concept: Continuous quality improvement]

0259. C - Formative evaluation [Concept: Formative evaluation]

0260. A - Formative evaluation: Evaluation conducted during program development or implementation to improve delivery. / Outcome evaluation: Assessment of changes or results associated with a program's goals. [Concept: Formative evaluation and Outcome evaluation]

0261. A - Implementation fidelity [Concept: Implementation fidelity]

0262. A - Logic model: Showing how staff and activities are expected to lead to measurable youth outcomes. / Outcome evaluation: Measuring change in the student outcome the program was designed to influence. [Concept: Logic model and Outcome evaluation]

0263. B - Implementation fidelity [Concept: Implementation fidelity]

0264. B - Process evaluation: Assessment of how a program was implemented, including reach, dose, fidelity, and context. / Implementation fidelity: The extent to which program components are delivered as intended. [Concept: Process evaluation and Implementation fidelity]

0265. B - Summative evaluation [Concept: Summative evaluation]

0266. B - Process evaluation [Concept: Process evaluation]

0267. B - Formative evaluation [Concept: Formative evaluation]

0268. A - Documenting delivery of core components before interpreting outcome differences. [Concept: Implementation fidelity]

0269. A - Checking who received the intervention and whether it was delivered as planned. [Concept: Process evaluation]

0270. C - Practical significance [Concept: Practical significance]

0271. B - Formative evaluation [Concept: Formative evaluation]

0272. D - Formative evaluation: Evaluation conducted during program development or implementation to improve delivery. / Practical significance: The real-world importance or usefulness of an observed change, beyond statistical detectability. [Concept: Formative evaluation and Practical significance]

0273. D - Reach: Comparing participants with the target population to identify who is not being reached. / Practical significance: Asking whether a measured difference matters to students and service decisions. [Concept: Reach and Practical significance]

0274. D - Practical significance: Asking whether a measured difference matters to students and service decisions. / Continuous quality improvement: Testing a small improvement, reviewing results, and adjusting the next cycle. [Concept: Practical significance and Continuous quality improvement]

0275. D - Implementation fidelity: The extent to which program components are delivered as intended. / Reach: The proportion and characteristics of the intended population engaged by a program. [Concept: Implementation fidelity and Reach]

0276. C - Assessment of changes or results associated with a program's goals. [Concept: Outcome evaluation]

0277. B - Documenting delivery of core components before interpreting outcome differences. [Concept: Implementation fidelity]

0278. C - Logic model: Showing how staff and activities are expected to lead to measurable youth outcomes. / Summative evaluation: Assessing whether a completed program achieved its stated goals. [Concept: Logic model and Summative evaluation]

0279. D - Summative evaluation [Concept: Summative evaluation]

0280. C - Continuous quality improvement [Concept: Continuous quality improvement]

0281. A - Outcome evaluation [Concept: Outcome evaluation]

0282. B - Logic model: A visual or narrative map linking program resources, activities, outputs, and intended outcomes. / Practical significance: The real-world importance or usefulness of an observed change, beyond statistical detectability. [Concept: Logic model and Practical significance]

0283. A - Checking who received the intervention and whether it was delivered as planned. [Concept: Process evaluation]

0284. A - Reach [Concept: Reach]

0285. D - Measuring change in the student outcome the program was designed to influence. [Concept: Outcome evaluation]

0286. D - Reach: Comparing participants with the target population to identify who is not being reached. / Practical significance: Asking whether a measured difference matters to students and service decisions. [Concept: Reach and Practical significance]

0287. A - Reach [Concept: Reach]

0288. D - Logic model [Concept: Logic model]

0289. A - Continuous quality improvement [Concept: Continuous quality improvement]

0290. A - Collecting early feedback to refine a new group before full-scale implementation. [Concept: Formative evaluation]

0291. D - Formative evaluation [Concept: Formative evaluation]

0292. C - Formative evaluation: Evaluation conducted during program development or implementation to improve delivery. / Process evaluation: Assessment of how a program was implemented, including reach, dose, fidelity, and context. [Concept: Formative evaluation and Process evaluation]

0293. A - Process evaluation [Concept: Process evaluation]

0294. A - Summative evaluation [Concept: Summative evaluation]

0295. C - Implementation fidelity [Concept: Implementation fidelity]

0296. C - The extent to which program components are delivered as intended. [Concept: Implementation fidelity]

0297. C - Outcome evaluation [Concept: Outcome evaluation]

0298. B - Summative evaluation: Evaluation that judges a program's overall merit, effectiveness, or outcomes after implementation. / Implementation fidelity: The extent to which program components are delivered as intended. [Concept: Summative evaluation and Implementation fidelity]

0299. B - Collecting early feedback to refine a new group before full-scale implementation. [Concept: Formative evaluation]

0300. B - Process evaluation: Checking who received the intervention and whether it was delivered as planned. / Reach: Comparing participants with the target population to identify who is not being reached. [Concept: Process evaluation and Reach]

0301. A - Process evaluation [Concept: Process evaluation]

0302. C - The extent to which program components are delivered as intended. [Concept: Implementation fidelity]

0303. D - Formative evaluation: Evaluation conducted during program development or implementation to improve delivery. / Process evaluation: Assessment of how a program was implemented, including reach, dose, fidelity, and context. [Concept: Formative evaluation and Process evaluation]

0304. D - Collecting early feedback to refine a new group before full-scale implementation. [Concept: Formative evaluation]

0305. B - Selecting a defined measure that reflects the program's stated goal. [Concept: Outcome indicator]

0306. A - Logic model: A visual or narrative map linking program resources, activities, outputs, and intended outcomes. / Process evaluation: Assessment of how a program was implemented, including reach, dose, fidelity, and context. [Concept: Logic model and Process evaluation]

0307. D - Continuous quality improvement [Concept: Continuous quality improvement]

0308. A - Logic model: Showing how staff and activities are expected to lead to measurable youth outcomes. / Reach: Comparing participants with the target population to identify who is not being reached. [Concept: Logic model and Reach]

0309. A - Continuous quality improvement [Concept: Continuous quality improvement]

0310. C - Evaluation that judges a program's overall merit, effectiveness, or outcomes after implementation. [Concept: Summative evaluation]

0311. D - Formative evaluation: Collecting early feedback to refine a new group before full-scale implementation. / Continuous quality improvement: Testing a small improvement, reviewing results, and adjusting the next cycle. [Concept: Formative evaluation and Continuous quality improvement]

0312. C - Outcome evaluation: Measuring change in the student outcome the program was designed to influence. / Implementation fidelity: Documenting delivery of core components before interpreting outcome differences. [Concept: Outcome evaluation and Implementation fidelity]

0313. B - Practical significance: The real-world importance or usefulness of an observed change, beyond statistical detectability. / Continuous quality improvement: An iterative use of data to identify changes, test them, and refine service delivery. [Concept: Practical significance and Continuous quality improvement]

0314. A - Implementation fidelity [Concept: Implementation fidelity]

0315. C - Outcome evaluation [Concept: Outcome evaluation]

0316. B - Summative evaluation: Evaluation that judges a program's overall merit, effectiveness, or outcomes after implementation. / Continuous quality improvement: An iterative use of data to identify changes, test them, and refine service delivery. [Concept: Summative evaluation and Continuous quality improvement]

0317. A - Documenting delivery of core components before interpreting outcome differences. [Concept: Implementation fidelity]

0318. C - Continuous quality improvement [Concept: Continuous quality improvement]

0319. D - Outcome indicator: A measurable variable used as evidence of progress toward a specified outcome. / Continuous quality improvement: An iterative use of data to identify changes, test them, and refine service delivery. [Concept: Outcome indicator and Continuous quality improvement]

0320. C - Outcome indicator [Concept: Outcome indicator]

0321. C - Process evaluation: Checking who received the intervention and whether it was delivered as planned. / Continuous quality improvement: Testing a small improvement, reviewing results, and adjusting the next cycle. [Concept: Process evaluation and Continuous quality improvement]

CAC.930 | Program Evaluation and Outcome Measurement

0462. B - Formative evaluation: Evaluation conducted during program development or implementation to improve delivery. / Summative evaluation: Evaluation that judges a program's overall merit, effectiveness, or outcomes after implementation. [Concept: Formative evaluation and Summative evaluation]

0463. A - Practical significance: The real-world importance or usefulness of an observed change, beyond statistical detectability. / Continuous quality improvement: An iterative use of data to identify changes, test them, and refine service delivery. [Concept: Practical significance and Continuous quality improvement]

0464. A - Outcome evaluation [Concept: Outcome evaluation]

0465. A - Continuous quality improvement [Concept: Continuous quality improvement]

0466. B - Outcome indicator [Concept: Outcome indicator]

0467. C - An iterative use of data to identify changes, test them, and refine service delivery. [Concept: Continuous quality improvement]

0468. A - Summative evaluation [Concept: Summative evaluation]

0469. D - Outcome indicator: Selecting a defined measure that reflects the program's stated goal. / Practical significance: Asking whether a measured difference matters to students and service decisions. [Concept: Outcome indicator and Practical significance]

0470. B - Practical significance [Concept: Practical significance]

0471. C - Outcome evaluation: Assessment of changes or results associated with a program's goals. / Implementation fidelity: The extent to which program components are delivered as intended. [Concept: Outcome evaluation and Implementation fidelity]

0472. C - Checking who received the intervention and whether it was delivered as planned. [Concept: Process evaluation]

0473. C - Implementation fidelity [Concept: Implementation fidelity]

0474. C - Outcome indicator: Selecting a defined measure that reflects the program's stated goal. / Continuous quality improvement: Testing a small improvement, reviewing results, and adjusting the next cycle. [Concept: Outcome indicator and Continuous quality improvement]

0475. C - Logic model [Concept: Logic model]

0476. C - Logic model [Concept: Logic model]

0477. A - Logic model: Showing how staff and activities are expected to lead to measurable youth outcomes. / Implementation fidelity: Documenting delivery of core components before interpreting outcome differences. [Concept: Logic model and Implementation fidelity]

0478. C - Reach: The proportion and characteristics of the intended population engaged by a program. / Outcome indicator: A measurable variable used as evidence of progress toward a specified outcome. [Concept: Reach and Outcome indicator]

0479. B - Formative evaluation: Evaluation conducted during program development or implementation to improve delivery. / Continuous quality improvement: An iterative use of data to identify changes, test them, and refine service delivery. [Concept: Formative evaluation and Continuous quality improvement]

0480. B - Practical significance [Concept: Practical significance]

0481. B - Logic model: Showing how staff and activities are expected to lead to measurable youth outcomes. / Outcome evaluation: Measuring change in the student outcome the program was designed to influence. [Concept: Logic model and Outcome evaluation]

0482. C - Practical significance [Concept: Practical significance]

0483. C - Outcome evaluation [Concept: Outcome evaluation]

0484. D - Summative evaluation [Concept: Summative evaluation]

0485. C - Outcome evaluation: Measuring change in the student outcome the program was designed to influence. / Continuous quality improvement: Testing a small improvement, reviewing results, and adjusting the next cycle. [Concept: Outcome evaluation and Continuous quality improvement]

0486. D - Process evaluation: Checking who received the intervention and whether it was delivered as planned. / Continuous quality improvement: Testing a small improvement, reviewing results, and adjusting the next cycle. [Concept: Process evaluation and Continuous quality improvement]

0487. B - Logic model: Showing how staff and activities are expected to lead to measurable youth outcomes. / Continuous quality improvement: Testing a small improvement, reviewing results, and adjusting the next cycle. [Concept: Logic model and Continuous quality improvement]

0488. C - Outcome indicator [Concept: Outcome indicator]

0489. A - Process evaluation: Assessment of how a program was implemented, including reach, dose, fidelity, and context. / Reach: The proportion and characteristics of the intended population engaged by a program. [Concept: Process evaluation and Reach]

0490. B - Implementation fidelity: The extent to which program components are delivered as intended. / Outcome indicator: A measurable variable used as evidence of progress toward a specified outcome. [Concept: Implementation fidelity and Outcome indicator]

0491. C - Summative evaluation [Concept: Summative evaluation]

0492. B - Formative evaluation [Concept: Formative evaluation]

0493. D - Outcome indicator: A measurable variable used as evidence of progress toward a specified outcome. / Continuous quality improvement: An iterative use of data to identify changes, test them, and refine service delivery. [Concept: Outcome indicator and Continuous quality improvement]

0494. D - Outcome indicator [Concept: Outcome indicator]

0495. D - Formative evaluation: Evaluation conducted during program development or implementation to improve delivery. / Process evaluation: Assessment of how a program was implemented, including reach, dose, fidelity, and context. [Concept: Formative evaluation and Process evaluation]

0496. B - Implementation fidelity: Documenting delivery of core components before interpreting outcome differences. / Practical significance: Asking whether a measured difference matters to students and service decisions. [Concept: Implementation fidelity and Practical significance]

0497. C - Summative evaluation: Assessing whether a completed program achieved its stated goals. / Outcome indicator: Selecting a defined measure that reflects the program's stated goal. [Concept: Summative evaluation and Outcome indicator]

0498. C - Practical significance [Concept: Practical significance]

0499. A - Logic model: A visual or narrative map linking program resources, activities, outputs, and intended outcomes. / Continuous quality improvement: An iterative use of data to identify changes, test them, and refine service delivery. [Concept: Logic model and Continuous quality improvement]

0500. B - Outcome evaluation: Measuring change in the student outcome the program was designed to influence. / Outcome indicator: Selecting a defined measure that reflects the program's stated goal. [Concept: Outcome evaluation and Outcome indicator]

0501. D - Outcome indicator: A measurable variable used as evidence of progress toward a specified outcome. / Practical significance: The real-world importance or usefulness of an observed change, beyond statistical detectability. [Concept: Outcome indicator and Practical significance]

0502. B - Reach: Comparing participants with the target population to identify who is not being reached. / Practical significance: Asking whether a measured difference matters to students and service decisions. [Concept: Reach and Practical significance]

CAC.930 | Program Evaluation and Outcome Measurement

QUESTION | CORRECT OPTION AND CONCEPT

0503. B - Process evaluation: Assessment of how a program was implemented, including reach, dose, fidelity, and context. / Implementation fidelity: The extent to which program components are delivered as intended. [Concept: Process evaluation and Implementation fidelity]

0504. C - Showing how staff and activities are expected to lead to measurable youth outcomes. [Concept: Logic model]

0505. A - Outcome evaluation: Assessment of changes or results associated with a program's goals. / Practical significance: The real-world importance or usefulness of an observed change, beyond statistical detectability. [Concept: Outcome evaluation and Practical significance]

0506. D - Implementation fidelity: Documenting delivery of core components before interpreting outcome differences. / Practical significance: Asking whether a measured difference matters to students and service decisions. [Concept: Implementation fidelity and Practical significance]

0507. D - Implementation fidelity: The extent to which program components are delivered as intended. / Reach: The proportion and characteristics of the intended population engaged by a program. [Concept: Implementation fidelity and Reach]

0508. A - Outcome evaluation: Assessment of changes or results associated with a program's goals. / Reach: The proportion and characteristics of the intended population engaged by a program. [Concept: Outcome evaluation and Reach]

0509. B - Process evaluation: Assessment of how a program was implemented, including reach, dose, fidelity, and context. / Outcome evaluation: Assessment of changes or results associated with a program's goals. [Concept: Process evaluation and Outcome evaluation]

0510. B - Outcome evaluation [Concept: Outcome evaluation]

0511. A - Implementation fidelity: The extent to which program components are delivered as intended. / Outcome indicator: A measurable variable used as evidence of progress toward a specified outcome. [Concept: Implementation fidelity and Outcome indicator]

0512. D - Implementation fidelity: Documenting delivery of core components before interpreting outcome differences. / Outcome indicator: Selecting a defined measure that reflects the program's stated goal. [Concept: Implementation fidelity and Outcome indicator]

0513. D - Logic model [Concept: Logic model]

0514. D - Formative evaluation [Concept: Formative evaluation]

0515. A - Process evaluation: Checking who received the intervention and whether it was delivered as planned. / Outcome indicator: Selecting a defined measure that reflects the program's stated goal. [Concept: Process evaluation and Outcome indicator]

0516. B - Reach [Concept: Reach]

0517. D - Checking who received the intervention and whether it was delivered as planned. [Concept: Process evaluation]

0518. C - Logic model: Showing how staff and activities are expected to lead to measurable youth outcomes. / Practical significance: Asking whether a measured difference matters to students and service decisions. [Concept: Logic model and Practical significance]

0519. C - Formative evaluation [Concept: Formative evaluation]

0520. D - Formative evaluation [Concept: Formative evaluation]

0521. B - Reach [Concept: Reach]

0522. C - Continuous quality improvement [Concept: Continuous quality improvement]

0523. C - Logic model [Concept: Logic model]

0524. C - Formative evaluation: Evaluation conducted during program development or implementation to improve delivery. / Outcome indicator: A measurable variable used as evidence of progress toward a specified outcome. [Concept: Formative evaluation and Outcome indicator]

0525. C - Reach [Concept: Reach]

0526. D - Logic model [Concept: Logic model]

0527. D - Implementation fidelity [Concept: Implementation fidelity]

0528. B - Reach [Concept: Reach]

0529. A - Formative evaluation: Evaluation conducted during program development or implementation to improve delivery. / Process evaluation: Assessment of how a program was implemented, including reach, dose, fidelity, and context. [Concept: Formative evaluation and Process evaluation]

0530. C - Outcome indicator [Concept: Outcome indicator]

0531. B - Practical significance [Concept: Practical significance]

0532. C - Continuous quality improvement [Concept: Continuous quality improvement]

0533. A - Process evaluation [Concept: Process evaluation]

0534. D - Implementation fidelity: Documenting delivery of core components before interpreting outcome differences. / Practical significance: Asking whether a measured difference matters to students and service decisions. [Concept: Implementation fidelity and Practical significance]

0535. D - Outcome evaluation: Measuring change in the student outcome the program was designed to influence. / Reach: Comparing participants with the target population to identify who is not being reached. [Concept: Outcome evaluation and Reach]

0536. C - Outcome indicator: Selecting a defined measure that reflects the program's stated goal. / Practical significance: Asking whether a measured difference matters to students and service decisions. [Concept: Outcome indicator and Practical significance]

0537. C - Practical significance [Concept: Practical significance]

0538. B - Process evaluation [Concept: Process evaluation]

0539. D - Process evaluation [Concept: Process evaluation]

0540. B - Implementation fidelity [Concept: Implementation fidelity]

0541. B - Logic model [Concept: Logic model]

0542. A - Outcome evaluation: Assessment of changes or results associated with a program's goals. / Continuous quality improvement: An iterative use of data to identify changes, test them, and refine service delivery. [Concept: Outcome evaluation and Continuous quality improvement]

0543. C - Reach: Comparing participants with the target population to identify who is not being reached. / Outcome indicator: Selecting a defined measure that reflects the program's stated goal. [Concept: Reach and Outcome indicator]

0544. A - Summative evaluation: Evaluation that judges a program's overall merit, effectiveness, or outcomes after implementation. / Practical significance: The real-world importance or usefulness of an observed change, beyond statistical detectability. [Concept: Summative evaluation and Practical significance]

0545. D - Outcome indicator [Concept: Outcome indicator]

0546. C - Summative evaluation [Concept: Summative evaluation]

0547. D - Summative evaluation: Assessing whether a completed program achieved its stated goals. / Practical significance: Asking whether a measured difference matters to students and service decisions. [Concept: Summative evaluation and Practical significance]

0548. A - Asking whether a measured difference matters to students and service decisions. [Concept: Practical significance]

0549. B - Outcome evaluation [Concept: Outcome evaluation]

0550. D - Process evaluation: Assessment of how a program was implemented, including reach, dose, fidelity, and context. / Implementation fidelity: The extent to which program components are delivered as intended. [Concept: Process evaluation and Implementation fidelity]

0551. B - Evaluation that judges a program's overall merit, effectiveness, or outcomes after implementation. [Concept: Summative evaluation]

0552. B - Outcome evaluation: Assessment of changes or results associated with a program's goals. / Reach: The proportion and characteristics of the intended population engaged by a program. [Concept: Outcome evaluation and Reach]

0553. A - Implementation fidelity: The extent to which program components are delivered as intended. / Outcome indicator: A measurable variable used as evidence of progress toward a specified outcome. [Concept: Implementation fidelity and Outcome indicator]

0554. A - Logic model [Concept: Logic model]

0555. D - Process evaluation: Assessment of how a program was implemented, including reach, dose, fidelity, and context. / Practical significance: The real-world importance or usefulness of an observed change, beyond statistical detectability. [Concept: Process evaluation and Practical significance]

0556. C - Process evaluation [Concept: Process evaluation]

0557. B - Logic model [Concept: Logic model]

0558. C - Formative evaluation [Concept: Formative evaluation]

0559. D - Formative evaluation [Concept: Formative evaluation]

0560. D - Outcome evaluation: Measuring change in the student outcome the program was designed to influence. / Continuous quality improvement: Testing a small improvement, reviewing results, and adjusting the next cycle. [Concept: Outcome evaluation and Continuous quality improvement]

0561. D - The extent to which program components are delivered as intended. [Concept: Implementation fidelity]

0562. B - Logic model: A visual or narrative map linking program resources, activities, outputs, and intended outcomes. / Formative evaluation: Evaluation conducted during program development or implementation to improve delivery. [Concept: Logic model and Formative evaluation]

0563. C - Logic model [Concept: Logic model]

0564. B - The extent to which program components are delivered as intended. [Concept: Implementation fidelity]

0565. C - Formative evaluation: Evaluation conducted during program development or implementation to improve delivery. / Reach: The proportion and characteristics of the intended population engaged by a program. [Concept: Formative evaluation and Reach]

0566. D - Logic model [Concept: Logic model]

0567. A - Logic model [Concept: Logic model]

CAC.930 | Program Evaluation and Outcome Measurement

QUESTION | CORRECT OPTION AND CONCEPT

0568. C - Reach [Concept: Reach]

0569. D - Summative evaluation [Concept: Summative evaluation]

0570. C - Summative evaluation [Concept: Summative evaluation]

0571. D - Implementation fidelity: The extent to which program components are delivered as intended. / Reach: The proportion and characteristics of the intended population engaged by a program. [Concept: Implementation fidelity and Reach]

0572. C - Reach [Concept: Reach]

0573. C - Formative evaluation: Evaluation conducted during program development or implementation to improve delivery. / Outcome evaluation: Assessment of changes or results associated with a program's goals. [Concept: Formative evaluation and Outcome evaluation]

0574. B - Logic model [Concept: Logic model]

0575. C - Outcome evaluation: Measuring change in the student outcome the program was designed to influence. / Practical significance: Asking whether a measured difference matters to students and service decisions. [Concept: Outcome evaluation and Practical significance]

0576. C - Reach [Concept: Reach]

0577. C - Summative evaluation: Assessing whether a completed program achieved its stated goals. / Outcome evaluation: Measuring change in the student outcome the program was designed to influence. [Concept: Summative evaluation and Outcome evaluation]

0578. C - Formative evaluation: Collecting early feedback to refine a new group before full-scale implementation. / Practical significance: Asking whether a measured difference matters to students and service decisions. [Concept: Formative evaluation and Practical significance]

0579. A - Reach [Concept: Reach]

0580. A - Logic model [Concept: Logic model]

0581. D - Outcome evaluation [Concept: Outcome evaluation]

0582. B - Formative evaluation: Evaluation conducted during program development or implementation to improve delivery. / Reach: The proportion and characteristics of the intended population engaged by a program. [Concept: Formative evaluation and Reach]

0583. D - Summative evaluation: Evaluation that judges a program's overall merit, effectiveness, or outcomes after implementation. / Practical significance: The real-world importance or usefulness of an observed change, beyond statistical detectability. [Concept: Summative evaluation and Practical significance]

0584. C - Logic model: A visual or narrative map linking program resources, activities, outputs, and intended outcomes. / Process evaluation: Assessment of how a program was implemented, including reach, dose, fidelity, and context. [Concept: Logic model and Process evaluation]

0585. C - Formative evaluation: Evaluation conducted during program development or implementation to improve delivery. / Reach: The proportion and characteristics of the intended population engaged by a program. [Concept: Formative evaluation and Reach]

0586. C - Outcome indicator: Selecting a defined measure that reflects the program's stated goal. / Continuous quality improvement: Testing a small improvement, reviewing results, and adjusting the next cycle. [Concept: Outcome indicator and Continuous quality improvement]

0587. B - Summative evaluation [Concept: Summative evaluation]

0588. A - Outcome evaluation [Concept: Outcome evaluation]

0589. C - Formative evaluation: Collecting early feedback to refine a new group before full-scale implementation. / Process evaluation: Checking who received the intervention and whether it was delivered as planned. [Concept: Formative evaluation and Process evaluation]

0590. D - Reach: The proportion and characteristics of the intended population engaged by a program. / Practical significance: The real-world importance or usefulness of an observed change, beyond statistical detectability. [Concept: Reach and Practical significance]

0591. A - Practical significance [Concept: Practical significance]

0592. B - Reach [Concept: Reach]

0593. C - Formative evaluation: Evaluation conducted during program development or implementation to improve delivery. / Implementation fidelity: The extent to which program components are delivered as intended. [Concept: Formative evaluation and Implementation fidelity]

0594. A - Implementation fidelity: Documenting delivery of core components before interpreting outcome differences. / Continuous quality improvement: Testing a small improvement, reviewing results, and adjusting the next cycle. [Concept: Implementation fidelity and Continuous quality improvement]

0595. A - Reach [Concept: Reach]

0596. C - A visual or narrative map linking program resources, activities, outputs, and intended outcomes. [Concept: Logic model]

0597. A - Practical significance [Concept: Practical significance]

0598. A - Summative evaluation: Assessing whether a completed program achieved its stated goals. / Practical significance: Asking whether a measured difference matters to students and service decisions. [Concept: Summative evaluation and Practical significance]

0599. C - Formative evaluation: Collecting early feedback to refine a new group before full-scale implementation. / Summative evaluation: Assessing whether a completed program achieved its stated goals. [Concept: Formative evaluation and Summative evaluation]

0600. B - Logic model [Concept: Logic model]

0601. B - Summative evaluation: Evaluation that judges a program's overall merit, effectiveness, or outcomes after implementation. / Implementation fidelity: The extent to which program components are delivered as intended. [Concept: Summative evaluation and Implementation fidelity]

0602. A - Summative evaluation: Assessing whether a completed program achieved its stated goals. / Continuous quality improvement: Testing a small improvement, reviewing results, and adjusting the next cycle. [Concept: Summative evaluation and Continuous quality improvement]

0603. D - Summative evaluation: Evaluation that judges a program's overall merit, effectiveness, or outcomes after implementation. / Outcome evaluation: Assessment of changes or results associated with a program's goals. [Concept: Summative evaluation and Outcome evaluation]

0604. C - The proportion and characteristics of the intended population engaged by a program. [Concept: Reach]

0605. A - Formative evaluation [Concept: Formative evaluation]

0606. B - Summative evaluation: Assessing whether a completed program achieved its stated goals. / Practical significance: Asking whether a measured difference matters to students and service decisions. [Concept: Summative evaluation and Practical significance]

0607. D - Formative evaluation: Evaluation conducted during program development or implementation to improve delivery. / Outcome evaluation: Assessment of changes or results associated with a program's goals. [Concept: Formative evaluation and Outcome evaluation]

0608. A - Logic model [Concept: Logic model]

0609. B - Implementation fidelity [Concept: Implementation fidelity]

0610. C - Showing how staff and activities are expected to lead to measurable youth outcomes. [Concept: Logic model]

0611. A - The proportion and characteristics of the intended population engaged by a program. [Concept: Reach]

0612. D - Formative evaluation: Collecting early feedback to refine a new group before full-scale implementation. / Outcome evaluation: Measuring change in the student outcome the program was designed to influence. [Concept: Formative evaluation and Outcome evaluation]

0613. A - Formative evaluation [Concept: Formative evaluation]

0614. B - Summative evaluation [Concept: Summative evaluation]

0615. C - Process evaluation [Concept: Process evaluation]

0616. D - Logic model: Showing how staff and activities are expected to lead to measurable youth outcomes. / Reach: Comparing participants with the target population to identify who is not being reached. [Concept: Logic model and Reach]

0617. B - Process evaluation: Checking who received the intervention and whether it was delivered as planned. / Outcome indicator: Selecting a defined measure that reflects the program's stated goal. [Concept: Process evaluation and Outcome indicator]

0618. C - Outcome indicator [Concept: Outcome indicator]

0619. C - Logic model: Showing how staff and activities are expected to lead to measurable youth outcomes. / Outcome indicator: Selecting a defined measure that reflects the program's stated goal. [Concept: Logic model and Outcome indicator]

0620. A - Process evaluation: Assessment of how a program was implemented, including reach, dose, fidelity, and context. / Reach: The proportion and characteristics of the intended population engaged by a program. [Concept: Process evaluation and Reach]

0621. A - Outcome indicator: A measurable variable used as evidence of progress toward a specified outcome. / Continuous quality improvement: An iterative use of data to identify changes, test them, and refine service delivery. [Concept: Outcome indicator and Continuous quality improvement]

0622. D - Practical significance [Concept: Practical significance]

0623. A - Logic model [Concept: Logic model]

0624. D - Practical significance [Concept: Practical significance]

0625. C - Reach: Comparing participants with the target population to identify who is not being reached. / Practical significance: Asking whether a measured difference matters to students and service decisions. [Concept: Reach and Practical significance]

0626. D - Continuous quality improvement [Concept: Continuous quality improvement]

CAC.930 | Program Evaluation and Outcome Measurement

QUESTION | CORRECT OPTION AND CONCEPT

0627. A - Logic model: A visual or narrative map linking program resources, activities, outputs, and intended outcomes. / Process evaluation: Assessment of how a program was implemented, including reach, dose, fidelity, and context. [Concept: Logic model and Process evaluation]

0628. C - Practical significance [Concept: Practical significance]

0629. D - Practical significance [Concept: Practical significance]

0630. B - Comparing participants with the target population to identify who is not being reached. [Concept: Reach]

0631. B - Formative evaluation: Evaluation conducted during program development or implementation to improve delivery. / Outcome indicator: A measurable variable used as evidence of progress toward a specified outcome. [Concept: Formative evaluation and Outcome indicator]

0632. A - Reach: The proportion and characteristics of the intended population engaged by a program. / Practical significance: The real-world importance or usefulness of an observed change, beyond statistical detectability. [Concept: Reach and Practical significance]

0633. B - Outcome indicator: Selecting a defined measure that reflects the program's stated goal. / Practical significance: Asking whether a measured difference matters to students and service decisions. [Concept: Outcome indicator and Practical significance]

0634. B - Process evaluation: Assessment of how a program was implemented, including reach, dose, fidelity, and context. / Outcome indicator: A measurable variable used as evidence of progress toward a specified outcome. [Concept: Process evaluation and Outcome indicator]

0635. A - Logic model: A visual or narrative map linking program resources, activities, outputs, and intended outcomes. / Implementation fidelity: The extent to which program components are delivered as intended. [Concept: Logic model and Implementation fidelity]

0636. B - Logic model: A visual or narrative map linking program resources, activities, outputs, and intended outcomes. / Formative evaluation: Evaluation conducted during program development or implementation to improve delivery. [Concept: Logic model and Formative evaluation]

0637. B - Practical significance [Concept: Practical significance]

0638. D - Implementation fidelity [Concept: Implementation fidelity]

0639. D - Outcome indicator [Concept: Outcome indicator]

0640. C - Logic model: Showing how staff and activities are expected to lead to measurable youth outcomes. / Practical significance: Asking whether a measured difference matters to students and service decisions. [Concept: Logic model and Practical significance]

0641. A - Logic model: Showing how staff and activities are expected to lead to measurable youth outcomes. / Continuous quality improvement: Testing a small improvement, reviewing results, and adjusting the next cycle. [Concept: Logic model and Continuous quality improvement]

0642. D - Logic model [Concept: Logic model]

0643. D - Continuous quality improvement [Concept: Continuous quality improvement]

0644. D - Reach [Concept: Reach]

0645. C - Summative evaluation [Concept: Summative evaluation]

0646. B - Process evaluation [Concept: Process evaluation]

0647. C - Testing a small improvement, reviewing results, and adjusting the next cycle. [Concept: Continuous quality improvement]

0648. D - The proportion and characteristics of the intended population engaged by a program. [Concept: Reach]

0649. C - Logic model: Showing how staff and activities are expected to lead to measurable youth outcomes. / Process evaluation: Checking who received the intervention and whether it was delivered as planned. [Concept: Logic model and Process evaluation]

0650. D - Reach: The proportion and characteristics of the intended population engaged by a program. / Outcome indicator: A measurable variable used as evidence of progress toward a specified outcome. [Concept: Reach and Outcome indicator]

0651. D - Formative evaluation: Evaluation conducted during program development or implementation to improve delivery. / Outcome indicator: A measurable variable used as evidence of progress toward a specified outcome. [Concept: Formative evaluation and Outcome indicator]

0652. A - Implementation fidelity: The extent to which program components are delivered as intended. / Reach: The proportion and characteristics of the intended population engaged by a program. [Concept: Implementation fidelity and Reach]

0653. C - Outcome evaluation [Concept: Outcome evaluation]

0654. A - Formative evaluation: Collecting early feedback to refine a new group before full-scale implementation. / Process evaluation: Checking who received the intervention and whether it was delivered as planned. [Concept: Formative evaluation and Process evaluation]

0655. D - Summative evaluation: Assessing whether a completed program achieved its stated goals. / Process evaluation: Checking who received the intervention and whether it was delivered as planned. [Concept: Summative evaluation and Process evaluation]

0656. A - Summative evaluation [Concept: Summative evaluation]

0657. D - Continuous quality improvement [Concept: Continuous quality improvement]

0658. B - Formative evaluation [Concept: Formative evaluation]

0659. C - Practical significance: The real-world importance or usefulness of an observed change, beyond statistical detectability. / Continuous quality improvement: An iterative use of data to identify changes, test them, and refine service delivery. [Concept: Practical significance and Continuous quality improvement]

0660. D - Testing a small improvement, reviewing results, and adjusting the next cycle. [Concept: Continuous quality improvement]

0661. B - Process evaluation [Concept: Process evaluation]

0662. C - Logic model [Concept: Logic model]

0663. D - Outcome evaluation [Concept: Outcome evaluation]

0664. A - Summative evaluation [Concept: Summative evaluation]

0665. B - Outcome indicator [Concept: Outcome indicator]

0666. B - Implementation fidelity: Documenting delivery of core components before interpreting outcome differences. / Practical significance: Asking whether a measured difference matters to students and service decisions. [Concept: Implementation fidelity and Practical significance]

0667. B - Assessing whether a completed program achieved its stated goals. [Concept: Summative evaluation]

0668. C - Reach [Concept: Reach]

0669. A - Summative evaluation: Assessing whether a completed program achieved its stated goals. / Implementation fidelity: Documenting delivery of core components before interpreting outcome differences. [Concept: Summative evaluation and Implementation fidelity]

0670. A - Logic model [Concept: Logic model]

0671. A - Process evaluation [Concept: Process evaluation]

0672. A - Outcome evaluation: Measuring change in the student outcome the program was designed to influence. / Reach: Comparing participants with the target population to identify who is not being reached. [Concept: Outcome evaluation and Reach]

0673. B - Summative evaluation: Evaluation that judges a program's overall merit, effectiveness, or outcomes after implementation. / Continuous quality improvement: An iterative use of data to identify changes, test them, and refine service delivery. [Concept: Summative evaluation and Continuous quality improvement]

0674. C - Summative evaluation [Concept: Summative evaluation]

0675. B - Outcome evaluation [Concept: Outcome evaluation]

0676. C - Implementation fidelity: The extent to which program components are delivered as intended. / Reach: The proportion and characteristics of the intended population engaged by a program. [Concept: Implementation fidelity and Reach]

0677. D - Measuring change in the student outcome the program was designed to influence. [Concept: Outcome evaluation]

0678. D - Implementation fidelity [Concept: Implementation fidelity]

0679. A - Formative evaluation [Concept: Formative evaluation]

0680. A - Summative evaluation: Evaluation that judges a program's overall merit, effectiveness, or outcomes after implementation. / Outcome indicator: A measurable variable used as evidence of progress toward a specified outcome. [Concept: Summative evaluation and Outcome indicator]

0681. B - Practical significance [Concept: Practical significance]

0682. A - Outcome evaluation: Assessment of changes or results associated with a program's goals. / Practical significance: The real-world importance or usefulness of an observed change, beyond statistical detectability. [Concept: Outcome evaluation and Practical significance]

0683. C - Process evaluation: Checking who received the intervention and whether it was delivered as planned. / Continuous quality improvement: Testing a small improvement, reviewing results, and adjusting the next cycle. [Concept: Process evaluation and Continuous quality improvement]

0684. C - Outcome evaluation [Concept: Outcome evaluation]

0685. A - Summative evaluation: Assessing whether a completed program achieved its stated goals. / Outcome indicator: Selecting a defined measure that reflects the program's stated goal. [Concept: Summative evaluation and Outcome indicator]

0686. C - Logic model: Showing how staff and activities are expected to lead to measurable youth outcomes. / Outcome evaluation: Measuring change in the student outcome the program was designed to influence. [Concept: Logic model and Outcome evaluation]

0687. A - Logic model: A visual or narrative map linking program resources, activities, outputs, and intended outcomes. / Outcome indicator: A measurable variable used as evidence of progress toward a specified outcome. [Concept: Logic model and Outcome indicator]

0688. C - Reach [Concept: Reach]

0689. D - Logic model [Concept: Logic model]

0690. B - Summative evaluation [Concept: Summative evaluation]

0691. A - Logic model [Concept: Logic model]

CAC.930 | Program Evaluation and Outcome Measurement

QUESTION | CORRECT OPTION AND CONCEPT

0692. C - Continuous quality improvement [Concept: Continuous quality improvement]

0693. B - Process evaluation: Assessment of how a program was implemented, including reach, dose, fidelity, and context. / Practical significance: The real-world importance or usefulness of an observed change, beyond statistical detectability. [Concept: Process evaluation and Practical significance]

0694. D - Process evaluation: Assessment of how a program was implemented, including reach, dose, fidelity, and context. / Continuous quality improvement: An iterative use of data to identify changes, test them, and refine service delivery. [Concept: Process evaluation and Continuous quality improvement]

0695. A - Formative evaluation: Evaluation conducted during program development or implementation to improve delivery. / Summative evaluation: Evaluation that judges a program's overall merit, effectiveness, or outcomes after implementation. [Concept: Formative evaluation and Summative evaluation]

0696. A - Summative evaluation: Assessing whether a completed program achieved its stated goals. / Outcome evaluation: Measuring change in the student outcome the program was designed to influence. [Concept: Summative evaluation and Outcome evaluation]

0697. A - Outcome evaluation: Measuring change in the student outcome the program was designed to influence. / Outcome indicator: Selecting a defined measure that reflects the program's stated goal. [Concept: Outcome evaluation and Outcome indicator]

0698. D - Formative evaluation: Collecting early feedback to refine a new group before full-scale implementation. / Reach: Comparing participants with the target population to identify who is not being reached. [Concept: Formative evaluation and Reach]

0699. D - Assessing whether a completed program achieved its stated goals. [Concept: Summative evaluation]

0700. C - Outcome indicator [Concept: Outcome indicator]

0701. A - Summative evaluation: Assessing whether a completed program achieved its stated goals. / Reach: Comparing participants with the target population to identify who is not being reached. [Concept: Summative evaluation and Reach]

0702. D - Process evaluation: Checking who received the intervention and whether it was delivered as planned. / Practical significance: Asking whether a measured difference matters to students and service decisions. [Concept: Process evaluation and Practical significance]

0703. C - Formative evaluation: Collecting early feedback to refine a new group before full-scale implementation. / Reach: Comparing participants with the target population to identify who is not being reached. [Concept: Formative evaluation and Reach]

0704. D - Process evaluation: Assessment of how a program was implemented, including reach, dose, fidelity, and context. / Implementation fidelity: The extent to which program components are delivered as intended. [Concept: Process evaluation and Implementation fidelity]

0705. C - Process evaluation: Checking who received the intervention and whether it was delivered as planned. / Outcome evaluation: Measuring change in the student outcome the program was designed to influence. [Concept: Process evaluation and Outcome evaluation]

0706. A - Continuous quality improvement [Concept: Continuous quality improvement]

0707. D - Process evaluation [Concept: Process evaluation]

0708. D - Implementation fidelity [Concept: Implementation fidelity]

0709. D - Summative evaluation [Concept: Summative evaluation]

0710. B - Implementation fidelity [Concept: Implementation fidelity]

0711. A - Formative evaluation: Collecting early feedback to refine a new group before full-scale implementation. / Implementation fidelity: Documenting delivery of core components before interpreting outcome differences. [Concept: Formative evaluation and Implementation fidelity]

0712. D - Summative evaluation [Concept: Summative evaluation]

0713. C - Continuous quality improvement [Concept: Continuous quality improvement]

0714. B - Outcome evaluation [Concept: Outcome evaluation]

0715. A - Practical significance [Concept: Practical significance]

0716. A - Summative evaluation: Assessing whether a completed program achieved its stated goals. / Implementation fidelity: Documenting delivery of core components before interpreting outcome differences. [Concept: Summative evaluation and Implementation fidelity]

0717. D - Implementation fidelity: Documenting delivery of core components before interpreting outcome differences. / Continuous quality improvement: Testing a small improvement, reviewing results, and adjusting the next cycle. [Concept: Implementation fidelity and Continuous quality improvement]

0718. B - Formative evaluation: Evaluation conducted during program development or implementation to improve delivery. / Outcome indicator: A measurable variable used as evidence of progress toward a specified outcome. [Concept: Formative evaluation and Outcome indicator]

0719. A - Comparing participants with the target population to identify who is not being reached. [Concept: Reach]

0720. A - Summative evaluation [Concept: Summative evaluation]

0721. D - Summative evaluation [Concept: Summative evaluation]

0722. D - Measuring change in the student outcome the program was designed to influence. [Concept: Outcome evaluation]

0723. C - Implementation fidelity [Concept: Implementation fidelity]

0724. D - Logic model: A visual or narrative map linking program resources, activities, outputs, and intended outcomes. / Practical significance: The real-world importance or usefulness of an observed change, beyond statistical detectability. [Concept: Logic model and Practical significance]

0725. C - The proportion and characteristics of the intended population engaged by a program. [Concept: Reach]

0726. C - Process evaluation [Concept: Process evaluation]

0727. D - Summative evaluation: Assessing whether a completed program achieved its stated goals. / Implementation fidelity: Documenting delivery of core components before interpreting outcome differences. [Concept: Summative evaluation and Implementation fidelity]

0728. A - Implementation fidelity [Concept: Implementation fidelity]

0729. B - Reach: The proportion and characteristics of the intended population engaged by a program. / Practical significance: The real-world importance or usefulness of an observed change, beyond statistical detectability. [Concept: Reach and Practical significance]

0730. D - Summative evaluation: Assessing whether a completed program achieved its stated goals. / Reach: Comparing participants with the target population to identify who is not being reached. [Concept: Summative evaluation and Reach]

0731. C - Process evaluation: Checking who received the intervention and whether it was delivered as planned. / Outcome evaluation: Measuring change in the student outcome the program was designed to influence. [Concept: Process evaluation and Outcome evaluation]

0732. D - Summative evaluation: Evaluation that judges a program's overall merit, effectiveness, or outcomes after implementation. / Outcome evaluation: Assessment of changes or results associated with a program's goals. [Concept: Summative evaluation and Outcome evaluation]

0733. A - Continuous quality improvement [Concept: Continuous quality improvement]

0734. A - Process evaluation: Checking who received the intervention and whether it was delivered as planned. / Practical significance: Asking whether a measured difference matters to students and service decisions. [Concept: Process evaluation and Practical significance]

0735. C - Logic model: Showing how staff and activities are expected to lead to measurable youth outcomes. / Process evaluation: Checking who received the intervention and whether it was delivered as planned. [Concept: Logic model and Process evaluation]

0736. C - Formative evaluation: Evaluation conducted during program development or implementation to improve delivery. / Continuous quality improvement: An iterative use of data to identify changes, test them, and refine service delivery. [Concept: Formative evaluation and Continuous quality improvement]

0737. A - Reach [Concept: Reach]

0738. B - Logic model: A visual or narrative map linking program resources, activities, outputs, and intended outcomes. / Practical significance: The real-world importance or usefulness of an observed change, beyond statistical detectability. [Concept: Logic model and Practical significance]

0739. D - Implementation fidelity: Documenting delivery of core components before interpreting outcome differences. / Reach: Comparing participants with the target population to identify who is not being reached. [Concept: Implementation fidelity and Reach]

0740. B - Process evaluation: Assessment of how a program was implemented, including reach, dose, fidelity, and context. / Implementation fidelity: The extent to which program components are delivered as intended. [Concept: Process evaluation and Implementation fidelity]

0741. A - Reach [Concept: Reach]

0742. C - Logic model: Showing how staff and activities are expected to lead to measurable youth outcomes. / Practical significance: Asking whether a measured difference matters to students and service decisions. [Concept: Logic model and Practical significance]

0743. D - Formative evaluation: Evaluation conducted during program development or implementation to improve delivery. / Implementation fidelity: The extent to which program components are delivered as intended. [Concept: Formative evaluation and Implementation fidelity]

0744. A - Outcome evaluation [Concept: Outcome evaluation]

0745. D - Outcome indicator [Concept: Outcome indicator]

0746. D - Logic model: A visual or narrative map linking program resources, activities, outputs, and intended outcomes. / Summative evaluation: Evaluation that judges a program's overall merit, effectiveness, or outcomes after implementation. [Concept: Logic model and Summative evaluation]

0747. C - Logic model: Showing how staff and activities are expected to lead to measurable youth outcomes. / Summative evaluation: Assessing whether a completed program achieved its stated goals. [Concept: Logic model and Summative evaluation]

0748. D - Logic model [Concept: Logic model]

CAC.930 | Program Evaluation and Outcome Measurement

QUESTION | CORRECT OPTION AND CONCEPT

0749. C - Summative evaluation: Assessing whether a completed program achieved its stated goals. / Outcome evaluation: Measuring change in the student outcome the program was designed to influence. [Concept: Summative evaluation and Outcome evaluation]

0750. A - Summative evaluation: Assessing whether a completed program achieved its stated goals. / Practical significance: Asking whether a measured difference matters to students and service decisions. [Concept: Summative evaluation and Practical significance]

0751. C - Formative evaluation: Collecting early feedback to refine a new group before full-scale implementation. / Reach: Comparing participants with the target population to identify who is not being reached. [Concept: Formative evaluation and Reach]

0752. D - Continuous quality improvement [Concept: Continuous quality improvement]

0753. A - Outcome evaluation: Assessment of changes or results associated with a program's goals. / Implementation fidelity: The extent to which program components are delivered as intended. [Concept: Outcome evaluation and Implementation fidelity]

0754. A - Outcome indicator [Concept: Outcome indicator]

0755. C - Summative evaluation [Concept: Summative evaluation]

0756. A - Implementation fidelity: Documenting delivery of core components before interpreting outcome differences. / Practical significance: Asking whether a measured difference matters to students and service decisions. [Concept: Implementation fidelity and Practical significance]

0757. C - Implementation fidelity: The extent to which program components are delivered as intended. / Outcome indicator: A measurable variable used as evidence of progress toward a specified outcome. [Concept: Implementation fidelity and Outcome indicator]

0758. D - Outcome evaluation: Assessment of changes or results associated with a program's goals. / Practical significance: The real-world importance or usefulness of an observed change, beyond statistical detectability. [Concept: Outcome evaluation and Practical significance]

0759. B - Practical significance: Asking whether a measured difference matters to students and service decisions. / Continuous quality improvement: Testing a small improvement, reviewing results, and adjusting the next cycle. [Concept: Practical significance and Continuous quality improvement]

0760. A - Summative evaluation: Assessing whether a completed program achieved its stated goals. / Outcome evaluation: Measuring change in the student outcome the program was designed to influence. [Concept: Summative evaluation and Outcome evaluation]

0761. A - Formative evaluation [Concept: Formative evaluation]

0762. A - Implementation fidelity: The extent to which program components are delivered as intended. / Continuous quality improvement: An iterative use of data to identify changes, test them, and refine service delivery. [Concept: Implementation fidelity and Continuous quality improvement]

0763. D - Logic model: A visual or narrative map linking program resources, activities, outputs, and intended outcomes. / Reach: The proportion and characteristics of the intended population engaged by a program. [Concept: Logic model and Reach]

0764. D - Reach [Concept: Reach]

0765. B - Implementation fidelity: Documenting delivery of core components before interpreting outcome differences. / Outcome indicator: Selecting a defined measure that reflects the program's stated goal. [Concept: Implementation fidelity and Outcome indicator]

0766. B - Formative evaluation [Concept: Formative evaluation]

0767. C - Outcome evaluation: Assessment of changes or results associated with a program's goals. / Outcome indicator: A measurable variable used as evidence of progress toward a specified outcome. [Concept: Outcome evaluation and Outcome indicator]

0768. D - Logic model: A visual or narrative map linking program resources, activities, outputs, and intended outcomes. / Practical significance: The real-world importance or usefulness of an observed change, beyond statistical detectability. [Concept: Logic model and Practical significance]

0769. C - Implementation fidelity: Documenting delivery of core components before interpreting outcome differences. / Continuous quality improvement: Testing a small improvement, reviewing results, and adjusting the next cycle. [Concept: Implementation fidelity and Continuous quality improvement]

0770. D - Outcome indicator [Concept: Outcome indicator]

0771. B - Logic model: A visual or narrative map linking program resources, activities, outputs, and intended outcomes. / Outcome evaluation: Assessment of changes or results associated with a program's goals. [Concept: Logic model and Outcome evaluation]

0772. C - Assessment of how a program was implemented, including reach, dose, fidelity, and context. [Concept: Process evaluation]

0773. D - Reach: Comparing participants with the target population to identify who is not being reached. / Outcome indicator: Selecting a defined measure that reflects the program's stated goal. [Concept: Reach and Outcome indicator]

0774. D - Outcome indicator: A measurable variable used as evidence of progress toward a specified outcome. / Practical significance: The real-world importance or usefulness of an observed change, beyond statistical detectability. [Concept: Outcome indicator and Practical significance]

0775. B - Summative evaluation: Evaluation that judges a program's overall merit, effectiveness, or outcomes after implementation. / Practical significance: The real-world importance or usefulness of an observed change, beyond statistical detectability. [Concept: Summative evaluation and Practical significance]

0776. D - Outcome evaluation [Concept: Outcome evaluation]

0777. A - Reach: The proportion and characteristics of the intended population engaged by a program. / Continuous quality improvement: An iterative use of data to identify changes, test them, and refine service delivery. [Concept: Reach and Continuous quality improvement]

0778. D - Outcome indicator [Concept: Outcome indicator]

0779. A - Outcome evaluation: Assessment of changes or results associated with a program's goals. / Continuous quality improvement: An iterative use of data to identify changes, test them, and refine service delivery. [Concept: Outcome evaluation and Continuous quality improvement]

0780. D - Process evaluation [Concept: Process evaluation]

0781. B - Process evaluation [Concept: Process evaluation]

0782. D - Logic model [Concept: Logic model]

0783. B - Process evaluation: Assessment of how a program was implemented, including reach, dose, fidelity, and context. / Practical significance: The real-world importance or usefulness of an observed change, beyond statistical detectability. [Concept: Process evaluation and Practical significance]

0784. B - Practical significance [Concept: Practical significance]

0785. B - Selecting a defined measure that reflects the program's stated goal. [Concept: Outcome indicator]

0786. D - Implementation fidelity [Concept: Implementation fidelity]

0787. A - Summative evaluation: Evaluation that judges a program's overall merit, effectiveness, or outcomes after implementation. / Implementation fidelity: The extent to which program components are delivered as intended. [Concept: Summative evaluation and Implementation fidelity]

0788. B - Logic model [Concept: Logic model]

0789. A - Reach [Concept: Reach]

0790. D - Formative evaluation [Concept: Formative evaluation]

0791. C - Summative evaluation [Concept: Summative evaluation]

0792. C - An iterative use of data to identify changes, test them, and refine service delivery. [Concept: Continuous quality improvement]

0793. A - Reach [Concept: Reach]

0794. A - Outcome evaluation [Concept: Outcome evaluation]

0795. B - Continuous quality improvement [Concept: Continuous quality improvement]

0796. D - Outcome evaluation: Assessment of changes or results associated with a program's goals. / Outcome indicator: A measurable variable used as evidence of progress toward a specified outcome. [Concept: Outcome evaluation and Outcome indicator]

0797. B - Outcome evaluation [Concept: Outcome evaluation]

0798. D - Continuous quality improvement [Concept: Continuous quality improvement]

0799. D - Outcome evaluation [Concept: Outcome evaluation]

0800. D - Logic model: Showing how staff and activities are expected to lead to measurable youth outcomes. / Implementation fidelity: Documenting delivery of core components before interpreting outcome differences. [Concept: Logic model and Implementation fidelity]

0801. B - Assessment of how a program was implemented, including reach, dose, fidelity, and context. [Concept: Process evaluation]

0802. A - Logic model: A visual or narrative map linking program resources, activities, outputs, and intended outcomes. / Continuous quality improvement: An iterative use of data to identify changes, test them, and refine service delivery. [Concept: Logic model and Continuous quality improvement]

0803. A - Logic model: Showing how staff and activities are expected to lead to measurable youth outcomes. / Outcome indicator: Selecting a defined measure that reflects the program's stated goal. [Concept: Logic model and Outcome indicator]

0804. C - Outcome evaluation: Assessment of changes or results associated with a program's goals. / Continuous quality improvement: An iterative use of data to identify changes, test them, and refine service delivery. [Concept: Outcome evaluation and Continuous quality improvement]

0805. A - Logic model: Showing how staff and activities are expected to lead to measurable youth outcomes. / Outcome evaluation: Measuring change in the student outcome the program was designed to influence. [Concept: Logic model and Outcome evaluation]

0806. A - Reach [Concept: Reach]

CAC.930 | Program Evaluation and Outcome Measurement

QUESTION | CORRECT OPTION AND CONCEPT

0807. A - Formative evaluation: Collecting early feedback to refine a new group before full-scale implementation. / Continuous quality improvement: Testing a small improvement, reviewing results, and adjusting the next cycle. [Concept: Formative evaluation and Continuous quality improvement]

0808. C - Formative evaluation: Evaluation conducted during program development or implementation to improve delivery. / Implementation fidelity: The extent to which program components are delivered as intended. [Concept: Formative evaluation and Implementation fidelity]

0809. D - Process evaluation [Concept: Process evaluation]

0810. C - Practical significance: Asking whether a measured difference matters to students and service decisions. / Continuous quality improvement: Testing a small improvement, reviewing results, and adjusting the next cycle. [Concept: Practical significance and Continuous quality improvement]

0811. B - Formative evaluation: Evaluation conducted during program development or implementation to improve delivery. / Implementation fidelity: The extent to which program components are delivered as intended. [Concept: Formative evaluation and Implementation fidelity]

0812. D - Outcome evaluation: Assessment of changes or results associated with a program's goals. / Practical significance: The real-world importance or usefulness of an observed change, beyond statistical detectability. [Concept: Outcome evaluation and Practical significance]

0813. D - Practical significance [Concept: Practical significance]

0814. D - Summative evaluation [Concept: Summative evaluation]

0815. A - Documenting delivery of core components before interpreting outcome differences. [Concept: Implementation fidelity]

0816. B - Summative evaluation: Evaluation that judges a program's overall merit, effectiveness, or outcomes after implementation. / Implementation fidelity: The extent to which program components are delivered as intended. [Concept: Summative evaluation and Implementation fidelity]

0817. B - Asking whether a measured difference matters to students and service decisions. [Concept: Practical significance]

0818. D - Outcome evaluation: Assessment of changes or results associated with a program's goals. / Outcome indicator: A measurable variable used as evidence of progress toward a specified outcome. [Concept: Outcome evaluation and Outcome indicator]

0819. B - Outcome indicator [Concept: Outcome indicator]

0820. D - Outcome evaluation: Measuring change in the student outcome the program was designed to influence. / Reach: Comparing participants with the target population to identify who is not being reached. [Concept: Outcome evaluation and Reach]

0821. D - Summative evaluation [Concept: Summative evaluation]

0822. C - Summative evaluation: Assessing whether a completed program achieved its stated goals. / Outcome evaluation: Measuring change in the student outcome the program was designed to influence. [Concept: Summative evaluation and Outcome evaluation]

0823. B - Formative evaluation [Concept: Formative evaluation]

0824. D - Practical significance [Concept: Practical significance]

0825. C - Continuous quality improvement [Concept: Continuous quality improvement]

0826. C - Reach [Concept: Reach]

0827. C - A visual or narrative map linking program resources, activities, outputs, and intended outcomes. [Concept: Logic model]

0828. B - Outcome indicator [Concept: Outcome indicator]

0829. B - Logic model: A visual or narrative map linking program resources, activities, outputs, and intended outcomes. / Implementation fidelity: The extent to which program components are delivered as intended. [Concept: Logic model and Implementation fidelity]

0830. A - Logic model: A visual or narrative map linking program resources, activities, outputs, and intended outcomes. / Process evaluation: Assessment of how a program was implemented, including reach, dose, fidelity, and context. [Concept: Logic model and Process evaluation]

0831. C - Reach: The proportion and characteristics of the intended population engaged by a program. / Continuous quality improvement: An iterative use of data to identify changes, test them, and refine service delivery. [Concept: Reach and Continuous quality improvement]

0832. C - Summative evaluation: Evaluation that judges a program's overall merit, effectiveness, or outcomes after implementation. / Outcome indicator: A measurable variable used as evidence of progress toward a specified outcome. [Concept: Summative evaluation and Outcome indicator]

0833. A - Outcome indicator [Concept: Outcome indicator]

0834. C - Logic model: Showing how staff and activities are expected to lead to measurable youth outcomes. / Reach: Comparing participants with the target population to identify who is not being reached. [Concept: Logic model and Reach]

0835. A - Reach: The proportion and characteristics of the intended population engaged by a program. / Continuous quality improvement: An iterative use of data to identify changes, test them, and refine service delivery. [Concept: Reach and Continuous quality improvement]

0836. C - Process evaluation: Checking who received the intervention and whether it was delivered as planned. / Practical significance: Asking whether a measured difference matters to students and service decisions. [Concept: Process evaluation and Practical significance]

0837. C - Formative evaluation: Evaluation conducted during program development or implementation to improve delivery. / Reach: The proportion and characteristics of the intended population engaged by a program. [Concept: Formative evaluation and Reach]

0838. D - Formative evaluation [Concept: Formative evaluation]

0839. B - Outcome indicator [Concept: Outcome indicator]

0840. C - Process evaluation: Assessment of how a program was implemented, including reach, dose, fidelity, and context. / Outcome evaluation: Assessment of changes or results associated with a program's goals. [Concept: Process evaluation and Outcome evaluation]

0841. A - Logic model: Showing how staff and activities are expected to lead to measurable youth outcomes. / Reach: Comparing participants with the target population to identify who is not being reached. [Concept: Logic model and Reach]

0842. C - Logic model: A visual or narrative map linking program resources, activities, outputs, and intended outcomes. / Outcome evaluation: Assessment of changes or results associated with a program's goals. [Concept: Logic model and Outcome evaluation]

0843. D - Formative evaluation [Concept: Formative evaluation]

0844. B - Practical significance [Concept: Practical significance]

0845. C - Outcome evaluation [Concept: Outcome evaluation]

0846. C - Outcome indicator: A measurable variable used as evidence of progress toward a specified outcome. / Practical significance: The real-world importance or usefulness of an observed change, beyond statistical detectability. [Concept: Outcome indicator and Practical significance]

0847. D - Formative evaluation [Concept: Formative evaluation]

0848. A - Summative evaluation: Assessing whether a completed program achieved its stated goals. / Continuous quality improvement: Testing a small improvement, reviewing results, and adjusting the next cycle. [Concept: Summative evaluation and Continuous quality improvement]

0849. D - Outcome evaluation: Measuring change in the student outcome the program was designed to influence. / Continuous quality improvement: Testing a small improvement, reviewing results, and adjusting the next cycle. [Concept: Outcome evaluation and Continuous quality improvement]

0850. C - Reach [Concept: Reach]

0851. D - Showing how staff and activities are expected to lead to measurable youth outcomes. [Concept: Logic model]

0852. A - Logic model: Showing how staff and activities are expected to lead to measurable youth outcomes. / Formative evaluation: Collecting early feedback to refine a new group before full-scale implementation. [Concept: Logic model and Formative evaluation]

0853. C - Continuous quality improvement [Concept: Continuous quality improvement]

0854. C - Implementation fidelity [Concept: Implementation fidelity]

0855. A - An iterative use of data to identify changes, test them, and refine service delivery. [Concept: Continuous quality improvement]

0856. D - Logic model: A visual or narrative map linking program resources, activities, outputs, and intended outcomes. / Formative evaluation: Evaluation conducted during program development or implementation to improve delivery. [Concept: Logic model and Formative evaluation]

0857. B - Summative evaluation: Assessing whether a completed program achieved its stated goals. / Reach: Comparing participants with the target population to identify who is not being reached. [Concept: Summative evaluation and Reach]

0858. D - Implementation fidelity [Concept: Implementation fidelity]

0859. A - Reach: Comparing participants with the target population to identify who is not being reached. / Continuous quality improvement: Testing a small improvement, reviewing results, and adjusting the next cycle. [Concept: Reach and Continuous quality improvement]

0860. A - Reach: The proportion and characteristics of the intended population engaged by a program. / Outcome indicator: A measurable variable used as evidence of progress toward a specified outcome. [Concept: Reach and Outcome indicator]

0861. D - Logic model [Concept: Logic model]

0862. C - Assessment of changes or results associated with a program's goals. [Concept: Outcome evaluation]

0863. C - Implementation fidelity [Concept: Implementation fidelity]

0864. C - Formative evaluation: Collecting early feedback to refine a new group before full-scale implementation. / Process evaluation: Checking who received the intervention and whether it was delivered as planned. [Concept: Formative evaluation and Process evaluation]

0865. D - Documenting delivery of core components before interpreting outcome differences. [Concept: Implementation fidelity]

0866. C - Implementation fidelity [Concept: Implementation fidelity]

CAC.930 | Program Evaluation and Outcome Measurement

QUESTION | CORRECT OPTION AND CONCEPT

0867. B - Logic model: Showing how staff and activities are expected to lead to measurable youth outcomes. / Formative evaluation: Collecting early feedback to refine a new group before full-scale implementation. [Concept: Logic model and Formative evaluation]

0868. B - Outcome evaluation: Assessment of changes or results associated with a program's goals. / Continuous quality improvement: An iterative use of data to identify changes, test them, and refine service delivery. [Concept: Outcome evaluation and Continuous quality improvement]

0869. B - Outcome evaluation [Concept: Outcome evaluation]

0870. C - Outcome indicator [Concept: Outcome indicator]

0871. B - Process evaluation [Concept: Process evaluation]

0872. C - Formative evaluation: Collecting early feedback to refine a new group before full-scale implementation. / Outcome indicator: Selecting a defined measure that reflects the program's stated goal. [Concept: Formative evaluation and Outcome indicator]

0873. A - Logic model: Showing how staff and activities are expected to lead to measurable youth outcomes. / Practical significance: Asking whether a measured difference matters to students and service decisions. [Concept: Logic model and Practical significance]

0874. D - Outcome indicator [Concept: Outcome indicator]

0875. D - Continuous quality improvement [Concept: Continuous quality improvement]

0876. A - Logic model [Concept: Logic model]

0877. A - Practical significance [Concept: Practical significance]

0878. B - Implementation fidelity [Concept: Implementation fidelity]

0879. B - Formative evaluation [Concept: Formative evaluation]

0880. B - Formative evaluation: Collecting early feedback to refine a new group before full-scale implementation. / Practical significance: Asking whether a measured difference matters to students and service decisions. [Concept: Formative evaluation and Practical significance]

0881. C - Outcome indicator [Concept: Outcome indicator]

0882. B - Formative evaluation [Concept: Formative evaluation]

0883. A - Process evaluation [Concept: Process evaluation]

0884. B - Summative evaluation [Concept: Summative evaluation]

0885. C - Implementation fidelity: Documenting delivery of core components before interpreting outcome differences. / Reach: Comparing participants with the target population to identify who is not being reached. [Concept: Implementation fidelity and Reach]

0886. D - Formative evaluation [Concept: Formative evaluation]

0887. A - Process evaluation [Concept: Process evaluation]

0888. A - Summative evaluation: Evaluation that judges a program's overall merit, effectiveness, or outcomes after implementation. / Outcome evaluation: Assessment of changes or results associated with a program's goals. [Concept: Summative evaluation and Outcome evaluation]

0889. D - Outcome indicator: A measurable variable used as evidence of progress toward a specified outcome. / Practical significance: The real-world importance or usefulness of an observed change, beyond statistical detectability. [Concept: Outcome indicator and Practical significance]

0890. C - Logic model: A visual or narrative map linking program resources, activities, outputs, and intended outcomes. / Outcome indicator: A measurable variable used as evidence of progress toward a specified outcome. [Concept: Logic model and Outcome indicator]

0891. D - Continuous quality improvement [Concept: Continuous quality improvement]

0892. A - Implementation fidelity: Documenting delivery of core components before interpreting outcome differences. / Reach: Comparing participants with the target population to identify who is not being reached. [Concept: Implementation fidelity and Reach]

0893. C - Formative evaluation: Collecting early feedback to refine a new group before full-scale implementation. / Implementation fidelity: Documenting delivery of core components before interpreting outcome differences. [Concept: Formative evaluation and Implementation fidelity]

0894. A - Logic model: A visual or narrative map linking program resources, activities, outputs, and intended outcomes. / Continuous quality improvement: An iterative use of data to identify changes, test them, and refine service delivery. [Concept: Logic model and Continuous quality improvement]

0895. B - Outcome indicator [Concept: Outcome indicator]

0896. C - Practical significance [Concept: Practical significance]

0897. D - Logic model: A visual or narrative map linking program resources, activities, outputs, and intended outcomes. / Practical significance: The real-world importance or usefulness of an observed change, beyond statistical detectability. [Concept: Logic model and Practical significance]

0898. A - Logic model: A visual or narrative map linking program resources, activities, outputs, and intended outcomes. / Reach: The proportion and characteristics of the intended population engaged by a program. [Concept: Logic model and Reach]

0899. A - Outcome indicator [Concept: Outcome indicator]

0900. A - Reach: Comparing participants with the target population to identify who is not being reached. / Continuous quality improvement: Testing a small improvement, reviewing results, and adjusting the next cycle. [Concept: Reach and Continuous quality improvement]

0901. D - Process evaluation: Checking who received the intervention and whether it was delivered as planned. / Implementation fidelity: Documenting delivery of core components before interpreting outcome differences. [Concept: Process evaluation and Implementation fidelity]

0902. A - Process evaluation: Checking who received the intervention and whether it was delivered as planned. / Reach: Comparing participants with the target population to identify who is not being reached. [Concept: Process evaluation and Reach]

0903. D - Summative evaluation [Concept: Summative evaluation]

0904. B - Process evaluation: Assessment of how a program was implemented, including reach, dose, fidelity, and context. / Continuous quality improvement: An iterative use of data to identify changes, test them, and refine service delivery. [Concept: Process evaluation and Continuous quality improvement]

0905. C - Logic model: A visual or narrative map linking program resources, activities, outputs, and intended outcomes. / Summative evaluation: Evaluation that judges a program's overall merit, effectiveness, or outcomes after implementation. [Concept: Logic model and Summative evaluation]

0906. A - Logic model: Showing how staff and activities are expected to lead to measurable youth outcomes. / Process evaluation: Checking who received the intervention and whether it was delivered as planned. [Concept: Logic model and Process evaluation]

0907. D - Process evaluation: Assessment of how a program was implemented, including reach, dose, fidelity, and context. / Outcome indicator: A measurable variable used as evidence of progress toward a specified outcome. [Concept: Process evaluation and Outcome indicator]

0908. B - Outcome indicator [Concept: Outcome indicator]

0909. A - Logic model: A visual or narrative map linking program resources, activities, outputs, and intended outcomes. / Implementation fidelity: The extent to which program components are delivered as intended. [Concept: Logic model and Implementation fidelity]

0910. C - Logic model: Showing how staff and activities are expected to lead to measurable youth outcomes. / Continuous quality improvement: Testing a small improvement, reviewing results, and adjusting the next cycle. [Concept: Logic model and Continuous quality improvement]

0911. C - Outcome indicator [Concept: Outcome indicator]

0912. D - Process evaluation [Concept: Process evaluation]

0913. A - Outcome indicator [Concept: Outcome indicator]

0914. C - Logic model: A visual or narrative map linking program resources, activities, outputs, and intended outcomes. / Outcome indicator: A measurable variable used as evidence of progress toward a specified outcome. [Concept: Logic model and Outcome indicator]

0915. B - Formative evaluation: Evaluation conducted during program development or implementation to improve delivery. / Summative evaluation: Evaluation that judges a program's overall merit, effectiveness, or outcomes after implementation. [Concept: Formative evaluation and Summative evaluation]

0916. D - Summative evaluation [Concept: Summative evaluation]

0917. D - Continuous quality improvement [Concept: Continuous quality improvement]

0918. A - Logic model: A visual or narrative map linking program resources, activities, outputs, and intended outcomes. / Summative evaluation: Evaluation that judges a program's overall merit, effectiveness, or outcomes after implementation. [Concept: Logic model and Summative evaluation]

0919. A - Logic model: A visual or narrative map linking program resources, activities, outputs, and intended outcomes. / Reach: The proportion and characteristics of the intended population engaged by a program. [Concept: Logic model and Reach]

0920. C - Outcome indicator [Concept: Outcome indicator]

0921. A - Process evaluation: Checking who received the intervention and whether it was delivered as planned. / Implementation fidelity: Documenting delivery of core components before interpreting outcome differences. [Concept: Process evaluation and Implementation fidelity]

0922. B - Outcome evaluation [Concept: Outcome evaluation]

0923. B - Summative evaluation: Assessing whether a completed program achieved its stated goals. / Outcome indicator: Selecting a defined measure that reflects the program's stated goal. [Concept: Summative evaluation and Outcome indicator]

0924. A - Process evaluation: Assessment of how a program was implemented, including reach, dose, fidelity, and context. / Outcome indicator: A measurable variable used as evidence of progress toward a specified outcome. [Concept: Process evaluation and Outcome indicator]

0925. A - Summative evaluation [Concept: Summative evaluation]

0926. A - Logic model [Concept: Logic model]

0927. C - Logic model [Concept: Logic model]

CAC.930 | Program Evaluation and Outcome Measurement

QUESTION | CORRECT OPTION AND CONCEPT

0928. B - Process evaluation [Concept: Process evaluation]

0929. B - Process evaluation: Checking who received the intervention and whether it was delivered as planned. / Practical significance: Asking whether a measured difference matters to students and service decisions. [Concept: Process evaluation and Practical significance]

0930. C - Measuring change in the student outcome the program was designed to influence. [Concept: Outcome evaluation]

0931. A - Logic model: A visual or narrative map linking program resources, activities, outputs, and intended outcomes. / Outcome evaluation: Assessment of changes or results associated with a program's goals. [Concept: Logic model and Outcome evaluation]

0932. A - Process evaluation: Checking who received the intervention and whether it was delivered as planned. / Outcome evaluation: Measuring change in the student outcome the program was designed to influence. [Concept: Process evaluation and Outcome evaluation]

0933. C - Logic model [Concept: Logic model]

0934. A - Process evaluation: Assessment of how a program was implemented, including reach, dose, fidelity, and context. / Outcome indicator: A measurable variable used as evidence of progress toward a specified outcome. [Concept: Process evaluation and Outcome indicator]

0935. D - Process evaluation [Concept: Process evaluation]

0936. A - Outcome evaluation [Concept: Outcome evaluation]

0937. C - Logic model: Showing how staff and activities are expected to lead to measurable youth outcomes. / Outcome indicator: Selecting a defined measure that reflects the program's stated goal. [Concept: Logic model and Outcome indicator]

0938. A - Outcome indicator: Selecting a defined measure that reflects the program's stated goal. / Continuous quality improvement: Testing a small improvement, reviewing results, and adjusting the next cycle. [Concept: Outcome indicator and Continuous quality improvement]

0939. D - Outcome indicator [Concept: Outcome indicator]

0940. A - Formative evaluation: Collecting early feedback to refine a new group before full-scale implementation. / Implementation fidelity: Documenting delivery of core components before interpreting outcome differences. [Concept: Formative evaluation and Implementation fidelity]

0941. B - Process evaluation: Assessment of how a program was implemented, including reach, dose, fidelity, and context. / Practical significance: The real-world importance or usefulness of an observed change, beyond statistical detectability. [Concept: Process evaluation and Practical significance]

0942. B - An iterative use of data to identify changes, test them, and refine service delivery. [Concept: Continuous quality improvement]

0943. D - Logic model: Showing how staff and activities are expected to lead to measurable youth outcomes. / Implementation fidelity: Documenting delivery of core components before interpreting outcome differences. [Concept: Logic model and Implementation fidelity]

0944. B - Process evaluation: Checking who received the intervention and whether it was delivered as planned. / Outcome indicator: Selecting a defined measure that reflects the program's stated goal. [Concept: Process evaluation and Outcome indicator]

0945. D - Outcome evaluation [Concept: Outcome evaluation]

0946. B - Logic model [Concept: Logic model]

0947. A - Outcome evaluation: Measuring change in the student outcome the program was designed to influence. / Implementation fidelity: Documenting delivery of core components before interpreting outcome differences. [Concept: Outcome evaluation and Implementation fidelity]

0948. B - The real-world importance or usefulness of an observed change, beyond statistical detectability. [Concept: Practical significance]

0949. D - Process evaluation: Assessment of how a program was implemented, including reach, dose, fidelity, and context. / Reach: The proportion and characteristics of the intended population engaged by a program. [Concept: Process evaluation and Reach]

0950. D - Continuous quality improvement [Concept: Continuous quality improvement]

0951. B - Reach: Comparing participants with the target population to identify who is not being reached. / Continuous quality improvement: Testing a small improvement, reviewing results, and adjusting the next cycle. [Concept: Reach and Continuous quality improvement]

0952. C - Formative evaluation [Concept: Formative evaluation]

0953. D - Logic model: A visual or narrative map linking program resources, activities, outputs, and intended outcomes. / Outcome indicator: A measurable variable used as evidence of progress toward a specified outcome. [Concept: Logic model and Outcome indicator]

0954. B - Logic model: Showing how staff and activities are expected to lead to measurable youth outcomes. / Implementation fidelity: Documenting delivery of core components before interpreting outcome differences. [Concept: Logic model and Implementation fidelity]

0955. D - Formative evaluation: Collecting early feedback to refine a new group before full-scale implementation. / Practical significance: Asking whether a measured difference matters to students and service decisions. [Concept: Formative evaluation and Practical significance]

0956. B - The extent to which program components are delivered as intended. [Concept: Implementation fidelity]

0957. C - Continuous quality improvement [Concept: Continuous quality improvement]

0958. D - Process evaluation: Checking who received the intervention and whether it was delivered as planned. / Continuous quality improvement: Testing a small improvement, reviewing results, and adjusting the next cycle. [Concept: Process evaluation and Continuous quality improvement]

0959. D - Reach [Concept: Reach]

0960. C - Reach [Concept: Reach]

0961. C - Outcome evaluation: Measuring change in the student outcome the program was designed to influence. / Outcome indicator: Selecting a defined measure that reflects the program's stated goal. [Concept: Outcome evaluation and Outcome indicator]

0962. B - Implementation fidelity: The extent to which program components are delivered as intended. / Practical significance: The real-world importance or usefulness of an observed change, beyond statistical detectability. [Concept: Implementation fidelity and Practical significance]

0963. B - Process evaluation: Checking who received the intervention and whether it was delivered as planned. / Reach: Comparing participants with the target population to identify who is not being reached. [Concept: Process evaluation and Reach]

0964. A - Outcome evaluation: Assessment of changes or results associated with a program's goals. / Outcome indicator: A measurable variable used as evidence of progress toward a specified outcome. [Concept: Outcome evaluation and Outcome indicator]

0965. A - Outcome indicator [Concept: Outcome indicator]

0966. B - Formative evaluation: Collecting early feedback to refine a new group before full-scale implementation. / Summative evaluation: Assessing whether a completed program achieved its stated goals. [Concept: Formative evaluation and Summative evaluation]

0967. D - Continuous quality improvement [Concept: Continuous quality improvement]

0968. C - Outcome evaluation: Assessment of changes or results associated with a program's goals. / Practical significance: The real-world importance or usefulness of an observed change, beyond statistical detectability. [Concept: Outcome evaluation and Practical significance]

0969. B - Outcome evaluation [Concept: Outcome evaluation]

0970. A - Process evaluation [Concept: Process evaluation]

0971. D - Reach: Comparing participants with the target population to identify who is not being reached. / Outcome indicator: Selecting a defined measure that reflects the program's stated goal. [Concept: Reach and Outcome indicator]

0972. A - Process evaluation [Concept: Process evaluation]

0973. B - Outcome indicator [Concept: Outcome indicator]

0974. B - Asking whether a measured difference matters to students and service decisions. [Concept: Practical significance]

0975. C - Summative evaluation: Assessing whether a completed program achieved its stated goals. / Continuous quality improvement: Testing a small improvement, reviewing results, and adjusting the next cycle. [Concept: Summative evaluation and Continuous quality improvement]

0976. C - Implementation fidelity: Documenting delivery of core components before interpreting outcome differences. / Continuous quality improvement: Testing a small improvement, reviewing results, and adjusting the next cycle. [Concept: Implementation fidelity and Continuous quality improvement]

0977. B - Implementation fidelity [Concept: Implementation fidelity]

0978. C - Implementation fidelity [Concept: Implementation fidelity]

0979. A - Summative evaluation: Evaluation that judges a program's overall merit, effectiveness, or outcomes after implementation. / Reach: The proportion and characteristics of the intended population engaged by a program. [Concept: Summative evaluation and Reach]

0980. B - Reach [Concept: Reach]

0981. C - Formative evaluation: Collecting early feedback to refine a new group before full-scale implementation. / Outcome evaluation: Measuring change in the student outcome the program was designed to influence. [Concept: Formative evaluation and Outcome evaluation]

0982. C - Process evaluation: Assessment of how a program was implemented, including reach, dose, fidelity, and context. / Practical significance: The real-world importance or usefulness of an observed change, beyond statistical detectability. [Concept: Process evaluation and Practical significance]

0983. C - Formative evaluation [Concept: Formative evaluation]

CAC.930 | Program Evaluation and Outcome Measurement

QUESTION | CORRECT OPTION AND CONCEPT

0984. B - Logic model: A visual or narrative map linking program resources, activities, outputs, and intended outcomes. / Formative evaluation: Evaluation conducted during program development or implementation to improve delivery. [Concept: Logic model and Formative evaluation]

0985. B - Continuous quality improvement [Concept: Continuous quality improvement]

0986. C - The real-world importance or usefulness of an observed change, beyond statistical detectability. [Concept: Practical significance]

0987. D - Summative evaluation: Assessing whether a completed program achieved its stated goals. / Outcome indicator: Selecting a defined measure that reflects the program's stated goal. [Concept: Summative evaluation and Outcome indicator]

0988. D - Summative evaluation [Concept: Summative evaluation]

0989. C - Formative evaluation: Evaluation conducted during program development or implementation to improve delivery. / Practical significance: The real-world importance or usefulness of an observed change, beyond statistical detectability. [Concept: Formative evaluation and Practical significance]

0990. B - Summative evaluation: Evaluation that judges a program's overall merit, effectiveness, or outcomes after implementation. / Outcome evaluation: Assessment of changes or results associated with a program's goals. [Concept: Summative evaluation and Outcome evaluation]

0991. C - Implementation fidelity: The extent to which program components are delivered as intended. / Outcome indicator: A measurable variable used as evidence of progress toward a specified outcome. [Concept: Implementation fidelity and Outcome indicator]

0992. B - Process evaluation [Concept: Process evaluation]

0993. C - Checking who received the intervention and whether it was delivered as planned. [Concept: Process evaluation]

0994. D - Practical significance [Concept: Practical significance]

0995. B - Practical significance [Concept: Practical significance]

0996. D - Process evaluation [Concept: Process evaluation]

0997. B - Testing a small improvement, reviewing results, and adjusting the next cycle. [Concept: Continuous quality improvement]

0998. D - Outcome indicator [Concept: Outcome indicator]

0999. B - Collecting early feedback to refine a new group before full-scale implementation. [Concept: Formative evaluation]

1000. C - Formative evaluation: Evaluation conducted during program development or implementation to improve delivery. / Practical significance: The real-world importance or usefulness of an observed change, beyond statistical detectability. [Concept: Formative evaluation and Practical significance]

CAC.931 | Advanced Pedagogy

QUESTION | CORRECT OPTION AND CONCEPT

0001. A - Retrieval practice [Concept: Retrieval practice]

0002. C - Constructive alignment: Checking that an assessment measures the skill stated in the course outcome. / Retrieval practice: Asking learners to retrieve key ideas from memory before reviewing notes. [Concept: Constructive alignment and Retrieval practice]

0003. C - Scaffolding in instruction: Modeling a skill and gradually reducing prompts as learners gain mastery. / Experiential learning: Pairing an activity with structured reflection and transfer to a new situation. [Concept: Scaffolding in instruction and Experiential learning]

0004. D - Summative assessment: Evaluating mastery after a course unit concludes. / Culturally responsive pedagogy: Connecting examples to students' contexts and checking whose perspectives are represented. [Concept: Summative assessment and Culturally responsive pedagogy]

0005. D - Universal Design for Learning: A framework for designing flexible learning environments with multiple means of engagement, representation, and action or expression. / Culturally responsive pedagogy: Teaching that draws on learners' cultural knowledge and experiences while maintaining high expectations and belonging. [Concept: Universal Design for Learning and Culturally responsive pedagogy]

0006. C - Summative assessment [Concept: Summative assessment]

0007. B - Constructive alignment [Concept: Constructive alignment]

0008. B - Culturally responsive pedagogy: Connecting examples to students' contexts and checking whose perspectives are represented. / Experiential learning: Pairing an activity with structured reflection and transfer to a new situation. [Concept: Culturally responsive pedagogy and Experiential learning]

0009. B - Formative assessment: Low-stakes evidence gathered during learning to guide feedback and next instructional steps. / Retrieval practice: Effortful recall of learned material that strengthens retention and reveals learning needs. [Concept: Formative assessment and Retrieval practice]

0010. D - Formative assessment: Low-stakes evidence gathered during learning to guide feedback and next instructional steps. / Retrieval practice: Effortful recall of learned material that strengthens retention and reveals learning needs. [Concept: Formative assessment and Retrieval practice]

0011. D - Experiential learning [Concept: Experiential learning]

0012. C - Experiential learning: Pairing an activity with structured reflection and transfer to a new situation. / Feedback literacy: Teaching students to interpret feedback and plan a concrete revision. [Concept: Experiential learning and Feedback literacy]

0013. B - Teaching students to interpret feedback and plan a concrete revision. [Concept: Feedback literacy]

0014. D - Learning through purposeful experience, reflection, conceptualization, and application. [Concept: Experiential learning]

0015. A - Formative assessment: Low-stakes evidence gathered during learning to guide feedback and next instructional steps. / Culturally responsive pedagogy: Teaching that draws on learners' cultural knowledge and experiences while maintaining high expectations and belonging. [Concept: Formative assessment and Culturally responsive pedagogy]

0016. A - Scaffolding in instruction: Modeling a skill and gradually reducing prompts as learners gain mastery. / Experiential learning: Pairing an activity with structured reflection and transfer to a new situation. [Concept: Scaffolding in instruction and Experiential learning]

0017. C - Summative assessment: Evaluating mastery after a course unit concludes. / Feedback literacy: Teaching students to interpret feedback and plan a concrete revision. [Concept: Summative assessment and Feedback literacy]

0018. C - Constructive alignment: Checking that an assessment measures the skill stated in the course outcome. / Summative assessment: Evaluating mastery after a course unit concludes. [Concept: Constructive alignment and Summative assessment]

0019. C - Scaffolding in instruction: Modeling a skill and gradually reducing prompts as learners gain mastery. / Experiential learning: Pairing an activity with structured reflection and transfer to a new situation. [Concept: Scaffolding in instruction and Experiential learning]

0020. A - Universal Design for Learning [Concept: Universal Design for Learning]

0021. D - Universal Design for Learning: Offering accessible ways to encounter material and demonstrate learning. / Culturally responsive pedagogy: Connecting examples to students' contexts and checking whose perspectives are represented. [Concept: Universal Design for Learning and Culturally responsive pedagogy]

0022. B - Formative assessment [Concept: Formative assessment]

0023. D - Experiential learning: Learning through purposeful experience, reflection, conceptualization, and application. / Feedback literacy: Learners' capacity to understand, evaluate, and use feedback to improve work. [Concept: Experiential learning and Feedback literacy]

0024. D - Feedback literacy [Concept: Feedback literacy]

0025. B - Learners' capacity to understand, evaluate, and use feedback to improve work. [Concept: Feedback literacy]

0026. A - Metacognition [Concept: Metacognition]

0027. C - Metacognition [Concept: Metacognition]

0028. B - Metacognition [Concept: Metacognition]

0029. A - Metacognition [Concept: Metacognition]

0030. C - Retrieval practice [Concept: Retrieval practice]

0031. C - Metacognition [Concept: Metacognition]

0032. A - Culturally responsive pedagogy: Connecting examples to students' contexts and checking whose perspectives are represented. / Experiential learning: Pairing an activity with structured reflection and transfer to a new situation. [Concept: Culturally responsive pedagogy and Experiential learning]

0033. B - Experiential learning [Concept: Experiential learning]

0034. C - Culturally responsive pedagogy: Teaching that draws on learners' cultural knowledge and experiences while maintaining high expectations and belonging. / Feedback literacy: Learners' capacity to understand, evaluate, and use feedback to improve work. [Concept: Culturally responsive pedagogy and Feedback literacy]

0035. C - Retrieval practice [Concept: Retrieval practice]

0036. C - Feedback literacy [Concept: Feedback literacy]

0037. B - Having students explain which strategy helped and what they will change next time. [Concept: Metacognition]

0038. A - Formative assessment: Low-stakes evidence gathered during learning to guide feedback and next instructional steps. / Metacognition: Awareness and regulation of one's own learning, including planning, monitoring, and evaluation. [Concept: Formative assessment and Metacognition]

0039. B - Culturally responsive pedagogy [Concept: Culturally responsive pedagogy]

0040. A - Evaluating mastery after a course unit concludes. [Concept: Summative assessment]

0041. A - Formative assessment: Using an exit question to decide what to reteach in the next class. / Feedback literacy: Teaching students to interpret feedback and plan a concrete revision. [Concept: Formative assessment and Feedback literacy]

0042. D - Metacognition [Concept: Metacognition]

0043. D - Metacognition: Having students explain which strategy helped and what they will change next time. / Feedback literacy: Teaching students to interpret feedback and plan a concrete revision. [Concept: Metacognition and Feedback literacy]

0044. D - Scaffolding in instruction: Modeling a skill and gradually reducing prompts as learners gain mastery. / Retrieval practice: Asking learners to retrieve key ideas from memory before reviewing notes. [Concept: Scaffolding in instruction and Retrieval practice]

0045. A - Constructive alignment [Concept: Constructive alignment]

0046. A - Culturally responsive pedagogy: Teaching that draws on learners' cultural knowledge and experiences while maintaining high expectations and belonging. / Feedback literacy: Learners' capacity to understand, evaluate, and use feedback to improve work. [Concept: Culturally responsive pedagogy and Feedback literacy]

0047. C - Metacognition [Concept: Metacognition]

0048. D - Evaluating mastery after a course unit concludes. [Concept: Summative assessment]

0049. A - Summative assessment [Concept: Summative assessment]

0050. C - Constructive alignment [Concept: Constructive alignment]

0051. D - Summative assessment [Concept: Summative assessment]

0052. B - Retrieval practice: Asking learners to retrieve key ideas from memory before reviewing notes. / Experiential learning: Pairing an activity with structured reflection and transfer to a new situation. [Concept: Retrieval practice and Experiential learning]

0053. C - Metacognition: Awareness and regulation of one's own learning, including planning, monitoring, and evaluation. / Culturally responsive pedagogy: Teaching that draws on learners' cultural knowledge and experiences while maintaining high expectations and belonging. [Concept: Metacognition and Culturally responsive pedagogy]

0054. B - Universal Design for Learning: Offering accessible ways to encounter material and demonstrate learning. / Formative assessment: Using an exit question to decide what to reteach in the next class. [Concept: Universal Design for Learning and Formative assessment]

0055. C - Metacognition [Concept: Metacognition]

0056. C - Culturally responsive pedagogy [Concept: Culturally responsive pedagogy]

0057. A - Culturally responsive pedagogy [Concept: Culturally responsive pedagogy]

0058. A - Retrieval practice [Concept: Retrieval practice]

0059. A - Learning through purposeful experience, reflection, conceptualization, and application. [Concept: Experiential learning]

0060. B - Feedback literacy [Concept: Feedback literacy]

0061. B - Awareness and regulation of one's own learning, including planning, monitoring, and evaluation. [Concept: Metacognition]

0062. D - Summative assessment: Evaluation of learning at the end of an instructional period or unit. / Retrieval practice: Effortful recall of learned material that strengthens retention and reveals learning needs. [Concept: Summative assessment and Retrieval practice]

CAC.931 | Advanced Pedagogy

QUESTION | CORRECT OPTION AND CONCEPT

0063. A - Retrieval practice: Effortful recall of learned material that strengthens retention and reveals learning needs. / Culturally responsive pedagogy: Teaching that draws on learners' cultural knowledge and experiences while maintaining high expectations and belonging. [Concept: Retrieval practice and Culturally responsive pedagogy]

0064. A - Scaffolding in instruction [Concept: Scaffolding in instruction]

0065. B - Scaffolding in instruction: Modeling a skill and gradually reducing prompts as learners gain mastery. / Experiential learning: Pairing an activity with structured reflection and transfer to a new situation. [Concept: Scaffolding in instruction and Experiential learning]

0066. C - Scaffolding in instruction: Temporary instructional support that enables increasingly independent performance. / Metacognition: Awareness and regulation of one's own learning, including planning, monitoring, and evaluation. [Concept: Scaffolding in instruction and Metacognition]

0067. D - Scaffolding in instruction [Concept: Scaffolding in instruction]

0068. C - Scaffolding in instruction [Concept: Scaffolding in instruction]

0069. D - Scaffolding in instruction: Temporary instructional support that enables increasingly independent performance. / Experiential learning: Learning through purposeful experience, reflection, conceptualization, and application. [Concept: Scaffolding in instruction and Experiential learning]

0070. D - Retrieval practice [Concept: Retrieval practice]

0071. B - Metacognition [Concept: Metacognition]

0072. C - Constructive alignment: Alignment among learning outcomes, teaching and learning activities, and assessment. / Retrieval practice: Effortful recall of learned material that strengthens retention and reveals learning needs. [Concept: Constructive alignment and Retrieval practice]

0073. C - Formative assessment [Concept: Formative assessment]

0074. D - Constructive alignment: Alignment among learning outcomes, teaching and learning activities, and assessment. / Culturally responsive pedagogy: Teaching that draws on learners' cultural knowledge and experiences while maintaining high expectations and belonging. [Concept: Constructive alignment and Culturally responsive pedagogy]

0075. C - Scaffolding in instruction: Temporary instructional support that enables increasingly independent performance. / Metacognition: Awareness and regulation of one's own learning, including planning, monitoring, and evaluation. [Concept: Scaffolding in instruction and Metacognition]

0076. D - Constructive alignment [Concept: Constructive alignment]

0077. B - Retrieval practice: Effortful recall of learned material that strengthens retention and reveals learning needs. / Metacognition: Awareness and regulation of one's own learning, including planning, monitoring, and evaluation. [Concept: Retrieval practice and Metacognition]

0078. B - Constructive alignment: Alignment among learning outcomes, teaching and learning activities, and assessment. / Scaffolding in instruction: Temporary instructional support that enables increasingly independent performance. [Concept: Constructive alignment and Scaffolding in instruction]

0079. C - Summative assessment [Concept: Summative assessment]

0080. B - Scaffolding in instruction: Temporary instructional support that enables increasingly independent performance. / Feedback literacy: Learners' capacity to understand, evaluate, and use feedback to improve work. [Concept: Scaffolding in instruction and Feedback literacy]

0081. A - Retrieval practice: Effortful recall of learned material that strengthens retention and reveals learning needs. / Experiential learning: Learning through purposeful experience, reflection, conceptualization, and application. [Concept: Retrieval practice and Experiential learning]

0082. C - Constructive alignment [Concept: Constructive alignment]

0083. B - Experiential learning [Concept: Experiential learning]

0084. A - Scaffolding in instruction [Concept: Scaffolding in instruction]

0085. A - Scaffolding in instruction [Concept: Scaffolding in instruction]

0086. A - Constructive alignment: Alignment among learning outcomes, teaching and learning activities, and assessment. / Culturally responsive pedagogy: Teaching that draws on learners' cultural knowledge and experiences while maintaining high expectations and belonging. [Concept: Constructive alignment and Culturally responsive pedagogy]

0087. D - Constructive alignment: Alignment among learning outcomes, teaching and learning activities, and assessment. / Summative assessment: Evaluation of learning at the end of an instructional period or unit. [Concept: Constructive alignment and Summative assessment]

0088. C - Constructive alignment [Concept: Constructive alignment]

0089. B - Metacognition [Concept: Metacognition]

0090. B - Culturally responsive pedagogy [Concept: Culturally responsive pedagogy]

0091. B - Evaluating mastery after a course unit concludes. [Concept: Summative assessment]

0092. A - Experiential learning [Concept: Experiential learning]

0093. B - Retrieval practice [Concept: Retrieval practice]

0094. B - Metacognition: Awareness and regulation of one's own learning, including planning, monitoring, and evaluation. / Culturally responsive pedagogy: Teaching that draws on learners' cultural knowledge and experiences while maintaining high expectations and belonging. [Concept: Metacognition and Culturally responsive pedagogy]

0095. B - Formative assessment: Low-stakes evidence gathered during learning to guide feedback and next instructional steps. / Culturally responsive pedagogy: Teaching that draws on learners' cultural knowledge and experiences while maintaining high expectations and belonging. [Concept: Formative assessment and Culturally responsive pedagogy]

0096. A - Retrieval practice [Concept: Retrieval practice]

0097. B - Experiential learning [Concept: Experiential learning]

0098. D - Scaffolding in instruction [Concept: Scaffolding in instruction]

0099. C - Evaluation of learning at the end of an instructional period or unit. [Concept: Summative assessment]

0100. C - Scaffolding in instruction: Temporary instructional support that enables increasingly independent performance. / Culturally responsive pedagogy: Teaching that draws on learners' cultural knowledge and experiences while maintaining high expectations and belonging. [Concept: Scaffolding in instruction and Culturally responsive pedagogy]

0101. D - Scaffolding in instruction: Modeling a skill and gradually reducing prompts as learners gain mastery. / Formative assessment: Using an exit question to decide what to reteach in the next class. [Concept: Scaffolding in instruction and Formative assessment]

0102. C - Metacognition [Concept: Metacognition]

0103. C - Scaffolding in instruction: Modeling a skill and gradually reducing prompts as learners gain mastery. / Metacognition: Having students explain which strategy helped and what they will change next time. [Concept: Scaffolding in instruction and Metacognition]

0104. B - Constructive alignment: Checking that an assessment measures the skill stated in the course outcome. / Feedback literacy: Teaching students to interpret feedback and plan a concrete revision. [Concept: Constructive alignment and Feedback literacy]

0105. B - Formative assessment [Concept: Formative assessment]

0106. A - Scaffolding in instruction [Concept: Scaffolding in instruction]

0107. B - Summative assessment [Concept: Summative assessment]

0108. B - Retrieval practice [Concept: Retrieval practice]

0109. B - Effortful recall of learned material that strengthens retention and reveals learning needs. [Concept: Retrieval practice]

0110. C - Scaffolding in instruction [Concept: Scaffolding in instruction]

0111. C - Universal Design for Learning: Offering accessible ways to encounter material and demonstrate learning. / Summative assessment: Evaluating mastery after a course unit concludes. [Concept: Universal Design for Learning and Summative assessment]

0112. A - Formative assessment: Using an exit question to decide what to reteach in the next class. / Feedback literacy: Teaching students to interpret feedback and plan a concrete revision. [Concept: Formative assessment and Feedback literacy]

0113. B - Scaffolding in instruction: Temporary instructional support that enables increasingly independent performance. / Metacognition: Awareness and regulation of one's own learning, including planning, monitoring, and evaluation. [Concept: Scaffolding in instruction and Metacognition]

0114. B - Metacognition [Concept: Metacognition]

0115. A - Formative assessment: Low-stakes evidence gathered during learning to guide feedback and next instructional steps. / Experiential learning: Learning through purposeful experience, reflection, conceptualization, and application. [Concept: Formative assessment and Experiential learning]

0116. C - Constructive alignment: Checking that an assessment measures the skill stated in the course outcome. / Feedback literacy: Teaching students to interpret feedback and plan a concrete revision. [Concept: Constructive alignment and Feedback literacy]

0117. D - Scaffolding in instruction [Concept: Scaffolding in instruction]

0118. C - Summative assessment [Concept: Summative assessment]

0119. B - Evaluating mastery after a course unit concludes. [Concept: Summative assessment]

0120. B - Summative assessment: Evaluation of learning at the end of an instructional period or unit. / Culturally responsive pedagogy: Teaching that draws on learners' cultural knowledge and experiences while maintaining high expectations and belonging. [Concept: Summative assessment and Culturally responsive pedagogy]

0121. A - Offering accessible ways to encounter material and demonstrate learning. [Concept: Universal Design for Learning]

0122. D - Experiential learning: Learning through purposeful experience, reflection, conceptualization, and application. / Feedback literacy: Learners' capacity to understand, evaluate, and use feedback to improve work. [Concept: Experiential learning and Feedback literacy]

CAC.931 | Advanced Pedagogy

QUESTION | CORRECT OPTION AND CONCEPT

0123. C - Constructive alignment [Concept: Constructive alignment]

0124. A - Scaffolding in instruction: Temporary instructional support that enables increasingly independent performance. / Retrieval practice: Effortful recall of learned material that strengthens retention and reveals learning needs. [Concept: Scaffolding in instruction and Retrieval practice]

0125. D - Constructive alignment: Alignment among learning outcomes, teaching and learning activities, and assessment. / Feedback literacy: Learners' capacity to understand, evaluate, and use feedback to improve work. [Concept: Constructive alignment and Feedback literacy]

0126. D - Culturally responsive pedagogy [Concept: Culturally responsive pedagogy]

0127. C - Constructive alignment [Concept: Constructive alignment]

0128. A - Summative assessment: Evaluating mastery after a course unit concludes. / Feedback literacy: Teaching students to interpret feedback and plan a concrete revision. [Concept: Summative assessment and Feedback literacy]

0129. D - Formative assessment: Low-stakes evidence gathered during learning to guide feedback and next instructional steps. / Feedback literacy: Learners' capacity to understand, evaluate, and use feedback to improve work. [Concept: Formative assessment and Feedback literacy]

0130. C - Summative assessment: Evaluating mastery after a course unit concludes. / Metacognition: Having students explain which strategy helped and what they will change next time. [Concept: Summative assessment and Metacognition]

0131. B - Metacognition [Concept: Metacognition]

0132. A - Universal Design for Learning: Offering accessible ways to encounter material and demonstrate learning. / Formative assessment: Using an exit question to decide what to reteach in the next class. [Concept: Universal Design for Learning and Formative assessment]

0133. D - Universal Design for Learning [Concept: Universal Design for Learning]

0134. D - Culturally responsive pedagogy: Connecting examples to students' contexts and checking whose perspectives are represented. / Feedback literacy: Teaching students to interpret feedback and plan a concrete revision. [Concept: Culturally responsive pedagogy and Feedback literacy]

0135. B - Scaffolding in instruction: Modeling a skill and gradually reducing prompts as learners gain mastery. / Retrieval practice: Asking learners to retrieve key ideas from memory before reviewing notes. [Concept: Scaffolding in instruction and Retrieval practice]

0136. D - Formative assessment [Concept: Formative assessment]

0137. C - Feedback literacy [Concept: Feedback literacy]

0138. A - Experiential learning [Concept: Experiential learning]

0139. B - Formative assessment [Concept: Formative assessment]

0140. A - Scaffolding in instruction: Modeling a skill and gradually reducing prompts as learners gain mastery. / Culturally responsive pedagogy: Connecting examples to students' contexts and checking whose perspectives are represented. [Concept: Scaffolding in instruction and Culturally responsive pedagogy]

0141. D - Summative assessment: Evaluation of learning at the end of an instructional period or unit. / Retrieval practice: Effortful recall of learned material that strengthens retention and reveals learning needs. [Concept: Summative assessment and Retrieval practice]

0142. C - Scaffolding in instruction [Concept: Scaffolding in instruction]

0143. B - Constructive alignment [Concept: Constructive alignment]

0144. B - Constructive alignment: Alignment among learning outcomes, teaching and learning activities, and assessment. / Formative assessment: Low-stakes evidence gathered during learning to guide feedback and next instructional steps. [Concept: Constructive alignment and Formative assessment]

0145. D - Culturally responsive pedagogy: Teaching that draws on learners' cultural knowledge and experiences while maintaining high expectations and belonging. / Experiential learning: Learning through purposeful experience, reflection, conceptualization, and application. [Concept: Culturally responsive pedagogy and Experiential learning]

0146. B - A framework for designing flexible learning environments with multiple means of engagement, representation, and action or expression. [Concept: Universal Design for Learning]

0147. D - Universal Design for Learning: A framework for designing flexible learning environments with multiple means of engagement, representation, and action or expression. / Culturally responsive pedagogy: Teaching that draws on learners' cultural knowledge and experiences while maintaining high expectations and belonging. [Concept: Universal Design for Learning and Culturally responsive pedagogy]

0148. A - Summative assessment [Concept: Summative assessment]

0149. A - Universal Design for Learning [Concept: Universal Design for Learning]

0150. C - Scaffolding in instruction [Concept: Scaffolding in instruction]

0151. D - Universal Design for Learning [Concept: Universal Design for Learning]

0152. C - Evaluation of learning at the end of an instructional period or unit. [Concept: Summative assessment]

0153. D - Formative assessment [Concept: Formative assessment]

0154. B - Universal Design for Learning: Offering accessible ways to encounter material and demonstrate learning. / Feedback literacy: Teaching students to interpret feedback and plan a concrete revision. [Concept: Universal Design for Learning and Feedback literacy]

0155. C - Retrieval practice [Concept: Retrieval practice]

0156. A - Retrieval practice [Concept: Retrieval practice]

0157. D - Metacognition: Awareness and regulation of one's own learning, including planning, monitoring, and evaluation. / Feedback literacy: Learners' capacity to understand, evaluate, and use feedback to improve work. [Concept: Metacognition and Feedback literacy]

0158. B - Universal Design for Learning: Offering accessible ways to encounter material and demonstrate learning. / Experiential learning: Pairing an activity with structured reflection and transfer to a new situation. [Concept: Universal Design for Learning and Experiential learning]

0159. D - Culturally responsive pedagogy [Concept: Culturally responsive pedagogy]

0160. A - Metacognition [Concept: Metacognition]

0161. D - Experiential learning [Concept: Experiential learning]

0162. B - Constructive alignment: Alignment among learning outcomes, teaching and learning activities, and assessment. / Metacognition: Awareness and regulation of one's own learning, including planning, monitoring, and evaluation. [Concept: Constructive alignment and Metacognition]

0163. B - Retrieval practice [Concept: Retrieval practice]

0164. D - Experiential learning: Pairing an activity with structured reflection and transfer to a new situation. / Feedback literacy: Teaching students to interpret feedback and plan a concrete revision. [Concept: Experiential learning and Feedback literacy]

0165. A - Teaching that draws on learners' cultural knowledge and experiences while maintaining high expectations and belonging. [Concept: Culturally responsive pedagogy]

0166. B - Summative assessment: Evaluation of learning at the end of an instructional period or unit. / Culturally responsive pedagogy: Teaching that draws on learners' cultural knowledge and experiences while maintaining high expectations and belonging. [Concept: Summative assessment and Culturally responsive pedagogy]

0167. D - Culturally responsive pedagogy [Concept: Culturally responsive pedagogy]

0168. C - Feedback literacy [Concept: Feedback literacy]

0169. A - Scaffolding in instruction: Temporary instructional support that enables increasingly independent performance. / Experiential learning: Learning through purposeful experience, reflection, conceptualization, and application. [Concept: Scaffolding in instruction and Experiential learning]

0170. B - Feedback literacy [Concept: Feedback literacy]

0171. C - Constructive alignment: Alignment among learning outcomes, teaching and learning activities, and assessment. / Retrieval practice: Effortful recall of learned material that strengthens retention and reveals learning needs. [Concept: Constructive alignment and Retrieval practice]

0172. A - Formative assessment: Low-stakes evidence gathered during learning to guide feedback and next instructional steps. / Metacognition: Awareness and regulation of one's own learning, including planning, monitoring, and evaluation. [Concept: Formative assessment and Metacognition]

0173. C - Formative assessment: Low-stakes evidence gathered during learning to guide feedback and next instructional steps. / Feedback literacy: Learners' capacity to understand, evaluate, and use feedback to improve work. [Concept: Formative assessment and Feedback literacy]

0174. B - Evaluation of learning at the end of an instructional period or unit. [Concept: Summative assessment]

0175. A - Offering accessible ways to encounter material and demonstrate learning. [Concept: Universal Design for Learning]

0176. A - Universal Design for Learning: Offering accessible ways to encounter material and demonstrate learning. / Scaffolding in instruction: Modeling a skill and gradually reducing prompts as learners gain mastery. [Concept: Universal Design for Learning and Scaffolding in instruction]

0177. C - Summative assessment [Concept: Summative assessment]

0178. A - Universal Design for Learning: Offering accessible ways to encounter material and demonstrate learning. / Summative assessment: Evaluating mastery after a course unit concludes. [Concept: Universal Design for Learning and Summative assessment]

0179. B - Scaffolding in instruction: Temporary instructional support that enables increasingly independent performance. / Experiential learning: Learning through purposeful experience, reflection, conceptualization, and application. [Concept: Scaffolding in instruction and Experiential learning]

0180. D - Scaffolding in instruction: Modeling a skill and gradually reducing prompts as learners gain mastery. / Summative assessment: Evaluating mastery after a course unit concludes. [Concept: Scaffolding in instruction and Summative assessment]

CAC.931 | Advanced Pedagogy

QUESTION | CORRECT OPTION AND CONCEPT

0181. B - Summative assessment: Evaluating mastery after a course unit concludes. / Culturally responsive pedagogy: Connecting examples to students' contexts and checking whose perspectives are represented. [Concept: Summative assessment and Culturally responsive pedagogy]

0182. A - Universal Design for Learning: Offering accessible ways to encounter material and demonstrate learning. / Retrieval practice: Asking learners to retrieve key ideas from memory before reviewing notes. [Concept: Universal Design for Learning and Retrieval practice]

0183. A - Formative assessment: Low-stakes evidence gathered during learning to guide feedback and next instructional steps. / Experiential learning: Learning through purposeful experience, reflection, conceptualization, and application. [Concept: Formative assessment and Experiential learning]

0184. A - Universal Design for Learning: A framework for designing flexible learning environments with multiple means of engagement, representation, and action or expression. / Feedback literacy: Learners' capacity to understand, evaluate, and use feedback to improve work. [Concept: Universal Design for Learning and Feedback literacy]

0316. A - Metacognition: Awareness and regulation of one's own learning, including planning, monitoring, and evaluation. / Experiential learning: Learning through purposeful experience, reflection, conceptualization, and application. [Concept: Metacognition and Experiential learning]

0317. A - Universal Design for Learning [Concept: Universal Design for Learning]

0318. A - Universal Design for Learning [Concept: Universal Design for Learning]

0319. C - Formative assessment: Using an exit question to decide what to reteach in the next class. / Summative assessment: Evaluating mastery after a course unit concludes. [Concept: Formative assessment and Summative assessment]

0320. B - Scaffolding in instruction: Temporary instructional support that enables increasingly independent performance. / Feedback literacy: Learners' capacity to understand, evaluate, and use feedback to improve work. [Concept: Scaffolding in instruction and Feedback literacy]

0321. D - Universal Design for Learning: Offering accessible ways to encounter material and demonstrate learning. / Metacognition: Having students explain which strategy helped and what they will change next time. [Concept: Universal Design for Learning and Metacognition]

0322. C - Scaffolding in instruction [Concept: Scaffolding in instruction]

0323. B - Formative assessment: Using an exit question to decide what to reteach in the next class. / Feedback literacy: Teaching students to interpret feedback and plan a concrete revision. [Concept: Formative assessment and Feedback literacy]

0324. C - Culturally responsive pedagogy [Concept: Culturally responsive pedagogy]

0325. B - Scaffolding in instruction: Temporary instructional support that enables increasingly independent performance. / Summative assessment: Evaluation of learning at the end of an instructional period or unit. [Concept: Scaffolding in instruction and Summative assessment]

0326. A - Feedback literacy [Concept: Feedback literacy]

0327. B - Formative assessment: Using an exit question to decide what to reteach in the next class. / Experiential learning: Pairing an activity with structured reflection and transfer to a new situation. [Concept: Formative assessment and Experiential learning]

0328. C - Pairing an activity with structured reflection and transfer to a new situation. [Concept: Experiential learning]

0329. B - Summative assessment: Evaluating mastery after a course unit concludes. / Experiential learning: Pairing an activity with structured reflection and transfer to a new situation. [Concept: Summative assessment and Experiential learning]

0330. C - Retrieval practice [Concept: Retrieval practice]

0331. D - Universal Design for Learning: A framework for designing flexible learning environments with multiple means of engagement, representation, and action or expression. / Formative assessment: Low-stakes evidence gathered during learning to guide feedback and next instructional steps. [Concept: Universal Design for Learning and Formative assessment]

0332. D - Effortful recall of learned material that strengthens retention and reveals learning needs. [Concept: Retrieval practice]

0333. A - Metacognition: Awareness and regulation of one's own learning, including planning, monitoring, and evaluation. / Culturally responsive pedagogy: Teaching that draws on learners' cultural knowledge and experiences while maintaining high expectations and belonging. [Concept: Metacognition and Culturally responsive pedagogy]

0334. D - Universal Design for Learning: Offering accessible ways to encounter material and demonstrate learning. / Culturally responsive pedagogy: Connecting examples to students' contexts and checking whose perspectives are represented. [Concept: Universal Design for Learning and Culturally responsive pedagogy]

0335. A - Scaffolding in instruction [Concept: Scaffolding in instruction]

0336. B - Constructive alignment: Checking that an assessment measures the skill stated in the course outcome. / Summative assessment: Evaluating mastery after a course unit concludes. [Concept: Constructive alignment and Summative assessment]

0337. C - Learners' capacity to understand, evaluate, and use feedback to improve work. [Concept: Feedback literacy]

0338. B - Metacognition: Having students explain which strategy helped and what they will change next time. / Culturally responsive pedagogy: Connecting examples to students' contexts and checking whose perspectives are represented. [Concept: Metacognition and Culturally responsive pedagogy]

0339. C - Universal Design for Learning: Offering accessible ways to encounter material and demonstrate learning. / Metacognition: Having students explain which strategy helped and what they will change next time. [Concept: Universal Design for Learning and Metacognition]

0340. B - Pairing an activity with structured reflection and transfer to a new situation. [Concept: Experiential learning]

0341. D - Retrieval practice [Concept: Retrieval practice]

0342. A - Retrieval practice: Asking learners to retrieve key ideas from memory before reviewing notes. / Experiential learning: Pairing an activity with structured reflection and transfer to a new situation. [Concept: Retrieval practice and Experiential learning]

0343. A - Retrieval practice: Asking learners to retrieve key ideas from memory before reviewing notes. / Feedback literacy: Teaching students to interpret feedback and plan a concrete revision. [Concept: Retrieval practice and Feedback literacy]

0344. D - Scaffolding in instruction: Modeling a skill and gradually reducing prompts as learners gain mastery. / Culturally responsive pedagogy: Connecting examples to students' contexts and checking whose perspectives are represented. [Concept: Scaffolding in instruction and Culturally responsive pedagogy]

0345. D - A framework for designing flexible learning environments with multiple means of engagement, representation, and action or expression. [Concept: Universal Design for Learning]

0346. C - Feedback literacy [Concept: Feedback literacy]

0347. B - Scaffolding in instruction [Concept: Scaffolding in instruction]

CAC.931 | Advanced Pedagogy

QUESTION | CORRECT OPTION AND CONCEPT

0348. B - Formative assessment: Using an exit question to decide what to reteach in the next class. / Culturally responsive pedagogy: Connecting examples to students' contexts and checking whose perspectives are represented. [Concept: Formative assessment and Culturally responsive pedagogy]

0349. B - Summative assessment [Concept: Summative assessment]

0350. A - Low-stakes evidence gathered during learning to guide feedback and next instructional steps. [Concept: Formative assessment]

0351. A - Constructive alignment: Checking that an assessment measures the skill stated in the course outcome. / Feedback literacy: Teaching students to interpret feedback and plan a concrete revision. [Concept: Constructive alignment and Feedback literacy]

0352. D - Teaching students to interpret feedback and plan a concrete revision. [Concept: Feedback literacy]

0353. B - Constructive alignment: Checking that an assessment measures the skill stated in the course outcome. / Metacognition: Having students explain which strategy helped and what they will change next time. [Concept: Constructive alignment and Metacognition]

0354. B - Retrieval practice: Asking learners to retrieve key ideas from memory before reviewing notes. / Experiential learning: Pairing an activity with structured reflection and transfer to a new situation. [Concept: Retrieval practice and Experiential learning]

0355. C - Retrieval practice: Asking learners to retrieve key ideas from memory before reviewing notes. / Culturally responsive pedagogy: Connecting examples to students' contexts and checking whose perspectives are represented. [Concept: Retrieval practice and Culturally responsive pedagogy]

0356. B - Awareness and regulation of one's own learning, including planning, monitoring, and evaluation. [Concept: Metacognition]

0357. A - Universal Design for Learning: A framework for designing flexible learning environments with multiple means of engagement, representation, and action or expression. / Scaffolding in instruction: Temporary instructional support that enables increasingly independent performance. [Concept: Universal Design for Learning and Scaffolding in instruction]

0358. A - Scaffolding in instruction: Temporary instructional support that enables increasingly independent performance. / Metacognition: Awareness and regulation of one's own learning, including planning, monitoring, and evaluation. [Concept: Scaffolding in instruction and Metacognition]

0359. D - Culturally responsive pedagogy: Teaching that draws on learners' cultural knowledge and experiences while maintaining high expectations and belonging. / Experiential learning: Learning through purposeful experience, reflection, conceptualization, and application. [Concept: Culturally responsive pedagogy and Experiential learning]

0360. B - Feedback literacy [Concept: Feedback literacy]

0361. B - Formative assessment: Low-stakes evidence gathered during learning to guide feedback and next instructional steps. / Retrieval practice: Effortful recall of learned material that strengthens retention and reveals learning needs. [Concept: Formative assessment and Retrieval practice]

0362. C - Retrieval practice [Concept: Retrieval practice]

0363. D - Experiential learning [Concept: Experiential learning]

0364. C - Feedback literacy [Concept: Feedback literacy]

0365. D - Constructive alignment [Concept: Constructive alignment]

0366. C - Constructive alignment: Checking that an assessment measures the skill stated in the course outcome. / Formative assessment: Using an exit question to decide what to reteach in the next class. [Concept: Constructive alignment and Formative assessment]

0367. D - Formative assessment: Low-stakes evidence gathered during learning to guide feedback and next instructional steps. / Experiential learning: Learning through purposeful experience, reflection, conceptualization, and application. [Concept: Formative assessment and Experiential learning]

0368. C - Formative assessment [Concept: Formative assessment]

0369. A - Summative assessment [Concept: Summative assessment]

0370. B - Formative assessment: Using an exit question to decide what to reteach in the next class. / Feedback literacy: Teaching students to interpret feedback and plan a concrete revision. [Concept: Formative assessment and Feedback literacy]

0371. B - Universal Design for Learning: A framework for designing flexible learning environments with multiple means of engagement, representation, and action or expression. / Retrieval practice: Effortful recall of learned material that strengthens retention and reveals learning needs. [Concept: Universal Design for Learning and Retrieval practice]

0372. C - Temporary instructional support that enables increasingly independent performance. [Concept: Scaffolding in instruction]

0373. C - Universal Design for Learning [Concept: Universal Design for Learning]

0374. A - Constructive alignment [Concept: Constructive alignment]

0375. C - Constructive alignment [Concept: Constructive alignment]

0376. A - Formative assessment [Concept: Formative assessment]

0377. B - Formative assessment: Using an exit question to decide what to reteach in the next class. / Retrieval practice: Asking learners to retrieve key ideas from memory before reviewing notes. [Concept: Formative assessment and Retrieval practice]

0378. C - Summative assessment [Concept: Summative assessment]

0379. B - Formative assessment [Concept: Formative assessment]

0380. B - Feedback literacy [Concept: Feedback literacy]

0381. C - Summative assessment [Concept: Summative assessment]

0382. D - Formative assessment [Concept: Formative assessment]

0383. C - Summative assessment: Evaluating mastery after a course unit concludes. / Experiential learning: Pairing an activity with structured reflection and transfer to a new situation. [Concept: Summative assessment and Experiential learning]

0384. A - Retrieval practice: Asking learners to retrieve key ideas from memory before reviewing notes. / Metacognition: Having students explain which strategy helped and what they will change next time. [Concept: Retrieval practice and Metacognition]

0385. D - Constructive alignment: Checking that an assessment measures the skill stated in the course outcome. / Metacognition: Having students explain which strategy helped and what they will change next time. [Concept: Constructive alignment and Metacognition]

0386. D - Universal Design for Learning: Offering accessible ways to encounter material and demonstrate learning. / Metacognition: Having students explain which strategy helped and what they will change next time. [Concept: Universal Design for Learning and Metacognition]

0387. D - Formative assessment: Using an exit question to decide what to reteach in the next class. / Summative assessment: Evaluating mastery after a course unit concludes. [Concept: Formative assessment and Summative assessment]

0388. C - Formative assessment [Concept: Formative assessment]

0389. A - Culturally responsive pedagogy: Connecting examples to students' contexts and checking whose perspectives are represented. / Feedback literacy: Teaching students to interpret feedback and plan a concrete revision. [Concept: Culturally responsive pedagogy and Feedback literacy]

0390. D - Universal Design for Learning: Offering accessible ways to encounter material and demonstrate learning. / Formative assessment: Using an exit question to decide what to reteach in the next class. [Concept: Universal Design for Learning and Formative assessment]

0391. D - Metacognition [Concept: Metacognition]

0392. A - Summative assessment [Concept: Summative assessment]

0393. A - Culturally responsive pedagogy [Concept: Culturally responsive pedagogy]

0394. B - Asking learners to retrieve key ideas from memory before reviewing notes. [Concept: Retrieval practice]

0395. C - Formative assessment: Using an exit question to decide what to reteach in the next class. / Retrieval practice: Asking learners to retrieve key ideas from memory before reviewing notes. [Concept: Formative assessment and Retrieval practice]

0396. A - Culturally responsive pedagogy [Concept: Culturally responsive pedagogy]

0397. B - Metacognition: Awareness and regulation of one's own learning, including planning, monitoring, and evaluation. / Feedback literacy: Learners' capacity to understand, evaluate, and use feedback to improve work. [Concept: Metacognition and Feedback literacy]

0398. A - Experiential learning [Concept: Experiential learning]

0399. A - Culturally responsive pedagogy [Concept: Culturally responsive pedagogy]

0400. A - Metacognition [Concept: Metacognition]

0401. B - Constructive alignment: Alignment among learning outcomes, teaching and learning activities, and assessment. / Metacognition: Awareness and regulation of one's own learning, including planning, monitoring, and evaluation. [Concept: Constructive alignment and Metacognition]

0402. A - Summative assessment [Concept: Summative assessment]

0403. C - Culturally responsive pedagogy [Concept: Culturally responsive pedagogy]

0404. A - Formative assessment: Using an exit question to decide what to reteach in the next class. / Summative assessment: Evaluating mastery after a course unit concludes. [Concept: Formative assessment and Summative assessment]

0405. A - Constructive alignment: Alignment among learning outcomes, teaching and learning activities, and assessment. / Retrieval practice: Effortful recall of learned material that strengthens retention and reveals learning needs. [Concept: Constructive alignment and Retrieval practice]

0406. B - Culturally responsive pedagogy [Concept: Culturally responsive pedagogy]

0407. B - Using an exit question to decide what to reteach in the next class. [Concept: Formative assessment]

0408. D - Metacognition: Having students explain which strategy helped and what they will change next time. / Culturally responsive pedagogy: Connecting examples to students' contexts and checking whose perspectives are represented. [Concept: Metacognition and Culturally responsive pedagogy]

0409. C - Retrieval practice [Concept: Retrieval practice]

CAC.931 | Advanced Pedagogy

QUESTION | CORRECT OPTION AND CONCEPT

0410. C - Retrieval practice: Effortful recall of learned material that strengthens retention and reveals learning needs. / Culturally responsive pedagogy: Teaching that draws on learners' cultural knowledge and experiences while maintaining high expectations and belonging. [Concept: Retrieval practice and Culturally responsive pedagogy]

0411. C - Experiential learning [Concept: Experiential learning]

0412. C - Scaffolding in instruction: Modeling a skill and gradually reducing prompts as learners gain mastery. / Metacognition: Having students explain which strategy helped and what they will change next time. [Concept: Scaffolding in instruction and Metacognition]

0413. C - Scaffolding in instruction [Concept: Scaffolding in instruction]

0414. A - Culturally responsive pedagogy: Connecting examples to students' contexts and checking whose perspectives are represented. / Experiential learning: Pairing an activity with structured reflection and transfer to a new situation. [Concept: Culturally responsive pedagogy and Experiential learning]

0415. D - Constructive alignment: Alignment among learning outcomes, teaching and learning activities, and assessment. / Metacognition: Awareness and regulation of one's own learning, including planning, monitoring, and evaluation. [Concept: Constructive alignment and Metacognition]

0416. D - Formative assessment: Low-stakes evidence gathered during learning to guide feedback and next instructional steps. / Summative assessment: Evaluation of learning at the end of an instructional period or unit. [Concept: Formative assessment and Summative assessment]

0417. C - Metacognition: Having students explain which strategy helped and what they will change next time. / Experiential learning: Pairing an activity with structured reflection and transfer to a new situation. [Concept: Metacognition and Experiential learning]

0418. B - Feedback literacy [Concept: Feedback literacy]

0419. A - Scaffolding in instruction: Modeling a skill and gradually reducing prompts as learners gain mastery. / Retrieval practice: Asking learners to retrieve key ideas from memory before reviewing notes. [Concept: Scaffolding in instruction and Retrieval practice]

0420. B - Constructive alignment: Checking that an assessment measures the skill stated in the course outcome. / Universal Design for Learning: Offering accessible ways to encounter material and demonstrate learning. [Concept: Constructive alignment and Universal Design for Learning]

0421. D - Constructive alignment [Concept: Constructive alignment]

0422. B - Feedback literacy [Concept: Feedback literacy]

0423. A - Metacognition [Concept: Metacognition]

0424. A - Universal Design for Learning [Concept: Universal Design for Learning]

0425. B - Metacognition: Having students explain which strategy helped and what they will change next time. / Feedback literacy: Teaching students to interpret feedback and plan a concrete revision. [Concept: Metacognition and Feedback literacy]

0426. A - Experiential learning: Pairing an activity with structured reflection and transfer to a new situation. / Feedback literacy: Teaching students to interpret feedback and plan a concrete revision. [Concept: Experiential learning and Feedback literacy]

0427. A - Experiential learning [Concept: Experiential learning]

0428. C - Scaffolding in instruction [Concept: Scaffolding in instruction]

0429. C - Retrieval practice: Asking learners to retrieve key ideas from memory before reviewing notes. / Feedback literacy: Teaching students to interpret feedback and plan a concrete revision. [Concept: Retrieval practice and Feedback literacy]

0430. C - Feedback literacy [Concept: Feedback literacy]

0431. B - Scaffolding in instruction [Concept: Scaffolding in instruction]

0432. C - Metacognition: Having students explain which strategy helped and what they will change next time. / Experiential learning: Pairing an activity with structured reflection and transfer to a new situation. [Concept: Metacognition and Experiential learning]

0433. A - Universal Design for Learning [Concept: Universal Design for Learning]

0434. C - Culturally responsive pedagogy [Concept: Culturally responsive pedagogy]

0435. C - Checking that an assessment measures the skill stated in the course outcome. [Concept: Constructive alignment]

0436. B - Alignment among learning outcomes, teaching and learning activities, and assessment. [Concept: Constructive alignment]

0437. A - Scaffolding in instruction: Modeling a skill and gradually reducing prompts as learners gain mastery. / Metacognition: Having students explain which strategy helped and what they will change next time. [Concept: Scaffolding in instruction and Metacognition]

0438. D - Summative assessment [Concept: Summative assessment]

0439. A - Formative assessment [Concept: Formative assessment]

0440. B - Feedback literacy [Concept: Feedback literacy]

0441. C - Culturally responsive pedagogy [Concept: Culturally responsive pedagogy]

0442. C - Formative assessment: Using an exit question to decide what to reteach in the next class. / Culturally responsive pedagogy: Connecting examples to students' contexts and checking whose perspectives are represented. [Concept: Formative assessment and Culturally responsive pedagogy]

0443. A - Learners' capacity to understand, evaluate, and use feedback to improve work. [Concept: Feedback literacy]

0444. D - Constructive alignment: Checking that an assessment measures the skill stated in the course outcome. / Culturally responsive pedagogy: Connecting examples to students' contexts and checking whose perspectives are represented. [Concept: Constructive alignment and Culturally responsive pedagogy]

0445. B - Universal Design for Learning: Offering accessible ways to encounter material and demonstrate learning. / Scaffolding in instruction: Modeling a skill and gradually reducing prompts as learners gain mastery. [Concept: Universal Design for Learning and Scaffolding in instruction]

0446. A - Universal Design for Learning: A framework for designing flexible learning environments with multiple means of engagement, representation, and action or expression. / Culturally responsive pedagogy: Teaching that draws on learners' cultural knowledge and experiences while maintaining high expectations and belonging. 0523. B - Experiential learning [Concept: Experiential learning]

0524. B - Culturally responsive pedagogy: Connecting examples to students' contexts and checking whose perspectives are represented. / Feedback literacy: Teaching students to interpret feedback and plan a concrete revision. [Concept: Culturally responsive pedagogy and Feedback literacy]

0525. D - Temporary instructional support that enables increasingly independent performance. [Concept: Scaffolding in instruction]

0526. D - Scaffolding in instruction: Modeling a skill and gradually reducing prompts as learners gain mastery. / Summative assessment: Evaluating mastery after a course unit concludes. [Concept: Scaffolding in instruction and Summative assessment]

0527. C - Universal Design for Learning [Concept: Universal Design for Learning]

0528. B - Summative assessment [Concept: Summative assessment]

0529. D - Universal Design for Learning [Concept: Universal Design for Learning]

0530. A - Constructive alignment: Checking that an assessment measures the skill stated in the course outcome. / Metacognition: Having students explain which strategy helped and what they will change next time. [Concept: Constructive alignment and Metacognition]

0531. D - Culturally responsive pedagogy [Concept: Culturally responsive pedagogy]

CAC.931 | Advanced Pedagogy

QUESTION | CORRECT OPTION AND CONCEPT

0532. A - Formative assessment [Concept: Formative assessment]

0533. A - Metacognition [Concept: Metacognition]

0534. A - Metacognition: Having students explain which strategy helped and what they will change next time. / Experiential learning: Pairing an activity with structured reflection and transfer to a new situation. [Concept: Metacognition and Experiential learning]

0535. B - Formative assessment [Concept: Formative assessment]

0536. C - Constructive alignment [Concept: Constructive alignment]

0537. B - Constructive alignment: Checking that an assessment measures the skill stated in the course outcome. / Experiential learning: Pairing an activity with structured reflection and transfer to a new situation. [Concept: Constructive alignment and Experiential learning]

0538. C - Constructive alignment: Checking that an assessment measures the skill stated in the course outcome. / Summative assessment: Evaluating mastery after a course unit concludes. [Concept: Constructive alignment and Summative assessment]

0539. A - Constructive alignment: Checking that an assessment measures the skill stated in the course outcome. / Retrieval practice: Asking learners to retrieve key ideas from memory before reviewing notes. [Concept: Constructive alignment and Retrieval practice]

0540. A - Constructive alignment [Concept: Constructive alignment]

0541. C - Constructive alignment [Concept: Constructive alignment]

0542. A - Experiential learning [Concept: Experiential learning]

0543. D - Scaffolding in instruction [Concept: Scaffolding in instruction]

0544. A - Summative assessment: Evaluating mastery after a course unit concludes. / Culturally responsive pedagogy: Connecting examples to students' contexts and checking whose perspectives are represented. [Concept: Summative assessment and Culturally responsive pedagogy]

0545. B - Retrieval practice [Concept: Retrieval practice]

0546. A - Experiential learning [Concept: Experiential learning]

0547. B - Constructive alignment [Concept: Constructive alignment]

0548. A - Scaffolding in instruction: Modeling a skill and gradually reducing prompts as learners gain mastery. / Formative assessment: Using an exit question to decide what to reteach in the next class. [Concept: Scaffolding in instruction and Formative assessment]

0549. C - Experiential learning [Concept: Experiential learning]

0550. C - Scaffolding in instruction [Concept: Scaffolding in instruction]

0551. D - Formative assessment [Concept: Formative assessment]

0552. A - Summative assessment: Evaluating mastery after a course unit concludes. / Retrieval practice: Asking learners to retrieve key ideas from memory before reviewing notes. [Concept: Summative assessment and Retrieval practice]

0553. A - Universal Design for Learning: A framework for designing flexible learning environments with multiple means of engagement, representation, and action or expression. / Retrieval practice: Effortful recall of learned material that strengthens retention and reveals learning needs. [Concept: Universal Design for Learning and Retrieval practice]

0554. C - Formative assessment [Concept: Formative assessment]

0555. C - Universal Design for Learning: Offering accessible ways to encounter material and demonstrate learning. / Retrieval practice: Asking learners to retrieve key ideas from memory before reviewing notes. [Concept: Universal Design for Learning and Retrieval practice]

0556. D - Metacognition: Awareness and regulation of one's own learning, including planning, monitoring, and evaluation. / Experiential learning: Learning through purposeful experience, reflection, conceptualization, and application. [Concept: Metacognition and Experiential learning]

0557. C - Summative assessment: Evaluating mastery after a course unit concludes. / Metacognition: Having students explain which strategy helped and what they will change next time. [Concept: Summative assessment and Metacognition]

0558. C - Constructive alignment [Concept: Constructive alignment]

0559. B - Feedback literacy [Concept: Feedback literacy]

0560. D - Formative assessment [Concept: Formative assessment]

0561. A - Scaffolding in instruction: Temporary instructional support that enables increasingly independent performance. / Summative assessment: Evaluation of learning at the end of an instructional period or unit. [Concept: Scaffolding in instruction and Summative assessment]

0562. C - Constructive alignment: Checking that an assessment measures the skill stated in the course outcome. / Formative assessment: Using an exit question to decide what to reteach in the next class. [Concept: Constructive alignment and Formative assessment]

0563. D - Universal Design for Learning: A framework for designing flexible learning environments with multiple means of engagement, representation, and action or expression. / Experiential learning: Learning through purposeful experience, reflection, conceptualization, and application. [Concept: Universal Design for Learning and Experiential learning]

0564. D - Formative assessment: Low-stakes evidence gathered during learning to guide feedback and next instructional steps. / Feedback literacy: Learners' capacity to understand, evaluate, and use feedback to improve work. [Concept: Formative assessment and Feedback literacy]

0565. A - Summative assessment [Concept: Summative assessment]

0566. D - Retrieval practice: Effortful recall of learned material that strengthens retention and reveals learning needs. / Metacognition: Awareness and regulation of one's own learning, including planning, monitoring, and evaluation. [Concept: Retrieval practice and Metacognition]

0567. A - Feedback literacy [Concept: Feedback literacy]

0568. C - Experiential learning [Concept: Experiential learning]

0569. B - Culturally responsive pedagogy [Concept: Culturally responsive pedagogy]

0570. A - Scaffolding in instruction [Concept: Scaffolding in instruction]

0571. A - Retrieval practice: Effortful recall of learned material that strengthens retention and reveals learning needs. / Feedback literacy: Learners' capacity to understand, evaluate, and use feedback to improve work. [Concept: Retrieval practice and Feedback literacy]

0572. A - Feedback literacy [Concept: Feedback literacy]

0573. D - Scaffolding in instruction: Modeling a skill and gradually reducing prompts as learners gain mastery. / Retrieval practice: Asking learners to retrieve key ideas from memory before reviewing notes. [Concept: Scaffolding in instruction and Retrieval practice]

0574. C - Feedback literacy [Concept: Feedback literacy]

0575. C - Summative assessment: Evaluation of learning at the end of an instructional period or unit. / Metacognition: Awareness and regulation of one's own learning, including planning, monitoring, and evaluation. [Concept: Summative assessment and Metacognition]

0576. D - Scaffolding in instruction [Concept: Scaffolding in instruction]

0577. B - Retrieval practice [Concept: Retrieval practice]

0578. A - Scaffolding in instruction [Concept: Scaffolding in instruction]

0579. B - Universal Design for Learning [Concept: Universal Design for Learning]

0580. D - Formative assessment [Concept: Formative assessment]

0581. D - Teaching students to interpret feedback and plan a concrete revision. [Concept: Feedback literacy]

0582. A - Formative assessment: Using an exit question to decide what to reteach in the next class. / Culturally responsive pedagogy: Connecting examples to students' contexts and checking whose perspectives are represented. [Concept: Formative assessment and Culturally responsive pedagogy]

0583. C - Retrieval practice [Concept: Retrieval practice]

0584. D - Constructive alignment [Concept: Constructive alignment]

0585. C - Constructive alignment: Checking that an assessment measures the skill stated in the course outcome. / Formative assessment: Using an exit question to decide what to reteach in the next class. [Concept: Constructive alignment and Formative assessment]

0586. B - Universal Design for Learning: A framework for designing flexible learning environments with multiple means of engagement, representation, and action or expression. / Retrieval practice: Effortful recall of learned material that strengthens retention and reveals learning needs. [Concept: Universal Design for Learning and Retrieval practice]

0587. A - Metacognition [Concept: Metacognition]

0588. A - Metacognition [Concept: Metacognition]

0589. B - Scaffolding in instruction [Concept: Scaffolding in instruction]

0590. A - Retrieval practice [Concept: Retrieval practice]

0591. D - Culturally responsive pedagogy [Concept: Culturally responsive pedagogy]

0592. A - Summative assessment: Evaluating mastery after a course unit concludes. / Experiential learning: Pairing an activity with structured reflection and transfer to a new situation. [Concept: Summative assessment and Experiential learning]

0593. B - Retrieval practice: Asking learners to retrieve key ideas from memory before reviewing notes. / Culturally responsive pedagogy: Connecting examples to students' contexts and checking whose perspectives are represented. [Concept: Retrieval practice and Culturally responsive pedagogy]

0594. B - Formative assessment [Concept: Formative assessment]

0595. D - Culturally responsive pedagogy: Connecting examples to students' contexts and checking whose perspectives are represented. / Experiential learning: Pairing an activity with structured reflection and transfer to a new situation. [Concept: Culturally responsive pedagogy and Experiential learning]

0596. A - Retrieval practice: Effortful recall of learned material that strengthens retention and reveals learning needs. / Experiential learning: Learning through purposeful experience, reflection, conceptualization, and application. [Concept: Retrieval practice and Experiential learning]

CAC.931 | Advanced Pedagogy

QUESTION | CORRECT OPTION AND CONCEPT

0597. B - Universal Design for Learning: Offering accessible ways to encounter material and demonstrate learning. / Retrieval practice: Asking learners to retrieve key ideas from memory before reviewing notes. [Concept: Universal Design for Learning and Retrieval practice]

0598. B - Scaffolding in instruction: Temporary instructional support that enables increasingly independent performance. / Feedback literacy: Learners' capacity to understand, evaluate, and use feedback to improve work. [Concept: Scaffolding in instruction and Feedback literacy]

0599. D - Universal Design for Learning: A framework for designing flexible learning environments with multiple means of engagement, representation, and action or expression. / Feedback literacy: Learners' capacity to understand, evaluate, and use feedback to improve work. [Concept: Universal Design for Learning and Feedback literacy]

0600. D - Experiential learning [Concept: Experiential learning]

0601. A - Constructive alignment: Alignment among learning outcomes, teaching and learning activities, and assessment. / Culturally responsive pedagogy: Teaching that draws on learners' cultural knowledge and experiences while maintaining high expectations and belonging. [Concept: Constructive alignment and Culturally responsive pedagogy]

0602. C - Summative assessment [Concept: Summative assessment]

0603. C - Scaffolding in instruction: Temporary instructional support that enables increasingly independent performance. / Culturally responsive pedagogy: Teaching that draws on learners' cultural knowledge and experiences while maintaining high expectations and belonging. [Concept: Scaffolding in instruction and Culturally responsive pedagogy]

0650. B - Metacognition [Concept: Metacognition]

0651. C - Teaching that draws on learners' cultural knowledge and experiences while maintaining high expectations and belonging. [Concept: Culturally responsive pedagogy]

0652. D - Teaching that draws on learners' cultural knowledge and experiences while maintaining high expectations and belonging. [Concept: Culturally responsive pedagogy]

CAC.931 | Advanced Pedagogy

QUESTION | CORRECT OPTION AND CONCEPT

0653. A - A framework for designing flexible learning environments with multiple means of engagement, representation, and action or expression. [Concept: Universal Design for Learning]

0654. A - Asking learners to retrieve key ideas from memory before reviewing notes. [Concept: Retrieval practice]

0655. A - Metacognition: Awareness and regulation of one's own learning, including planning, monitoring, and evaluation. / Experiential learning: Learning through purposeful experience, reflection, conceptualization, and application. [Concept: Metacognition and Experiential learning]

0656. A - Culturally responsive pedagogy: Teaching that draws on learners' cultural knowledge and experiences while maintaining high expectations and belonging. / Feedback literacy: Learners' capacity to understand, evaluate, and use feedback to improve work. [Concept: Culturally responsive pedagogy and Feedback literacy]

0657. D - Scaffolding in instruction [Concept: Scaffolding in instruction]

0658. C - Having students explain which strategy helped and what they will change next time. [Concept: Metacognition]

0659. B - Metacognition: Having students explain which strategy helped and what they will change next time. / Feedback literacy: Teaching students to interpret feedback and plan a concrete revision. [Concept: Metacognition and Feedback literacy]

0660. A - Formative assessment: Using an exit question to decide what to reteach in the next class. / Culturally responsive pedagogy: Connecting examples to students' contexts and checking whose perspectives are represented. [Concept: Formative assessment and Culturally responsive pedagogy]

0661. D - Formative assessment: Low-stakes evidence gathered during learning to guide feedback and next instructional steps. / Experiential learning: Learning through purposeful experience, reflection, conceptualization, and application. [Concept: Formative assessment and Experiential learning]

0662. B - Learners' capacity to understand, evaluate, and use feedback to improve work. [Concept: Feedback literacy]

0663. D - Universal Design for Learning: A framework for designing flexible learning environments with multiple means of engagement, representation, and action or expression. / Summative assessment: Evaluation of learning at the end of an instructional period or unit. [Concept: Universal Design for Learning and Summative assessment]

0664. B - Formative assessment: Low-stakes evidence gathered during learning to guide feedback and next instructional steps. / Summative assessment: Evaluation of learning at the end of an instructional period or unit. [Concept: Formative assessment and Summative assessment]

0665. B - Universal Design for Learning [Concept: Universal Design for Learning]

0666. C - Modeling a skill and gradually reducing prompts as learners gain mastery. [Concept: Scaffolding in instruction]

0667. C - Formative assessment: Low-stakes evidence gathered during learning to guide feedback and next instructional steps. / Feedback literacy: Learners' capacity to understand, evaluate, and use feedback to improve work. [Concept: Formative assessment and Feedback literacy]

0668. D - Feedback literacy [Concept: Feedback literacy]

0669. D - Metacognition: Having students explain which strategy helped and what they will change next time. / Culturally responsive pedagogy: Connecting examples to students' contexts and checking whose perspectives are represented. [Concept: Metacognition and Culturally responsive pedagogy]

0670. B - Retrieval practice: Effortful recall of learned material that strengthens retention and reveals learning needs. / Feedback literacy: Learners' capacity to understand, evaluate, and use feedback to improve work. [Concept: Retrieval practice and Feedback literacy]

0671. A - Retrieval practice [Concept: Retrieval practice]

0672. D - Formative assessment: Using an exit question to decide what to reteach in the next class. / Metacognition: Having students explain which strategy helped and what they will change next time. [Concept: Formative assessment and Metacognition]

0673. C - Scaffolding in instruction: Temporary instructional support that enables increasingly independent performance. / Formative assessment: Low-stakes evidence gathered during learning to guide feedback and next instructional steps. [Concept: Scaffolding in instruction and Formative assessment]

0674. A - Formative assessment [Concept: Formative assessment]

0675. D - Constructive alignment: Alignment among learning outcomes, teaching and learning activities, and assessment. / Feedback literacy: Learners' capacity to understand, evaluate, and use feedback to improve work. [Concept: Constructive alignment and Feedback literacy]

0676. B - Retrieval practice: Asking learners to retrieve key ideas from memory before reviewing notes. / Experiential learning: Pairing an activity with structured reflection and transfer to a new situation. [Concept: Retrieval practice and Experiential learning]

0677. D - Metacognition: Having students explain which strategy helped and what they will change next time. / Culturally responsive pedagogy: Connecting examples to students' contexts and checking whose perspectives are represented. [Concept: Metacognition and Culturally responsive pedagogy]

0678. D - Formative assessment [Concept: Formative assessment]

0679. B - Constructive alignment: Alignment among learning outcomes, teaching and learning activities, and assessment. / Summative assessment: Evaluation of learning at the end of an instructional period or unit. [Concept: Constructive alignment and Summative assessment]

0680. A - Retrieval practice [Concept: Retrieval practice]

0681. C - Retrieval practice: Asking learners to retrieve key ideas from memory before reviewing notes. / Feedback literacy: Teaching students to interpret feedback and plan a concrete revision. [Concept: Retrieval practice and Feedback literacy]

0682. C - Universal Design for Learning [Concept: Universal Design for Learning]

0683. D - Retrieval practice [Concept: Retrieval practice]

0684. A - Metacognition [Concept: Metacognition]

0685. C - Retrieval practice: Effortful recall of learned material that strengthens retention and reveals learning needs. / Experiential learning: Learning through purposeful experience, reflection, conceptualization, and application. [Concept: Retrieval practice and Experiential learning]

0686. C - Universal Design for Learning: Offering accessible ways to encounter material and demonstrate learning. / Summative assessment: Evaluating mastery after a course unit concludes. [Concept: Universal Design for Learning and Summative assessment]

0687. A - Formative assessment [Concept: Formative assessment]

0688. C - Formative assessment [Concept: Formative assessment]

0689. C - Scaffolding in instruction: Temporary instructional support that enables increasingly independent performance. / Formative assessment: Low-stakes evidence gathered during learning to guide feedback and next instructional steps. [Concept: Scaffolding in instruction and Formative assessment]

0690. A - Summative assessment: Evaluating mastery after a course unit concludes. / Feedback literacy: Teaching students to interpret feedback and plan a concrete revision. [Concept: Summative assessment and Feedback literacy]

0691. C - Constructive alignment: Checking that an assessment measures the skill stated in the course outcome. / Retrieval practice: Asking learners to retrieve key ideas from memory before reviewing notes. [Concept: Constructive alignment and Retrieval practice]

0692. A - Universal Design for Learning [Concept: Universal Design for Learning]

0693. C - Scaffolding in instruction: Temporary instructional support that enables increasingly independent performance. / Summative assessment: Evaluation of learning at the end of an instructional period or unit. [Concept: Scaffolding in instruction and Summative assessment]

0694. B - Culturally responsive pedagogy [Concept: Culturally responsive pedagogy]

0695. A - Scaffolding in instruction: Temporary instructional support that enables increasingly independent performance. / Retrieval practice: Effortful recall of learned material that strengthens retention and reveals learning needs. [Concept: Scaffolding in instruction and Retrieval practice]

0696. A - Constructive alignment [Concept: Constructive alignment]

0697. B - Metacognition: Awareness and regulation of one's own learning, including planning, monitoring, and evaluation. / Experiential learning: Learning through purposeful experience, reflection, conceptualization, and application. [Concept: Metacognition and Experiential learning]

0698. B - Formative assessment: Using an exit question to decide what to reteach in the next class. / Culturally responsive pedagogy: Connecting examples to students' contexts and checking whose perspectives are represented. [Concept: Formative assessment and Culturally responsive pedagogy]

0699. A - Experiential learning [Concept: Experiential learning]

0700. C - Culturally responsive pedagogy [Concept: Culturally responsive pedagogy]

0701. B - Universal Design for Learning: A framework for designing flexible learning environments with multiple means of engagement, representation, and action or expression. / Metacognition: Awareness and regulation of one's own learning, including planning, monitoring, and evaluation. [Concept: Universal Design for Learning and Metacognition]

0702. A - Constructive alignment [Concept: Constructive alignment]

0703. B - Universal Design for Learning: Offering accessible ways to encounter material and demonstrate learning. / Scaffolding in instruction: Modeling a skill and gradually reducing prompts as learners gain mastery. [Concept: Universal Design for Learning and Scaffolding in instruction]

0704. D - Feedback literacy [Concept: Feedback literacy]

0705. C - Summative assessment: Evaluating mastery after a course unit concludes. / Retrieval practice: Asking learners to retrieve key ideas from memory before reviewing notes. [Concept: Summative assessment and Retrieval practice]

0706. B - Formative assessment [Concept: Formative assessment]

0707. B - Summative assessment [Concept: Summative assessment]

0708. D - Summative assessment: Evaluation of learning at the end of an instructional period or unit. / Culturally responsive pedagogy: Teaching that draws on learners' cultural knowledge and experiences while maintaining high expectations and belonging. [Concept: Summative assessment and Culturally responsive pedagogy]

CAC.931 | Advanced Pedagogy

QUESTION | CORRECT OPTION AND CONCEPT

0709. C - Constructive alignment: Alignment among learning outcomes, teaching and learning activities, and assessment. / Scaffolding in instruction: Temporary instructional support that enables increasingly independent performance. [Concept: Constructive alignment and Scaffolding in instruction]

0710. D - Constructive alignment: Checking that an assessment measures the skill stated in the course outcome. / Experiential learning: Pairing an activity with structured reflection and transfer to a new situation. [Concept: Constructive alignment and Experiential learning]

0711. A - Summative assessment [Concept: Summative assessment]

0712. A - Metacognition [Concept: Metacognition]

0713. A - Metacognition [Concept: Metacognition]

0714. C - Summative assessment: Evaluation of learning at the end of an instructional period or unit. / Experiential learning: Learning through purposeful experience, reflection, conceptualization, and application. [Concept: Summative assessment and Experiential learning]

0715. A - Scaffolding in instruction: Temporary instructional support that enables increasingly independent performance. / Experiential learning: Learning through purposeful experience, reflection, conceptualization, and application. [Concept: Scaffolding in instruction and Experiential learning]

0716. C - Feedback literacy [Concept: Feedback literacy]

0717. B - Retrieval practice: Effortful recall of learned material that strengthens retention and reveals learning needs. / Metacognition: Awareness and regulation of one's own learning, including planning, monitoring, and evaluation. [Concept: Retrieval practice and Metacognition]

0732. C - Constructive alignment: Alignment among learning outcomes, teaching and learning activities, and assessment. / Retrieval practice: Effortful recall of learned material that strengthens retention and reveals learning needs. [Concept: Constructive alignment and Retrieval practice]

0733. A - Retrieval practice [Concept: Retrieval practice]

0734. C - Universal Design for Learning: A framework for designing flexible learning environments with multiple means of engagement, representation, and action or expression. / Feedback literacy: Learners' capacity to understand, evaluate, and use feedback to improve work. [Concept: Universal Design for Learning and Feedback literacy]

0735. D - Culturally responsive pedagogy [Concept: Culturally responsive pedagogy]

0736. B - Culturally responsive pedagogy [Concept: Culturally responsive pedagogy]

0737. C - Learning through purposeful experience, reflection, conceptualization, and application. [Concept: Experiential learning]

0738. D - Scaffolding in instruction: Modeling a skill and gradually reducing prompts as learners gain mastery. / Feedback literacy: Teaching students to interpret feedback and plan a concrete revision. [Concept: Scaffolding in instruction and Feedback literacy]

0739. D - Universal Design for Learning [Concept: Universal Design for Learning]

0740. D - Constructive alignment [Concept: Constructive alignment]

0741. B - Universal Design for Learning: Offering accessible ways to encounter material and demonstrate learning. / Experiential learning: Pairing an activity with structured reflection and transfer to a new situation. [Concept: Universal Design for Learning and Experiential learning]

0742. C - Culturally responsive pedagogy [Concept: Culturally responsive pedagogy]

0743. A - Scaffolding in instruction: Temporary instructional support that enables increasingly independent performance. / Feedback literacy: Learners' capacity to understand, evaluate, and use feedback to improve work. [Concept: Scaffolding in instruction and Feedback literacy]

0744. D - Summative assessment: Evaluation of learning at the end of an instructional period or unit. / Feedback literacy: Learners' capacity to understand, evaluate, and use feedback to improve work. [Concept: Summative assessment and Feedback literacy]

0745. C - Scaffolding in instruction [Concept: Scaffolding in instruction]

0746. A - Universal Design for Learning: A framework for designing flexible learning environments with multiple means of engagement, representation, and action or expression. / Feedback literacy: Learners' capacity to understand, evaluate, and use feedback to improve work. [Concept: Universal Design for Learning and Feedback literacy]

0747. A - Scaffolding in instruction [Concept: Scaffolding in instruction]

0748. B - Universal Design for Learning: A framework for designing flexible learning environments with multiple means of engagement, representation, and action or expression. / Retrieval practice: Effortful recall of learned material that strengthens retention and reveals learning needs. [Concept: Universal Design for Learning and Retrieval practice]

0749. B - Culturally responsive pedagogy: Teaching that draws on learners' cultural knowledge and experiences while maintaining high expectations and belonging. / Feedback literacy: Learners' capacity to understand, evaluate, and use feedback to improve work. [Concept: Culturally responsive pedagogy and Feedback literacy]

0750. D - Universal Design for Learning [Concept: Universal Design for Learning]

0751. A - Retrieval practice: Effortful recall of learned material that strengthens retention and reveals learning needs. / Metacognition: Awareness and regulation of one's own learning, including planning, monitoring, and evaluation. [Concept: Retrieval practice and Metacognition]

0752. C - Constructive alignment: Checking that an assessment measures the skill stated in the course outcome. / Culturally responsive pedagogy: Connecting examples to students' contexts and checking whose perspectives are represented. [Concept: Constructive alignment and Culturally responsive pedagogy]

0753. C - Alignment among learning outcomes, teaching and learning activities, and assessment. [Concept: Constructive alignment]

0754. C - Scaffolding in instruction: Modeling a skill and gradually reducing prompts as learners gain mastery. / Feedback literacy: Teaching students to interpret feedback and plan a concrete revision. [Concept: Scaffolding in instruction and Feedback literacy]

0755. D - Culturally responsive pedagogy [Concept: Culturally responsive pedagogy]

0756. C - Constructive alignment [Concept: Constructive alignment]

0757. B - Universal Design for Learning: Offering accessible ways to encounter material and demonstrate learning. / Experiential learning: Pairing an activity with structured reflection and transfer to a new situation. [Concept: Universal Design for Learning and Experiential learning]

0758. A - Constructive alignment: Alignment among learning outcomes, teaching and learning activities, and assessment. / Feedback literacy: Learners' capacity to understand, evaluate, and use feedback to improve work. [Concept: Constructive alignment and Feedback literacy]

0759. C - Constructive alignment: Checking that an assessment measures the skill stated in the course outcome. / Scaffolding in instruction: Modeling a skill and gradually reducing prompts as learners gain mastery. [Concept: Constructive alignment and Scaffolding in instruction]

0760. D - Universal Design for Learning: A framework for designing flexible learning environments with multiple means of engagement, representation, and action or expression. / Summative assessment: Evaluation of learning at the end of an instructional period or unit. [Concept: Universal Design for Learning and Summative assessment]

0761. C - Evaluation of learning at the end of an instructional period or unit. [Concept: Summative assessment]

0762. D - Scaffolding in instruction [Concept: Scaffolding in instruction]

0763. C - Scaffolding in instruction: Modeling a skill and gradually reducing prompts as learners gain mastery. / Feedback literacy: Teaching students to interpret feedback and plan a concrete revision. [Concept: Scaffolding in instruction and Feedback literacy]

0764. B - Metacognition [Concept: Metacognition]

0765. C - Universal Design for Learning [Concept: Universal Design for Learning]

0766. C - Scaffolding in instruction: Modeling a skill and gradually reducing prompts as learners gain mastery. / Culturally responsive pedagogy: Connecting examples to students' contexts and checking whose perspectives are represented. [Concept: Scaffolding in instruction and Culturally responsive pedagogy]

0767. D - Feedback literacy [Concept: Feedback literacy]

CAC.931 | Advanced Pedagogy

QUESTION | CORRECT OPTION AND CONCEPT

0768. C - Scaffolding in instruction: Temporary instructional support that enables increasingly independent performance. / Retrieval practice: Effortful recall of learned material that strengthens retention and reveals learning needs. [Concept: Scaffolding in instruction and Retrieval practice]

0769. C - Summative assessment [Concept: Summative assessment]

0770. A - Universal Design for Learning: Offering accessible ways to encounter material and demonstrate learning. / Scaffolding in instruction: Modeling a skill and gradually reducing prompts as learners gain mastery. [Concept: Universal Design for Learning and Scaffolding in instruction]

0771. A - Summative assessment: Evaluation of learning at the end of an instructional period or unit. / Metacognition: Awareness and regulation of one's own learning, including planning, monitoring, and evaluation. [Concept: Summative assessment and Metacognition]

0772. A - Universal Design for Learning [Concept: Universal Design for Learning]

0773. C - A framework for designing flexible learning environments with multiple means of engagement, representation, and action or expression. [Concept: Universal Design for Learning]

0774. A - Universal Design for Learning: A framework for designing flexible learning environments with multiple means of engagement, representation, and action or expression. / Scaffolding in instruction: Temporary instructional support that enables increasingly independent performance. [Concept: Universal Design for Learning and Scaffolding in instruction]

0775. A - Scaffolding in instruction [Concept: Scaffolding in instruction]

0776. C - Feedback literacy [Concept: Feedback literacy]

0777. C - Learning through purposeful experience, reflection, conceptualization, and application. [Concept: Experiential learning]

0778. D - Culturally responsive pedagogy [Concept: Culturally responsive pedagogy]

0779. B - Formative assessment: Using an exit question to decide what to reteach in the next class. / Metacognition: Having students explain which strategy helped and what they will change next time. [Concept: Formative assessment and Metacognition]

0780. A - Universal Design for Learning [Concept: Universal Design for Learning]

0781. D - Scaffolding in instruction: Temporary instructional support that enables increasingly independent performance. / Experiential learning: Learning through purposeful experience, reflection, conceptualization, and application. [Concept: Scaffolding in instruction and Experiential learning]

0782. D - Modeling a skill and gradually reducing prompts as learners gain mastery. [Concept: Scaffolding in instruction]

0783. B - Formative assessment: Using an exit question to decide what to reteach in the next class. / Experiential learning: Pairing an activity with structured reflection and transfer to a new situation. [Concept: Formative assessment and Experiential learning]

0784. C - Culturally responsive pedagogy [Concept: Culturally responsive pedagogy]

0785. B - Feedback literacy [Concept: Feedback literacy]

0786. A - Scaffolding in instruction: Modeling a skill and gradually reducing prompts as learners gain mastery. / Formative assessment: Using an exit question to decide what to reteach in the next class. [Concept: Scaffolding in instruction and Formative assessment]

0787. D - Constructive alignment: Checking that an assessment measures the skill stated in the course outcome. / Formative assessment: Using an exit question to decide what to reteach in the next class. [Concept: Constructive alignment and Formative assessment]

0788. A - Summative assessment [Concept: Summative assessment]

0789. A - Alignment among learning outcomes, teaching and learning activities, and assessment. [Concept: Constructive alignment]

0790. A - Summative assessment: Evaluating mastery after a course unit concludes. / Feedback literacy: Teaching students to interpret feedback and plan a concrete revision. [Concept: Summative assessment and Feedback literacy]

0791. B - Constructive alignment [Concept: Constructive alignment]

0792. B - Summative assessment: Evaluation of learning at the end of an instructional period or unit. / Metacognition: Awareness and regulation of one's own learning, including planning, monitoring, and evaluation. [Concept: Summative assessment and Metacognition]

0793. C - Summative assessment [Concept: Summative assessment]

0794. B - Summative assessment: Evaluation of learning at the end of an instructional period or unit. / Experiential learning: Learning through purposeful experience, reflection, conceptualization, and application. [Concept: Summative assessment and Experiential learning]

0795. B - Constructive alignment [Concept: Constructive alignment]

0796. C - Constructive alignment [Concept: Constructive alignment]

0797. A - Universal Design for Learning: Offering accessible ways to encounter material and demonstrate learning. / Formative assessment: Using an exit question to decide what to reteach in the next class. [Concept: Universal Design for Learning and Formative assessment]

0798. C - Experiential learning: Learning through purposeful experience, reflection, conceptualization, and application. / Feedback literacy: Learners' capacity to understand, evaluate, and use feedback to improve work. [Concept: Experiential learning and Feedback literacy]

0799. A - Formative assessment [Concept: Formative assessment]

0800. C - Scaffolding in instruction [Concept: Scaffolding in instruction]

0801. B - Universal Design for Learning [Concept: Universal Design for Learning]

0802. D - Universal Design for Learning: Offering accessible ways to encounter material and demonstrate learning. / Culturally responsive pedagogy: Connecting examples to students' contexts and checking whose perspectives are represented. [Concept: Universal Design for Learning and Culturally responsive pedagogy]

0803. C - Retrieval practice [Concept: Retrieval practice]

0804. B - Feedback literacy [Concept: Feedback literacy]

0805. A - Formative assessment [Concept: Formative assessment]

0806. C - Formative assessment [Concept: Formative assessment]

0807. B - Scaffolding in instruction [Concept: Scaffolding in instruction]

0808. C - Universal Design for Learning [Concept: Universal Design for Learning]

0809. A - Scaffolding in instruction [Concept: Scaffolding in instruction]

0810. C - Retrieval practice: Effortful recall of learned material that strengthens retention and reveals learning needs. / Feedback literacy: Learners' capacity to understand, evaluate, and use feedback to improve work. [Concept: Retrieval practice and Feedback literacy]

0811. A - Culturally responsive pedagogy: Teaching that draws on learners' cultural knowledge and experiences while maintaining high expectations and belonging. / Feedback literacy: Learners' capacity to understand, evaluate, and use feedback to improve work. [Concept: Culturally responsive pedagogy and Feedback literacy]

0812. D - Universal Design for Learning [Concept: Universal Design for Learning]

0813. C - Summative assessment [Concept: Summative assessment]

0814. B - Formative assessment: Using an exit question to decide what to reteach in the next class. / Retrieval practice: Asking learners to retrieve key ideas from memory before reviewing notes. [Concept: Formative assessment and Retrieval practice]

0815. C - Culturally responsive pedagogy: Connecting examples to students' contexts and checking whose perspectives are represented. / Feedback literacy: Teaching students to interpret feedback and plan a concrete revision. [Concept: Culturally responsive pedagogy and Feedback literacy]

0816. D - Constructive alignment: Alignment among learning outcomes, teaching and learning activities, and assessment. / Formative assessment: Low-stakes evidence gathered during learning to guide feedback and next instructional steps. [Concept: Constructive alignment and Formative assessment]

0817. B - Constructive alignment: Alignment among learning outcomes, teaching and learning activities, and assessment. / Experiential learning: Learning through purposeful experience, reflection, conceptualization, and application. [Concept: Constructive alignment and Experiential learning]

0818. D - Feedback literacy [Concept: Feedback literacy]

0819. A - Feedback literacy [Concept: Feedback literacy]

0820. B - Feedback literacy [Concept: Feedback literacy]

0821. C - Summative assessment [Concept: Summative assessment]

0822. A - Constructive alignment: Checking that an assessment measures the skill stated in the course outcome. / Formative assessment: Using an exit question to decide what to reteach in the next class. [Concept: Constructive alignment and Formative assessment]

0823. C - Culturally responsive pedagogy [Concept: Culturally responsive pedagogy]

0824. A - Scaffolding in instruction: Temporary instructional support that enables increasingly independent performance. / Summative assessment: Evaluation of learning at the end of an instructional period or unit. [Concept: Scaffolding in instruction and Summative assessment]

0825. D - Constructive alignment: Checking that an assessment measures the skill stated in the course outcome. / Feedback literacy: Teaching students to interpret feedback and plan a concrete revision. [Concept: Constructive alignment and Feedback literacy]

0826. A - Constructive alignment [Concept: Constructive alignment]

0827. C - Formative assessment: Using an exit question to decide what to reteach in the next class. / Metacognition: Having students explain which strategy helped and what they will change next time. [Concept: Formative assessment and Metacognition]

0828. A - Constructive alignment: Checking that an assessment measures the skill stated in the course outcome. / Scaffolding in instruction: Modeling a skill and gradually reducing prompts as learners gain mastery. [Concept: Constructive alignment and Scaffolding in instruction]

0946. A - Universal Design for Learning [Concept: Universal Design for Learning]

0947. B - Universal Design for Learning: A framework for designing flexible learning environments with multiple means of engagement, representation, and action or expression. / Experiential learning: Learning through purposeful experience, reflection, conceptualization, and application. [Concept: Universal Design for Learning and Experiential learning]

0948. D - Awareness and regulation of one's own learning, including planning, monitoring, and evaluation. [Concept: Metacognition]

0949. D - Temporary instructional support that enables increasingly independent performance. [Concept: Scaffolding in instruction]

0950. C - Summative assessment: Evaluation of learning at the end of an instructional period or unit. / Feedback literacy: Learners' capacity to understand, evaluate, and use feedback to improve work. [Concept: Summative assessment and Feedback literacy]

0951. A - Constructive alignment: Alignment among learning outcomes, teaching and learning activities, and assessment. / Feedback literacy: Learners' capacity to understand, evaluate, and use feedback to improve work. [Concept: Constructive alignment and Feedback literacy]

0952. A - Metacognition [Concept: Metacognition]

0953. B - Experiential learning [Concept: Experiential learning]

CAC.931 | Advanced Pedagogy

QUESTION | CORRECT OPTION AND CONCEPT

0954. D - Constructive alignment: Alignment among learning outcomes, teaching and learning activities, and assessment. / Scaffolding in instruction: Temporary instructional support that enables increasingly independent performance. [Concept: Constructive alignment and Scaffolding in instruction]

0955. C - Metacognition [Concept: Metacognition]

0956. A - Formative assessment [Concept: Formative assessment]

0957. B - Culturally responsive pedagogy [Concept: Culturally responsive pedagogy]

0958. A - Alignment among learning outcomes, teaching and learning activities, and assessment. [Concept: Constructive alignment]

0959. C - Constructive alignment: Alignment among learning outcomes, teaching and learning activities, and assessment. / Feedback literacy: Learners' capacity to understand, evaluate, and use feedback to improve work. [Concept: Constructive alignment and Feedback literacy]

0960. A - Offering accessible ways to encounter material and demonstrate learning. [Concept: Universal Design for Learning]

0961. B - Universal Design for Learning: Offering accessible ways to encounter material and demonstrate learning. / Culturally responsive pedagogy: Connecting examples to students' contexts and checking whose perspectives are represented. [Concept: Universal Design for Learning and Culturally responsive pedagogy]

0962. B - Formative assessment: Using an exit question to decide what to reteach in the next class. / Metacognition: Having students explain which strategy helped and what they will change next time. [Concept: Formative assessment and Metacognition]

0963. D - Universal Design for Learning: A framework for designing flexible learning environments with multiple means of engagement, representation, and action or expression. / Formative assessment: Low-stakes evidence gathered during learning to guide feedback and next instructional steps. [Concept: Universal Design for Learning and Formative assessment]

0964. B - Universal Design for Learning [Concept: Universal Design for Learning]

0965. D - Universal Design for Learning: Offering accessible ways to encounter material and demonstrate learning. / Summative assessment: Evaluating mastery after a course unit concludes. [Concept: Universal Design for Learning and Summative assessment]

0966. D - Universal Design for Learning [Concept: Universal Design for Learning]

0967. D - Constructive alignment: Alignment among learning outcomes, teaching and learning activities, and assessment. / Universal Design for Learning: A framework for designing flexible learning environments with multiple means of engagement, representation, and action or expression. [Concept: Constructive alignment and Universal Design for Learning]

0968. C - Constructive alignment: Alignment among learning outcomes, teaching and learning activities, and assessment. / Universal Design for Learning: A framework for designing flexible learning environments with multiple means of engagement, representation, and action or expression. [Concept: Constructive alignment and Universal Design for Learning]

0969. B - Summative assessment: Evaluation of learning at the end of an instructional period or unit. / Culturally responsive pedagogy: Teaching that draws on learners' cultural knowledge and experiences while maintaining high expectations and belonging. [Concept: Summative assessment and Culturally responsive pedagogy]

0970. B - Evaluation of learning at the end of an instructional period or unit. [Concept: Summative assessment]

0971. B - Summative assessment: Evaluating mastery after a course unit concludes. / Feedback literacy: Teaching students to interpret feedback and plan a concrete revision. [Concept: Summative assessment and Feedback literacy]

0972. B - Formative assessment: Low-stakes evidence gathered during learning to guide feedback and next instructional steps. / Metacognition: Awareness and regulation of one's own learning, including planning, monitoring, and evaluation. [Concept: Formative assessment and Metacognition]

0973. C - Universal Design for Learning: A framework for designing flexible learning environments with multiple means of engagement, representation, and action or expression. / Formative assessment: Low-stakes evidence gathered during learning to guide feedback and next instructional steps. [Concept: Universal Design for Learning and Formative assessment]

0974. A - Culturally responsive pedagogy [Concept: Culturally responsive pedagogy]

0975. B - Effortful recall of learned material that strengthens retention and reveals learning needs. [Concept: Retrieval practice]

0976. C - Retrieval practice [Concept: Retrieval practice]

0977. A - Scaffolding in instruction: Modeling a skill and gradually reducing prompts as learners gain mastery. / Summative assessment: Evaluating mastery after a course unit concludes. [Concept: Scaffolding in instruction and Summative assessment]

0978. B - Retrieval practice [Concept: Retrieval practice]

0979. A - Retrieval practice [Concept: Retrieval practice]

0980. D - Experiential learning [Concept: Experiential learning]

0981. C - Culturally responsive pedagogy [Concept: Culturally responsive pedagogy]

0982. D - Metacognition [Concept: Metacognition]

0983. B - Retrieval practice [Concept: Retrieval practice]

0984. B - Summative assessment: Evaluation of learning at the end of an instructional period or unit. / Feedback literacy: Learners' capacity to understand, evaluate, and use feedback to improve work. [Concept: Summative assessment and Feedback literacy]

0985. C - Formative assessment: Low-stakes evidence gathered during learning to guide feedback and next instructional steps. / Culturally responsive pedagogy: Teaching that draws on learners' cultural knowledge and experiences while maintaining high expectations and belonging. [Concept: Formative assessment and Culturally responsive pedagogy]

0986. A - Awareness and regulation of one's own learning, including planning, monitoring, and evaluation. [Concept: Metacognition]

0987. A - Pairing an activity with structured reflection and transfer to a new situation. [Concept: Experiential learning]

0988. D - Experiential learning [Concept: Experiential learning]

0989. D - Summative assessment [Concept: Summative assessment]

0990. B - Offering accessible ways to encounter material and demonstrate learning. [Concept: Universal Design for Learning]

0991. A - Feedback literacy [Concept: Feedback literacy]

0992. C - Constructive alignment [Concept: Constructive alignment]

0993. A - Metacognition [Concept: Metacognition]

0994. B - Temporary instructional support that enables increasingly independent performance. [Concept: Scaffolding in instruction]

0995. C - Retrieval practice: Effortful recall of learned material that strengthens retention and reveals learning needs. / Culturally responsive pedagogy: Teaching that draws on learners' cultural knowledge and experiences while maintaining high expectations and belonging. [Concept: Retrieval practice and Culturally responsive pedagogy]

0996. A - Universal Design for Learning: Offering accessible ways to encounter material and demonstrate learning. / Feedback literacy: Teaching students to interpret feedback and plan a concrete revision. [Concept: Universal Design for Learning and Feedback literacy]

0997. A - Constructive alignment [Concept: Constructive alignment]

0998. B - Constructive alignment: Alignment among learning outcomes, teaching and learning activities, and assessment. / Metacognition: Awareness and regulation of one's own learning, including planning, monitoring, and evaluation. [Concept: Constructive alignment and Metacognition]

0999. C - Culturally responsive pedagogy [Concept: Culturally responsive pedagogy]

1000. D - Metacognition [Concept: Metacognition]
